BOYD NURSERY COMPANY

F. C. Boyd,

McMINNVILLE, TENNESSEE

SPRING 1930

Growers and Dealers in Quality Nursery
Stock---Flowering Shrubs, Shade Trees, Fruit
Trees, Evergreens, Roses and Bulbs

This folder lists only a few of the many bargains in our catalogue. Order from this list, or if what you desire is not listed, write immediately for our catalogue. Every order, large or small, will receive our very best attention.

RHODODENDRON CAROLINIANUM. The most beautiful of the native Rhododendrons, growing 6 to 8 feet high. The plants are well clothed with dark green leaves, rusty below, and produce in early May, a wealth of unusually large, rose-pink flowers in good sized clusters. One of the best broad-leaved evergreens.

RHODODENDRON CATAWBIENSE. One of the most beautiful and hardiest of all the Rhododendrons. In late spring every branch has a large cluster of 1 1-2 inch broad, rosy-purple blooms. The foliage is the most handsome of any Rhododendrons.

RHODODENDRON MAXIMUM. A hardy variety of magnificent size, making a wonderful plant for mass effects. The luxuriant growth of dark green narrow leaves, 6 to 12 inches long, gives a delightful atmosphere. The light pink or white flowers 1½-2 inches broad are borne in large clusters in great abundance in June.

Prices on Above Varieties.

	Each	Per 10
12 to 18 inch, transplanted clumps.....	\$2.25	\$20.00
18 to 24 inch, transplanted clumps.....	3.00	27.00
2 to 3 feet, transplanted clumps.....	5.00	45.00

ILEX OPACA, American Holly. Without doubt, one of the most beautiful native trees. Rich, glossy foliage, with bright red berries. The familiar Christmas Holly. Trees grow to height of fifty feet, and are adaptable to every landscape.

18 to 24 inch.....	\$2.00	\$17.50
2 to 3 feet.....	3.00	25.00

KALMIA LATIFOLIA. Mountain Laurel. An evergreen shrub, of unusual beauty. Will grow to a height of 8 feet. In June rose-colored flowers appear in large clusters at the end of the shoots. These beautiful flowers together with the broad, glossy green foliage, have made this one of our most beautiful broad-leaved evergreens.

18 to 24 inch.....	\$2.00	\$17.50
2 to 3 feet.....	3.00	25.00

ABELIA GRANDIFLORA. Glossy Abelia. Has the great merits of bearing fragrant and beautiful flowers, as well as being evergreen. The leaves are at first bright green, turning later to a darker green. Heat and dust do not injure their beauty. The pinkish-white flowers are delicately fragrant and continue from May to November. Will grow from 3 to 5 feet tall.

18 to 24 inch.....	\$.60	\$ 5.00
2 to 3 feet.....	.85	7.50

NANDINA DOMESTICA. An evergreen Japanese shrub, which grows well in either sun or shade. The white flowers are produced in panicles, and are followed by red berries. The new foliage is tinted with pink and in winter becomes a beautiful bronze color from effects of cold.

15 to 18 inch.....	\$2.00
18 to 24 inch.....	3.50

It is easy to order by mail, just fill in the enclosed order blank, being particular to specify just what is wanted. Your name, post office and shipping point should be written plainly to avoid mistakes.

TREE SEEDLINGS

No farm should be without a grove of Forest Trees, the expense is very small, it pays well in shade and timber, and may mean a good estate for your children in years to come.

We print below a letter to farmers from State Forester Maddox, which shows the many advantages of utilizing land on the farm, which would otherwise be barren, by planting trees for commercial purposes, as well as beautifying the property and enriching the ground:

TO THE FARMER:

Grow a black walnut orchard on your farm. The trees will produce the finest, the most valuable timber, and at the same time yield quantities of the richest nuts, whose kernels are marketed in abundance at a good price. You have, at least, "odd nooks," on your farm that will grow a few trees, if no more; let them grow walnuts for you.

When you want lumber for building you will look far before finding any better than yellow poplar. Examine your farm and see if you have areas that are producing nothing for you. Perhaps they are well suited to growing yellow poplar. If not, they will grow some other good tree; put these idle lands to work for you instead of letting them keep you working for them. You pay the taxes and bear the loss which the poor appearance and worthless condition impose upon your farm.

Your farm will always need fences. Your fences will always need posts. The black or yellow locust grows the best of posts and quickly. Make your idle or waste land produce these needed posts. The black or yellow locust will grow on your waste or idle lands, will make the land rich and yield you a profit all at the same time. What better would you want.

Yours very truly,
 R. S. MADDUX,
 State Forester, Tennessee.

THESE SPECIAL PRICES ARE FOR THOSE INTERESTED AND ARE PLANTING FOR RE-FORESTATION, AND ARE SOLD ONLY IN QUANTITY LOTS.

RHODODENDRONS AND AZALEAS.

Rhododendrons and Azaleas must be given careful attention after planting, for often-times, fine, thrifty stock fails to produce the desired results because of the lack of after-care. The soil must be thoroughly prepared by deep spading, making it porous, and after the plants are set the ground must be given frequent waterings and a heavy mulch of leaves applied; the latter will tend to retain the moisture in the soil.

SOILS: All members of the Heath family, including broad-leaved evergreens and azaleas, require a soil showing an acid reaction. Because of this special requirement, many sections of the country have thus far, been prevented from enjoying the beautiful display furnished by rhododendrons, kalmias and azaleas. In sections where the soil shows an alkaline reaction, gardeners need no longer despair, because by special soil preparation these gorgeous representatives of our native plants can be made to thrive.

Prepare the soil carefully by spading thoroughly to a depth of 12 to 15 inches. Then place a layer of Granulated Peat Moss 3 to 4 inches thick, which should be thoroughly worked into the soil. Granulated Peat Moss by repeated tests, has proved a great stimulant to the growth of plants belonging to the Heath family. It produces a strong reaction and leaves the soil porous, admitting the air and affording good drainage.

After Rhododendrons and Azaleas have been planted in this specially prepared soil, a mulch of 2 inches of the same Granulated Peat Moss should be applied. This treatment will tend to keep the moisture at the surface of the soil, which is quite necessary in growing this order of plant material successfully.

Granulated Peat Moss comes packed in bales containing eight bushels. It is very light in weight, but will absorb eight times its weight in moisture. One bale, when pulverized, will cover an area of 240 square feet, 1 inch deep. The price on Granulated Peat Moss is \$5.00 per bale F O. B. McMinnville, Tennessee.

RHODODENDRON CAROLINIANUM. The most beautiful of the native Rhododendrons, growing 6 to 8 feet high. The plants are well clothed with dark green leaves, rusty below, and produce in early May, a wealth of unusually large, rose-pink flowers in good sized clusters. One of the best broad-leaved evergreens.

R. CATAWBIENSE. One of the most beautiful native shrubs and the hardiest of all the Rhododendrons. In late spring every branch has a large cluster of 1 1-2 inch broad, rosy purple blooms. The foliage is the most handsome of any Rhododendrons.

R. MAXIMUM. A hardy variety of magnificent size, making it a wonderful plant for mass effects. The luxuriant growth of dark green, narrow leaves 6 to 12 inches long, gives a delightful atmosphere. The light pink or white flowers, 1 1-2 to 2 inches broad, are borne in large clusters in great abundance in June.

ALL ABOVE PLANTS SHOULD BE BALLED AND BURLAPPED. 25c PER PLANT EXTRA WILL BE CHARGED FOR B&B.

HARDY FERNS.

These graceful and universally popular plants are of easy culture, and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf-mould or woods earth is available; and better still, if rocks or stumps may unite in breaking the monotony of the grounds surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. There are many places more or less shut out from the sunlight that may be converted into veritable beauty spots by clumps of Ferns of various kinds, and their intrinsic ornamental qualities are well worthy of your attention.

ADIANTUM PEDATUM, Maiden-Hair Ferns. A graceful species, with large deciduous leaves, dark chestnut-brown stripes radially forked at the summit. One of the beautiful native ferns. Grows 10 to 15 inches high. Small roots. **DICKSONIA PUNCTILOBULA,** Hay-Scented Fern. A handsome large fern with thin and delicate leaves, from one to three feet long. Stipes clustered, pale green and sweet scented, bearing many soft green pinnatifid divisions. A very handsome deciduous species. .

Prices for above two varieties:

50c Per Dozen; \$4.00 Per Hundred.

OSMUNDA CINNAMOMEA, Cinnamon Fern. A stately large Fern with very large creeping rootstocks. Leaves deciduous, produced in circular cluster, bright green with pinnatifid divisions, growing 3 to 5 feet tall. A very ornamental Fern.

OSMUNDA REGALIS, Royal Fern. A vigorous tall-growing fern with good stout rootstocks. Fronds will measure a foot or more wide, growing 2 to 5 feet tall, fruiting portions paniced at the summit. Weship these in clumps.

POLYSTICHUM ACROSTICHOIDES, Christmas Fern. A beautiful evergreen fern with densely chaffy stipes. Leaves deep green with numerous pinnae, 1 to 2 feet long.

Prices for above varieties:

\$6.00 Per Hundred. \$1.00 Per Dozen;

LONICERA HALLIANA, Halls Japan Honeysuckle. Dark green, dense foliage, almost evergreen with fragrant white flowers, changing to yellow. A good old dependable Honeysuckle. Grows rank under any conditions. These are being used in large quantities for reforestation work, for planting in gullied lands, banks and unsightly places. If wanted in quantity lots, write for special quotations.
