WHOLESALE PRICE LIST

To the Trade

1931 :- 1932

U. S. Department of Agriculture

ESTABLISHED 1878

LEONARD COATES NURSERIES

INCORPORATED

WHOLESALE GROWERS OF

Evergreen and Deciduous Ornamentals .: Conifers .:
Lining-Out Stock .: Rose Stocks .: Budded Roses .:
Budded Fruit Trees and Fruit Tree Seedlings

Nurseries at
Morgan Hill, Santa Cruz
and Brentwood

Office and Salesyard
SAN JOSE
CALIFORNIA

Member California Association of Nurserymen .: Pacific Coast Association of Nurserymen .: American Rose Society

Terms, Conditions and Organization

OUR POLICY

Is to grow the best. Quality nursery stock cannot be grown without extra care and expense. Therefore look out for **cheap stock** as quality, condition or cleanliness must be sacrificed. All our stock in "containers" is clean, healthy and not root bound. None of our "Balled" stock is too old or overgrown while our "Deciduous" stock is freshly grown each year. "Quality Stock Pays."

TERMS

All prices are net; 5% discount for cash with order. All bills due and payable 60 days from date of invoice, unless otherwise arranged. Interest at the rate of 7 per cent will be charged after 60 days.

RATE

Quotations in this list will be furnished 5 at ten rate, 50 at hundred rate and 300 at thousand rate.

PACKING

Packing is done in the most careful way and a charge is made to cover cost of materials only. Our packers have had many years' experience.

TRUCK DELIVERIES

With a fleet of four trucks we can make prompt deliveries to all parts of California. Charges will be very nominal and will save our customers boxing, freight and cartage, and also eliminate extra handling of plants.

GUARANTEE

While we exercise the greatest care to have all stock true to name, we give no warranty, express or implied, and in event that stock is

proven not true to name, we shall be liable only for the sum paid for such stock.

CLAIMS

Of any kind will not be allowed unless reported within 10 days after receipt of stock.

NATIVE TREES

The stock of Native Trees and Shrubs we carry cannot be equalled in California. Our nurseries are recognized Headquarters for this class of stock. The demand for native stock is increasing each year and wherever a shortage of water exists this type of plant can be suggested. All natives are preceded with an asterisk (*).

EXPLANATION OF ABBREVIATIONS

B.—Balled; B. R.—Bare Root; P.—Pot; Qt.—Quart Can; Gal.—One Gallon Can; 2½g.—Two and one-half Gallon Can; 5g.—Five Gallon Can; Ft.—Feet, and In.—Inches.

APPRECIATION

We wish to again express our appreciation for the increased patronage given us by our many wholesale customers. This increase has justified our feeling that there is still a market for High Grade, Quality Nursery stock at a fair price.

VISIT OUR NURSERIES

We have three principal growing grounds, or Nurseries, located at Morgan Hill, Santa Clara County; Santa Cruz, Santa Cruz County; and Brentwood, Contra Costa County, with our Main Office, Floral Store and Salesyard at 2201-2205 The Alameda, San Jose, on the main San Francisco Highway, between San Jose and Santa Clara.

At Morgan Hill we have our propagation houses for cuttings and seedage, as well as lath-houses where all the stock in containers is grown. At this nursery we grow over three hundred-thousand plants. The climate at Morgan Hill is warmer than most parts of Santa Clara Valley and with plenty of water is conducive to very favorable plant growth.

At Santa Cruz we have twelve acres where eighty thousand field grown, or "balled" plants are produced under most favorable growing conditions. This section was designated by the late Luther Burbank as being the best in California for the largest variety of plants.

At Brentwood, where we have three locations, all deciduous fruit stock, roses and fruit tree seedlings are grown. On the highlands we grow the budded fruit trees and roses in loamy soil, while the seedlings are grown under Delta peat conditions. The former with plenty of water and heat produces ideal fruit trees in a section free from Peach Root Borer, and the latter, which is sub-irrigated, develops a splendid fibrous branched root system.

Our location at San Jose is the main distributing point and acts as a hub in the center of the nursery locations. We believe the favorable conditions under which our stock is grown and the years of experience back of our employees put us in a position to cater to those who want the best.

PARTIAL VIEW OF OUR SANTA CRUZ NURSERY

Evergreen Trees and Shrubs

We offer this year a larger and we think better assortment of varieties than ever before. All of our stock, both in the field and in containers is carefully grown, quality stock that you can recommend to your customers without hesitation.

Flowering Fruit Trees

We have made a specialty of flowering fruit trees and have an extremely large and varied assortment of worthwhile varieties. The flowering trees are becoming more popular every year and you should stock a complete assortment of them. Our trees are grown in a section free from Peach root borer and may be shipped anywhere.

PRUNES PEARS CHERRIES
THREE VIEWS OF "FRUIT TREES" AT OUR BRENTWOOD NURSERY

Fruit and Nut Tree Department

Our stock of fruit trees this year is unusually fine. We have all the varieties which should be included in home orchard plantings. Our fruit trees are all grown near Brentwood in Contra Costa County where conditions are unexcelled for the growing of quality stock. This section is absolutely free from "Peach Root Borer" and our stock can be shipped anywhere.

The following prices apply to all varieties of fruit trees in lots of ten or more of a variety, except where other prices are given.

4 to 6 ft.....	25
