Vegetable Seed Trials

Landscape Gardening

The Neosho Nurseries Co., maintain a landscape department with an experienced man in charge. Ornamental planting plans furnished to customers anywhere. A pleased customer wrote the Nursery the letter printed below:

Neosho Nurseries Co.,
Gentlemen:

We were delighted with the plan prepared by your landscape department for beautifying the grounds of our new home. You recommended only the planting necessary to bring about the best results at a minimum cost. A portion of it was done last spring. We have a definite plan to follow in completing the layout, a great help, indeed, especially for the inexperienced in landscaping. The planting already done is growing nicely—do not believe I could have obtained better nursery stock anywhere than that furnished by you, and I shall order from you the plants required to finish the work that was started right.

I again thank you for your kind co-operation and the valuable suggestions given for "Growing Satisfaction."

C. H. M., East St. Louis, Ill.

If you have a problem in landscaping, either home or public grounds, let us help you.

T. G. BANNING.

Dependable Seeds, Plants, Onion Plants, Onion Sets and Nursery Stock

TO MY FRIENDS, MY CUSTOMERS:

To any of my customers who may want to know why I am in this business: It is because of a natural love of growing things. When a boy of twelve years of age, I had gone to the woods and transplanted all the different kinds of wild flowers into a small garden in my father's yard, where they bloomed for many years. When I became older and had to buy plants to set out and found them not always true to name, it gave me a desire to grow plants that would be reliable. When I commenced to grow plants I determined to grow and sell plants that were true to name. By following this rule I feel that I have won and held the confidence of my customers to such an extent that old customers re-order year after year, and many new customers come in each year. Orders came from as far away as Ohio and Colorado.

In appreciation of my customers, I want to express to them, at this time, that they have always been as fair to me as I have tried to be with them.

Errors are sometimes made, and when an error occurs in your order, write and tell me and it will be corrected by return mail.

The seeds and nursery stock quoted in this catalogue are first quality in every particular and the plants are grown from strains of seeds of high quality, productiveness and trueness to name.

By fair dealings, we hope to be able to merit a share of your orders again this year.

Yours truly,

January 1, 1931.

T. G. BANNING.

A REQUEST

Our business has grown so much that it is all we can do to take care of it on week-days by working from 15 to 17 hours a day during the rush season, and on *Sunday, No Business, Please.*

FREE SEEDS

When you make out your order for Seeds, Onion Sets or Plants, if it amounts to \$1.00 or more, you may include, free one package of flower seed or pop corn seed. Write your choice on your order and mark it free seed.

Neosho Trees Growing

NURSERY STOCK

There is as much difference between Neosho Nursery Stock and the general run of nursery stock as there is between a wool suit of clothes and a cotton suit. Every tree or shrub that does not come up to a high standard is thrown on a brush pile and burned. We will be glad to compare prices, quality and sizes of this nursery stock with any stock grown anywhere.

You can buy Neosho Nursery Stock from this list at prices never given before for such number one quality of fruit trees and shrubs. The prices given are F. O. B. the Nursery, buyer paying the small express or mail charges.

Also prices on trees, shrubs, hedge plants, grape vines and fruit bushes, mailed post paid. Get acquainted offers including "Home Fruit Collections" and dollar offers are listed. You will be pleased with quality of stock you receive.

GUARANTEE

We guarantee the vitality and purity of the seeds we sell to the full amount of the purchase price. Even with the quality of the seeds sold, garden success depends largely upon cultivation, soil and weather conditions. Therefore, it is mutually agreed that in no case, shall we be liable for more than the amount actually paid for the seeds.

Safe arrival of your seeds guaranteed and we guarantee their quality to the amount of the purchase price. You can

have your money back any time in 1930 if you are not satisfied with any seeds you may purchase from me. All seeds mailed postpaid at prices quoted.

VEGETABLES BY MAIL

Each year we mail a number of orders for fresh vegetables and will be glad to quote prices on them delivered postpaid by parcel post.

We grow annually, several hundred bushels of carrots, turnips, parsnips, man-goes, hot peppers, sweet potatoes, tomatoes, green stringless beans, green lima beans, radishes, celery, garden sage. Any inquiry about any vegetables will be promptly answered.

POSTAGE ON PLANT ORDERS

Postal rates on plant orders as follows and postage should be added as given below: The postal department collects a service charge on all parcel post packages over eight ounces in weight. To all plant orders under \$1.00 please add 8 cents. To order over \$1.00 add 10c postage.

All seeds delivered postpaid at prices quoted.

MAIL ORDERS

Several years ago we placed small advertisements announcing that we would accept orders for plants to be mailed to any customer. At that time the advertisement stated that all plants were guaranteed to reach destination in good condition. If damaged in transit, that any

loss would be made good to customer without charge. This guarantee is still in force and we want all buyers, either old or new, to know that this means exactly what it states. Any buyer who receives an order in damaged condition, just drop me a card and your loss will be made good by return mail. That this rule has been followed is shown by the fact that the first mail order customers that we found by our small advertisements, are still regular buyers and their orders are welcome visitors each spring. We always attempt to fill all seed orders by return mail and plants immediately unless held up by bad weather. Sometimes all plants on an order are not ready so we send out at once all that we can and send balance as soon as ready. Mail orders are given just as careful attention as orders from customers who come personally for their order. We try to have all orders filled correctly, but errors will occur. Always keep a copy of your order and if you find any error in your order let me know by return mail and correction will be made at once. If you have the slightest complaint, we are more than anxious to make it right. But please remember we cannot know about it unless you tell us.

Each season many letters are received from satisfied customers, expressing their

See pages 26 and 27 for our Special Get-Acquainted Offers

satisfaction. Several letters are printed, but many more are received each year.

Lewistown, Mo., April 15, 1930.

Mr. T. G. Banning,

Brookfield, Mo.

Dear Sir: I am enclosing an order for seeds and plants. We have moved from Linneus to a farm near Lewistown. I have grown your plants for 11 years and always have such good luck with them.

Mrs. Lyell Harris, Lewistown, Mo.

Mr. T. G. Banning

Brookfield, Mo.

College Mound, Mo.

March 6, 1929

Dear Sir:

I am enclosing money order for one dollar and fifteen cents.

We have gotten plants from you for the last two years and was pleased with them in every way. Please send them as soon as the ground will do. Yours truly, Mrs. Harry Ratcliff.

T. G. Banning

Brookfield, Mo.

Callao, Mo.

June 5, 1929

Dear Sir:—We have gotten potato plants from you for two or three years and they are the nicest we have ever gotten from anyone. They were so nice and fresh, looked like they had just been freshly pulled. We also like your prompt service.

Yours truly, Mrs. H. L. Sipe.

LAWN GRASS

CHICAGO PARKS MIXTURE—A blend of lawn grass seeds which is positively the highest grade mixture that can be prepared. Composed of seed of the finest English and American grasses with white clover so that with even ordinary care it cannot fail to make a beautiful lawn. One pound will cover about 300 square feet of soil. The ground should be thoroughly pulverized and raked until it is fine and the surface level. If the soil is not naturally rich, it should be fertilized by sowing ten to fifteen pounds of fine sheep manure to each 200 square feet. After sowing the seed, rake or brush the seed in and finish with a roller. For quickly producing a permanent and velvety sward, this lawn seed cannot be excelled. Seed in bulk, $\frac{1}{2}$ lb., 30c; 1 lb., 55c. Seed in 15 oz. sifter top cans, 55c each.

SHADY NOOK LAWN GRASS—Usually it is quite difficult to obtain a good growth of grass under trees and in shady places. For sowing in such places this blend of lawn grass seed is recommended. It will quickly produce an abundant and even growth of beautiful grass. $\frac{1}{2}$ lb., 30c; 1 lb., 55c.

VEGETABLE SEEDS

It is with pleasure that we can again this year offer the same high grade garden seed. This list of seeds does not consist of a great list of varieties, but every one is a tested variety that has proven its worth in our North Missouri soils and climate. Plant any of these seeds, give them clean cultivation and your efforts will be rewarded with a bountiful harvest of quality vegetables. These strains of garden seed have been developed by a seed firm especially to meet the wants of market gardeners, for they are the most critical seed buyers in the country. Thousands of gardeners can recommend their worth. We buy the seed in bulk, and put them up in packages, so you get fresh seed each season. We have such faith in these seeds that any time in 1931 we will refund the purchase price for any seed with which any customer may be dissatisfied. All seed mailed postpaid at price quoted. No order too small for careful attention. Early orders solicited.

BEANS

BURPEE'S STRINGLESS GREEN POD—

The best of all green podded bush beans. Pods are round, entirely stringless and of the best quality. Plants are strong growers and produce tender pods early in the season. The seed is quite hardy and does not rot in cool spring weather near as easily as seed of wax varieties. I make three plantings of this variety during the growing season. The first, the last part of April, the other plantings about the middle of June and July. 3 oz., 10c; ½ lb., 20c; lb., 35c.

EARLY VALENTINE—Plants dwarf and prolific. Pods four inches long, round, meaty and brittle even when full grown. One of the best early green pod varieties. 3 oz., 10c; ½ lb., 20c; lb., 35c.

PENCIL POD BLACK WAX—Grows a tall, strong and vigorous bush with long, slender, straight, handsome pods, shaped much like a pencil. 3 oz., 10c; ½ lb., 20c; lb., 35c.

WEBBER WAX—An early stringless wax podded bean of high quality. A heavy yielder of pods, which are almost immune from blight and pod spot. Originated by a market gardener and it has met with favor wherever tried. 3 oz., 10c; ½ lb., 20c; lb., 35c.

BURPEE'S BRITTLE WAX—One of the most popular of wax beans. Hardy and produces a heavy crop of fleshy, meaty pods. Round pods, 6 to 7 inches long. Stringless and tender. Seed almost white. 3 oz., 10c; ½ lb., 20c; lb., 35c.

BURPEE'S KIDNEY WAX—Pods about six inches long, of high quality. Stringless, fleshy, yellow pods about six inches long. Ripens mid-season. Excellent for canning. 3 oz., 10c; ½ lb., 20c; 1 lb., 35c.

KENTUCKY WONDER WAX—One of the earliest of the pole wax sorts. Pods eight or more inches long, thick and fleshy, yellow attractive pods. 3 oz., 10c; ½ lb., 20c; 1 lb., 35c.

LAZY WIFE—One of the most productive and easily gathered of pole beans. The green pods measure 4 to 6 inches long and are broad and almost stringless. Seed is round and white. 3 oz., 10c; ½ lb., 20c; 1 lb., 35c.

RED SPECKLED CUT SHORT (or corn hill)—One of the best varieties to plant in hills of corn. A heavy cropper. 3 oz., 10c; ½ lb., 20c; 1 lb., 35c.

KENTUCKY WONDER POLE BEANS—The one best bean, as dry weather does not burn up the vine as it does the bush variety. Not as early as the bush beans but is a heavy yielder of fine beans, either to snap when young or hull later. Often will get two full crops in a season. Drive a lath or any kind of pole in the ground, plant three or four beans to a hill, and see how many beans you get to a hill. 3 oz., 10c; ½ lb., 20c; lb., 35c.

Burpee's Stringless Green Pod

MISSOURI WONDER—Pole beans that originated in Missouri. A hardy variety that yields a heavy crop in spite of adverse weather conditions. Pods are green, tender and almost stringless if the pods are picked while young. A great yielder of hulling beans. 3 oz., 10c; ½ lb., 20c; lb., 35c.

RED KIDNEY—One of the best dry shell beans; hardy and vigorous grower; heavy yielders of red beans. 3 oz., 10c; ½ lb., 20c; lb., 35c.

IMPROVED WHITE NAVY—A strain of seed developed in Western New York. A sure cropper and not only more prolific than the common white bean but of better quality. 3 oz., 10c; ½ lb., 20c; 1 lb., 30c; 5 lb., \$1.35.

HENDERSON'S BUSH LIMA—A very productive bush variety of small lima beans. Vines are literally covered with pods, holding two to four beans. 3 oz., 10c; ½ lb., 25c; 1 lb., 45c.

FLORIDA SPECKLED BUTTER—Will make an abundant crop under weather conditions that cause other varieties to fail. Seed speckled white and brownish red. A quick growing pole or climbing variety. 3 oz., 10c; ½ lb., 25c; 1 lb., 45c.

BEANS—(Continued)

BURPEE FORDHOOK BUSH LIMA—After a test of this variety for three years I believe it is the best and most productive of the large bush lima beans. It sets a good crop of pods with three to five large beans to a pod. Has the same good qualities of the large pole limas. 3 oz., 10c; ½ lb., 25c; 1 lb., 45c.

POLE LIMA—King of the garden. Strong grower with pods of four to five large beans of excellent quality. One of the best tall growing lima beans. 3 oz., 10c; ½ lb., 25c; 1 lb., 45c.

CAROLINA SMALL LIMA—Vines vigorous with many branches. Early and productive, bearing short pods with two to three beans. This pole variety is similar in size to Henderson's Bush Lima. 3 oz., 10c; ½ lb., 25c; 1 lb., 45c.

Webber Wax

BEETS

DETROIT DARK RED—Medium early, dark red in color, round with a small tap root. Beets are round, smooth and quality is of the best. Beets remain tender even when of large size. Fine for canning. Pkt., 5c; oz., 15c; ¼ lb., 40c.

MAMMOTH LONG RED—A large stock beet which is eaten in winter by all kinds of stock. Should be thinned in the rows to stand 6 to 8 inches apart. Pkt., 5c; oz., 15c; ¼ lb., 35c.

SWISS CHARD

Does not make a bulb but is grown for the leaves and stalks which are used for greens. Can be used all summer after spinach is gone. ½ oz., 10c; oz., 15c; ¼ lb., 40c.

Copenhagen Market

CABBAGE

EARLY JERSEY WAKEFIELD—Standard early pointed heads of medium size. Heads early, but does not stand long without bursting. Pkt., 10c; oz., 35c.

COPENHAGEN MARKET—Wilt resistant. A strain developed to be immune to cabbage diseases that now infest many gardens. Heads round with few outside leaves. Can be set as close as Jersey Wakefield. Heads stand a long time without bursting. Pkt., 10c.

GOLDEN ACRE—A dwarf growing variety of the Copenhagen type. One of the earliest heads about one-half size of Copenhagen Market. Fine quality. Pkt., 10c.

EARLY FLAT DUTCH—Old standard, flat-headed early cabbage. About two weeks later than the first early cabbage. Heads good size. Pkt., 10c; oz., 35c.

PREMIUM LATE FLAT DUTCH—Standard late cabbage for fall and winter use. Large, solid, flat heads. Pkt., 10c; oz., 35c.

DANISH BALL HEAD—A winter cabbage selected and perfected for many years by Danish gardeners. Hard heading and long keeping. Heads round as a ball, solid, fine grained and unexcelled flavor. Pkt., 10c; oz., 35c.

CAULIFLOWER

EARLY SNOWBALL—Good for either early or late, but to make good heads cauliflower needs plenty of moisture. This is an extra good strain. Pkt., 10c.

Detroit Dark Red

CELERY

GOLDEN SELF BLANCHING—Almost as early as White Plume, but stalks are larger and better quality. Pkt., 10c.

EASY BLANCHING—Excels in qualities that give self blanching celeries their value. It blanches earlier and easier than most other varieties but if put away green, it is the longest keeping variety known. Pkt., 10c.

GIANT PASCAL—Winter variety with large bunches of heavy ribbed stalks. Plants grow large and when blanched are tender and of fine flavor. Pkt., 10c.

CARROT

DANVERS—The smooth roots are deep orange color; flesh is sweet and tender and are easily pulled. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c.

CHANTENAY RED CORELESS—Tops medium sized, roots uniformly smooth, color a deep orange red, flesh crisp and tender and almost coreless. Medium early, a heavy cropper and is a fine winter keeper. Roots grow about six inches long and are easy to pull. Pkt., 5c; 1 oz., 15c.

SWEET CORN

GOLDEN BANTAM—Extra early, with golden yellow kernels of fine quality. Ears are medium size, just right for the table. $\frac{1}{4}$ lb., 10c; lb., 30c; 5 lbs., \$1.25.

LEONARD'S EARLY—A new early variety first offered in 1926. The large ears are a beautiful white with a fine sweet flavor and is ready for the table much ahead of many early varieties. This new variety is strongly recommended and growers will want to plant it again after once trying it. $\frac{1}{4}$ lb., 10c; 1 lb., 30c; 5 lbs., \$1.25.

STOWELL'S EVERGREEN—A favorite main crop variety excelling in productiveness and quality. Makes a large ear of sugary sweetness. $\frac{1}{4}$ lb., 10c; 1 lb., 30c; 5 lbs., \$1.25.

COUNTRY GENTLEMAN—A productive variety of high quality with deep, slender grains, irregularly arranged on the cob. $\frac{1}{4}$ lb., 10c; lb., 30c; 5 lbs., \$1.25.

BANTAM EVERGREEN—A cross between Golden Bantam and Stowell's Evergreen, with the quality of Bantam and part of the size of Evergreen. A good sized golden ear of first quality. $\frac{1}{4}$ lb., 10c; lb., 30c; 5 lbs., \$1.25.

EARLY EVERGREEN—The ears of this new corn grow eight inches long with 14 to 18 rows of kernels. It ripens ten to fifteen days ahead of Stowell's Evergreen and is equally as good for all purposes. Kernels are very sweet and tender. $\frac{1}{4}$ lb., 10c; 1 lb., 30c; 5 lbs., \$1.25.

START 1931 RIGHT FOR A PROSPEROUS YEAR BY PLANTING YOUR GARDEN WITH BANNING'S SEEDS AND PLANTS.

Golden Self Blanching

POP CORN

JAPANESE HULLESS or BABY BUSTER—Small white grained popping corn. A good yielder and a fine popper. Grains when popped are large and tender. Pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c.

GOLDEN QUEEN—Yellow variety, grains large and smooth. Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c.

CUCUMBER

IMPROVED LONG GREEN—Fruits are long, green. Fine for slicing. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c.

CHICAGO PICKLE—Small fruits, grown mostly for pickling. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c.

EARLY WHITE SPINE—Vines vigorous, early and productive. One of the best sorts for table use. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c.

DILL

MAMMOTH—The seed and foliage of this annual herb are used for flavoring. Grow some of it and put up your own dill pickles. Pkt., 10c.

Golden Bantam

Simpson Lettuce

LETTUCE

BLACK SEEDED SIMPSON—A loose, fluffy headed variety of quick growth and good quality. The best variety for outdoor planting. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c.

PRIZE HEAD—Crisp, tender leaves, shaded a reddish brown. Grows rapidly. A valuable sort for the home garden. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c.

HANSON—A quick growing lettuce with green, curly leaves. This lettuce is classed as a head lettuce. It makes a loose head that is creamy colored in the center and is about the only variety that I have had success in growing here to make any kind of a head. Stands hot weather well and stands a long time before going to seed. Pkt., 5c; 1 oz., 15c; $\frac{1}{4}$ lb., 40c.

LEONARD'S HEAD—A cabbage head variety for early and late summer planting. Small ribbed leaves, tender and crisp. Withstands heat well. Pkt., 5c; oz., 15c.

MELONS

ROCKYFORD—The netted green fleshed cantaloupes shipped in large quantities from the growing centers. Vines productive and melons are sweet to the rind. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; 1 lb., \$1.25.

TIP TOP—Muskmelon of large size with fine flavored salmon flesh. Pale green skin distinct-

ly ribbed and slightly netted. A melon that is tip top in quality, appearance and productiveness. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; 1 lb., \$1.25.

KLECKLEY'S SWEET WATERMELON—Vines vigorous and productive. Fruit medium size. This is the fine dark green melon which is grown so much in the Missouri bottoms. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.00.

TOM WATSON—Large, long melon of fine flavor. Produces a heavy crop. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.00.

STONE MOUNTAIN—Large, medium dark green, round melon of excellent quality. Flesh highly colored, solid with few seeds. Rind is tough enough to stand handling for nearby markets. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

GOLDEN HONEY—Best of yellow fleshed melons. Oblong in shape with white seeds. Rind is dark green. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

MUSTARD

GIANT CURLED—Used for greens. Plant some in your garden for greens. Hoe up any left before blooming and you will have no trouble with it seeding itself. Pkt., 5c; oz., 10c.

OKRA

Largely used in the south for soups, etc. Pods should be gathered and used when still young and tender. Seed should be sown after weather is settled and nights are quite warm. Pkt., 10c.

Bermuda Onion

ONIONS

BERMUDA ONION PLANTS—These plants produce large sweet onions in your own garden just as large as any grown in the south. It is surprising how quickly, with ordinary care, you can produce onions three to four inches in diameter. The plants will stand frost and should be set out as early as possible in the spring. To plant, sharpen a stick, make a hole about two inches deep, place the plant in the hole and press the dirt firmly around the plant with the stick. Keep the ground clean with shallow cultivation. Bermuda onions are not long keepers, but by handling the bulbs without bruising, they may be kept until late in the fall. The plants are supposed to be packed 100 to a bunch, but they vary a great deal. Some bunches will run over and some under the count. We always try to buy from reliable growers who try to give a good full count. If your plants do not count out reasonably close let us know and we will make up your shortage. Prices in Brookfield: 2 bunches 25c; 5 bunches, 60c; 10 bunches, \$1.15. Prices by mail postpaid: 2 bunches, 35c; 5 bunches, 65c; 10 bunches, \$1.25.

Rockyford

Prizetaker

ONION SETS

RED and AMBER—These sets are grown by a pioneer set grower. They are small, clean and have that fine bright color which is so much desired by all buyers. They are properly stored in the fall and reach planters in sound and unsprouted condition. One quart of these sets goes as far as two bunches of onion plants. If you want quick green spring onions, plant sets. Prices in Brookfield: Red, Amber, 2 qts., 25c. Prices by mail postpaid, 2 qts., 35c; 4 qts., 65c.

JAPANESE or EBENEZER—Mild onion, almost as mild as the Bermuda varieties. We sold 20 bushels of these sets last spring and had many favorable reports on the mild green onions they produced. If you like a mild green spring onion try these sets. Price in Brookfield, qt., 15c. By mail postpaid, 2 qts., 40c; 4 qts., 75c.

ONION SEED

Good onions of first quality can be grown by careful attention in preparing the soil, planting and cultivation, but above all else, the seed planted must be of high quality.

RED GLOBE—Dark red onions of a globe shape. Planted thinly they will make large size bulbs. An extra good strain. Pkt., 10c; oz., 25c.

WHITE GLOBE—A perfect globe shaped white onion of large size. Skin is a clear white. Pkt., 10c; oz., 25c.

PRIZETAKER—Large yellow onion with firm white flesh. Ripens up hard and firm, is fine grained and mild in flavor. A fine onion for fall market. Pkt., 10c; oz., 25c.

CRYSTAL WHITE and YELLOW BERMUDA—Grow your own Bermuda onions right from seed. Plant the seed early and you can transplant or thin them out and raise fine, mild onions for fall use. Pkt., 10c; ½ oz., 25c; 1 oz., 45c.

Moss Curled Parsley

WHITE PORTUGAL—American Silver Skin. Best sort to sow for growing small white pickling onions. Sown thickly, the small onions ripen small hard bulbs. Pkt., 10c; oz., 25c.

PARSNIPS

HOLLOW CROWN—Roots long, tender and sweet. The most popular parsnip. Pkt., 5c; oz., 15c; ¼ lb., 40c.

GUERNSEY—Roots tender with smooth, clear skin. I grew this variety last year on the recommendation of a customer and found it to be a fine variety. Pkt., 5c; oz., 15c.

PARSLEY

MOSS CURLED—Rich, green color, with leaves curled and twisted. One of the best varieties for garnishing. Pkt., 5c; oz., 15c.

Claudet Peas

PEAS

CLAUDET—Resembles Alaska peas in general habit and height of vine, ripens at the same time but with much larger pods. Seed is smooth and can be planted early. Plant this pea in place of Alaska. ¼ lb., 10c; 1 lb., 35c.

LEONARD'S POTTATCH—Strong, vigorous vines, twenty to twenty-four inches in height, dark green foliage with large pods three to four inches in length. Pottatch is a variety from which anyone may expect great things. No variety will produce more pods or shell out more peas. Peas are large and fit for the table early. ¼ lb., 10c; 1 lb., 35c.

LAXTONIAN—Largest podded of the dwarf growing varieties. Vines vigorous and productive, growing fifteen inches high. Foliage dark green with pods about four inches long. An early variety but as the seed is wrinkled, it should not be planted too early. ¼ lb., 10c; lb., 35c.

AMERICAN WONDER—Esteemed for earliness, productiveness and quality. Robust vines about ten inches high which produce quantities of good sized pods closely packed with peas. ¼ lb., 10c; lb., 35c.

LITTLE MARVEL—A pea rightly named. Vines grow 12 to 15 inches high. No earlier wrinkled peas and the quality satisfies everybody. Pods dark green, about three inches long, filled with six to seven peas. ¼ lb., 10c; lb., 35c.

TELEPHONE—Foliage large and coarse, light green in color. Height 3 to 4 ft., an early, tall growing variety. Seed large and wrinkled. One of the best climbing peas. Pods large and full. ¼ lb., 10c; 1 lb., 35c.

PEPPERS

RUBY KING—Large, sweet mangoes. Green at first, turning to deep crimson when ripe. Mangoes are always smooth, even in the largest ones. Pkt., 10c.

CHINESE GIANT—The largest sweet mango grown. Does not bear as much fruit as the Ruby King. Its mammoth size always commands attention. Pkt., 10c.

GOLDEN QUEEN MAMMOTH—Very large green peppers turning to a rich golden yellow when ripe. Sweet and an early variety. Pkt., 10c.

HOT CAYENNE—Peppers are two to three inches long, half inch in diameter and fiery hot. Pkt., 10c.

PIMENTO—Flesh sweet and thicker than any other pepper. Fruits are glossy green, turning to a beautiful dark red when ripe. Fruits measure two to three inches in diameter and one to two inches in depth. Many customers are now canning these sweet thick meaty peppers each fall. Pkt., 10c.

NEAPOLITAN—A medium size sweet pepper that is early and a sure cropper. Always sweet. This variety can always be counted on to ripen most of its crop early in the fall, thereby giving plenty of red mangoes for pickles. Pkt., 10c.

HARRIS'S EARLY GIANT—Earliest and most prolific of all large peppers. Fruit is size of Ruby King. Plants often have 12 or more large peppers on them at a time. A sure bearer even in dry weather. Pkt., 10c.

Sugar or Pie

PUMPKIN

LARGE CHEESE or KENTUCKY FIELD—One of the best for table use and very productive. Shape of fruit is flat, flesh yellow, thick and tender. Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 35c.

SUGAR or PIE—A rather small but handsome variety. Shape round, skin deep orange colored, flesh fine grained, sweet and superior for pies. Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 35c.

GREEN CUSHAW—Fruit large with crooked necks. Color creamy white, irregularly striped with green. Flesh light yellow, thick and sweet. Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 35c.

RADISH

CRIMSON GIANT—A large early variety of the round red type. Grows about twice the size of the early turnip type of radishes but is not as early. Remains solid longer than other round varieties. Pkt., 5c; 1 oz., 15c; $\frac{1}{4}$ lb., 40c.

Ruby King

FRENCH BREAKFAST—Olive shaped, scarlet radish with white tip. Tender and early. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c.

ICICLE—Early, long white radish. Flesh tender and crisp. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c.

SAXA—An extremely early round red radish of fine quality and no radish makes a prettier bunch than this variety. This radish is a week earlier than any radish that we have ever grown. They are ready to pull when the tops are small and are very crisp and tender. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c.

WHITE TIPPED SCARLET TURNIP—Early round radish with white tap root. Flesh tender and snappy. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c.

WHITE STRASBURG—A popular summer radish with long, thick, white roots. Remains solid for some time after reaching full size. Pkt., 5c; 1 oz., 15c; $\frac{1}{4}$ lb., 40c.

WHITE CHINA OR CELESTIAL WINTER—Roots are long with beautiful white skin and flesh is so white as to attract attention even among other white varieties. Radishes grow large but even in the largest size they are sweet, tender and solid. Plant seed at late turnip planting time. Use them through the fall and dig and store balance the same as potatoes and turnips. I never grew them until last fall but they are certainly fine. Pkt., 5c; oz., 15c.

SAGE

Mammoth Broad Leaved Garden Sage used for seasoning. Makes a good sized bush the first season and will live over the winter if protected from severe cold. Pick the leaves before frost and cure in the shade. Pkt., 10c.

White Tipped

SALSIFY

SALSIFY or **OYSTER PLANT**—This is grown for fall and winter use and is highly esteemed for the fine flavor of the roots. The name of oyster plant has been given to Salsify because the roots have an oyster-like flavor. Sow the seed thinly in shallow drills early in the spring. Pkt., 10c; oz., 20c.

SPINACH

VICTORIA — Early large leaved variety. Should be planted early. Pkt., 5c; oz., 10c; ¼ lb., 40c.

Warty Hubbard

SQUASH

WARTY HUBBARD—Large size winter squash with a hard, warty skin. Splendid for baking. Pkt., 5c; oz., 15c; ¼ lb., 40c.

FORDHOOK—A squash small in size that is fine for cutting in halves and baking. Fruits are 6 to 8 inches long, slightly ridged, and a light lemon in color. Flesh fine grained, free from fiber and of a buttery flavor. Pkt., 5c; oz., 15c.

TOMATO

EARLIANA—Extra early tomatoes. The first fruits are the best but the size soon runs small. Plant a late variety to come on when the best fruits are gone. Pkt., 10c; oz., 35c.

CHALK'S EARLY JEWELL—Not quite as early as Earliana, but far better quality. Fruit is smooth and ripens up evenly to the stem. Pkt., 10c; oz., 35c.

Beefsteak

Spinach

JUNE PINK—Best described as a pink Earliana. Ripens with Earliana but fruit is better quality. Pkt., 10c; oz., 40c.

MARGLOBE—Wilt and rust resistant, a new widely known tomato. One of the best varieties for producing a crop under adverse weather conditions. A fine second early and main crop tomato. Pkt., 10c; oz., 40c.

PONDEROSA—Large, meaty variety of tomato with few seeds. No garden complete without this tomato. Ripens early for such large fruit. Pkt., 10c; oz., 45c.

STONE—A leading variety for main crop, with large smooth fruit. Color bright scarlet. Ripens evenly to stem. One of the best varieties for canning. Pkt., 10c; oz., 35c.

BEEFSTEAK—A large red tomato of few seeds and much meat. A great favorite with many customers. Fruit ripens mid-season. Pkt., 10c.

RED HEAD—A fine early red tomato ripening as early as Chalk's Early Jewel. Fruit is large and smooth. A production variety of solid quality tomatoes. Pkt., 10c; oz., 35c.

GOLDEN PONDEROSA—Similar in size to Ponderosa except fruit is golden yellow tinged on blossom side with pink. Pkt., 10c.

Purple Top Strap Leaf

TURNIP

PURPLE TOP WHITE GLOBE—An early turnip of globe shape which is rapidly taking the market away from all other varieties. Pkt., 5c; oz., 10c; ¼ lb., 35c; 1 lb., \$1.00.

EARLY PURPLE TOP STRAP LEAF—An early turnip used extensively for table use. The leaves are few and upright in growth. Roots are flat, purple above ground, flesh fine grained. Pkt., 5c; oz., 10c; ¼ lb., 35c; 1 lb., \$1.00.

RUTABAGA

IMPROVED PURPLE TOP—Hardy and productive. Roots are globular with a small tap root and a small neck. Color bright yellow. Pkt., 10c; oz., 35c.

FLOWER SEEDS

A Home can hardly be called a home without some bright colored flowers blooming in the yard, and adding cheer to the surroundings. Flowers, when care is exercised, are not hard to grow, and every home and every farm should abound in them.

ASTERS

QUEEN OF THE MARKET, MIXED—Early flowers double and large on stems of gold length. Fine for cutting. The best colors blended in this mixture. Pkt., 10c.

AMERICAN BRANCHING—Plants grow 2½ to 3 feet high, branching and robust habit. Flowers large and double. Mixed colors. Pkt., 10c.

CALENDULA

DOUBLE ORANGE KING—Seeds may be sown in shallow drills in flower beds when trees are starting to leaf out. Excellent for beds or borders and they last a long time as cut flowers in water. Pkt., 10c.

CASTOR BEANS

Large variety, often growing ten to twelve feet high. Leaves are extra large. Seed should not be planted in the open ground until maples are leafing out. Pkt., 10c.

COSMOS

EXTRA EARLY MAMMOTH FLOWERING—Mammoth flowers in pink, white and crimson are produced by this mixture. One of the best flowers for cutting. Pkt., 10c.

CYPRESS VINE

Beautiful and popular tender climbing vine with fern-like foliage and many scarlet and white star-shaped flowers. Pkt., 10c.

GOURDS

Mixed varieties. Fast growing climbers with ornamental foliage and singular shaped fruit. Pkt., 10c.

Larkspur

GYPSOPHILA

(Baby's Breath) Pretty, free-flowering plants. Their misty white panicles of bloom are used for mixing with other cut flowers. Pkt., 10c.

HYACINTH BEAN

(Delichos). Mixed. Annual climber of rapid growth with Wistaria-like clusters of flowers followed by bronzy-purple seed pods. Pkt., 10c.

HELICHRYSUM

(Strawflower). Finest mixed. Flowers are round, flat and very full of short incurved petals. Their chief value is for winter use in vases and baskets. Cut blossoms with long stems when they are about a third open. Hang bunch, head down in a cool place until dry. Pkt., 10c.

HOLLYHOCKS

Fine mixed varieties of old time flowers. Seed should be sown in June or July to have flowering plants the next summer. If sown in the house early in the spring, they will bloom the first year. Pkt., 10c.

LARKSPUR

Double mixed. Free flowering annuals with fine spikes of flowers. They do best in cool and moist soil. Pkt., 10c.

MARIGOLDS

This is an old favorite free flowering annual of easiest culture. They have uniformly large, yellow orange colored flowers. They do best when grown with full exposure to the sun. Pkt., 10c.

NASTURTIUMS

DWARF MIXED—One of the best for plenty of flowers. Bright colored flowers are borne with profusion. Fine for edging beds. There is no flower that will give such an abundance of bloom for the little care they take. ½ oz., 10c; oz., 15c.

TALL MIXED—These are fine for growing in solid masses. Will grow on fences or can be let trail loose on the ground. ½ oz., 10c; oz., 15c.

PANSY—Giant Trimordeau. Blossom large, colors from the lightest shade to the darkest purple. Pkt., 10c.

Asters

Petunia

PETUNIA

GOOD HYBRIDS MIXED—For out door planting few plants are equal to this class of flowers. They bloom early and continue to flower through the summer. Give them rich soil and a sunny location. Pkt., 10c.

PINKS

CHINESE DOUBLE MIXED—Flowers of these double pinks are borne on upright strong stems from mid-summer until frost. Pkt., 10c.

PORTULACA

MIXED COLORS—Brilliant garden annual, six inches high blooming profusely from spring until fall. Colors range through red, yellow, pink, white and variegated. When in bloom there is nothing prettier than a bed of these low growing plants. Pkt., 10c.

SALPIGLOSSIS

(Painted Tongue). A fine annual of easiest culture. They like a sunny position in any good

soil. Grow two feet high. Splendid for cut flowers. In rich coloring, flowers vie with orchids. Mixed colors. Pkt., 10c.

SUMMER CYPRESS

(Burning Bush). A fine annual-growing plant with light green foliage turning to red early in fall. Makes a fine hedge as it grows fast and can be trimmed to any shape desired. Pkt., 10c.

SWEET ALYSSUM

LITTLE GEM—A dwarf compact plant covered with a mass of small white flowers from spring until fall. Only grows a few inches tall, and is fine for edging beds or walks. Pkt., 10c.

SWEET PEAS

SPENCER VARIETIES MIXED—An extra good mixture of fine Spencer Sweet Peas. This seed produces large flowers on good stems. Many customers have been pleased with the quality of this seed. Pkt., 10c; oz., 25c.

VERBENAS

MAMMOTH CHOICE MIXED—Verbena thrive in almost any situation or soil. They make attractive borders and beds and are continuous bloomers. Pkt., 10c.

ZINNIA

ZINNIAS MIXED—A blend of large dahlia flowered Zinnias in several colors. An old-fashioned flower which has been greatly improved. Zinnias will stand more neglect and drought and produce more flowers than most any other flower. Pkt., 10c.

GIANT ZINNIA—This is a strain of large Zinnias. Flowers are large, with very few single blossoms. No better strain of this seed can be produced anywhere. For largest blossoms the plants should be thinned to stand one foot apart. The small plants can be easily transplanted. Have this seed in two colors, red and rose. Pkt., 15c.

VEGETABLE PLANTS

We have been growing plants for about fifteen years, and it has always been our rule to grow good ones from select strains of seed, and to attempt each year to give our customers better plants. We do not try to see how cheap plants we can grow, but rather try to produce ones that will give good crops when set out and amply repay the buyer for the small amount paid for the plants.

We use seed which we know is true to name and for such seed we have to pay a good price.

Cheap seed is often the most expensive for any planter to use as it is very poor crop insurance. The price asked for plants is less than is often asked by many large growers.

Weather conditions being favorable, all plants ready about May 1. By continued plantings, we endeavor to have plants until July 1.

POSTAGE ON PLANTS

Postal rates on plant orders are as follows and postage should be added as given below. The postal department collects a service charge on all parcel post packages over eight ounces in weight. To all plant orders under \$1.00, please add 8 cents. To orders over \$1.00 add 10 cents postage. All plants are guaranteed to reach customers in good order or any damage will be made good on receipt of a postal card giving amount of loss.

PLANTGARD

An insecticide which will not burn or injure the foliage on flower or vegetable plants, but is sure death to insect pests that sap the vitality of plant life. Comes in powdered form all ready to dust on plants. Two sizes, 35c and 60c.

SEED DISINFECTION

All seed used to grow plants is disinfected before planting. We use Semesan to sterilize the seed against all disease spores that possibly might be on the seed coats. Seed thus treated sprouts quickly, comes up clean and disease free, grows rapidly when set out in your garden and produces earlier and better crops. Last year seed sterilization was given a thorough trial, and never again will we plant any seed without thus preparing the seed.

May 5, 1930.

Banning's Seed House:

I have always received fine plants from your house and had earlier tomatoes last year than any of my neighbors from Chalk's early Jewell and they were loaded with green tomatoes when frost came. Mrs. W. C. Riddle, Milan, Mo.

TOMATO

EARLIANA—Extra early variety with small, slender vines. Sets fruit early. Tomatoes good size at first but last of crop is small. Do not plant all of your garden to this variety.

CHALK'S EARLY JEWELL—A second early variety from a week to ten days later than Earliana. Fruits large and smooth. Bears over a long season and last fruits are of the same high quality as the first.

RED HEAD—An early tomato possibly a little earlier than Jewell. Fruit smooth, of medium size and of fine quality.

JUNE PINK—Best described as a pink Earliana. Ripens as early as Earliana, but fruit is of better quality.

STONE—A large, smooth red tomato and main crop variety for canning. Vines bear a heavy crop over a long season.

BUCKBEE'S BEEFSTEAK—An extra large smooth tomato, fine for slicing and canning. Few seeds.

MARGLOBE—Wilt and rust resistant, new widely known tomato. One of the best varieties to produce a crop under adverse weather conditions. Is a second early and main crop tomato.

OKHEART—Large tomato, shaped like a beef heart. Sweet flavor and few seeds. Not a heavy yielder but an attractive sort.

PONDEROSA—Very large, purple colored fruit. The large fruits are extra fine for slicing. No garden complete without this variety.

GOLDEN PONDEROSA—Fruit large and solid. Color a beautiful golden yellow, sometimes with a blush of red. Superior quality.

All tomato plants 15c per dozen; 50 for 50c; 95c per 100.

POTTED TOMATO PLANTS

EARLIANA, JEWELL, RED HEAD, JUNE PINK, STONE, BEEFSTEAK, PONDEROSA—50c per dozen. By mail 65c per dozen.

CABBAGE

COPENHAGEN MARKET—Wilt resistant strain. Early round heads, as early as Jersey Wakefield and will average twice the size. Fine quality.

EARLY FLAT DUTCH—Second early. Flat heads. An improved strain.

GOLDEN ACRE—Similar to Copenhagen Market but heads are smaller and a week earlier. Heads round, solid and quality of the best.

PREMIUM LATE FLAT DUTCH—Standard late cabbage. Large flat heads.

DANISH BALL HEAD—A winter variety. Hard heading and long keeping. Heads round as a ball, solid, fine grained and good flavor.

FROST PROOF CABBAGE PLANTS

We do not handle any of the southern grown plants, for a good home grown plant set out after April 15 will do far better than the southern grown plants. Before sending out any cabbage plants we get them hardened to outside weather conditions so that they will stand frosty weather without killing. Frost-proof plants are generally ready April 1 to 10. Jersey Wakefield, Copenhagen and Golden Acre.

All cabbage plants, 12 for 10c; 25 for 15c; 50 for 25c; 100 for 50c.

CAULIFLOWER

EARLY SNOWBALL—10c per dozen.

SWEET POTATOES

RED BERMUDA and **NANCY HALL**—We grow our sweet potato plants each year from certified seed. This seed generally costs more than common seed, but plants grown from this seed are worth more. Nancy Hall is a fine yellow, vineless sweet potato. Yields well in all North Missouri soils. Red Bermuda is an early variety, yielding a good crop of good sized red potatoes. Each, 50c per 100.

PEPPERS

Sweet peppers grow in popularity each year for use in salads, cooking and pickles. A few plants will usually supply all the peppers a family will use. Chinese Giant, Ruby King, Golden Queen Mammoth and Harris's Early Giant are all large sweet peppers. Neapolitan is early but smaller than the later kinds. Pimentoes are small but meat is much thicker. Hot cayenne are small hot peppers used for seasoning chilli sauce and pickles. All varieties, 15c doz.

EGG PLANT

NEW YORK PURPLE—Fruit large and smooth. 15c per doz.

SAGE

Plants of Mammoth Broad Leaved Sage grown in pots. Ready about the middle of May. 6 for 25c.

CELERY

Many home owners think celery is a very difficult vegetable to grow in our North Missouri soil. It may not be possible to grow celery on a large commercial scale, but no home garden owner need deprive himself of this luxury. Celery can be classed as a luxury when you grow it at home and get that fine flavor which is completely lacking in the shipped article. Any garden soil that will grow good lettuce and cabbage may easily produce a family supply of this welcome delicacy. Many home owners are finding this out about celery as you will see in the two unsolicited letters. Last year we sold 30,000 celery plants and will have 100,000 for sale this year. Set the plants 6 to 8 inches apart in a straight row. Keep them hoed clean. When celery is a foot high toward the last of August gather each stalk up straight and tie it at the top with a string. To blanch it use boards against the rows or tie paper around each stalk, or use a tile or anything else that will exclude the light from the stalks and the self-blanching kinds will be ready to use in a short time.

Golden Self Blanching and Henderson's Easy Blanching and White Plume for fall use, Giant Pascal for winter use. Plants ready in May and June. 25 plants, 15c; 50 plants 25c; 100 for 50c.

Cora, Mo., March 24, 1927.

Mr. T. G. Banning.
Dear Sir:

The celery plants can be sent when their season comes. I raised some of the finest celery last year from your plants I ever saw. Check for \$3.65 enclosed for seeds and plants.

Mrs. N. C. Morris.

Marceline, Mo., June 22, 1927.

Dear Mr. Banning:

I hope I have not waited too long for my celery plants. This is the third year I have ordered celery plants from you and have always had fine celery for use up until Christmas.

Please send me 100 Golden Self Blanching and 50 Giant Pascal. I don't like the plants too small, please. I am enclosing check for same. I thank you.

Mrs. Arthur Jobson.

FLOWERING PLANTS and BULBS

These plants ready about May 1 for setting out.

CANNAS

Three varieties ready early in May. These cannas are the best three kinds which were grown in the Brookfield Park Oval Canna beds during the summer of 1928. All free bloomers and strong growers. Grow 3 to 4 feet tall.

KING HUMBERT—Bronze leaves. Large scarlet flowers. Height 4 feet.

YELLOW KING HUMBERT—Large green foliage with deep yellow flowers spotted with red. Height 4 feet.

THE PRESIDENT—Large green foliage growing to a height of 4 feet. Flowers a rich glowing red.

Any Canna, 20c each; 6 for \$1.00.

GLADIOLI

More gladioli are planted each year. Easy to grow. Just plant the bulbs, four or five inches deep, hoe them a little and you cannot help having flowers for your home. Blooming size bulbs, mixed colors. 12 bulbs for 35c; 25 bulbs for 65c; 50 bulbs for \$1.00.

ASTERS—Queen of the market and American Branching. Both varieties mixed colors. Doz., 20c.

PANSIES—In bud and bloom, 6 for 25c.

SALVIA or SCARLET SAGE—6 for 25c.

SNAP DRAGON—Mixed colors, 6 for 25c.

VERBENAS—6 for 25c.

ZINNIAS—Dahlia flowered, mixed colors, 1 doz., 20c; 3 doz., 50c.

PEONIES

Prices F. O. B. Neosho

The most widely planted and popular of all hardy flowers. Easy to grow, all they ask is good soil and winter mulch. Plant only 2 to 3 in. deep. Plant in Sept. and Oct. Double Blossoms—Strong Divisions, 3 to 5 eyes.

IRIS

PREPAID PRICES

These exquisite flowers are easily grown. They pay big dividends in any garden. Be careful not to plant them too deep. The crown should be covered only 2 inches deep.

The figure following the name of the variety is the rating by the American Iris Society. Heights of the stalks are given in inches.

GERMANICA VARIETIES—Named in order of blooming.

BLACK PRINCE (78)—24 in. Dark purplish blue; blooms nearly 30 days, beginning almost a month ahead of Orientalis.

PERFECTION (78)—30 in. Purple and lavender, very beautiful.

SAN SOUCI (40)—24 in. Canary yellow and crimson brown.

Peonies

CELESTE—30 in. Pale azure blue, large.

MADAME CHEREAU (74)—30 in. White frill-
ed with clear blue.

SIBERIAN—

ORIENTALIS—18 in. Intense blue. Narrow
leaves.

PRICE—Per 3, 50c; Per 12, \$1.75, Per 25,
\$3.00.

JAPANESE IRIS (Iris Kaempferi)—Flowers
are rather flat and wide, appearing after the Ger-
man varieties are through. Stalks are 2 to 3 ft.
tall.

GEKKA-NO-NAMI—Glistening white. (Waves
under Moonlight).

KOKO-NO-IRO—Purple petals, yellow center.
(Purple and gold).

MONIJI-NO-TAKI—Rosy crimson, feathered in
white, double. (Maple Waterfall).

UCHIU—Cerulean blue, golden center. (Uni-
verse).

Three each of four colors. Our selection.

IRIS—Siberian 15 for \$1.00 postpaid

DUTCH BULBS

Every spring when tulips, hyacinths and nar-
cissus are in their full glory of bloom folks say:
Oh, if I had only planted some bulbs last fall.
Just look how pretty the flowers are in the
yards of my neighbors. These bulbs come from

Holland and can only be planted in the fall
months. It is hard to set a price on these
bulbs at this time of the year. Last fall tulips
were cheaper and better than they had been for
several years and we sold them a great deal
cheaper than we expected to be able to do so.
Send in your orders and we will quote the prices
about Sept. 1.

TULIPS—Darwin tulips bloom a little later
than the early varieties, but are better and hold
their color and freshness for a long time. There
is no flower that makes more of a show than
Darwin tulips on their tall stems.

HYACINTHS—The fragrant flowers push
through the ground almost before the leaves
of the plant. A bouquet of them will perfume a
house. Mixed colors for bedding.

NARCISSUS or **DAFFODILS**—What is finer
than some of these early yellow flowers blooming
by your doorstep in the spring, almost before
the snow is gone.

LILIES

SELECT NURSERY STOCK

Nursery stock quoted in this list is grown by the Neosho Nurseries Co., of Neosho, Mo., in
the heart of the Ozark Fruit Country, where all fruits reach perfection in growth and quality. This
nursery is one of the most reliable in the country with over 800 acres in test orchards and nursery
fields.

You would buy their
trees if you could see
them. They look good.
They are good, clean and
healthy, with plenty of
roots, with sturdy trunks,
uniform in size, graded
by diameter two inches
above the ground, and
full of vitality. You will
be pleased with their
small fruits and shade
trees, roses, shrubs, vines
and perennials. They
guarantee satisfaction on
arrival of your order.
They try to be longer on
performance than they
are on promises.

This nursery stock is
not to be compared with
the small stock advertised
by radio and mailed out
by some firms. Why buy
small size trees and
shrubs by mail when for
almost the same price,
you can get full size
stock which will be two
or three years ahead of mailing size. We filled
a number of mail orders for nursery stock last
spring with satisfaction to all.

Prices on fruit trees are usually quoted ac-
cording to height only. Obviously that is a poor
measure of value because the planter cuts off the
top when transplanting. That is why the Neosho
Nursery Co. grades and sells their fruit trees by
diameter of the trees, measuring two inches above
the ground. It is the part of the tree left after
transplanting that counts in making a good,
thrifty fruit tree.

Delivering Neosho Nursery Stock

I have sold many orders of this nursery stock
and have received many compliments on the qual-
ity of stock delivered to customer.

PRICES

The prices quoted here are F. O. B. Nurseries
at Neosho, Mo. The prices made are for payment
in advance and orders are shipped direct to cus-
tomers by mail or express, according to size of
package.

The nursery guarantees your satisfaction upon

arrival of your order. If you should receive any unsatisfactory stock heel it in subject to disposal by nursery and they will replace it free. All claims should be made on arrival of goods.

APPLES AND CRAB APPLES

EARLY SUMMER—Liveland Raspberry, Yellow Transparent. **MIDSUMMER**—Red Astrachan, Duchess of Oldenburg, Sweet Bough. **LATE SUMMER**—Maiden Blush, Wealthy. **FALL**—McIntosh*, Wagener*. **WINTER**—Delicious, Winter Banana, Ben Davis, Baldwin*, Northern Spy*, Senator (Oliver), York Imperial, Champion (Collins). **CRABAPPLES**—Florence, Excelsior, Hyslop, Whitney.

Varieties marked * are adapted only to northern climate.

Burbank Plum

Delicious Apple

RICHARED (Trade Marked) DELICIOUS

This strain of common Delicious colors up a solid red two or three weeks earlier but is identical in flavor, size, shape and texture. The Richared originated near Wenatchee, Washington, in the orchard planted in 1910 of G. T. Richardson. Trees of the third generation grown from this original tree have borne fruit true-to-strain.

Wherever the common Delicious thrives, this Richared will prove more profitable because it can be picked and marketed two weeks earlier with solid red color. Windfalls are avoided and the keeping quality is better.

Purchasers are required to sign an agreement not to sell or give away or dispose of any buds or scions from these trees.

GRAPES

One of the best fruits to eat right from the vine and one of the easiest to grow. How would you like to have a grape arbor like the one shown in the photograph? This is an actual photograph of a grape arbor right here in Brookfield. The camera was small so only five vines show, but there are six on each side. These one year vines were set out in April, 1922, and the photograph was taken in October, 1923, or a little less than eighteen months after planting. In 1923 the arbor bore all the grapes one family could use. Twelve Concord grape vines to plant an arbor like this cost only \$1.50. Any home owner can get the same results in almost any kind of soil. It is simply a case of doing it. There is a place for grape vines in every yard. These vines came from the Neosho Nursery Co., and I can sell you more just like them.

RHUBARB

Strong Divisions, Each 15c; 5 for 70c.

ASPARAGUS

WASHINGTON—This strain of asparagus was selected by Department of Agriculture, Washington, D. C., and has proved to be almost immune to rust a disease that has weakened and killed much asparagus. It is now considered the best in asparagus. To set roots, dig a small trench, deep enough so that the roots can be spread out, and the crowns three inches deep. Any good black garden soil is all right to set asparagus in. Plant roots a foot apart and make rows two to three feet apart.

2 yr. roots, 12 for 40c; 25 for 75c; 100 for \$2.00.

Mastodon Strawberries

STRAWBERRIES

Finest of all fruits. Every garden should contain a strawberry patch. A very small plot of ground will furnish all the berries a family can use on the table and some to preserve. With strawberries in your garden you can have fresh berries whenever you want them. To plant a bed, make rows 2½ feet apart and set the plants 15 inches apart in the rows. If you want to put out a patch large enough to cultivate with horse tools, make rows 3½ feet apart and set plants 15 inches apart in the rows. When cold weather comes the following December, cover the strawberries two inches deep with straw or prairie hay. We have two spring bearing varieties, Senator Dunlap and Aroma.

DUNLAP and **AROMA** are two fine mid-season berries either of which will bear a large crop of fine fruit. Strong thrifty plants. 50 plants 50c; 100 for 85c; 200 for \$1.65.

MASTODON—A new everbearing variety which I believe is the best and largest strawberry of the everbearers. It has been tried out generally and proved its good qualities. We can fill orders for a limited quantity. 25 for 65c; \$2.50 per 100.

Cumberland Raspberries

SHRUBS

SHRUBS—Prices F. O. B. Neosho

This list contains the best grades, well branched and well rooted.

(For smaller sizes see mail sizes, page 27.

The 5-Rate applies on 5 shrubs of one or more varieties.

Figures following names of varieties are heights when full grown.

ALTHEA or **ROSE OF SHARON**—(Hibiscus Syriacus)—White, Pink or Red, double flowers, July to September. 2-3 ft., each 45c; 5 at 40c each; 25 at 35c each; 3-4 ft., each 55c; 5 at 50c each; 25 at 45c each.

BARBERRY, JAPANESE (Berberis Thunbergi)—Scarlet berries and leaves in fall. 18-24 in., each 35c; 5 at 30c each; 25 at 25c each; 2-2½ ft., each 45c; 5 at 40c each; 25 at 35c.

BARBERRY, RED LEAVED (Berberis Thunbergi Atropurpurea)—Red foliage all season. 12-15 in., each 75c; 5 at 70c; 25 at 65c each; 15-18 in., each 90c; 5 at 80c each; 25 at 70c.

Althea or Rose of Sharon

BUTTERFLY BUSH (*Buddleia Magnifica*) 4-5 ft. Lilac flowers, June Sept. 2 Yr. No. 1. each 50c; 5 at 45c each; 25 at 40c each.

CORALBERRY (*Indian Currant*)—Red berries fall and winter. 2-3 ft., 35c each; 5 at 30c each; 25 at 25c each.

DEUTZIA GRACILIS—White 2-3 ft. 18-24 in. 45c each; 5 at 40c each; 25 at 35c each. White flowers in late April. 15-18 in., each 35c; 5 at 30c each; 25 at 25c each.

DEUTZIA LEMOINEI—3-5 ft.—White flowers in May. 2-2½ ft., each 55c; 5 at 50c each; 25 at 45c each. 18-24 in., 45c each; 5 at 40c each; 25 at 35c each.

DEUTZIA, PRIDE OF ROCHESTER—6-8 ft. White double flowers in May. 3-4 ft., each 55c; 5 at 50c each; 25 at 45c each. 2-3 ft., each 45c; 5 at 40c each; 25 at 35c each.

DOGWOOD, REDTWIGGED—6-10 ft. (*Cornus Alba Siberica*)—Valuable for bright red bark. 2-3 ft., each 50c; 5 at 40c each; 25 at 35c each. 3-4 ft., each 65c; 5 at 60c each; 25 at 55c each.

Deutzia, Pride of Rochester

DWARF BUSH HONEYSUCKLE — 3 ft. (*Diervilla trifida*)—Yellow flowers, June. 18-24 in. Each \$1.00; 5 at 90c each; 25 at 80c each.

ELDER GOLDEN—8-12 ft. (*Sambucus Canadensis Aurea*)—Yellow foliage all season. 2-3 ft., each 65c; 5 at 60c each; 25 at 55c each; 3-4 ft., 80c each; 5 at 70c each; 25 at 60c each.

GLOBE FLOWER—4-5 ft. (*Kerria Japonica flore-pleno*)—Double golden yellow flowers. May Sept. 2-3 ft., each \$1.00; 5 at 90c each; 25 at 80c each. 18-24 in., each 80c; 5 at 70c each; 25 at 60c each.

HONEYSUCKLE, EVERBLOOMING—15-20 ft. 2 Yr. (*Lonicera heckrottii*)—Flowers purple outside, yellow inside, July-Sept., each 80c; 5 at 70c each; 25 at 60c each.

Hydrangea, P. G.

HONEYSUCKLE, Japan Bush—6-8 ft. (*Lonicera Morrowi*)—White flowers in May, then red berries. 3-4 ft., each 65c; 5 at 60c each; 25 at 50c each. 2-3 ft., at 55c each; 5 at 50c each; 25 at 45c each.

HONEYSUCKLE, TARTARIAN, Pink—6-10 ft. (*Lonicera Tartarica*)—Pink flowers in late April, then red berries. 3-4 ft., each 65c; 5 at 60c each; 25 at 55c each. 2-3 ft., each 55c; 5 at 50c each; 25 at 45c each.

HONEYSUCKLE, FRAGRANT—6-8 ft. (*Lonicera Fragrantissima*)—Dark green leaves, almost evergreen. 3-4 ft., each 65c; 5 at 60c; 25 at 55c each. 2-3 ft., each 55c; 5 at 50c each; 25 at 45c each.

HYDRANGEA ARBORESCENS GRANDIFLORA—(Hills of Snow) 3-6 ft.—White, double flowers, June to August. 2-3 ft., each 65c; 5 at 60c; 25 at 50c each. 18-24 in., each 55c; 5 at 50c each; 25 at 45c each.

HYDRANGEA PAN. GRANDIFLORA—(Tree Form)—3-4 ft., each \$1.50; 5 at \$1.35 each; 25 at \$1.25 each.

Fragrant Honeysuckle

If you only need one tree, vine or shrub, your order will be given careful attention. No order too large or too small. A small amount spent for trees or shrubs will add many times their cost to the value of your home.

HYDRANGEA PAN. GRANDIFLORA—6-10 ft. (Bush Form)—White flowers turning to pink, then bronze, July to October. 2-3 ft., each 65c; 5 at 60c each; 25 at 55c each. 18-24 in., each 55c; 5 at 50c; 25 at 45c each.

JAPAN QUINCE (*Cydonia Japonica*) 3-5 ft. Scarlet flowers, early April. 2-3 ft., each 60c; 5 at 55c each; 25 at 50c each. 18-24 in., each 45c; 5 at 40c each; 25 at 35c each.

LILAC—BUDDED FRENCH (Bush Form)—6-10 ft. (*Syringa Hybrid*)—Dark purplish red, double white, or double blue. Large flowers in late April. 3-4 ft., each \$1.75; 5 at \$1.50 each; 25 at \$1.35 each. 2-3 ft., each \$1.50; 5 at \$1.35; 25 at \$1.25 each.

LILAC—COMMON PURPLE—8-15 ft. (*Syringa Vulgaris*)—Flowers early spring. 3-4 ft., each 80c; 5 at 75c; 25 at 70c each. 2-3 ft., each 55c; 5 at 50c; 25 at 45c each.

MOCK ORANGE—Sweet, 8-12 ft. (*Philadelphus Coronarius*)—Fragrant white flowers in May. 3-4 ft., each 55c; 5 at 50c; 25 at 45c. 2-3 ft., each 45c; 5 at 40c; 25 at 35c each.

SNOWBALL (*Viburnum Opulus Sterile*)—8-12 ft.—Large clusters white flowers in May. 2-3 ft., each 65c; 5 at 60c each; 25 at 55c each.

Mock Orange, *Philadelphus Coronarius*

SPIREA, DWARF WHITE (*S. Callosa Alba*) 2-3 ft. White flowers all summer. 15-18 in., each 55c; 5 at 50c each; 25 at 45c each.

SPIREA, DWARF PINK (*S. Callosa Rosea*) 2-3 ft. Light pink flowers in summer. 18-24 in., each 55c; 5 at 50c each; 25 at 45c each.

SPIREA, FROEBEL'S (*S. Froebeli*) 2-4 ft.—Bright crimson flowers in summer. 2-2½ ft., each 55c; 5 at 50c each; 25 at 45c each. 18-24 in., each 45c; 5 at 40c each; 25 at 35c each.

SPIREA, VAN HOUTTE'S (*S. Van Houttei*) 6-8 ft.—White flowers late April. 3-4 ft., each 45c; 5 at 40c each; 25 at 35c each. 2-3 ft., each 35c; 5 at 30c each; 25 at 25c each.

TAMARISK AFRICANA—8-12 ft. Pink flowers in May, feathery foliage. 3-4 ft. each 60c; 5 at 55c each; 25 at 50c each. 2-3 ft., each 50c; 5 at 45c each; 25 at 40c each.

WEIGELA—Pink (*Weigela Rosea*) 6-8 ft.—Rose pink flowers, May. 3-4 ft., each 60c; 5 at 55c each; 25 at 50c each. 2-3 ft., each 50c; 5 at 45c each; 25 at 40c each.

WEIGELA HYBRID, Red 3-5 ft.—(*Weigela Eva Rathke*). Crimson flowers, June. 2-3 ft., each 65c; 5 at 60c each; 25 at 55c each. 2-3 ft., each 55c; 5 at 50c each; 25 at 45c each.

Spirea Bridal Wreath

SNOWBERRY (*Symphoricarpos Racemosus*) 3-5 ft. White berries, June into winter. 2-3 ft. each, 35c; 5 at 30c each; 25 at 25c each. 18-24 in., each 30c; 5 at 25c each; 25 at 20c each.

SPIREA, THUNBERG'S (*S. Thunbergii*) 3-5 ft.—White flowers, April, feathery foliage. 2-2½ ft., each 50c; 5 at 45c; 25 at 40c each. 18-24 in., each 40c; 5 at 35c each; 25 at 30c each.

SPIREA CRIMSON (*S. Anthony Waterer*)—2-3 ft.—Bright red flowers all summer. 18-24 in., each 55c; 5 at 50c each; 25 at 45c each.

SPIREA, BILLARD'S (*S. Billardi Rosea*) —4-6 ft. Pink flowers all summer. 3-4 ft. Each 60c; 5 at 55c; 25 at 50c each. 2-3 ft., each 50c; 5 at 45c each; 25 at 40c each.

SPIREA, BRIDAL WREATH (*S. Prunifolia*) —6-8 ft. Double white flowers, early April. 2-3 ft., each 65c; 5 at 60c; 25 at 55c each.

Weigela Eva Rathke

Meadville, Mo., April 18, 1927.

Mr. T. G. Banning,
Brookfield, Mo.

Dear Sir:

I am enclosing a check to pay for the trees. They came Sunday and are in splendid shape. Many thanks to you for your promptness.

Yours truly,
Belva Humphrey.

March 5, 1930.

T. G. Banning:

Please send your 1930 seed and plant catalog. I have for several years ordered plants but I have another address and want your book.

Mrs. George Veinum,
Callao, Mo., Route 4.

Callao, Mo., April 21, 1930.

Mr. T. G. Banning.

Dear Sir: No use to tell you I am well pleased with your seeds and plants. I raised fine sweet potatoes, cabbage and tomatoes from your plants last year.

Mrs. Martha Davenport.

ROSES

ROSES—Prices are F. O. B. Neosho

Two year field grown plants of first grade. *Everbloomers. The Climbers have 3 canes or more, but Dorothy Perkins, Excelsa and Wichuriana have 4 canes or more. Baby roses, 4 canes or more. Teas, Hybrid Teas and Hybrid Perpetuals, 3 canes or more, will give satisfactory blooms the first season.

One Neosho customer counted over 1,000 blooms the first year on 17 of our plants.

CLIMBING ROSES:	Each
American Pillar, bright crimson, white eye, yellow stamens	\$0.75

EVERGREENS

EVERGREENS—Prices F. O. B. Neosho

The following prices are on good specimens, fresh dug with ball of earth wrapped in burlap, f. o. b. Neosho. There is no guarantee of growth since that depends upon proper care on the part of the customer.

Directions—Submerge the earth ball in water 30 minutes in a shady place out of the wind. Set the tree slightly deeper than it stood in the nursery. Leave the burlap around the earth ball, but cut the strings after placing the tree in position. Tramp good dirt firmly around the tree. When the space around the ball is nearly filled, pour in several pails of water. Then fill in with loose dirt. Don't put any fertilizer in the holes. Loose straw or well rotted leaves spread around the tree make a good fertilizer and help protect against winter injury. Evergreens should be well watered during the summer and also in late fall.

AMERICAN ARBORVITAE (Thuja Occidentalis)—Deep green, grows bushy at bottom, tapering towards top. 2-3 ft.\$3.50
3-4 ft. 5.00

AMERICAN GLOBE ARBORVITAE—(Thuja Occidentalis Globosa)—Deep green natural globe shaped. 15-18 in. spread 3.25
18-24 in. spread 4.75
2-2½ ft. spread 6.00

AMERICAN PYRAMIDAL ARBORVITAE—(Thuja Occidentalis Pyramidalis)—Needs full sun. Narrow pyramidal form. 2½-3 ft. 3.50
3-3½ ft. 5.00
3½-4 ft. 6.25

***BAKER'S PYRAMIDAL ARBORVITAE**—(Biota Orientalis Pyramidalis)—Yellowish green. Natural pyramidal form. 3-3½ ft. 4.25
3½-4 ft. 5.25
4-4½ ft. 6.75

***BEECKMAN'S GOLDEN ARBORVITAE**—(Biota Orientalis Aurea Nana)—Rich golden. Compact globular form. 2-2½ ft. 4.25
2½-3 ft. 5.25
3-3½ ft. 7.25

BONITA ARBORVITAE, Locke's Dwarf Globe. (Bonita Arborvitae) — Rich green. Unrivalled in color and perfection of form. 2-2½ ft. 4.75

PFITZER'S JUNIPER (J. Chinensis Pfizeriana)—Deep green with grayish cast. Stands shade. Irregular, flat spreading growth. 18-24 in. 4.25
2-3 ft. 5.25
3-4 ft. 8.25

SAVIN JUNIPER (Juniperus sabina)—A broad, very compact form with dark green foliage. 18-24 in.\$4.25
2-3 ft. 5.25

ANDORRA JUNIPER (Juniperus communis depressa plumosa)—During summer and spring bright green. As soon as frost comes in the fall, it changes to a rich, purple-bronze color. 18-24 in. 4.75

SWEET WILLIAM (*Dianthus Barbatus*)—Mixed. Various colors. May-June. 18 in. high, plant 12 in. apart.

Bucklin, Mo., April 29, 1930.

Mr. Banning.

Dear Sir, Enclosed find check for which please send me plants. We like your plants because they are true to name and have better roots than we can get other places. The cabbage plants are fine and every one lived.

Respectfully,

L. J. Svensson,
Route 3.

Special Get-Acquainted Offers

We were fortunate in having enough rain but particularly successful with some sorts, so we are sharing our good fortune with our customers. Over one-half of our orders came from our old customers—full endorsement of our products and service. You, too, can enjoy "Growing Satisfaction."

TERMS—Cash with order. Satisfaction guaranteed upon arrival. Subject to prior sale.

DEMONSTRATION ORCHARDS

These are first-class trees, just the same as our commercial customers have used with highly satisfactory results. Remember you must cut the tops back after planting and what you then have left makes the foundation of your orchard. Graded as they are, by diameter, you will have a uniform lot of trees, all with the same size trunks and with good root systems.

APPLE—1 yr. $\frac{3}{8}$ in. up diameter, 3 to 4 ft. Your choice of Yellow Transparent, Duchess, Wealthy, Jonathan, Delicious, Winesap, Stayman and Crabapple. 25 for \$4.00 F. O. B. Neosho; 100 for \$12.00 F. O. B. Neosho.

APPLE—2 yr. 9-16 in. up diameter, 4 to 6 ft. Your choice of Yellow Transparent, Duchess,

Wealthy, Delicious and Crabapple. 25 for \$7.00 F. O. B. Neosho; 100 for \$24.00 F. O. B. Neosho.

PEACH—5-16 to 7-16 in. diameter, 2 $\frac{1}{2}$ ft. up. Your choice of Mayflower, Greensboro, Arp Beauty, Carman, J. H. Hale, Early Elberta, Elberta Cling, Krummel. 25 for \$3.60 F. O. B. Neosho; 100 for \$12.00 F. O. B. Neosho.

DOLLAR OFFERS—POSTPAID

All these offers are extra good values. Please note we specify sizes so that you may know exactly what to expect.

APPLE—1 yr. $\frac{3}{8}$ in. up diameter, 3 to 4 ft. Your choice of Yellow Transparent, Duchess, Wealthy, Jonathan, Delicious, Winesap, Stayman and Crabapple. 5 for \$1.00, postpaid.

PEACH—5-16 to 7-16 in. diameter, 2 $\frac{1}{2}$ ft. up. Your choice of Mayflower, Greensboro, Arp Beauty, Carman, J. H. Hale, Early Elberta, Elberta Cling, Krummel. 6 for \$1.00, postpaid.

3 Everblooming for \$2.00, postpaid.
6 Everblooming for \$3.50, postpaid.

Your choice of Pink, Red, White, Yellow, but our selection of varieties.

SHRUBS are the most important ornamentals and give quickest results. They are invaluable as specimens; in groups or continuous borders; as screens against objectionable views or to secure privacy; as barriers or windbreaks; for flowering effects, for attractiveness of foliage or fruit. They have the greatest range of color and bloom, and increase in attractiveness, usefulness and value from year to year. They relieve the harshness where house and lawn meet and the sharpness of corners. The home nestles cozily in a nest of green, instead of springing suddenly from the lawn like a Jack-in-a-box.

DEAR FRIENDS:

I trust you have found something of interest in this little book. There are many things possibly of interest to you that I have not had room enough to put in, but I will be glad to answer any question that may be of interest to you. Just write and let me know. I do not know everything about this business, but am glad to help you in your garden problems if I can.

Yours truly,
T. G. BANNING.

FERTILIZER

I have some inquiries for bone meal, pulverized sheep manure and other fertilizers. I get my supplies from one of the best companies making these goods and can quote prices this spring, F. O. B. Brookfield. Pulverized sheep manure per 100 lbs., \$2.50.

BEAUTIFY YOUR HOME—USE VIGORO

You can beautify your home by having a velvety green lawn, crisp, succulent vegetables, colorful flowers, luxuriant shrubbery, and stately trees if you will keep in mind the fact that plants, like human beings, must be fed—and fed the right kind of plantfood.

VIGORO provides an economical, practical, and effective way to secure finest results. Economical because the cost is only 10c to 20c for every 100 square feet. Practical because it is clean, odorless, easy to apply—can be sown by hand like grass seed or applied with an ordinary kitchen colander. Effective because it contains all of the elements of plant food required to produce early, vigorous growth and bring fruit, flowers and foliage, to full development. Complete directions in every bag. Economical, practical, effective. 100-lb. bag, \$5.00; 50 lb. bag, \$3.00; 25 lb. bag, \$1.75; 5 lb. pkt., 50c; 12 oz. pkt., 10c. Prices F. O. B. Brookfield.

VIGORO

Specially prepared plant food

A Swift & Company Product.

NEW WAY TO KILL GARDEN BUGS

PROTECT your flowers and vegetables this new way. Surprisingly easy! Simply sprinkle with a new kind of non-poisonous powder called **PLANTGARD**. Not only are bugs, worms and insects *killed*, but this almost magical powder also *fertilizes* the ground. No wonder flowers grow larger and brighter colored! Vegetables mature quicker and are more tasty. Yet it costs only a few cents to protect an entire garden bed.
