DONDERO'S

VEGETABLE AND BERRY
PLANTS

PRICE LIST

FOR SPRING 1930

L. and F. DONDERO

Vineland, New Jersey

Please Read This Page Carefully Before Ordering

HELP US TO SERVE YOU RIGHT

HOW TO ORDER. You should order just as soon as you receive this catalog. By so doing, you get your order booked in time before the rush of the season and get just what you want. Don't wait and be disappointed. You may add to your order later if you wish.

ALWAYS write name and address plainly and state how goods should be sent. When this is not done we will use the best of our knowledge.

OUR TERMS. Cash with order. C. O. D. shipment will be made only when one-fourth amount is sent in with order. Kindly remit by Postal Money Order, Registered Letter, Express Money Order or Personal Check. Please do not ask us to open accounts for less than \$10.00 orders.

Packing is executed with utmost care. Special pains are taken to pack lightly, thereby reducing the expense of transportation to a minimum. There is no extra charge for packing.

GUARANTEE—We warrant our plants and seeds true to name, with the explicit understanding that should any prove otherwise, we will upon satisfactory proof, return the money paid or replace it with other stock; but we are not liable for damage beyond this. A sure indication of the purity of our stock and our way of doing business is the fact that customers of former years continue to deal with us.

YOU WILL find the prices in this catalog much lower than others, for the kind of stock we are offering. A trial order will convince you that our plants are as good as can be purchased anywhere, regardless of cost.

CLAIMS, if any, must be made upon receipts of goods, when they will be carefully and cheerfully examined, and, if just, all will be made satisfactory. Claims made after five days from receipt of goods will not be entertained.

Prices in this catalogue cancel previous quotations. The prices quoted are for the quantities specified, but six, fifty or five hundred of a variety will be supplied at dozen, hundred, and thousand rates, respectively. Only lots of 100 or over may be made up at larger rates of less than fifty of a variety.

L. and F. DONDERO

DELSEA DRIVE

VINELAND, NEW JERSEY

GREETINGS

In issuing our Price-list for 1930 we first wish to thank our many friends and customers for the confidence and patronage tendered our place last season. We enjoyed a large volume of business and trust that our customers are as pleased as we are and we will continue our motto as in former years of "A Satisfied Customer or His Money Back".

We are now prepared to supply your wants for this spring with fine Garden Roots, Vines, Vegetables and Berry plants. Have a large stock of all varieties on hand and our prices are low for quality stock we are offering. If you've never had the opportunity to order of our stock before—give us a trial order—no matter how small; we know you will be satisfied and larger ones will follow.

Sincerely yours,

L. & F. DONDERO

STATE OF NEW JERSEY
THE DEPARTMENT OF AGRICULTURE
Bureau of Statistics and Inspection

No. 225

Trenton, N. J., September 1st, 1929.

THIS IS TO CERTIFY That we have this 22nd day of July 1929, in accordance with the provisions of Chapter 268 Laws of 1916, State of New Jersey, inspected or caused to be inspected by a duly appointed Inspector the GENERAL Nursery Stock growing in the **L. and F. Dondero Nursery** of **L. and F. Dondero**, proprietors, at Vineland in Cumberland County, New Jersey, and have found the same apparently free from San Jose Scale and other dangerously injurious insect pests and dangerously destructive plant diseases.

This Certificate expires Sept. 1, 1930, and covers only stock actually in the nurseries when examined.

(Signed) THOMAS J. HEADLEE,

State Entomologist.

WM. H. MARTIN, State Plant Pathologist.

RALPH B. LOTT, Chief Insp.

SPECIAL RASPBERRY CERTIFICATE

No. 4

Trenton, N. J.

THIS IS TO CERTIFY That the Raspberry plants from which sales are to be made by **L. and F. DONDERO** of Vineland in Cumberland County during the season of 1929-1930, have been field inspected and found practically free from transmissible diseases.

September 2nd, 1929.

EDGAR G. REX, Inspector

Asparagus Roots

THE MARY WASHINGTON

Rust-resistance and giant-size stalks

This asparagus, which has been selected by the United States department of Agriculture, Washington, D. C., has proven itself the leading *Asparagus* known. It is practically rust free. The plants form large clean shoots which are long, straight, thick and heavy, with closely folded tips. The color is rich dark green, tinted darker at the tips. It is a heavy yielder and a long-lived producer of exceptionally fine flavor. The fact that the mother plant has been tried for over 15 years in the trial grounds of the Department of Agriculture, is ample proof of the hardiness and longevity of this variety.

We may also add at this point that we can now definitely state that green asparagus is bringing a higher price on the general markets than white, and the fact that the Mary Washington produces a very large, dark green, tight tip shoot which will not prematurely sprang out is greatly in its favor in the production of what is now desired.

All the roots we offer are grown by us from first class seed (guaranteed true to name) under favorable conditions in rich soil. Placing us in a position to

cover requirements of the most critical planter.

A bed 12 x 40 feet, requiring about 100 roots, should give a sufficient supply for any ordinary family; 5000 roots will plant an acre.

Roots are ordinarily shipped about last week in March. Orders should be placed as soon as possible. At the following prices every family should have its own *Asparagus* bed.

PRICES: Giant 1 year old roots: \$1.25 per 100; \$10.00 per 1000.

2 year No. 1 Roots: \$1.50 per 100; \$12.00 per 1000.

2 year No. 2 Roots: \$1.00 per 100; \$6.00 per 1000.

3 year old (Fruiting age): \$2.00 per 100; \$18.00 per 1000.

Lots up to 500 Postpaid. 500 and over sent as directed, charges Collect.

CULTURE—Select good loamy soil that is well drained. Put in good quantity of manure and plow deep. Make a trench about eight inches deep, set crowns nine inches apart. A couple inches of well rotted stable manure at the bottom of the trench before setting down roots goes well. For field culture rows should be 4 feet apart.

THE WASHINGTON**Another good variety**

In short the Washington is exceptional rust-resistant due to unusually vigorous constitution (secured by critical selection extending over ten years); extraordinary yielding qualities; large size, of individual stalks and their rapid development to cutting size, which rapid growth stands for tenderness. The shoots are straight, of dark green color, with a heavy purple overtone. They do not open until well above the ground.

PRICES on 2 year No. 1, \$1.50 per 100; \$10.00 per 1000. 1 year No. 1: \$1.25 per 100; \$8.00 per 1000. 1 year No. 2: 75c per 100; \$6.00 per 1000. Lots of 100 sent Postpaid Large lots sent as directed charges collect.

For culture directions see page 4.

PALMETTO (True) — Bears stalks of large size, is of early maturity, and a heavy yielder. A very reliable variety that is comparatively free from rust and blight.

PRICES: 2 year No. 1, \$1.00 per 100 Postpaid; \$8.00 per 1000; 1 year No. 1, 75c per 100 Postpaid \$6.00 per 1000.

Write for special prices on larger lots.

RHUBARB OR PIE PLANT

Every family should have a few hills of rhubarb, as it is very fine for eating and making pies and canning. Rhubarb brings good money in market, and there isn't much work to its culture. Include a few in your order. **PRICE:** 2 year No. 1 (extra heavy) \$1.00 per dozen. \$5.00 per 100 Postpaid. \$40.00 per 1000 sent as directed charges collect. 2 year No. 2, 75c per dozen. \$3.00 per 100 Postpaid, \$24.00 per 1000, sent as directed, charges collect.

HORSE RADISH

BOHEMIAN OR MILNERKREN—Of very strong growth, cuttings, planted in April, producing fine large radish for grating the first of October. It is as white as snow when dressed. Grows to great size if left in ground until Spring and yields as much as four tons to the acre. Entirely free from all diseases and grows on any kind of soil, from heavy clay to light sand and withstands drought as well as the potato. Of easiest culture. Plant the sets in moist, rich soil, small end down, with tip an inch below the surface. **PRICES:** 50c per dozen: \$2.00 per 100, sent Postpaid to your address. \$12.00 per 1000 sent as directed charges collect

Standard Varieties of

Grapes

The Pick of the Choicest!

The grape is one of the easiest of cultivation, growing almost anywhere and requiring very little attention. They can be grown on a trellis or the vines trailed along a fence, and they are also grown for shade for the back porch or summer house, not only

giving protection from the sun, but producing in autumn an abundance of fruit, thus giving a two-fold return.

Plant 5 feet apart.

IVES SEEDLING—This we recommend as the hardiest of all grapes vines. The bunches are large and very compact (as in picture). The berries are a very dark purple. Very good for table use, also for jelly or wine. Good strong two year old plants at 20c each; \$1.75 per dozen; \$8.00 per 100 postpaid; 1000, \$60.00 exp. 3 year \$2.50 per dozen; 15.00 per 100 Postpaid.

CONCORD (Black)—The leading variety for home use, producing large bunches of big black berries of splendid flavor. A good keeper and excellent for making grape juice. By far the most popular grape on the market. Price, same as Ives Seedling.

NIAGARA (White)—The standard white grape. Both bunch and berries are large handsome and well formed. The flesh is firm and juicy, while the flavor is of the best. A splendid variety in every way, and should be in every collection. Good strong two year vines, 25c each; dozen \$1.95 postpaid. 100, \$10.00; 1000, \$70.00. express collect.

BLACKBERRIES

A Delight to the Eye, a Pleasure to the Palate

The Choicest Among BLACKBERRIES

THE BEST OF ALL—A leading berry for market and home use. The Best of All is what you should plant because there is no other berry that can take its place, and now is the time to set out what you may want of them, do not wait until next year. The fruit is jet black and firm, and will not soften either on the bush or after it has been picked. It is a large berry of exceptional flavor. **PRICES:** each 15c; dozen \$1.00; 100 \$5.00 Postpaid; 1000 \$40.00 Express collect. Transplanted plants, \$1.50 per dozen Postpaid.

MERSEREAU—A superb berry. Fruit is large, glossy and firm. Stands shipping as well, and sells for Wilson, on any market. Has great productiveness and unusual freedom from orange rust. **Dozen, 50c; 100 \$3.00; 1000 \$25.00.** 100 or less will be sent by parcel post Prepaid. Write for prices in larger quantities.

BLOWERS—Possess the quadruple valuable qualities of large size, productiveness, absolute hardiness and a very prolonged season of fruiting. On fertile soil the canes often grow to ten or twelve feet, if unchecked. The fruit is large and attractive. Price, same as Mersereau.

LUCRETIA DEWBERRY

This is the standard and best dewberry. Extremely hardy and very productive. It ripens in advance of the earliest blackberry and equals in size the best varieties of its near relation. The vines are of slender trailing habit, and succeed upon soils (even very sandy) and produce a sparkling jet black, large berry, of high quality and very firm. Ships well, keeps well, and sells well.

If to be staked, plant in rows four feet apart each way; if to be mulched, plant in rows six feet apart and the plants three feet apart in the rows. Good strong tip plants. **Price each 20c; 100, \$1.75; sent postpaid; 1000, \$12.** sent as directed, charges collect.

STRAWBERRIES

BIG JOE—(Perfect). This is a splendid variety that is being extensively grown in this country, and in our judgment it is second to none, all points considered. It has been grown in this section several years, each year netting as much or more money per acre than any other variety grown for commercial purposes. It is wonderfully productive of extra large good quality berries that bring top prices in market. It is a larger berry than the Chesapeake, ripens a few days earlier and has as fine appearances as any strawberry that we have ever seen. It is uniform, well colored and firm enough for distant shipment. The plants are strong growers and good plant maker with luxuriant light green foliage. You can make no mistake by including the Big Joe in your order.

LUPTON—(Perfect.) A good late variety. Plants are healthy, strong growers, making enough plants for a good fruiting row. Foliage dark green. Very productive of beautiful brilliant red berries that resemble Chesapeake in shape. Ripens perfect and excellent shipper.

DR. BURRELL—(Perfect). This berry was originated by Dr. Burrell, who originated the Senator Dunlap, which has been worth millions to berry growers. He says it is a scientific cross of Senator Dunlap and Crescent. In plant growth it is a marvel. Its foliage is large and of a beautiful dark green. In the production of fruit it surpasses either of its parents. Its berries are large and beautifully formed. Color a deep glossy red, a trifle lighter than Dunlap. The meat is solid and rich. The berries are excellent shipper and splendid keeper. The calyx is a bright green, seeds yellow. This is a strong bisexual variety and has a long blooming season making it unequaled for a pollinizer for pistillate varieties.

KELLOGG'S PRIZE—(Imp.) This is a pistillate variety and ripens late. Very productive of high quality bright glossy red berries, with yellow seeds, slightly imbedded, which makes a beautiful appearance when packed for market. Plant Kellogg's Prize with Big Joe and you will have a winner.

PREMIER or HOWARD 17—(perfect). In our judgement this is the most perfect early variety to date. In fact, it is in a class by itself, having all the desirable qualities necessary to constitute an ideal extra early variety. Thrives on practically all soils. Has dark green foliage coming to a medium height and shows no sign of disease. Berries are large, beautiful deep red, with all the quality one would desire in strawberries.

MASTODON

THE WONDERFUL NEW EVERBEARING STRAWBERRY

This great strawberry found in Indiana a few years ago, has stood tests in practically every section of the United States the last couple of seasons. It is now widely distributed and favorable reports come from experiment stations in various states where the berry has been tried.

The fruit is almost double in size of the ordinary everbearers. Produces a heavy crop in the spring and another in late summer and early fall. Will produce a good crop this fall if planted in early spring.

It is truly the largest, most delicious and heaviest yielding of all everbearing sorts. It outyields some of the finest June bearing sorts during their season and continues to bear, throughout summer and fall, berries of amazing size and surpassing quality. For best results (though this is not essential), plants should be disbudded up to July 1st. They will then bear banner crops beginning early in August and continue to produce heavy crops of delicious berries right up until severe freezing weather.

We have our own MASTODON plants from stock purchased direct from the originator and guaranteed true to name. For prices on this variety see page 10.

As the quantity we have is small in comparison to the orders which we will receive, we advise placing your order immediately if this variety is wanted.

PRICES: Following page.

Strawberry Culture and Price List

For hill culture, rows should be either 24, 30 or 36 inches, and plants set 12 inches apart down the row.

For matted row system rows should be either 42 inches or 48 inches and plants set 18 inch to 24 inch in row.

An important point when planting Strawberry plants is to get your plants in the ground the same depth as they grew in the original bed, and to pack the dirt firmly around the roots. We have found the two following methods most practical. If plants are to be set with two-horse transplanter, we use light marker attached to transplanter, setting the plants level with the surface, within a few days after planting we sow fertilizer down the rows at the rate of 400 lbs. per acre, following with the cultivator, being very careful not to disturb the roots of the plants, also not to cover up the crowns or heart of the plants. If plants are to be set with trawl, we use a one-horse plow to make a furrow, sow fertilizer down the furrow at the rate of 400 pounds per acre, make a sharp list with one-horse plow, then strike list down nearly level with the field with light drag, or board. Drag and set plants immediately.

We strongly advise very early spring planting, as plants set early get a good start before the hot, dry weather strikes them and are much more apt to grow and make a good fruiting row than those set late in the season.

Planting Season April 1st to May 15th.

ROUND TOP FARM

Muncy, Pa., April 8th, 1929.

Messrs. L. & F. Dondero,
Vineland, N. J.

Gentlemen:

The MASTODON Strawberry plants you sent last year were great. Please send me 100 more.
Enclose check \$2.50.

Very truly,

H. G. GRANNIS

—L&FD—

THE RURAL NEW YORKER

333 West 30th St., New York, N. Y., April 11, 1929.

Mr. F. A. Dondero,
Vineland, N. J.

Dear Mr. Dondero:

The package of plants arrived to-day in good shape, and they look to me like very fine stock.

Sincerely yours,

WM. W. HIGGINS

Editor

WWH:ER

—L&FD—

Pequea, Pa., R. F. D. No. 1, April 3rd, 1929.

Messrs. L. & F. Dondero,
Vineland, N. J.

Dear Sirs:

Received the Strawberry plants in perfect condition and am very well pleased with them.

Thanking you very much for the prompt attention you have given in sending the order which I received April 1st., I am,

Yours truly,

JACOB G. WITMER

—L&FD—

April 20th, 1929.

Messrs. L. & F. Dondero,
Vineland, N. J.

Gentlemen:

The Strawberry plants you sent me last year were the very finest I have seen. Is it too late to set out an asparagus patch?

Sincerely,

JANE STILWELL

Raspberry Plants

We offer only fresh-dug plants. No cold storage plants that were dug last fall or during the winter are shipped to our customers. Fresh lots dug daily. All our plants have passed State Inspection and when necessary have been inspected twice. (St. Regis) Another point is our plants are dug very carefully not to break the roots and we assure you satisfaction when given ordinary care. One setting is good for several years.

CULTURE—Plant the red or upright growing varieties in rows six feet apart and plants three feet apart in the rows, requiring 2420 plants per acre. In small garden, plant four feet apart each way and restrict to hill, permitting but three or four canes to remain in each hill. For field culture, the black cap varieties should be planted in rows seven feet apart and plants three feet apart down the row. Sucker plants should be trimmed back to within three inches of the ground three weeks after planting.

THREE LEADING RED VARIETIES

WELSH—A mid-season variety producing berries of extra large size, good, bright crimson color and very sweet. The finest in quality of any offered, but is not firm enough to ship well a long distance. The canes are vigorous, hardy and productive. The best for the home garden. Prices bottom of next page.

CUTHBERT—The best Red Raspberry for commercial purpose. A variety that can be depended upon for a good crop of fine fruit in practically all sections of the country. For hardy, vigorous bushes plant in a sandy loam. Berries retain their brightness long after being picked. A wonderful berry for long distance shipping. Prices next page.

ST. REGIS—(Most popular red everbearing) Not only raspberries, but berries of the very highest grade—in size, in brilliant crimson color, in

firmness and flavor. Ripens with the earliest and continues on young canes until autumn, starting to produce about 80 days after planting. It succeeds on all soils, light or heavy. Canes absolutely hardy, producing large quantities of delicious fruit. The most widely planted variety for the market garden.

TWO LEADING BLACK CAP VARIETIES

CUMBERLAND—Produces large jet black fruit, firm, and of excellent quality; sweet and, ripening in mid-season and continuing for two weeks. Stands long shipments well. Bush healthy and vigorous.

PLUM FARMER—Is considered by most growers to be the best early black cap variety. Strong, vigorous, upright grower, producing the largest of all Black Raspberries. Good for both home and market.

 50 Blower Blackberries.
 Sent Postpaid upon receipt of \$4.00.

SWEET POTATOES

CULTURE Plants should not be set until the soil becomes warm and weather mild. We find they do best if set in a sandy loam, altho they do well on quite heavy soil also. Set plants in either hills or on ridges about 6 inches in height, the rows being about 3 feet apart and plants 18 inches apart down the row. After preparing the ground and marking out the rows put a small handful of fertilizer (rich in potash) and well mixed in each hill. Of course, a small shovelful of compost or manure will answer the purpose just as well. If, while setting the plants the soil is dry, always be sure to put a little water in the hole with the plant, this insures it getting a good start.

Follow with thorough clean culture. Using a cultivator with vine turners, if in field and always bank the soil towards the plants. You can allow the vines to root on the top of the ridge, if you wish, as it seems to do no harm.

OUR LEADER (THE JERSEY YELLOW)

DIGGING AND STORING

Dig in dry weather if possible, and allow to dry several hours in field. Put immediately in storage if to be kept in winter. Moving afterwards even from place to place in the same room will sometimes cause them to rot. A dry cellar with a stove or heater in it where the temperature can be kept about 50 or 60 degrees and air dry is one of the best places to keep sweet potatoes, although for large quantities storehouses are often built above ground. It is usual to leave an air space of four inches or more under the bins or boxes in which they are stored.

THE JERSEY YELLOW—This seems to be the preferred name for the sweet potato grown mainly in New Jersey. Our Vineland Fancy Strain has for years been carefully selected from the best Jersey Yellow seed, having a smooth skin, good form, color and general appearance as well as productivity and keeping qualities.

BIG STEM JERSEY—Another very good variety. A very rapid grower and heavy yielder of the Jersey Yellow type. Prices for Big Stems, same as for the Jersey Yellow.

Prices on the Jersey Yellows and the Big Stem Jersey are as follows: Selected disease-free seed Potatoes, per peck \$1.00 postpaid; per bushel \$2.25 sent as directed at purchaser's expense, if wanted by Parcel Post add 50c per bushel. In lots of 5 bushels and over \$2.10 per bushel.

First class plants (sprouts) \$1.25 per 100, postpaid; 500, \$2.25, postpaid; 1000, \$3.50 sent as directed, charges collect.

(Planting season May 15th to June 15th)

THE JERSEY REDS—A very fine potato. The best of all sweet potatoes for table use. Also good for the market grower. Is a heavy yielder of well shaped potatoes of a very attractive color.

Disease-free seed Potatoes \$1.00 per peck postpaid; per bushel \$3.00; shipped as directed charges collect, if wanted by Parcel Post add 50c for Postage.

Good strong plants \$1.25 per 100, postpaid; 500, \$3.00, postpaid; 1000, \$4.00, shipped as directed, charges collect.

(Planting season same as for Yellows)

We advise the small grower to buy plants instead of tubers.

We sell sweet potatoes for seed purposes and also the plants in large quantities. Write us for special prices, stating amount you can use.

YAMS (White)

We are in a position to offer our customers this season a very well known species of Sweet Potato called the Yam.

This potato is most commonly grown in the South, but it has proven very satisfactory in this locality and also further north. The tuber comes much larger than the ordinary sweet potato, and matures much earlier. The fact that it matures earlier does not seem in any way to effect the keeping qualities, as it keeps over the winter months as good as the ordinary sweet potato. Price, same as the Jersey Red.

SOME SWEET POTATO GARDENS

100 Jersey Yellow
100 Jersey Reds
25 Yams

First-class disease free plants, sent postpaid for \$2.25.

THE SNOWBALL CAULIFLOWER

April 15th to Aug. 12th

SNOWBALL—This is the most popular of all cauliflower. One of the best for home or market gardeners. Snowball Cauliflower can be planted for early or late and it will make a fine, large head. Another advantage of planting Snowball Cauliflower is that the plants can be set closer in the row than other varieties. Early field grown plants ready about May 1st. Late field grown plants ready about July 1st. **PRICES.** dozen, 20c; 100, \$1.00; 500, \$4.00, postpaid. 1000, \$7.00; by express collect.

NEW CENTURY CAULIFLOWER—New Century Cauliflower is about the same size as Snowball, and it has a fine flavor and is a very good keeper. Price, same as Snowball. Field grown plants ready May 25th.

Brussel Sprouts Plant

BRUSSELS SPROUTS—Small heads or knobs along the stem. They are better than cabbage, may be boiled like cabbage or cooked like cauliflower. Ready for use in 125 days from time you set out the plants. Be sure to try them. Price same as cauliflower.

Tomato Plants

EARLIANA—Early, good size and quite smooth. A very fine tomato for market; scarlet red color. An excellent early tomato for home use. **PRICES:** dozen, 25c; 100, \$1.00; 500, \$4.00; postpaid; 1000, \$6.00, by express not paid. Ready about May 10th.

MARGLOBE—The Great New Tomato introduced by the U. S. Department of Agriculture through the efforts of Dr. Fred J. Pritchard, of the Bureau of Plant Industry is the last word in Tomatoes.

Never before has a hybrid of such great promise been brought to our notice. Its spreading habits of growth enable it to bear large, perfect globe-shaped fruit in great abundance. In color it is a most beautiful scarlet, ripening well up to the stem. Its eating qualities, likewise, are very much superior to most of the common varieties.

Spotted (transplanted) plants guaranteed to grow with any ordinary care, ready about May 15th, as follows: dozen, 75c; 100, \$4.00 postpaid; 1000, \$35.00, by express, collect.

Cabbage Plants

EARLY CABBAGE PLANTS, bed grown, ready about April 12th

JERSEY WAKEFIELD. It is a very solid early cabbage and it has a very few outer leaves. Can be set very early. It will mature nice, large head in 75 to 80 days. **PRICES:** 25, 30c; 100, 85c; 500, \$2.50; postpaid. 1000 \$4.00, express.

COPENHAGEN MARKET. A fine, large, early, round-head cabbage. It will stand a long time without bursting and easy to grow to 10 pounds. Short stem, heads almost on the ground and can be set closer than other varieties. They should be set out in every garden. Try them. **PRICES:** 25, 40c; 100, \$1.00; 500 \$3.00, postpaid; 1000, \$5.00 express.

Egg Plant Plants

(We Only Sell Transplanted Plants)

NEW YORK IMPROVED LARGE PURPLE—Fruit large, fine and free from thorns. Matures in 130. Skin rich purple. Flesh white and of good flavor. We can highly recommend our carefully selected strain of this egg plant to everyone. Prices, same as for Black Beauty.

BLACK BEAUTY—Is very early, in fact the earliest of good market variety. It grows a good size fruit for market. Average weight, two to three pound. Bears its fruit close to main stem. Price, dozen, 60c; 25, \$1.10; 50, \$2.00. 100, \$3.00; postpaid. (Ready about May 25th).

PEPPERS

RUBY KING—A very large and sweet pepper, well known by all pepper growers. The flesh is thick and meaty and when ripe is a bright red. It is an immensely productive pepper and is as fine a market and home pepper as one wants. Price, per dozen, 25c; 100, 90c; 500, \$3.00 postpaid; 1000, \$4.00 not prepaid. (Ready May 20th).

The New Tomato Pepper

(Pimiento)—Is of upright growth, enormously productive. May be eaten out of the hand like an apple, or stuffed with meats, rice, etc., and baked, or served as a salad, and fine for canning, being of mild and delicate flavor. It is sure to prove a profitable market variety. It stays in bearing right through the season from early June until frost. An excellent sort for the home or market. Price, same as Ruby King.

LONG RED CAYENNE—The conical shaped fruits are three to four inches long, of bright red color, and borne in great profusion. The flesh in character is very hot, sharp and pungent. A favorite for bunching with pot-herbs or for winter use. Price, same as the Ruby King.

CHERRY—Another very hot pepper. Grows about the size of a large cherry, or somewhat larger. An excellent pepper for the market. It is used for canning purposes. Price, same as Ruby King.

A SPECIAL PEPPER

THE CHINESE GIANT—The largest of all peppers. The fruits of this variety are of monstrous size, even when put alongside such a large kind as the Ruby King.

The shape is more blocky than that of any other pepper; comes almost square and growing as large as four inches in diameter and of equal length. Color, brilliant glossy scarlet. It is so immensely productive that frequently a half dozen peppers will touch one another. The habit of growth is strong and stocky, about 18 inches to 24 inches high. Usually three of four fruits are set first near the base, and while these are ripening, a second setting is growing higher up. Flesh is thick and meaty and entirely free from any fiery flavor. Price per dozen, 30c; 100, \$1.00; 500, \$3.25; postpaid; 1000, \$4.50 by express not paid.

Red Skin Potato

The wonderful red potato. The red skin potato is not an early potato at all, and should not be planted for early crop. Here in South Jersey we plant them from July first to July tenth. This red skin potato will do best in cold weather; it will grow fine potatoes even if the vines are hurt from the frost a bit. The potato does not grow deep in the ground. We dig them the last of October or first of November, depending on how cold the weather is. The red skin potato is a fine yielder of fine large potatoes, is one of the best keeping potatoes on the market, and a good eating potato, cooking dry and mealy. This potato, with good cultivation, good fertilizer and good ground will yield from two to five hundred bushels of fine potatoes per acre. Irrigation will produce as high as eight hundred bushel per acre. This wonderful red skin potato should be planted either for market or home use. I therefore advise all growers to plant some of this wonderful potato; it is sure to please.

Peck, \$1.00, Postpaid. Bushel, \$2.00 Express charges collect.

Small size, just right for planting, \$1.75 per bushel.

NOTICE—Special Offer. To those who cannot use any of the amounts of red skin potatoes offered above and wishing to give them a trial, will send postpaid to any address, 12 potatoes for 35c; 24 potatoes for 65c. Try them.

Barberry Thunbergie

The Wonderful new Hedge plant that excells as an informal hedge. Its low dense horizontal growth and graceful branching habit make it most beautiful. Has a bright green foliage very early in the spring and this changes to beautiful shades of orange and red in the Fall of the year; and the attractive red berries which hang on all winter and are sometimes retained until the plants leaf out the following spring.

Prices as follows:

Good strong plants about 1 foot high

25c each; \$2.50 per dozen, Postpaid; 100 \$10.00 Express collect..

A few Extra Heavy at 35c each; \$3.50 per dozen, Postpaid..

We Grow Yearly
200,000 California Privet
Hedge Plants
(OVALIFOLIUM)

For many years California Privet has been recognized as the one best plant for hedge purposes, as it is remarkable for its beautiful dark green, glossy foliage, its quick, strong and symmetrical growth, its freedom from insects and scale and its ability to withstand pruning and trimming into any desired shape.

We have been for many years the leading growers in this section and our stock cannot be surpassed anywhere. It is strong, thrifty and in the best of shape for transplanting, each one being a specimen plant.

We offer at this time first class one and two-year-old plants as follows:

	10	100	500	1000
12 to 18 inches	\$.95	\$3.00	\$10.00	\$18.00
18 to 24 inches	1.15	4.00	15.00	22.00
2 to 3 feet	1.45	6.00	18.00	30.00

Lots of 100 or less will be sent by parcel post, prepaid. Larger lots, as directed, charges collect. Let us quote on quantity lot.
