ORNAMENTAL TREES AND SHRUBS

Beautifying the home garden, now so appropriately called The Outdoor Living Room, is receiving more attention in every community. Everywhere people realize the importance of selecting and buying the best type and highest quality plants for the home grounds. Perhaps no investment of a small amount of money adds so much to the beauty and attractiveness of a home and so greatly increases its value as saleable property. Today the prospective buyer of a home, especially in California, expects to find the home grounds properly planted with the finest ornamental trees, shrubs and flowers.

To aid those who wish to make the Outdoor Living Room more beautiful we have for free distribution a book entitled, "How to Plant the Home Grounds," edited by E. H. Wilson, famous horticulturist of the Arnold Arboretum. Ask for your copy of this book at our main office, 111 Orange Street.

Consult us about your planting or landscape problems. It is very important that you choose the right kind and combination of ornamental shrubs and trees. Our many years' experience with plants and planting in this district qualifies us to advise you regarding the varieties that thrive and grow best in this locality.

In this limited space it is impossible to list all of our many varieties of trees, shrubs, etc. Ask us about plants you can't find here; we probably have them.
