GENERAL INFORMATION

We are always glad to give information or answer questions of any kind.

Order early, as the stocks of some of our finest varieties are limited. Early orders are solicited to prevent disappointments in case the varieties selected should be sold out.

Discounts. On all orders received before March 1st, 1930, amounting to \$2.00 or more, we will allow extra bulbs, your selection equal to 10% of the order. No orders accepted after May 1st.

We do not substitute unless directed to do so.

Terms. Net cash before shipment, 25% deposit will hold your order until March 1st. Orders not fully paid will be sent C. O. D. for the balance.

Remittance may be made by post-office order, bank-draft, express money order or personal check.

We pay postage on all orders of \$1.00 or more; of less amounts add 25 cents to cover postage.

Six bulbs sold at the dozen rate.

At prices quoted $\frac{1}{2}$ size Gladiolus bulbs will be sold at $\frac{1}{2}$ price, where the price is 20c or more.

In comparing prices please bear in mind that quality bulbs and tubers can not be produced and sold at cut rate prices.

If you do not find the varieties you want in this catalogue, write us. We have many of which stock is too limited to list.

Wholesale orders. We are in a position to accept wholesale orders on quantity lots of many varieties listed. If interested write for quotations.

OUR GUARANTEE

Every bulb, tuber and root is guaranteed to be true to name and healthy. Our stock is semasen treated; a certificate of inspection will be attached to each package where required.

If for any reason you are dissatisfied with the stock, when received, return it and your money will be refunded.

GREETINGS

In presenting our annual catalogue, it has been our endeavor to make it better than all previous issues—better in its appearance, better in its offerings.

We desire to thank our many customers for their liberal patronage during the past and for the many kind letters telling us of their success with our bulbs and roots, both in the garden and the showroom.

We grow new varieties of Gladiolus, Dahlias and Peonies from many growers in this country and Europe, from these we select for our customers' choice, only those varieties that are of outstanding merit in their particular class. Varieties, for which we find more worthy successors, are discarded each year.

Our ambition is to grow the finest of these flowers that can be acquired and to send out the finest stock that can be grown.

No time or labor is spared in raising our crop and should you favor us with your orders you may feel confident you are buying the best stock obtainable.

We extend to you a cordial invitation to visit our gardens any time during the blooming season, which is from June 1st until heavy frosts.

Sincerely yours,

J. V. EDLUND.

How to Grow Gladiolus

Plant the bulbs in well-worked soil 4 to 6 inches deep. Deep planting will serve to protect the roots from the hot sun, keeping more moisture about the roots, and also serves to hold up the heavy spike after it has grown to its full height.

The Gladiolus will thrive in almost any good garden soil, but seems best results are obtained in soil that are more or less sandy. Plant in a sunny location away from trees and large shrubs. The first planting may be made in the spring as soon as the ground is warm and in good workable condition. If a succession of blooms are desired throughout the summer, new plantings may be made about 10 days after the foliage of the previous planting show through the ground and additional plantings continued until the last week in June, which is about as late as is safe to make the last planting in order to secure flowers before frost.

Cultivate often and thoroughly; the more you cultivate the better they grow. Do not allow the ground to bake around the plants. The bulbs should be dug before the plants are too ripe and before hard frosts. Dig the bulbs and cut off the tops close to the bulbs. Dry well in the open air and sunshine, then put in dry airy place for two or three weeks to cure. Be sure to protect against frost. As soon as well dried the old bulbs, bulblets and roots can easily be removed.

Put bulbs in trays not over four inches deep. Store in cellar or basement where the temperature is uniform and around 40 to 45 degrees.

MINNESOTA GROWN

Minnesota grown bulbs are conceded to be the best produced anywhere, because of the climatic conditions which tend to develop a much firmer, healthier bulb than those grown under warmer and more humid climatic conditions.

At the Minnesota State Fair each year visitors are always attracted by our display of Gladiolus, where in 1929 we received more premiums than has ever been awarded to any one grower in the history of the fair, a record that will perhaps stand for a long time.

The Gladiolus

Montbretias

One of the brightest of our late summer and fall flowering bulbs. They should be set out early in April. They should be planted and handled the same as *Gladiolus*. We offer, only the variety *Crocsmiaeflora* which is a color of orange scarlet. Strong bulbs, per Doz. \$1.00.

Delphiniums

Delphiniums are perfectly hardy, there has been a great revival of interest in them the past few years due to the wonderful improvements that have been made in them. Several famous hybridizers have been working on them and have produced new forms and types and beautiful colorings, many of them now having beautiful shades of pink, mauve and purple mingled with the various shades of blue and shades of white.

Our plants are grown from the finest seeds obtainable in England and France, which are in no comparison with the old common kinds; they can be planted in September or early spring and bloom the first year. We offer in assorted colors one year plants; each \$1.00; Doz. \$10.00. Winter sown seedling in 3-inch pots, each 50 cents; Doz. \$5.00, postpaid.

Mastodon Strawberries

We have grown Mastodon strawberries for the past three years and have found them to be far superior to any everbearing strawberry we have ever seen, planted early they will begin bearing about August 1st and continue until killed by heavy frost and again an early crop in the spring; plant in rows about three feet apart and one foot in the row and keep free from weeds and remove all blossoms until about July 1st, then give them a good dressing of well-rotted manure and a good mulch. Our plants are the true Mastodon ever-bearer. Doz. 50c; one hundred \$3.50, postpaid.

Dahlias

Dahlias are easily grown, requiring no special soil or treatment to bring them to perfection. They like an open, sunny situation, but also succeed in partial afternoon shade.

Prepare the soil thoroughly by spading 12 to 18 inches deep, and if the soil is poor work in some 2-16-8 Commercial fertilizer about two weeks in advance of planting, about six or seven pounds to 100 square feet. Dig holes 3 or 4 feet apart and about 5 inches deep; drive a stout stake in each hole and lay the tuber down flat with the crown toward the stake and the eye upward, then cover with 2 or 3 inches of soil, leaving the balance of the hole to be filled up later, after the plant comes up.

Plant any time from May 15th to June 15th in this vicinity, the later date being the best for exhibition flowers.

To prevent the plant from growing too tall, they can be pinched back at the top when they have made their third set of leaves, this will make them branch and we think produce more blooms.

Allow only one plant to each stake. Tie plant securely to stake as it continues to grow. Cultivate at least once every week and after each rain, until the buds appear, rake in the soil a handful of hardwood ashes if possible and mulch the ground with well-rotted manure or lawn clippings and water thoroughly whenever the plants need it.

Disbudding the side buds, leaving only the terminal bud to develop, will bring larger blossoms.

After the plants have been killed by hard frost they should be carefully dug, allowed to dry a few hours, and stored in a dry cellar tops down and with dry soil over them to keep from shriveling. We have them stored in boxes or barrels and covered them with dry pine sawdust with excellent results.

Plants—We have been very successful during the past few years in growing and shipping green plants long distances, we therefore recommend to experienced growers, plants for fine exhibition flowers. Dip the root of the plant in water before planting, plant at least six inches deep, the lower leaves may be removed if necessary. The after-cultivation and care of plants should be the same as for tubers.

Our collection of Dahlias received some of the highest awards at the Minnesota State Fair, 1929.

- WACHTUNG SUNRISE (Smith)**—Decorative. It is a rich, golden yellow suffused amaranth pink towards the outer petals. The flowers are enormous and when fully developed, form a perfect sphere. It is vigorous and the stems are perfect.....Plants **\$3.00**

Pompon Dahlias

This class is a miniature form of the show or ball Dahlias, having the same round, ball-like form, but much smaller in size. The plants are also smaller, of branching habit, producing the flowers in endless profusion. As they can be cut in sprays they are valuable for bouquets and particularly table decorations. They last a long time when cut.

We only offer tubers of these as we do not propagate green plants of this section.

Peonies

Peonies are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted, increase in beauty each year.

Planting—Peonies may be planted any time in the Fall, from September 1st until the ground freezes. No Peonies are handled by us in the spring, as that is entirely the wrong time to plant them.

Size of Root—Making a specialty of growing Peonies and Gladiolus our progress depends entirely upon the results obtained from our roots and bulbs; for this reason we quote prices on 3 to 5 eye, or large divisions only.

Important! An important point to observe in the planting of Peonies is not to plant too deep. The roots should be placed so that the eyes are two inches below the surface, and the soil tightly packed about them.

It will be noticed that we are not quoting any Peonies for less than \$1.00 as we cannot grow, care for our stock, dig, pack, label and supply our customers with good, strong plants and make a living profit for less than this amount.

Discounts—On all orders amounting to \$10.00 or more a discount of 10% will be allowed when cash accompanies the order.

The figures that follow the variety name denote the rating given by the American Peony Society. The valuation is based on a possible score of ten. Where no rating is shown, the variety is too new to have had sufficient votes to be properly judged.
