We cannot emphasize too strongly the superior quality of 2-2 stock (two years in seed bed and two years in transplant bed). During the past five years we have had various experiences in planting 3-0 (three year seedlings) 4-0 (four year seedlings) 3-1 (three years in seed bed and one year in transplant bed) 3-2 and 2-3 trees. We have proven beyond a doubt in our own minds that the most practical and most economical tree to plant is the 2-2 transplant. This is the only size we will use and guarantee in our contract planting work.
