Indispensable on the farm for early feeding and ensilage purposes as well as table use. Under favorable weather yields 100 bushels to the acre.

In introducing the **New Variety of Roasting Ear Corn**, we do not hesitate to say it is one of the very earliest now grown, and you can get corn for your table in about 65 days from planting. While this is not a true sweet corn, you can hardly tell the difference. It is far ahead of the Early Adams Varieties. The ears are from 8 to 10 inches long and have two to three ears to the stalk. The picture here shown is a true photograph of an ideal ear of this **Grand New Corn**. We have a limited amount of this corn for sale this season, so send us your order at once.

Price 1 lb., 25c; 2 lbs., 45c postpaid; ½ bu. by express, \$2.00; 1 bu. by express, \$3.50.

NOTE:—We have several varieties of sweet corn as well as field corn and you will find them listed herein. Special prices in large lots. Let us have your orders this season. We can please you in the quality of our seeds. Your money refunded if not satisfied.
