New and Rare Plants and Bulbs

We call your attention to the following varieties:

Among the Narcissus, GARDEN GEM, a very old variety but one that is splendid for naturalizing. RED GOLD, one of the most beautiful of the Boetaz group; and INGLESIDE BEAUTY, which originated in one of our own gardens. Of these we have sufficient stock to enable us to offer them at exceedingly low rates. Among the perennials and rockplants, GEUM BORISSI is very lovely. Hemerocallis, QUEEN BESS, a volunteer in a bed of Queen of May, we are introducing this year. LYTHRUM LINEARE, besides its other good qualities, colors most beautifully in the fall. VERONICA TEXANA presented some years ago to the garden by Mother Nature, is one of the most attractive and satisfactory rockplants that we know. Among the Sedums are a number that are unusual and delightful. While our rare old roses might properly be termed "Fool-Proof Roses" as they can be moved at any time, are exceedingly hardy, and grow and bloom in weeds and grass as well as in the best kept garden. In bloom they are a joy, and no garden should be without them.

SPRING FLOWERING BULBS NARCISSUS

(C. cup or crown; T. trumpet; P. perianth)

GIANT TRUMPET DAFFODILS

	Each
APRICOT. A dainty thing for the rock garden. P. white, T. apricot buff	\$2.50
