FALL 1930 — SPRING 1931

These Phlox are grown on "A. No. 1" soil, planted the first part of June, with underground irrigation. This gives us thrifty plants which have an excellent start. Then the water is turned off and the Phlox are about three feet above the water level, which gives them a splendid root system. My propagation stock, I take the latter part of August when everything is in bloom, when I pick out the strongest plants, at which time I can be sure of keeping my Phlox true to name. Of course an error could happen, in which case we will replace the plants or refund your money.

Send in your orders and I will guarantee you satisfactory Phlox Plants. If you find they are not high grade and just as represented you may return them at our expense and your money will be refunded.

The price below are per 100. Write us for special prices in larger lots. These prices are for plants grown by myself, personally. This year I have planted 250,000 Phlox.

Try Le Poire Quality Phlox at these low prices. All packing free of charge.

HENRY LE POIRE

Grower of

Gladiolus, Peonies and Phlox

ZEELAND — Route No. 2 — MICHIGAN
