PATERSON, N. J.

All the Flower Bulbs listed in the following pages are suitable for planting in the fall, in fact none of them will succeed if planted at any other time. Flowers that cheer the home in winter and make Spring-time in the garden a real joy are fully described and many suggestions and helpful directions are given to aid in attaining best results. All the Bulbous stock has been procured from specialists in its culture, quality can positively be relied upon.

These prices quoted are for the cream of the season's crop; these are always in demand, and having made special early reservations for limited quantities, those who place orders now can have their goods specially packed for early delivery.

A booklet containing cultural instructions will be supplied on application.

EARLY FORCING BULBS

Paper White Grandiflora

PAPER WHITE NARCISSUS

There is no flower more largely grown for winter bloom than this fragrant French Narcissus. Large quantities are forced every year, either in soil or pebbles and water.

Mammoth Bulbs (15 ctm. circum.). Per doz. \$1.50; per 100 \$10.00; per 1000 \$85.00.

Large Bulbs (13-14 ctm. circum.). Per doz. \$1.25; per 100 \$9.00; per 1000 \$75.00.

SOLEIL D'OR

The Yellow Paper White. Per doz. \$2.50; 100 \$18.00; 1000 \$160.00.

PEBBLES AND ORNAMENTAL CHIPS

For use with Narcissus, etc., in bowls

Colored Pearl Chips, per qt. .35
White Pearl Chips, per qt. .25
Natural Pebbles, per qt. .10

Add 10c per quart for mailing.

Bulb Fibre

A natural peat fibre, full of nutritious properties for the growing of flower bulbs indoors. This compost acts as a moisture-retainer, which promotes the growth of roots on the bulbs, at the same time releasing its organic fertilizing elements in soluble form, developing and maintaining a steady and sturdy growth on the bulbs until the flowers have matured. Pk. \$1.75, bus. \$6.50.

LILY OF THE VALLEY

Retarded crowns for growing indoors.

These blooms within 3 weeks after planting, and by putting some in every 10 days or so, a continuous bloom is assured.

Selected Pips, case of 250, \$20.00 500, \$37.50; 1000 \$70.00.

HARDY GARDEN LILIES

Lilies do best in the hardy border or among shrubbery, because the flowering stems bear masses of roots immediately below the ground surface, and the shady situation helps protect these feeding roots from the hot sun. Lilies thrive in any well-drained garden soil where the ground does not become water-logged, but do not want to come in contact with fresh manure.

Dear Sirs:

I have been growing your *Lilium Harrisii* for the past three years and found the quality of the very best. Plants from your bulbs have won three first prizes at the International show in New York City for the past two years, which speaks very highly for the grade of Lilies you handle.

Yours very truly,
(Signed) J. W. SMITH, Supt.,

TIME OF ARRIVAL

Generally the Hardy Japanese Lily Bulbs, such as *Auratum*, *Rubrum*, etc., do not arrive in this country until late November or early December. Where the bulbs are to be planted outdoors, it is advisable to prepare the soil and then cover with stable manure to prevent freezing until bulbs are planted. However, if this is not possible, the bulbs may be supplied in the spring as we carry a large quantity of all varieties in cold storage.

Each Doz. 100

Auratum (The Gold-banded Lily of Japan). Delicate ivory white color, thickly studded with chocolate, crimson spots and striped through the center with a golden yellow band. Should be planted 8 to 10 in. deep, in sunny or partly shaded situation.

Extra Size Bulbs, 11 to 13 \$0.60 \$6.00 \$50.00

Mammoth Size Bulbs, 9 to 1150 5.00 40.00

Batemanniae. Grows 3 ft. with five to ten flowers of reddish orange color. Blooms in July or August.

Extra Size Bulbs \$0.40 \$4.00 \$30.00

Candidum (Madonna or Annunciation Lily). The bulbs we offer are the true, hardy, Northern French-grown; arriving here in September, they should be planted at once. They make their leaf growth in October, then die down and bloom late the following June—stately spikes of large white, fragrant flowers with yellow anthers.

Large Bulbs, 24-26 \$4.00 \$30.00

Mammoth Bulbs, 32 and up 8.00 60.00

Canadense. A very beautiful native Lily. Flowers vary in color, red and yellow, 3 to 5 ft. high. Blooms June and July. Prefers peaty soil.

Extra Size Bulbs \$0.20 \$2.00 \$16.00

Henryi (Yellow Speciosum). Color, rich golden yellow, lightly spotted with brown. Height 5 ft. Blooms in August. Plant 10 inches deep.

Choice Bulbs \$0.70 \$7.00 \$55.00

Regale (*Myriophyllum*). One of the most beautiful garden Lilies yet introduced. Grows 3 to 5 ft. high, blooms in July. Perfectly hardy. The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the center. Very fragrant.

DARWIN TULIPS

The Darwin Tulips, while among the last of the tulip family to bloom, are the first in the affections and esteem of flower lovers. They are very stately and beautiful; producing immense flowers on tall sturdy stems attaining a height of 2 to 3 feet; easy to grow, unsurpassed as cut flowers, and very effective massed in the garden or herbaceous border with a back ground of greenery.

CULTURE. Bulbs should be planted 5 to 6 inches deep and not less than 5 inches apart. Sand to the depth of $\frac{1}{2}$ inch at the base of the bulbs will amply repay the trouble by the provision of drainage during wet weather. For forcing, bulbs should be planted as soon as received. A temperature of 55 to 60 degrees is recommended.

Doz. 60c; 100 \$4.50; 1000 \$40.00

OLD DUTCH BREEDER TULIPS

Breeder Tulips are very similar in habit to the Darwins, and flower at the same time. Their chief characteristic is their immense blooms, borne on strong, stiff stems, many of them longer than the most gigantic Darwins. The revival of the taste for art colors has made these Tulips, at one time very popular in England, strong favorites with American enthusiasts, who find in their bronze, buff, and brown shades excellent material for contrasting with the light and bright colors of the Darwins. They require the same cultural treatment as the Darwins.

SINGLE EARLY TULIPS

Single Early Tulips are ideal for outdoor bedding and edging as well as indoor early forcing. While they have not the same size of bloom and length of stem which the Darwins have, they are frequently used where early blooms are desired and when the beds are to be used for early annual plants in the spring.

For pot culture—Plant three to five bulbs, according to size, in a 6-inch pot, which should be buried until the bulbs are well rooted.

NARCISSUS AND DAFFODILS

Perhaps of all the Spring flowering bulbs the Narcissus or Daffodil is the greatest favorite; certainly no garden is complete without them, either in small masses in the perennial border among the other plants or naturalized, that is, grown as if wild in outlying portions of the lawn, on terraced slopes, and along semi-shaded paths or streams.

CULTURE—Owing to the various sizes of the bulbs it is not advisable to give the exact depth to plant; but the simple rule of covering the bulb one and a half times its own depth, and 3 to 4 inches between the smaller sorts and 5 to 6 inches for the larger ones. For greenhouse or window-garden culture treat them the same as hyacinths, except plant three or more bulbs in a pot.

HYACINTHS

The fragrance and stately splendor of the Hyacinth, its easy growth both indoors and outside, and its magnificent response to a little special effort and care, make it one of the most popular of all bulbs for the home and garden.

Directions for culture of Hyacinths in Pots:—Fill the pots with a light, rich potting soil, and have the tops of the bulbs just above the surface; give a good watering and set away in a cool place, covering them with about five inches of sand or coal ashes. In about eight weeks they may be taken to the room in which they are to flower. By bringing in a few pots at a time about two weeks apart a succession of bloom may be had.

Glass Culture:—Single Hyacinths do better than double in glasses as they produce a much larger and more showy truss. Place the bulbs in the glasses, which should be filled with water so it touches the bottom of the bulbs, put them in a cool dark place, or on a shelf in the dark part of the cellar, for from six to eight weeks, changing the water every ten days or two weeks; then remove them to the light. If then placed in a cool room they will produce very fine spikes and remain in bloom a long time. A small piece of charcoal in the water is beneficial.

Planting in the open ground:—October and November is the proper time, but they can be set out any time as long as the ground is open and the bulbs remain sound. The bulbs should be planted evenly about six inches deep (to the bottom of the bulbs) and from five to six inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly.

The following varieties are offered in three sizes:

	Doz.	100
Exhibition Quality (Mammoth Bulbs)	\$3.50	\$25.00
Forcing Quality (Selected Bulbs)	3.00	22.00

PREPARED OR TREATED DUTCH HYACINTHS

These Hyacinths are given a special treatment in heated warehouses to advance the final development of the embryo flower and thereby make it possible to have them in bloom about three weeks before the others offered above. The bulbs are not as large, but if potted early and given ample time to develop strong roots, will bloom early. We offer five distinct varieties.

Arentine Arendsen, Pure white Gertrude, Rosy Pink
 Dr. Lieber. Porcelain Blue Garibaldi, Carmine Red
 Yellow Hammer, Golden Yellow

Price, any of the above, 30 cts. each.

\$3 per doz., \$20 per 100

FRENCH ROMAN HYACINTHS

French Roman Hyacinths are among the earliest bulbs to be had in flower. The bulbs arrive from France late in August; they may be had in flower from November all through the winter months, if potted up in September and at intervals of every two weeks. They are much prized for pots or cutting on account of their graceful appearance and delicate fragrance. The flowers are smaller than those of the Dutch Hyacinth, and are borne in great profusion, the larger bulbs frequently having three to five graceful spikes of bloom. They are not hardy in our northern climate, and should not be planted outdoors.

\$1.00 doz., \$7.50 per 100.

St. Brigid. A wide range of rich and brilliant double and semi-double flowers.

\$1.50 doz., \$10.00 per 100.

CROCUS

Crocuses, among the earliest bulbs to flower, are most effective when planted in masses on the lawn, or arranged in rows in the border. They are perfectly hardy, and may be left in the ground for three or four years after planting, without being disturbed. The best method is to scatter the bulbs about the lawn and planting where they fall with a trowel, covering about 1 inch in depth.

IRIS FOR FORCING

Iris Tingitana and Spanish Iris may be grown both in and outdoors. If planted indoors they should not be forced as they will be apt to come blind; given a slow treatment they will bloom without difficulty in the early spring.

Imperator. Early-flowering. Brilliant blue, large and well-shaped flowers on long strong stems. The best for greenhouse culture. \$1.50 per doz.; \$10.00 per 100.

Tingitana. Early-flowering Dutch Iris. Produces large, well-shaped blue flowers on long, strong stems. If grown cool in greenhouse will flower early in March. Will not stand forcing. \$1.75 per doz.; \$12.00 per 100; \$110.00 per 1000.

Wedgewood. Beautiful pale blue, with yellow blotch. Large flowers on tall spike. Splendid for greenhouse, flowering in March. \$3.50 per doz.; \$28.00 per 100.

DUTCH IRIS

Resembles the well known Spanish Iris, but their whole habit of growth is more vigorous, and the flowers are much larger. Their greatest value is their earliness, as the buds open at least two weeks before the Spanish Iris.

AMARYLLIS, GIANT HYBRIDS

For growing in the house or conservatory, few plants produce as striking a display, with so little trouble, as Amaryllis. The bulbs should be potted in the fall, be kept rather dry all winter until growth starts in early spring when they should be watered plentifully, fertilized and lightly shaded. A few weeks, and they break into immense lily-like blooms of gorgeous color and form. Large Bulbs in Choice Mixture. \$1.00 each, \$10.00 per doz., \$75.00 per 100.
