The Far North Gardens

H. D. SAUVE,
IRON RIVER, WIS.

MEMBER:
American Gladiolus Society
Wisconsin Horticultural Society.

Visitors are Welcome

Iron River is on Federal Highway No. 2, 40 miles East of Superior, 30 miles West of Ashland. Irises, lilies and some other plants are grown in town, gladioli and some other plants, on a farm about a mile out, a little off Highway 2 East of town. Irises bloom all thru June; Glads in August and September. Come and see.

*To our Customers, past, present and future,
Greeting:*

Here is my latest price list—nothing to raise about as far as elaboration is concerned. No pictures to look at. Nothing but the plants and bulbs named and priced. But you will note that the prices are low. A fancier catalog would come out of the plants and you would have to pay more for your irises and “glads.” You will see, too, that many gladiolus bulbs and irises listed last year are not in the list now. Am trying to weed both down to one hundred good ones, reasonably priced. You will meet some of both at very high prices, but of low worth. One cannot judge by price alone. If you wish to try an iris or gladiolus that was listed last year and you do not see it now, ask for it. There may be a few left, and if so, you will get a bargain. Sincerely,

H. D. SAUVE.

TERMS

Cash with order, and orders over \$1. are prepaid.

NOTE—Gladioli are delivered after March 15th, unless otherwise requested; irises at any time except winter. Perennials spring and fall, Cut flowers in season. Gladioli, on the field, 50c per doz. Order by mail at 75c per doz. prepaid.

GLADIOLI

The bulbs herein offered were grown on sandy soil, in which gladioli have never been grown before, and are guaranteed to be strong, healthy bulbs, true to name. Any not found to be so, will be replaced free of charge. Further than this, we cannot be responsible for the crop. One dozen furnished at price of ten, six at same rate. If large bulbs are sold out, order will be filled with double quantity of next size, unless otherwise instructed. Planting instructions with every order.

All single bulbs 5c each, unless otherwise noted.

Most lilies thrive best in cool, moist ground, with shade at least part of the day. These named will do best without lime, tho Tigrinum and Candidum will endure a little. Any of these may be planted in spring, except Candidum, which must be planted in autumn, as early as possible, as it makes a fall growth, which remains green all winter. Autumn planting is equally adapted to the others.

HARDY PERENNIALS
