LIST 3111

P.O. Box 343

COVERING STOCK
OFFERED BY

Phone
BALLARD 1776

CLARKE NURSERY CO.
SAN JOSE, CALIF.

SEASON 1931-1932

PLEASE NOTE

All summer quotations not accepted to date are hereby cancelled.

Terms. To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25 % with order, balance C.O.D.

Grading. Plants that are wider than tall are graded by width.

Quantities. Five or more plants of one kind and size will be supplied at 10 rate; 50 or more at 100 rate; 500 or more at 1000 rate. For less than 5 of one kind and size add 20 % to 10 rate.

Pots. Prices on pot grown stock do not include the pots and unless otherwise instructed plants will be removed from pots before shipping. If wanted in the pots they will be charged for at cost, but can be returned if desired and credit will be given.

Packing. Will be charged for at cost as usual, including paper pots if used. Plants will be packed to secure lowest possible freight classification consistent with the nature of goods shipped. All prices are at our nursery unless otherwise stated. Packing free if cash comes with order.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

Nomenclature. Plant names, both botanical and common, conform with 1923 edition of "Standardized Plant Names," with the addition of a few common names widely used on the Pacific Coast.

This list covers items of which we now have a fairly good supply unsold. Many other things can be furnished in moderate quantities and quotations will be made on request. So if you want any ornamental stock not listed here write us about it.

This list is for the trade only and all prices are strictly net. Landscape Architects and Landscape Gardeners who are not actual nursery men will be charged 20 % in addition to the rates quoted herein.

CYTISUS scoparius andreanus
ITEA ilicifolia
OSMANTHUS fragrans
PHOTINIA serrulata nova
PYRACANTHA formosana splendens
PYRACANTHA rogersiana aurantiaca
RAPHIOLEPIS indica rosea
RHODODENDRON Pink Pearl
RHODODENDRON Hybrids Assorted
SPARTIUM junceum nanum
STRANVAESIA davidiana
TEMPLETONIA retusa
VIBURNUM rhytidophyllum

FLOWERING FRUIT TREES

APRICOT, Japanese erect and weeping
CHERRIES, Japanese erect
CHERRIES, Japanese weeping
PEACH, 3-colored trees
PEACH, Weeping
PLUM blirieana

DECIDUOUS TREES

BETULA pendula youngi
CRATAEGUS pinnatifida major
KOELREUTERIA integrifolia
LABURNUM vossi
POPULUS tremula pendula
SORBUS aucuparia pendula

DECIDUOUS SHRUBS

CYDONIA japonica, new varieties
SYRINGA, Lilac Novelties

CLIMBERS

CLEMATIS veitchiana
HEDERA canariensis variegata
KENNEDYA rubicunda
WISTERIA floribunda violacea plena
WISTERIA multijuga longissima
WISTERIA multijuga rosea
WISTERIA Standards (tree shaped)

MISCELLANEOUS

HESPEROYUCCA whipplei

Lining Out Stock

We offer many items in small sizes for growing on. They are not listed separately but will be found at the end of each item if any stock is available for that purpose. We particularly call attention to grafted conifers in 4-inch pots.

Abbreviations

It is important for buyers to know whether they are getting seedlings or cuttings, etc., so for every item we have shown how it was propagated using the following abbreviations:

C—cuttings
G—grafted

S—seedlings
B—budded

CONIFERS

Unless otherwise stated all plants in this section will be balled at prices quoted.

NOTE—A large proportion of our conifers are grafted on seedling roots which gives them a far better root system than when grown from cuttings.

We call particular attention to grafted conifers offered in 4 in. pots. These were grafted on 2½ in. pot stock in Summer 1930, transplanted to 4 in. pots in Spring 1931 so now have had a full season's growth. This gives them an excellent root system and makes them far better and more profitable for growing on than newly grafted stock in 2½ in. pots. We use this 4 in. pot stock for our own planting and can recommend it highly to our customers

	10 rate	100 rate
ABIES arizonica glauca, BLUE CORK FIR		
4 in. pot, 6 to 10 in. G.....	\$0.45	\$0.40
cephalonica, GREEK FIR		
1 to 1½ ft. S.....	.75	
concolor, WHITE FIR		
1 to 1½ ft. S.....	.85	.75
firma, MOMI FIR		
1 to 1½ ft. S.....	.85	
nobilis glauca, BLUELEAF NOBLE FIR		
4 in. pot, 6 to 8 in. G.....	.60

2½ in. pot, 4 to 6 in.....	.12	.10
deodara aurea, GOLDEN DEODAR		
4 in. pot, 8 to 12 in. G.....	.50	
deodara compacta		
A variety of Deodar developed by us and now offered for first time. Compact, erect, very silvery and grows about half as fast as seedlings so is far superior for the average home.		
2 to 2½ ft. G.....	1.25	
1½ to 2 ft. G.....	1.00	
1 to 1½ ft. G.....	.75	
4 in. pot, 10 to 15 in. G.....	.40	

CONIFERS

CEDRUS (Continued)		10 rate	100 rate
deodara repandens			
Habits strongly weeping or almost prostrate, plants offered have been staked.			
2 to 3 ft. G.....	1.50		
1 ½ to 2 ft. G.....	1.25		
1 to 1 ½ ft. G.....	1.00		
libani, CEDAR OF LEBANON			
6 to 7 ft. S.....	3.00		
5 to 6 ft. S.....	2.50	2.25	
4 to 5 ft. S.....	2.00	1.75	
3 to 4 ft. S.....	1.75	1.50	
2 to 3 ft. S.....	1.50		
3 in. pot, 6 to 10 in. S.....	.20	.15	
2 ½ in. pot, 4 to 6 in. S.....	.12	.10	
CEPHALOTAXUS harringtoni			
(pedunculata fastigiata)			
HARRINGTON PLUM YEW			
4 in. pot, 8 to 10 in. G.....	.40		
CHAMAECYPARIS lawsoniana			
LAWSON CYPRESS			
2 ½ in. pot, 1 to 1 ½ ft. S.....	.20	.15	
lawsoniana alumi, SCARAB CYPRESS			
Growth erect, almost columnar. Foliage silvery blue.			
4 to 4 ½ ft. G.....	2.50		
3 ½ to 4 ft. G.....	2.00		
3 to 3 ½ ft. G.....	1.75		
2 ½ to 3 ft. G.....	1.50		
2 to 2 ½ ft. G.....	1.25		
1 ½ to 2 ft. G.....	1.00		
1 to 1 ½ ft. G.....	.75		
4 in. pot, 10 to 12 in. G.....	.40	.35	
lawsoniana elegans			
4 in. pot, 1 to 1 ½ ft. G.....	.40		
lawsoniana erecta viridis			
GOLDEN COLUMN CYPRESS			
Growth erect and columnar. Foliage unusually rich green.			
5 to 6 ft. G.....	2.75		
4 to 5 ft. G.....	2.25	2.00	
3 to 4 ft. G.....	1.75	1.50	
2 to 3 ft. G.....	1.50	1.25	
1 ½ to 2 ft. G.....	1.25	1.00	
lawsoniana fletcheri (new)			
8 to 12 in. C.....	.60		
lawsoniana globosa (dwarf)			
Extremely dwarf. Excellent for Japanese and rock gardens.			
4 to 6 in. G.....	.75		
4 in. pot, 3 to 4 in. G.....	.40	.35	
lawsoniana minima (dwarf)			
Equally dwarf but distinct.			
12 to 15 in. G.....	1.25		
4 to 6 in. G.....	.75		
4 in. pot, 3 to 4 in. G.....	.40		
lawsoniana nidiformis, BIRDSNEST CYPRESS			
Often called "nidifera." Growth almost prostrate and nest-shaped.			
1 ½ to 2 ft. C.....	1.50		
8 to 12 in. G.....	1.00	.90	
4 in. pot, 10 to 12 in. G.....	.45	.40	
4 in. pot, 6 to 10 in. G.....	.40	.35	
lawsoniana Silver Queen			
Much like ordinary Lawson Cypress but more compact and foliage has a rich green color only slightly silvery.			
7 to 8 ft. G.....	3.00		
6 to 7 ft. G.....	2.50		
5 to 6 ft. G.....	2.00		
3 to 4 ft. G.....	1.75		
2 to 3 ft. G.....	1.50		
lawsoniana stewarti			
One of the very best trees we grow. Entirely golden hued. The color holds throughout the year and in winter when Golden Arbor Vitaes turn green, this golden color of Stewarti is at its brightest.			
3 to 3 ½ ft. G.....	2.25	2.00	
2 ½ to 3 ft. G.....	2.00	1.75	
2 to 2 ½ ft. G.....	1.75	1.50	
1 ½ to 2 ft. G.....	1.50	1.25	
1 to 1 ½ ft. G.....	1.25	1.00	
4 in. pot, 6 to 10 in. G.....	.40	.30	
lawsoniana "Triomphe de Boskoop"			
Growth erect and bushy. Very silvery.			
3 to 4 ft. G.....	1.75		
2 to 3 ft. G.....	1.50		
1 ½ to 2 ft. G.....	1.25		

CONIFERS

CHAMAECYPARIS (Continued)

lawsoniana wisseli

Growth narrow and erect. Foliage moss-like.
Color very rich, metallic sage or silvery green.
Rare and beautiful.

	10 rate	100 rate
4 to 5 ft. G.....	3.00	2.50
3 ½ to 4 ft. G.....	2.50	2.25
3 to 3 ½ ft. G.....	2.25	2.00
2 ½ to 3 ft. G.....	2.00	
2 to 2 ½ ft. G.....	1.75	
4 in. pot, 8 to 10 in. G.....	.40	.35
4 in. pot, 6 to 8 in. G.....	.35	.30

nootkatensis glauca

SILVER NOOTKA CYPRESS

Growth erect and branching. Foliage silvery. Very rare.

2 to 3 ft. G.....	2.00	
4 in. pot, 8 to 12 in. G.....	.50	.40
4 in. pot, 6 to 8 in. G.....	.40	.35

obtusa, HINOKI CYPRESS

6 to 7 ft. S.....	3.50	
5 to 6 ft. S.....	3.00	
3 to 4 ft. S.....	2.00	

obtusa crippsi

4 in. pot, 8 to 12 in. G.....	.50	
-------------------------------	-----	--

obtusa nana

DWARF HINOKI CYPRESS

4 to 8 in. G.....	.75	
-------------------	-----	--

pisifera aurea

GOLDEN SAWARA RETINOSPORA

Very graceful habit. Foliage fine. Golden color holds well all year.

6 to 7 ft. G.....	3.50	
5 to 6 ft. G.....	3.00	
3 to 4 ft. G.....	2.00	
2 to 3 ft. G.....	1.50	
1 ½ to 2 ft. G.....	1.25	
1 to 1 ½ ft. G.....	1.00	

pisifera plumosa aurea

GOLDENPLUME RETINOSPORA

4 in. pot, 6 to 10 in. G.....	.50	.40
-------------------------------	-----	-----

CRYPTOMERIA japonica

COMMON CRYPTOMERIA

4 in. pot, 2 to 3 ft. S.....	.30	
4 in. pot, 1 ½ to 2 ft. S.....	.25	
3 in. pot, 2 to 2 ½ ft. S.....	.25	.20
3 in. pot, 1 ½ to 2 ft. S.....	.20	.15
2 ½ in. pot, 1 to 1 ½ ft. S.....	.15	.10

japonica elegans, PLUME CRYPTOMERIA

5 in. pot, 2 to 2 ½ ft. C.....	.40	
--------------------------------	-----	--

CUPRESSUS arizonica, ARIZONA CYPRESS

gal. can 4 to 6 ft. S.....	.40	.35
2 ½ in. pot, 1 ½ to 2 ft. S.....	.15	.12
2 ½ in. pot, 1 to 1 ½ ft. S.....	.12	.10

chinensis, F.P.I. 56305

A very fine-leaved Cypress introduced from China by U. S. Dept. of Agriculture. Makes a tall tree with stout trunk. Thrives well here and probably very hardy.

3 to 4 ft. G.....	1.00	
2 to 3 ft. G.....	.75	
gal. can 3 to 4 ft. G.....	.50	

glabra stricta, BLUE ITALIAN CYPRESS

Form exactly like Italian Cypress but foliage is bright silvery blue. Originated here as a chance seedling.

8 to 10 ft. G.....	3.00	2.50
3 to 4 ft. G.....	1.25	
2 to 3 ft. G.....	1.00	
gal. can 2 to 3 ft. G.....	.50	.40
4 in. pot, 2 to 2 ½ ft. G.....	.40	.35
4 in. pot, 1 ½ to 2 ft. G.....	.35	.30

macnabiana, MACNAB CYPRESS

gal. can 6 to 8 ft. S.....	.75	
----------------------------	-----	--

sempervirens stricta

COLUMNAR ITALIAN CYPRESS

6 to 7 ft. S.....	1.75	1.50
5 to 6 ft. S.....	1.50	
4 to 5 ft. S.....	1.25	
3 to 4 ft. S.....	1.00	
5 gal. can 3 to 4 ft. S.....	.75	
5 gal. can 2 to 3 ft. S.....	.60	
1 gal. can 2 to 3 ft. S.....	.30	
4 in. pot, 2 to 2 ½ ft. S.....	.25	
2 ½ in. pot, 1 ½ to 2 ft. S.....	.15	.12
2 ½ in. pot, 1 to 1 ½ ft. S.....	.12	.10

CONIFERS

CUPRESSUS (Continued)

sp., SILVERSPRAY WEEPING CYPRESS

Species unknown. Growth decidedly drooping. Foliage silvery. Mass effect very beautiful as it attains age.

6 to 8 ft. G.....	2.00	
4 to 6 ft. G.....	1.50	
3 to 4 ft. G.....	1.25	
2 to 3 ft. G.....	1.00	
5 in. pot, 1 to 1½ ft. G.....	.40	

JUNIPERUS bermudiana

BERMUDA REDCEDAR

2½ to 3 ft. G.....	1.25	
2 to 2½ ft. G.....	1.00	
1½ to 2 ft. G.....	.75	

chinensis albobariegata

WHITELEAF CHINESE JUNIPER

2 to 2½ ft. G.....	1.50	
1½ to 2 ft. G.....	1.25	
1 to 1½ ft. G.....	1.00	.90
4 in. pot, 6 to 10 in. G.....	.50	.40

chinensis columnaris

COLUMNAR CHINESE JUNIPER

A variety introduced by U. S. Dept. of Agriculture. Growth narrow and erect like Irish Juniper but a far better tree. Foliage silvery.

6 to 7 ft. G.....	2.50	
5 to 6 ft. G.....	2.25	
4 to 5 ft. G.....	2.00	
3 to 4 ft. G.....	1.75	
2 to 3 ft. G.....	1.25	1.00
1½ to 2 ft. G.....	.85	

chinensis kaizuka, HOLLYWOOD JUNIPER

A most beautiful variety of narrow, erect growth with wavy outline. Foliage rich green. Highly attractive. Popular in So. Calif. and well deserves wide distribution.

2 to 2½ ft. G.....	1.50	
1½ to 2 ft. G.....	1.25	
1 to 1½ ft. G.....	1.00	

chinensis pfitzeriana, PFITZER JUNIPER

Growth low and arching. Foliage feathery and graceful. Silvery green.

4 to 5 ft. G.....	2.50	
3 to 4 ft. G.....	2.25	
2 to 3 ft. G.....	1.75	
1½ to 2 ft. G.....	1.25	
1 to 1½ ft. G.....	.75	
gal. can 1½ to 2 ft. G.....	.75	
4 in. pot, 8 to 12 in. G.....	.40	.35

communis hibernica, IRISH JUNIPER

gal. can 1 to 1½ ft. G.....	.40	.35
-----------------------------	-----	-----

excelsa stricta, SPINY GREEK JUNIPER

2½ to 3 ft. G.....	1.50	
2 to 2½ ft. G.....	1.25	
1½ to 2 ft. G.....	1.00	
1 to 1½ ft. G.....	.75	

japonica (chinensis procumbens)

JAPANESE CREEPING JUNIPER

1½ to 2 ft. G.....	1.00	
1 to 1½ ft. G.....	.75	.65
8 to 12 in. G.....	.60	.50
4 in. pot, 6 to 10 in. G.....	.40	.35
2½ in. pot, 6 to 8 in. G.....	.30	.25
2½ in. pot, 4 to 6 in. G.....	.25	.20

japonica albobariegata

A variety of Chinese Creeping Juniper with white variegation. Scarce.

8 to 12 in. G.....	.60	
4 in. pot, 4 to 8 in. G.....	.50	.40
2½ in. pot, 4 to 6 in. G.....	.30	.25

japonica aureo-variegata

A variety of Chinese Creeping Juniper with yellow variegation. Scarce.

4 in. pot, 6 to 8 in. G.....	.50	
------------------------------	-----	--

sabina, SAVIN JUNIPER

4 to 5 ft. G.....	3.00	
-------------------	------	--

sabina tamariscifolia, TAMARIX SAVIN

8 to 12 in. G.....	.50	
4 in. pot, 6 to 10 in. G.....	.40	.35

squamata meyeri, MEYER JUNIPER

Growth low, slow and irregular. Ideal for rockeries, pools and Japanese Gardens. Foliage intense silvery blue. Among the best novelties in years. Very scarce.

8 to 12 in. G.....	1.00	
4 in. pot, 6 to 8 in. G.....	.60	.50
4 in. pot, 4 to 6 in. G.....	.50	.40

CONIFERS

JUNIPERUS (Continued)

	10 rate	100 rate
virginiana glauca, SILVER REDCEDAR		
Growth upright with spreading branches. Silvery blue. Very good.		
2 ½ to 3 ft. G.....	1.25	
2 to 2 ½ ft. G.....	1.00	
1 ½ to 2 ft. G.....	.75	
4 in. pot, 8 to 12 in. G.....	.40	.35

virginiana kosteriana, KOSTER REDCEDAR		
Growth flat and spreading, the branches making long pointed sprays. Slightly silvery.		
2 to 3 ft. G.....	1.50	
1 ½ to 2 ft. G.....	1.25	
1 to 1 ½ ft. G.....	1.00	
4 in. pot, 6 to 10 in. G.....	.40	.35

virginiana lebretoni		
8 to 12 in. G.....	.75	
4 in. pot, 8 to 12 in. G.....	.60	
4 in. pot, 6 to 8 in. G.....	.50	

Wilson's Weeping

This is probably a form of *J. chinensis sargentii* with strongly arching branches. Habit a picture of grace. Main growth erect but branches droop toward tips. Color soft sage green, very slightly silvery. A beauty.

3 ½ to 4 ft. G.....	2.25	
3 to 3 ½ ft. G.....	2.00	
2 ½ to 3 ft. G.....	1.75	
2 to 2 ½ ft. G.....	1.50	
1 ½ to 2 ft. G.....	1.25	
1 to 1 ½ ft. G.....	1.00	
4 in. pot, 6 to 8 in. G.....	.50	.40
2 ½ in. pot, 6 to 8 in. G.....	.30	.25
2 ½ in. pot, 3 to 6 in. G.....	.25	.20

sp., "Golden Variegated Spreading"

An unidentified variety distinct from *J. japonica aureo-variegata*.

4 in. pot, 6 to 8 in. G.....	.50	.40
------------------------------	-----	-----

sp., "Silver Variegated Spreading"

An unidentified variety distinct from *J. japonica albo-variegata*.

4 in. pot, 6 to 8 in. G.....	.50	.40
------------------------------	-----	-----

LIBOCEDRUS chilensis

CHILEAN INCENSE-CEDAR

4 in. pot, 6 to 10 in. G.....	.50	.40
-------------------------------	-----	-----

decurrens, CALIFORNIA INCENSE-CEDAR

5 gal. can, 2 ½ to 3 ft. S.....	1.25	
5 in. pot, 1 to 1 ½ ft. S.....	.50	

PICEA engelmanni, ENGELMANN SPRUCE

Very similar to Colorado Spruce (*P. pungens*) but with softer foliage. Varies from green to bluish green.

4 in. pot, 8 to 10 in. S.....	.30	.25
-------------------------------	-----	-----

pungens, COLORADO SPRUCE

2 to 2 ½ ft. S.....	1.50

-----------------	------	--

praecox

One of the best novelties we offer. Growth practically prostrate. Leaves glossy, about ¾ inch long with wavy margins which give the plant great beauty. Its peculiar and striking merit is its earliness which gives it its name. The berries are large, red and colored by the end of June, months before other Cotoneasters. Our specimen plants have been greatly admired by visiting nurserymen. It drops its leaves for a short period about as *C. horizontalis* does.

BROAD LEAVED EVERGREENS

COTONEASTER (Continued)		10 rate	100 rate
pyrenaica, PYRENEES COTONEASTER			
A beautiful and unique little plant. Growth not simply prostrate but really directly downward if it gets the chance. Hence to show its true habit it should be grown in a rockery or else top-grafted when it makes a miniature umbrella shaped specimen. Leaves small, evergreen. Berries red but scarce. Growth very slow.

BROAD LEAVED EVERGREENS

PYRACANTHA (Continued)

10
rate 100
rate

formosana splendens (new)

This splendid novelty originated with us several years ago, but we have never been able to list it before as all stock has been ordered ahead by nurserymen who had seen the original plant in berry. In freedom of production it far surpasses any other *Pyracantha* or *Cotoneaster*. The berries are rich red, highly glossy and borne in astounding profusion. We regard it as far and away the best red berried plant grown.

4 in. pot, 1 to 1½ ft. C & G.....	.40	.35
4 in. pot, 8 to 12 in. C & G.....	.30	.25
2½ in. pot, 3 to 4 in. C.....	.25	.20

rogersiana aurantiaca (new)

This also has points of the greatest merit. It blooms so profusely as to be valuable as a flowering plant. The berries, equally profuse, are glossy orange and produced all along the long slender shoots. Will be of the greatest value as a producer of cut decorative material.

FLOWERING APRICOTS

All the Japanese apricots are varieties of *Prunus mume*. The flowers resemble those of the flowering peaches but they have the great advantage of a pleasing carnation-like fragrance while peaches are scentless.

ERECT GROWING VARIETIES

6 to 7 ft. B.....	.60	.50
4 to 6 ft. B.....	.50	.45
3 to 4 ft. B.....	.40	.35

Dawn

The best Mume and one of the loveliest flowering trees. Flowers large, double with ruffled petals, rich pink. In Japan called Musashi-nono meaning "Valley of Fragrance."

Double Red

A very scarce color in mumes.

Early Double Pink

Colored like Dawn. Flowers a little smaller but about ten days earlier.

Praecox

Single white. Not only the earliest Mume but with us the earliest of all deciduous flowering trees or shrubs.

WEeping VARIETIES

4 to 6 ft. stems.....	1.00	
-----------------------	------	--

Weeping Red

Weeping White

FLOWERING CHERRIES

We have specialized on these beautiful trees for years and have the largest commercial collection in the U. S. A. All propagation is direct from our own specimen trees. They are correctly and authentically named. Below are descriptions of varieties still available for this season. Any further information will gladly be given on request.

ERECT GROWING VARIETIES

AMANOGAWA. Light pink, semi-double. Growth remarkably slender and upright requiring little space.

ANEMONE. Pink, semi-double. Flowers formed like Anemone or Hepatica. Bears a tremendous crop of flowers.

ASAHI. Pale pink, very double, 35 to 40 petals. Flowers borne on long stems. Somewhat similar to Victory but new leaves are green, not bronze.

BIZARRE. Not described in any of the standard reference books so we have given it a temporary name. Flowers of medium size, very double, variegated and striped green and white. With age the flowers show cerise veining. Most unusual and striking.

CAMPANULATA. The only truly red cherry. Flowers single, bell shaped. Three weeks earlier than any other variety. Growth extremely vigorous.

Shumai zakura

FLOWERING FRUIT TREES

DAYBREAK. An unidentified variety. Extremely early. Flowers single pink borne entirely before the leaves and in such profusion as to make the tree look like a cloud of pink. The most effective variety in our collection. Growth strong.

FUGENZO. Double pink. Flowers very large, up to 2 inches diameter. At first almost red but quickly become lighter in center. Flowers appear progressively so has a long blooming period.

GOSHOZAKURA. Clear pink. Double. As Japanese name indicates, the flowers are almost always in clusters of five. Very pretty. Grows rather slowly.

HORINJI. Double flesh pink. Flowers large, about 20 petals on long stems and in large clusters. Very profuse and is in bloom for a long time. Seems hard to propagate so that we have not been able to offer it until now.

JUGATSUZAKURA (*P. subhirtella autumnalis*). Name means October cherry. This occasionally blooms in the Fall but usually in the very early spring. Flowers are single, long narrow petals, light pink with cerise at the tips and on the back. Flowers nearly one inch in diameter. Very beautiful. Has the longest blooming period of all.

KAIDO. Semi-double pink. Color clear and bright. So closely resembles Halliana or Parkmanni Crab that we have given it the name the Japanese use for that variety.

KURAMAYAMA. A beautiful double flowered variety opening out rather flat. The center is flesh pink but marked with carmine at the edges. The petals are ruffled or frilled. Late.

MOMIJIGARI. A subhirtella variety, so has small flowers which are red in the bud but open deep pink. Semi-double, about 15 petals.

NADEN. One of the loveliest and most double of the pink flowered varieties. The petals are so numerous as to make the flower a perfect tuft showing no center. This is not the Naden of Wilson.

OJOCHIN. The "large paper lantern" cherry. Flowers are practically single but are so large with heavily pleated petals that they look double. Buds pink, open flowers flesh.

SHIROTAE (Mt. Fuji). The best double white. Flowers are large and double. Foliage light green. A good grower. Also known as Komatsunagi-zakura.

SHOGETSU. Double, pale pink. Very free bloomer.

TAIZANFUKUN. Flowers of medium size, double and tufted. Light pink becoming flesh or nearly white. Leaves small. The tree grows unusually erect and slender.

TAKASAGO. This is the cherry that Wilson calls *Prunus sieboldi*. Flowers are double, light pink on rather short stems and massed into large compact clusters. Blooms early before the leaves appear. Very showy.

TAKINIOI. Flowers of medium size, single and semi-double. Buds flesh, open flowers white. Valued for its delightful fragrance.

TANKOSHINJU (Pink Pearl). Double pink. Considering everything, growth, color, freedom of bloom, size of flowers and all other points, we consider this the best of the doubles. It is early, flowers are large, fairly double, pink with lighter center, but deeper at edges and on the back. A good grower making a fine symmetrical tree, healthy and most profuse bloomer.

UKON. Unique in having yellow flowers, somewhat greenish. When the flowers get old the center and the veins of the petals change to cerise. A good grower. Late.

VICTORY. Also known as Shirofugen. Flowers extremely large, up to 2½ inches diameter, borne in racemes of about three on a long stem. Very double, 35 to 40 petals. Coloring very unique. Flowers open a pale pink, become white and then turn cerise. For this reason trees will always show white and pink flowers at the same time.

YAMAZAKURA No. 67963. A good double pink.

YEDOZAKURA. Double pink. Color bright and clear. Flowers large, double, usually in clusters of three. Very pretty.

WEeping VARIETIES

DOUBLE PINK WEeping. One of the scarcest varieties in our collection. Branches droop but not as strongly as the single weepers. Flowers are of medium size and double, 50 to 60 petals. Color deep pink. Has to be top grafted to make a good tree.

EUREKA WEeping (*P. subhirtella pendula*; Japanese Weeping Rose Flowering Cherry). This is the common, single flowered, light pink Weeping Japanese Cherry that has been grown in this country at least fifty years which is a tribute to its beauty and popularity.

PARK WEeping (*P. aequinoctialis pendula rosea*). It is as strongly drooping as Eureka Weeping but differs in its more vigorous growth, type of foliage and most important the color of the flowers which are deep pink instead of light pink.

SHIDAREYOSHINO. Flowers single white. Growth very vigorous. Branches grow directly downward.

FLOWERING PLUMS

PRUNUS blirieana

Leaves purple, flowers double pink.

Not at all a novelty on the Pacific Coast as we introduced it from Europe in 1917. Strangely enough it seems almost unknown in the East. It has purple leaves like *P. pissardi* and beautiful rich pink, full double flowers which are produced very early in astonishing profusion. Splendid for cutting.

Lilacs

Named Varieties

All our Lilacs are pinched when a few inches high so all sizes are branched and practically all will bloom the first season.

In order to show what sizes are available for each variety we use letters following the description of each variety. The code is as follows:

A for 8 to 10 ft.	E for 2 to 3 ft.
B for 6 to 8 ft.	F for 1 ½ to 2 ft.
C for 4 to 6 ft.	G for 1 to 1 ½ ft.
D for 3 to 4 ft.	

NOVELTIES

4 to 5 ft. B.....	1.00	.85
3 to 4 ft. B.....	.75	.65
2 to 3 ft. B.....	.60	.50
1 ½ to 2 ft. B.....	.50	.45
1 to 1 ½ ft. B.....	.40	.35

Capt. Baltet—Single. Violet lilac. C-D-E-F.

Jan Van Tol—Single white. Both the clusters and the individual flowers are of enormous size. A very good grower and free bloomer. Very fine. C-E-F-G.

Katherine Havemeyer—Double. Cobalt blue flushed mauve. Flowers very large, perfectly formed with broad imbricated lobes. One of the handsomest. D-E-F-G.

Maurice Barres—Single pale lilac. Flowers large; clusters of medium size. D.

Mme. Francisque Morel—Double. Light creamy lilac. Very fine. C-D-E-F-G.

Mrs. Edward Harding—Double. "Bright carmine rose. Bears big panicles of large full flowers. Awarded the special prize founded by Mrs. Edw. Harding for the best double red lilac." This is the introducer's description. Has not flowered with us as yet. G.

My Favorite—Double. Originated and named by Mrs. Hulda Klager of Woodland, Wash. A very early and profuse bloomer. Buds dark purple opening to lavender purple. Clusters large and forked. F-G.

Pres. Faillieres—Double. Lavender pink. Color charming. Trusses simply enormous. Flowers large and very double. Truly magnificent and easily the best. C-D-E-F-G.

Pres. Poincare—Double. Claret mauve. Clusters of unusual size, very compact, with very large flowers. One of the best. C-D-E-G.

Reamur—Single. Violet carmine. Buds deep purple. Clusters rather long, single or forked. Very good. D-F.

Volcan—Single. Not so new as the rest but far from common. Buds deepest imaginable purple. Opens dark purple without shading and holds its color. D-E-F.

GENERAL COLLECTION

Letters after description indicate available sizes as explained above.

8 to 10 ft. B.....	1.25	1.00
6 to 8 ft. B.....	1.00	.85
4 to 6 ft. B.....	.75	.65
3 to 4 ft. B.....	.60	.50
2 to 3 ft. B.....	.50	.45
1 ½ to 2 ft. B.....	.40	.35
1 to 1 ½ ft. B.....	.35	.30

We can also supply large specimen plants in many varieties. If interested write for particulars or call if convenient..

DOUBLE VARIETIES

***Berryer**—Mauve. Petals curly. Free bloomer. D-E.

Chas. Sargent—Violet mauve blended sky blue; enormous flowers and clusters. E-F-G.

***Claude Bernard**—Bright mauve. Included in the "Early Lilacs" but really in a class by itself and distinct from all others. Petals are long and wavy or twisted. Largest flowers are an inch broad. Very fine. A-B-D-E.

LILACS

GENERAL COLLECTION (Continued)

- Condorcet—Almost pure blue. Semi-double. D-E-F.
 Edouard Andre—Rose or nearly pink. D-F-G.
 Ellen Willmott—Snow white. Elegant spikes; fine large flowers of the "hose in hose" type. D-E-G.
 Emile Gentile—Bright cobalt-blue. B-C.
 Georges Bellair—Carmine becoming purple. Very profuse and compact. E-F-G.
 Hippolyte Maringer—Purplish mauve; compact clusters. D-E-F-G.
 Jean Bart—Carmine becoming rosy purple. Petals sharp and twisted. Unique. E-F-G.
 Jean Mace—Mauve changing to bluish purple. Very good. A-B-C-D-E.
 Jeanne d'Arc—White. Flowers very large. Very early, profuse and fine in every way. E-F-G.
 La Tour d'Auvergne—Dark lilac. Good. F-G.
 Leon Gambetta—Pink-lilac. Early. Among the best. B-C-D-E-F-G.
 Marechal Lannes—Mauve becoming pinkish blue. Beautiful color. C-D-E-F-G.
 Maximowicz—Violet heliotrope. Clusters long and well filled. F-G.
 Montaigne—Pinkish mauve. Very large clusters. C-D-E.
 President Loubet—Deep purple becoming reddish lilac. C-D-G.
 President Viger—Purple becoming lilac. Clusters large and dense. D-E.
 *Vauban—Pale mauve pink. Panicles large. Delicious fragrance. Extremely free bloomer. Strong grower. A-B-C-D-E.
 Victor Lemoine—Pinkish purple becoming mauve blue. Clusters much forked. Strong fragrance. C-E.
 Waldeck-Rousseau—Double. Deep violet flowers, borne in long trusses. D-E-F.

SINGLE VARIETIES

- *Buffon—Flowers large, pink shaded mauve. A-B-C-D-E-F.
 Christopher Columbus—Opens clear blue. Late. E-F-G.
 De Miribel—Dark bluish violet. Very late. C-D-E-F-G.
 *Descartes—Mauve blue. Exceedingly free blooming. Flowers before leaves appear. B-C-D-E.
 Diderot—Deep purple; buds almost black. Clusters very long and narrow. F-G.
 Dr. Breitschneider—Pure pink. Blooms on new wood, hence late. D-E-F-G.
 Dr. Lindley—Brilliant violet-purple, buds red. Fine regular clusters. D-E-F-G.
 Edmond Boissier—Dark purple. Flowers very large. B-C-D-E-F-G.
 Gloire de Lorraine—Dark lilac becoming blue. D-E.
 Hugo Koster—Reddish purple. Clusters of good size and regular form. D-E.
 *Lamartine—Mauve pink. Clusters much forked. Flowers large. Extremely vigorous and one of the earliest. A-B-C-D-E-F-G.
 *Louvois—Purple becoming blue. Clusters extra large. C-F-G.
 Ludwig Spaeth—Dark purple. Clusters long and slender. Late. C-D-E-F.
 Lutece—Pink. Very late. Blooms on new wood. C-D-E.
 Marie Le Graye—White. Early. An old favorite. D-E-F.
 *Mirabeau—Mauve. The earliest of all. Extremely vigorous. B-C-D-F-G.
 Mont Blanc—White. Large flowers and clusters. Very fragrant. C-D-E-F-G.
 Perle von Stuttgart—Pure white. Both flowers and clusters very large. C-D-E-F.
 Vestale—White. Flowers large. Our earliest white variety. Very fine. C-D-E.
 *Varieties starred are the new "Early Lilacs." These are hybrids between *Syringa giraldi* and the earliest varieties of *S. vulgaris*. They are very distinct from previous varieties in both appearance and habit. They are ten days to two weeks earlier and the clusters are borne well above the foliage at the ends of long erect branches. Leaves are only partially developed when they bloom. These features give them very great value as cut flowers. We recommend them highly.

2 year G.....	1.00	
5 gal. can 4 to 5 ft. G.....	2.00	

CLIMBERS

WISTERIA (Continued)	10 rate	100 rate
multijuga longissima A variety of W. multijuga with astonishingly long clusters of light purple flowers. On a well established vine they will run 3 to 4 ft. in length. The original old vine frequently has them 4 to 5 ft. and very rarely they have actually attained 6 ft.		
2 year G.....	1.25	1.00
multijuga rosea, PINK JAPANESE WISTERIA These are genuinely pink. There seem to be inferior strains of so-called pink wisterias. All our propagation is from our own blooming plants which bear beautiful pink flowers in long clusters.		
4 year G.....	2.00	
3 year G.....	1.50	1.25
2 year G.....	1.25	1.00
sinensis (blue), CHINESE WISTERIA		
5 year G.....	2.00	1.75
4 year G.....	1.75	1.50
2 year G.....	1.00	.85
sinensis alba, WHITE CHINESE WISTERIA		
2 year G.....	1.25	
venusta, SILKY WISTERIA (white)		
2 year G.....	1.25	
STANDARD WISTERIAS		
A splendid novelty which we first put on the market last season. Stems are about 4½ ft. tall (a foot taller than the usual Standard Rose). Heads are strong, two years or older, and many bloomed in the field last spring.		
4½ ft. stems, heavy heads.....	2.25	2.00
floribunda violacea plena		
multijuga longissima		
multijuga rosea		

Miscellaneous

CORDYLINE (Dracaena)		
balled, 5 to 6 ft. S.....	2.00	
balled, 4 to 5 ft. S.....	1.75	1.50
balled, 3 to 4 ft. S.....	1.50	1.25

4 in. pot, 1 to 1½ ft. S.....	.25	.20
HESPEROYUCCA whipplei		
CHAPARRAL YUCCA		
CALIFORNIA YUCCA This is our native Yucca whose enormous flower spikes lend so much beauty to the foothill region of Southern California. Is not long coming into bloom. Flower spikes often 10 or 12 ft. tall with hundreds of flowers.		
4 in. pot, 1½ to 2 ft. S.....	.35	.30
4 in. pot, 15 to 18 in. S.....	.30	.25
4 in. pot, 12 to 15 in. S.....	.25	.20
PEONIES, assorted	.25	
Princess Mathilde—pink.		
Duchess d'Orleans—pink.		
Delachei—crimson.		
Queen Victoria—white.		
PHOENIX canariensis, CANARY DATE PALM		
balled, 3 to 4 ft. S.....	2.00	
2 to 3 ft. S.....	1.50	
TRITOMA Wm. F. Dreer		
4 in. pot, 1 to 2 ft.....	.25	
4 in. pot, 8 to 10 in.....	.20	
REDWOOD BURLS —We can always supply these in any desired quantity. Price fluctuates according to season and expense of gathering. If interested write us about how many you can use, size desired and we will quote definitely.		
WOODWARDIA radicans We can supply collected roots for shipment from Santa Cruz Mountains direct to customers at \$7.50 per 100. No shipment of less than 50.		

Roses

BUSH AND STANDARD

We grow both bush and standards extensively and specialize on the best of recent sorts. As this list goes to press we are digging and do not want to issue new list until that job is completed and we know just what is unsold.

Revised list corrected down to date will be issued in early December. If you are interested write us for a copy. For descriptions of all varieties offered see our List No. 3109 which will be sent on request.
