Fruit and Economic Plant Seeds	7-9
Conifer Seeds	9-13
Miscellaneous Tree and Shrub Seeds	13-28
Palm Seeds	28-29
Iris Seeds	29
Lily Seeds	29-30
Perennial Flower Seeds	30-32
Lily Bulbs	32

FOREWORD

The coming tree seed crop gives every indication of being abundant and of splendid quality. This applies particularly to the Conifers. Nurserymen should use this opportunity of making liberal plantings of the rarer species.

To avoid loss of *Juniperus virginiana* from blight, I would like to call attention to the values of Japanese grown *J. communis* and *chinensis*, the seed of which is offered in this catalog both in berries and cleaned. As a general rule, plants acclimatized to the Orient resist blight and insects in a marked degree. Both should be equally satisfactory for grafting understock.

My Agents, Herbst Brothers, will be located in their new premises at 92 Warren Street when this catalog reaches you. They have built in their new home huge iceboxes so that they can carry our seed in cold storage year in and year out, so that when it reaches you, you receive it in the best possible condition for planting. Arrangements will be made to induce after-ripening, so that when you get the seed, you may expect a good catch in the shortest possible time.

For the convenience of the Trade, the items offered by my Company are printed in bold face, or heavy type. Items offered by Herbst Brothers from other than Oriental sources, are in the smaller, or lighter type.

I take this opportunity of thanking the many nurserymen I met during my trip through the United States early this year, and to express my extreme appreciation of the courtesies they extended to me.

Yours faithfully,

Takio Sakata,

T. SAKATA & CO.

Yokohama, Japan, 1930.

Terms of Sale

Disclaimer: We give for ourselves or our principals no warranty, express or implied, as to the description, quality or productiveness, or in any other respect for the seed we deliver, nor will we be responsible for the crop in any way. In no case shall we or our principals be held liable for more than the invoice value of the seed sold.

Prices are based on an average crop and normal cost of collecting and preparing the seed. If through unforeseen contingencies the cost of any item is extraordinarily increased, we reserve for ourselves and our principals the privilege of proportionately advancing the price of such items of accepted orders, subject to the buyers' option to acquiesce or cancel the items affected.

Prices are given in United States Gold Dollars and Cents F.O.B. our collectors' point of shipment. **They include transportation to and distribution from the Pacific Coast or New York, costs of fumigation and the present U. S. Duty of 8c per pound.** Any changes in the duty are for buyer's account.

Weights are net. Containers are charged at cost.

Purchases of less than one-half pound of any one item will be billed at 25% over the pound price. We do not sell less than 4 oz. of any one variety except where pricelist indicates smaller quantities, and do not bill less than 25c worth of any one variety.

Payment:—Our prices are calculated on a strictly cash basis; customers remitting with their orders will be allowed 5% discount.

Buyers will kindly indicate the routing desired, which will be followed as far as possible; otherwise Messrs. T. Sakata & Co., will use their best judgment in shipping, always subject to the Buyer's responsibility after delivery to carrier.

Messrs. T. Sakata & Co., will cover Marine Insurance for Buyer's account.

It is important that orders should be in our hands as early as possible for immediate transmission to Messrs. T. Sakata & Co., who will promptly advise their acceptance, entire or in part, always subject to crop-out-turn and pro rata delivery.

Respectfully,
HERBST BROTHERS,
Sole Agents for the United States and Canada
for Messrs. T. Sakata & Co.

92 Warren Street,
New York City,
May, 1930

Import Services

In order to give our customers quick and efficient service we have arranged to completely comply with the regulations of the U. S. Customs and the requirements of the Federal Horticultural Board. Our prices include the present rate of Duty and the import costs. Any changes in duty are for buyer's account.

The importation is effected under our permit.

Our purpose is to relieve our customers of the many small petty charges assumed with individual importations, to overcome the need of securing individual import permits, and to supply a better grade of seed.

By bulking importations we guard against costly delays and through more elaborate and safer packing further insure arrival of the seed in the best possible condition.

Purchases of less than one-half pound of any one item will be billed at 25% over the pound price. We do not sell less than 4 oz. of any one variety except where price list indicates smaller quantities, and do not bill less than 25c worth of any one variety.

Explanation of Signs

- * Early maturing varieties which should be ordered at once.
- d deciduous.
- dc ... deciduous climber.
- e evergreen.
- ec ... evergreen climber.
- CS .. Clean Seed.
- B.... Seed in Berries.
- x Items appearing under Iris, Lily and Flower Seeds not offered for account of Messrs. T. Sakata & Co.

Cultural Notes

Tree seed planters often attribute lack of success to the seed, which, though good failed by reason of improper sowing. To prevent such failure we give a few important cultural notes which we invite those of our customers who have no experience in tree seed culture to read carefully.

Seeds having a hard skin or shell often remain for a year, and even longer, dormant in the ground. They may come up during the following season or even two or three years later.

To succeed with tree seed it is important to keep the seed bed sufficiently moist but not too wet, as this may lead to "Damping off," especially in the case of coniferous seedlings. The seed bed must be of well drained loamy soil sufficiently sandy to prevent fungus attacking the seedlings. Shading is necessary, especially for the delicate sorts. We recommend the use of disinfectants of which numerous brands have recently come on the market.

Generally speaking, tree seed does not carry well in warm, dry places; it should be at once placed in cold storage if it cannot be immediately used. Even then it often will not carry safely from season to season.

Many sorts lose their germination quickly, especially *Ulmus*, Cherries, small-fruited *Prunus*, Mulberries, *Elaeagnus*, etc. These should be kept only in cold storage.

It is physically impossible to treat conclusively in a few lines the subject of tree seed germination. To all, even experienced growers of seedlings, flowering cherries and stone fruited plants, we can recommend Bulletin No. 369 of the New York State Agricultural Experiment Station at Geneva, N. Y., by Dr. H. B. Tukey. In this Bulletin you will find the above subject treated fully and practically.

Growers of Conifers and Shrubs will do well to keep posted on the Bulletins of the Boyce Thompson Institute.

We may recommend specially Dr. William Crocker's Bulletin No. 15, dated March, 1930, copies of which may be secured, we believe, from the Boyce Thompson Institute for Plant Research, 1086 North Broadway, Yonkers, New York.

The following pointers may be of service to the nurseryman. They are based on our own experience but should be changed as conditions seem to require :

Andromeda Azalea	Enkianthus	Rhododendron	} Sow in peat moss or fine leaf mould in well protected seed bed.
Carpinus Edgeworthia	Prunus	Ulmus	
Aesculus Alnus Amygdalus Chamaerops (in warmer climate)	Cinnamomum (in warmer climate) Cornus Corylus Fraxinus	Ligustrum Prunus communis Sapindus Syringa Tilia	} Sow in autumn or when seed arrives.
Actinidia Akebia Aleurites Berberis Catalpa Celtis Cercidiphyllum Clematis Daphniphyllum Desmodium Deutzia Diospyros	Distylium Euptelea Eurya (in warmer climate) Euscaphis Fagus Gleditschia Illicium Juglans Juniperus Kalopanax	Kerria Paeonia Podocarpus Pyrus Rhus Sambucus Schizophragma Skimmia Sophora Staphylea Stewartia	
Abies Acer Ampelopsis Aralia Aucuba Betula Biota Buxus Camellia Celastrus Cephalotaxus Cercis Chamaecyparis Clethra Crataegus Cryptomeria Cunninghamia Cydonia	Elaeagnus Euonymus Gardenia Ginkgo Hibiscus Hydrangea Ilex Larix Lindera Magnolia Melia Morus Nandina Paulownia Phellodendron Photinia Picea Pinus	Pittosporum Pueraria Raphiolepis Rhodotypos Robinia Sciadopytis Spirea Sterculia Styrax Taxus Thujopsis Torreya Tsuga Viburnum Vitis Wisteria Zelkova	} Sow in spring after danger of frost is past and soil is warm.
Juniperus	Magnolia	Taxus	
Albizzia Buxus Camellia Cercis	Gleditschia Ilex Photinia Pueraria	Robinia Rosa Sophora	} Soak in hot water just before planting.
Ampelopsis Aucuba Berberis Cinnamomum Euonymus	Ginkgo Hedera Ligustrum Lindera Magnolia	Prunus Rosa Sapindus Viburnum	
Ardisia	Kadsura		Sow under glass.
