New Haven, Missouri

RELIABLE NURSERY STOCK SINCE 1872

"It's not a Home-

until it's PLANTED

ANYONE can have a beautiful HOME, because it is not expensive. A few shrubs and evergreens planted around your house will change it into a beautiful HOME. No extensive country estate is necessary to enjoy these miniature trees, because any small vacant spot is sufficient to provide a home for the planting of shrubs and evergreens. These plants may be used as individual specimens or in groups about the house. The proper intermingling of evergreens and shrubs makes a most attractive picture. If you feel that you cannot afford to buy enough plants one year to beautify your house properly, make a start this year by purchasing a few and then add to this collection year after year. You will soon have a home that is your pride and joy and the envy of your neighborhood.

The quiet beauty of the CATALPA BUNGEII, which can be placed anywhere about the home or can be made to stand like sentinels in the corners of your yard and on each side of your walk, makes this one of the most unique trees for lawn and yard planting. The leaves are large, glossy, heart-shaped, deep green. The stately beauty of the MAPLE, which is one of the fastest growing and most serviceable of our shade trees, makes it one of the most desired trees for lawn or street planting. These trees thrive in soils in which other trees do not grow so well. One of the most outstanding and sought-after trees is our AMERICAN ELM, which is made majestic with its wide-spreading branches which form a beautiful background. For those who desire the narrow steeple-like tree, we offer our LOMBARDY POPLAR, which is strikingly picturesque because of its unusual contrast to surrounding trees and plants. It is used in many ways, especially as screens and windbreaks.

Catalpa Bungei

Who doesn't admire the yard that is enclosed with a neat, well-trimmed hedge? There is no better line of improvement that can be put upon a home than a living fence—one made from growing plants, attractive with their green leaves, formal trained or arched branches, colored foliage—is surely more pleasing than the still, rigid, mechanical effect obtained by a similar use of wood or metal. Our CALIFORNIA PRIVET

Evergreens

is the ideal hedge plant and it can be trimmed for formal or informal purposes. One of the most popular hedges in this country and one that is most generally seen is the SPIREA VAN HOUTTII. This plant can be allowed to go untrimmed, and during the blooming time the entire plant is covered with a mass of exquisite tiny white flowers, borne in clusters the entire length of each limb.

American Elm

Spiraea Van Houttii

When all shrubs and trees have lost their leaves and the cold of winter sets in, the EVERGREENS stand out in their glory, lending much to their surroundings by the foliage that they never drop. They are strikingly ornamental and useful in either tall, stately groups or in dwarf varieties for lawn decorations. Tastefully arranged, they unquestionably enhance realty values. Plant Evergreens for all-year-round beauty.

FRUIT TREES must not be forgotten, as they are very essential in the planting program. Plant them, not only because they will provide the family table with luscious tree-ripened fruit that is so much sweeter and fresher than the fruit you buy, but also because their flowers and foliage will add much to the beauty and fragrance of your surroundings.

We have a complete line of General Nursery Stock that is as good as can be grown.
