Oregon Giant Pansy Seed

This strain of Pansies which is fast becoming world famous, was originated by Mrs. Merton G. Ellis. She allows us to list her seed and the following is taken from her Pansy Circular.

FINEST FLORISTS' MIXTURE	
600 Seeds.....	\$ 1.00
½ ounce.....	7.50
1 ounce.....	15.00
1 pound.....	200.00

OREGON GIANTS—ELLIS SPECIAL

(Only one Packet to a Customer.)

100 Seeds.....	\$1.00
----------------	--------

This EXTRA SPECIAL MIXTURE is personally selected by Mrs. Merton G. Ellis from the very best plants all over the garden. There will be only a limited amount of this seed for most of it must go in the regular mixture. We work to have the regular mixture extremely satisfactory and this Special Seed will probably be superior only in that the proportion of extra good plants will be higher. It is the best we can offer and that seems to be what so many of our customers want. It is what we plant ourselves in order to have the quality improve each year. We have had so many requests for Extra Special Seed that we feel compelled to make this offer.

Virginia M. Fisher (D) geranium pink.....	
White Wonder (Kemp) tall white.....	
Woods, Mrs. John S., same as Mrs. Leon D.....	
Wm. G. Badger (M) tall pink.....	

ELLIS ORIGINATIONS

Alvina (Ellis)

A flesh pink of very dainty and exquisite coloring.

Angel's Dream (Ellis)

"Most exquisite La France pink, almost a self color. Fine spikes of attractively formed florets. One of the most beautiful of any that we grow. Fine propagator." As described by Mr. Thacker.

"Immense spikes with many open florets of a soft caressing pink. Surely a mighty pretty Glad. One of the outstanding new varieties and bound to be popular with all who see it." As described by Dr. Bales.

Beatricia (Ellis)

Soft rose-red with large wide-open florets.

Bengal Beauty (Mrs. Ellis)

A cross between Bengal Tiger and Golden Measure, with the tall, strong spike of Golden Measure, but with the coloring of Bengal Tiger, except that it has more gold and brilliant markings and does not fade. Very attractive.

Bronze Maid (Ellis)

The best we have yet seen in the bronze type. Beautiful blue throat blotch. Strong and vigorous.

Capt. Courageous (Ellis)

"Great big, velvety blood-red blossoms flaked with a deeper red. Tall spike with several blooms open at one time. Well named, for he is the kind of glad that will look anyone in the face and tell them 'what's what.'" As described by Dr. Bales.

"Beautiful mottled red, on excellent spike. One of the best reds, a strong grower and fairly good propagator." As described by Mr. Thacker.

Dorothy Wood (Mrs. Ellis)

Very early. An improved and deeper pink than Prince of Wales. Highly recommended by Mr. T. H. Wood of Canada and named by him.

Early Phipps (Ellis)

Slightly deeper than W. H. Phipps, and not so tall a spike. One of the best early glads we have. Perfect form. Quite prolific." As described by Mr. Thacker.

Of the shimmering, iridescent effect as of Mr. W. H. Phipps under electric light, where it is at its best in basket or vase. Slightly ruffled, very early and of very lasting quality.

Ella V. Birney (Ellis)

A dainty pink of fine form and perfect placement of florets.

Eloma (Ellis)

A pink of the Longfellow type. Winner of first prize for best new seedling in 1927 at the N. W. Regional Glad Show.

Ellen C. Jacobsen (Mrs. Ellis)

Pink, resembling Richard Diener in color but a shade deeper, and a much taller spike. Large florets. Many open. Fine exhibition variety.

Ernestine (Mrs. Ellis)

Very clear, bright, peach-red with pure white throat. Sparkles in the sunlight or under electric light. Large florets and many open at once.

Frost King (Mrs. Ellis)

A clear, coral pink with white throat. Graceful spike. Blooms very early and late. Early frosts do not seem to affect it. Very prolific and splendid germinator.

General Canby (Ellis)

"A brilliant red, marked yellow in throat. Unusual and attractive color combination. One which demands attention. Prolific." As described by Mr. Thacker.

Named after General Canby who was ambushed and treacherously killed by the Indians in the Modoc Indian War in Southern Oregon while trying to negotiate a treaty of peace. The peculiar feathery sprinkling of red in the yellow throat adds greatly to its beauty.

Gloriola (Ellis)

"A giant in the prim grandiflora class. Color similar to Gloriana, but much more size and not quite so exquisite, but better form. Very strong. Makes huge bulbs, but did not seem to have many bulblets." As described by Mr. Thacker.

Golden Chimes (Ellis)

Those who have heard the music of the Golden Chimes will at once associate the name with that which is beautiful, exquisite and rare. A ruffled golden yellow of great beauty. Florets are star-shaped, wide open, large and nicely placed. Not yet on the market.

Grey Knight (Ellis)

"A beautiful lavender, overlaid with a veil of gray. A very interesting flower, with a clear blue throat blotch. A very fine and unusual new smoky." As described by Mr. Sawyer who specializes in the smoky varieties.

Lady Macbeth (Mrs. Ellis)

"Rose red with speckled throat. Perfect form and placement. An excellent red for exhibition or commercial use. Good Propagator." As described by Mr. Thacker.

"This very choice scarlet produces us 6 to 8 six-inch flowers and is most competitive for honors in color section No. 7. Its immense scarlet flowers are beautified by two large white blotches which have a central line of dark red." As described by Mr. Biddle.

Lady Lorene (Ellis)

Dainty, deep pink with yellow throat. Tall, slender spike. Exquisitely beautiful. Named after a dainty little lady in our home.

Miss Canby (Ellis)

A daintily ruffled white with cream throat. Works up beautifully with Minuet or Mountain Girl in floral pieces.

Monarch of the Glen (Mrs. Ellis)

An immense spike. The strongest growing glad in the garden. Extremely ruffled or fluted, bright salmon pink florets. When the first huge spike of this began to form we watched in wonder to see what sort of Monarch this would be. Somehow, the famous painting by that name seemed to be the right name for this one.

Mountain Girl (Mrs. Ellis)

A wild-rose lavender pink, beautifully shaded with deeper pink, and with a yellow throat. Tall straight spike. Slightly ruffled. Many florets open. A good keeper. Fine in floral pieces.

Oregon (Ellis)

Shell pink. Spike is tall, strong and massive in appearance. Florets are seven inches across and well placed. Not yet on the market. Winner of blue ribbon as best new seedling in 1929 at N. W. Regional Exhibit.

Oregon Queen (Mrs. Ellis)

Imagine a couple of glad fans, regular he-men, hopping across the glad beds, without regard to where they might step, and with eyes glued on a large spike of creamy lily-like blossoms. We took so kindly to their performance that we told them they might name it. Being loyal Oregonians, they named it Oregon Queen. We have heard also of people in the East who have gone hopping over beds in similar fashion to see it.

Pink Marie (Ellis)

An excellent florists' pink, in form and earliness resembling its parent Marie Kunderd.

Point Twain (Ellis)

This one makes a large spike with many florets open of exquisite pink and with pointed petal. Destined to be as great among the glad fans as Mark Twain among the glad writers.

"We like this the best of any of the 1929 Ellis varieties. Soft clear pink of most attractive form. Pointed petals. Several open at a time. A most exquisite variety. Good propagator." As described by Mr. Thacker.

Pride of Portland (Ellis)

'Bagonia Rose. Very large flowers with cream blotches on lower petals. A super glad worthy of a place in any collection. Winner of many awards; many open at once. Outstanding for color section No. 14." As described by Mr. Biddle.

Winner of A. G. S. Trophy at N. W. Regional Exhibit in 1926 for best new seedling.

Red Glory (Ellis and Piper)

Vigorous bright ruffled red of extra fine form and value and a consistent winner of blue ribbons. For the past two years it has won first for best red at N. W. Regional Exhibit, as well as other awards.

"Handsome new bright ruffled red. Fine form; beautiful spike of large flowers, resembles Purple Glory in everything but color; valuable addition to color section No. 8." As described by Mr. Biddle.

"Here is a real beauty. It is a sport of Purple Glory which it resembles in everything but color, which is rich fiery red. It is a mighty rare glad and our stock is very limited. If you want it, you'd better order early." As described by Dr. Bales.

Red Tornado (Ellis)

The first spike of this came from a small bulb which bloomed late in the fall. There it stood in the rain, glowing like living coals when most others had faded. Then we thought, "It will take the world by storm, but storms won't take it." This one may not be so good in the summer but it is the best of the reds in the late fall.

"A most beautiful brilliant red with dark velvety throat. It resembles a rich piece of plush. Wonderful substance. Flowers large and wide open. Absolutely in a class by itself. One of the finest in color section No. 8." As described by Mr. Biddle.

Red Roy (Ellis)

A very tall red, with large, well placed florets and beautiful bulbs. A striking variety.

Rippling Waters (Ellis)

Makes a large spike of creamy rippling effect. Destined to be great companion for Minuet in floral pieces. Minuet by itself, or with white, does not have enough life. But Rippling Waters adds life.

"Delicate, soft creamy blossoms with a faint flaking or suffusion of very light pink. Seems almost too pretty to be real. Though the coloring is very delicate, the size of the blooms is the reverse. As many as eight large florets open at one time, on the tall, heavy spike. It's surely a winner with those who delight in the delicate shades of colors." As described by Dr. Bales.

"Very choice, one of our favorites, in color section No. 2. Large flowers and spike, 8 big ones open at once. Regular peaches and cream. Best authorities consider it one of the best light colored Glads to date." As described by Mr. Biddle.

Star of the Sea (Ellis)

"Peach-red, shading to very light throat. On the lower petal there is a very prominent blotch of brownish scarlet, sprinkled with gold dust. Immense, wide open, flaring, star-shaped blossoms compactly placed, though not crowded. Tall, slender, graceful spikes with several florets open at one time. Surely one of the handsomest Glads in existence today. Everybody loves Star of the Sea." As described by Dr. Bales.

"One of the finest Glads developed in our gardens in 1929. Peach red with a magnificent chocolate red throat tipped with rich yellow. You make no mistake in buying this one for color section No. 31." As described by Mr. Biddle.

"Peach red with brownish markings. Very wide open, star shaped flowers of great beauty. Good propagator." As described by Mr. Thacker.

Sword of Mahomet (Ellis)

"A smoky brown, very pretty. Tall, strong grower. One of the best smokies." As described by Mr. Gove.

"An unusual shade of purplish brownish red. A strong grower. Tall, straight spike. An oddity of real class. It has to be seen to be appreciated." As described by Mr. Biddle.

"A peculiar red, blue and 'smoky' combination of color. Reminds one of a Persian rug. Extra tall spikes bearing 18 to 20 florets; generous with side spikes too; nearly always two and sometimes three of them. If you like 'smoky' Glads, you'll like this one." As described by Dr. Bales.
