OPALESCE

OPALESCE—Wonderful spikes of very large, pale rose lavender. A pure self color, with soft, lilac throat lines. A vigorous grower, with excellent foliage and strong, straight bloom stalks. Flowers well placed, with broad petals of good substance. As sparkling and pure as the water of the Adirondack Mountain stream for which it was named. Special Award of Merit by the American Gladiolus Society in 1924

HOW TO ORDER BY MAIL

Please use the Order Sheet in center of catalog. Write your name and complete address plainly. This publication cancels all previous prices, terms, or discounts.

ORDER EARLY

Orders are booked in rotation as received. If a variety ordered is sold out we will substitute another variety of equal or higher value, or return the amount to you. Please indicate by "yes" or "no" on order sheet in proper space, whether we may make substitution. Our stock of some varieties is limited, and the first orders will get them.

TERMS

Remittance must accompany all orders, as prices are based on cash with order. All bulbs ordered from this catalog sent prepaid to all points in United States and Canada. No charge for packing. Transportation extra to foreign countries.

CANADIAN CUSTOMERS

All Canadian customers must apply to "Destructive Insect and Pest Act Advisory Board, Department of Agriculture, Ottawa, Ontario," for a permit to import bulbs.

TRADE DISCOUNTS

Special lists will be sent to commercial growers, florists and nursemens when application is made on printed stationery or business card enclosed.

GUARANTEE

We guarantee all stock to be true to name, and to be vigorous flowering size. We cannot guarantee results, as the condition under which they are planted is a matter beyond our control. However, full cultural directions will be included with every shipment.

TIME OF SHIPMENT

We begin to make shipments about March 1st, or as soon after as weather permits.

OUR LOCATION

Our location is just east of Canandaigua, on the main highway from Buffalo, through Canandaigua to Geneva, Auburn, Syracuse and New York City. Thousands of tourists stop to view our plantings.

The Latch String hangs clear out into the middle of the road, and it will be our pleasure to make your acquaintance and show you our place.

BANK REFERENCE

If you should care to do so, we invite you to refer to: The Canandaigua National Bank, or Ontario County Trust Co., both of Canandaigua, N. Y.

GREETINGS 1931

Good bye 1930, we are glad to bid you farewell, and feel sure that 1931 will bring us all a greater measure of success and happiness.

We, who supply the home gardener with seeds, plants and bulbs have cause to be grateful that our customers have not placed the blame on us for their garden failures in 1930. Almost universally they realize that 1930 was a difficult year to have the best garden results. They also seem to be imbued with the spirit to plan, and the faith to expect better results in 1931.

BILL'S GLAD FARMS, are continuing to broaden the service to our customers and you will find in the following pages, not only the best in GLADIOLUS, but also select lists of reasonably priced,

PEONIES	Page 26	IRIS	Page 25
FLOWER SEEDS	Page 29	VEGETABLE SEEDS	Page 30
DAHLIAS	Page 32	ROSES	Page 27
LILIES	Page 28	GARDEN SUPPLIES	Page 28

I am calling attention to the above items because I have found that many of you have overlooked the fact that our service covers these items as well as the Best in Glads.

Best Size Glad Bulbs to Buy?

I am going to say first that it depends on the purpose you have in mind.

If you want the MOST FLOWERS per bulb order No. 1 size.

If you want the BEST FLOWER SPIKES No. 2 size is usually the best and cost you less.

If you want LATE FLOWERS No. 3 size will do, but flower spikes will not be as good the first year, but again less cost to you.

If you want the BEST FOR PROPAGATION then No. 4 size in addition to giving you some flowers will produce a fine crop of No. 1 and No. 2 bulbs, with a maximum production of bulblets (cormels). I never buy anything smaller than No. 4.

If you want to start with the SMALLEST INVESTMENT you may buy No. 5 size or cormels. It is quite satisfactory to start with No. 5 size but I do not recommend that you buy bulblets unless you have had experience in growing them. We cannot guarantee bulblets true to name as it is too easy to get them mixed in storage handling.

Beware of bulbs advertised as flowering size at greatly reduced prices. In many cases you will receive No. 4 and No. 5 sizes. Flowering size means nothing definite. Standard sizes are as follows: No. 1— $1\frac{1}{2}$ " diameter or larger; No. 2— $1\frac{1}{4}$ " to $1\frac{1}{2}$ "; No. 3—1" to $1\frac{1}{4}$ "; No. 4— $\frac{3}{4}$ " to 1"; No. 5— $\frac{1}{2}$ " to $\frac{3}{4}$ ".

How We Fill Your Order for Glads

If sold out of the size you order we will supply next size larger at same price and you win. If next size larger not available we will supply next size smaller with extra count to offset the difference in price.

We appreciate your kindness in giving us the names of your friends who have gardens and endeavor to put something extra with your order to show our appreciation.

I wish you the best of success with your 1931 Gardens.

Yours most cordially,

GLADIOLUS BILL.

BREAK O' DAY

BREAK O' DAY This variety is now recognized as one of the outstanding recent productions. It combines delicate coloring, graceful stems, large size, earliness, vigor and good keeping qualities. Massive spikes, with several flowers open at a time. Blooming extra early, its soft LaFrance pink flowers will always be marketable at high prices. The pink is flushed over a cream ground and the shade is deeper at tips of petals. There is a zone of martius yellow on lower petals, with delicate central lines of Brazil red. The most striking extra early variety ever produced. 3 for 25c; 10 for 65c; 100 for \$5.00.

Bill's Best Originations

ALLEN V. BUNCE—Livid orange yellow, with clear central lines of deep claret. Large, well-expanded, winged flowers, gracefully placed on wiry stalks. In a class with Orange Queen, but longer spikes, larger flowers and colors are clear.

ARABY—The open flowers are flushed Rosalane pink, with a very distinct, strong throat of Tyrian rose. The buds are clear Chatenay pink. A vase of these flowers with buds one color and open flowers another color, forms an unusual and striking floral arrangement. The flowers are large, well placed and frilled. Strong grower and several open at once. A winner at the Toledo Show.

ARISTOCRAT—This is a true Aristocrat among the hundreds of new ones. Large, strong, massive spikes of most delicate coloring. A pale saffron pink flaked deep orange, with cream throat and a very distinct violet feather. Slightly ruffled and extra large. Several flowers open at a time.

CHAS. CURTIS—Sea-shell pink, with back of petals veined venetian pink. Lower petals maize-yellow, with small carmine feather. Large violet anthers. Strong, vigorous spikes, 16 or more buds, 6 open at a time, good sized flowers, correctly spaced and faced on the stem. The maize-yellow throat is striking and rich.

CHINOLINE—Dye manufacturers know this color as Chinoline Yellow. The flowers are 4½ inches across, and the tip flowers are practically the same size as the first ones. We frequently have 8 to 10 perfect flowers at a time, wide open, spaced perfectly. Sounds like a world beater, doesn't it? It has one fault. The stem is weak and you must tie it up to have perfect spikes, but with this little attention it is a wonderful yellow.

CLEOPATRA (Ruffled)—Very deep yellow. Large, massive spikes. Heavy substance. Created a sensation at the Rochester Exposition. Rated 98 per cent as an exhibition variety by Gersdorff. Late flowering.

DARDANELLA—This is entirely different from anything else in our list. Flowers are Congo pink, flaked deep hellebore red at the tips. Strong feather of jasper red on straw yellow throat. Tall and straight, with 8 to 10 open flowers in double row.

BETTY JOY

Soft creamy white, flushed LaFrance pink. Strong grower, long flower spikes, with 6 to 10 perfect flowers opening at a time. Rated 97 per cent as a commercial flower by Gersdorff. Many of the best judges say this is the finest introduction of our entire list.

"The Glad with the School Girl Complexion"

FIRST LADY—An early *Primulinus Grandiflorus*, in which the colors are unusually clear and glistening. The color is geranium-pink, with a dainty maize-yellow throat carrying small lines of carmine. Good, vigorous growth, with straight, slender stems. Flowers 4 inches across, wide open, and 4 to 5 open at a time. In addition to its size and clear colors, it is an excellent keeper. In very hot, wilting weather it stood up the best of any in our fields.

FORT SUMTER—A red of exceptional merit. A pure self scarlet red. Very large, wide open, massive flowers, with petals nearly equal in size. Spikes often have 6 to 8 of these huge blooms open at once. Extra fine and stock limited.

GENEVA GEM—Very large, heavy flowers, scarlet red, veined cream. Greatly admired when exhibited at N. Y. State Fair, 1927. Strong grower, stands up well, several open and well placed. This proved to be one of the most magnificent in our entire planting the past summer. An entire row of them stood five feet to the tips, and not a crooked spike in the row. Florets measure 5 inches across and 5 to 6 open on third day.

HARVEST MOON—Marguerite yellow, shaded deeper at the center, which carries a faint line of Chinese violet. Strong, vigorous growth, with 16 or more buds. Flowers placed in a double row, facing properly and of good size. Excellent substance, good keeper, opening 8 or more flowers at once.

LUCETTE

LUCETTE—As seen growing in the fields it appears to be absolutely pure white, but backs of petals carry a trace of phlox pink which imparts an alluring orchid sheen to the flowers. Lower petals have a dainty, subdued feather of wonderfully soft phlox pink. As a commercial white, it is ideal in color and form. Also well adapted for mass planting in landscape work. Extra good as a forcing white.

MAUVE BELLE—Very large flowers of spinel pink, with center of Tyrian rose, bordered yellow. Long flower heads, 5 or more open, vigorous grower.

NOBILIS—One of those velvet deep reds. It does not fade in wet weather, as most others of this type do. Ridgeway's Color Chart calls it Amaranth purple. Many massive, frilled flowers open at a time.

TOMMY ATKINS—The cut flowers sell the quickest of any red we have. It is bright scarlet, with deep carmine throat lines. Tall stems, 14 to 20 buds. several large flowers open at once; it is a winner.

In the Garden Six Feet Tall

VANITY

Delicate LaFrance pink, flushed over cream ground. Very large flowers of airy, graceful type, with slightly reflexed petals.

Unsurpassed for large baskets.

Won first prize at A. G. S. Show in New York City for handsomest floor basket.

The sensation of the New York wholesale cut flower market. Awarded First Class Certificate by the American Gladiolus Society in 1924. Strong, vigorous grower.

GLADDIE BOY**GLADDIE BOY**

At the American Gladiolus Exhibit in New York City, GLADDIE BOY won the class of the "Most Beautiful Basket of Glads," as well as the class for the "Most Artistic Table Decoration." It is the *Primulinus Grandiflorus* type, retaining the delicate characteristic coloring. Flowers are well expanded, with only a slight hooded effect. Mature bulbs throw spikes with 18 to 20 buds, and opening 6 to 8 perfect flowers at a time. The color is very distinctive, the general effect being a Grenadine pink, gradually blending with straw yellow deep in the center. The petals are most gracefully frilled.

GLADDIE GIRL—We have been searching our test planting several years to find a Glad we thought worthy of this name. After selecting several different ones and later discarding them, we bought the entire stock of another grower's production to name it Gladdie Girl. This in turn was discarded as not good enough. Now we have it from our own productions. You see, the trouble was caused by a definite decision that it must be better than Gladdie Boy. It sure is. The style is somewhat similar to Gladdie Boy, but it is taller and much more attractive. Flowers are good size, ruffled, and petals are arranged in both standard and reverse arrangement. The two lower inside petals are rich plush, wax yellow. Other petals are flushed with bittersweet pink, changing to grenadine pink at the tips. Good long bud spikes and six perfect flowers open at one time.

MRS. HERBERT HOOVER

Registered with the American Gladiolus Society. The beauty of this variety together with the name selected for it will create a big demand. Those who buy this season will be able to make some money on it. The flower is a blotched one, similar to Pendleton, but in the lilac shades instead of pink. Shape of flower similar to LeMarechal Foch, but a good keeper. Here is our field note description based on Ridgeway's Color Chart. "Pale vinaceous lilac, flushed Persian lilac. Heavy blotch of Rhodamine purple. Facing and spacing correct, massive heads, always erect, thick petals, slightly reflexed. Heavy broad foliage, medium height, straight, stiff stem, 14 buds, 6 open, $4\frac{1}{2}$ inch flowers."

OH BOY!—When you see this variety you will fully realize the significance of the name. Your exclamation of delight will prolong the "Oh!" and follow with a sharp, explosive "Boy!" A brilliant red, self color, without markings. Flowers 7 inches or more across, and petals extremely thick. Sometimes with 4 or 5 of these mammoth flowers at a time it gives the impression that the limit has been reached. Flowers are wide, open and the petals are broad, rather than narrow and pointed.

SPIDER—New form and style. Long, narrow petals, which are a distinct novelty in form. Flowers spaced regular on tall, strong stem, with 6 or more open. Good size flowers that give an impression of massiveness in spite of extremely narrow petals. Color is cream.

WHITE ORCHID—The picture will convey to you the extreme grace, beauty and style of this variety. The color is a pure cream white. The wing petals stand well open, measuring 4 to 5 inches across. The upper central petals gracefully curved forward. The three lower petals are somewhat smaller. All petals most beautifully frilled and of heavy substance which hold up well under adverse conditions. The type of the flower immediately gives the impression of an orchid by its extreme grace and poise. It is a strong grower and blooms rather early.

BEARDED IRIS

CULTURAL DIRECTIONS

Plant Bearded Irises in the sunniest and best drained places in the garden. They require the moisture but will not do well in naturally wet soil. Do not use stable manure in soil intended for Bearded Iris.

Bearded Irises are shipped dry and should be planted as soon as received. Our plants will come properly trimmed and the roots

pruned back ready for planting. Should the tops be dried out and the roots appear shriveled when the plants are opened, no harm is done as the rhizomes will start new growth soon after they are planted.

Plant shallow so that the rhizomes, or fleshy part of the root lies in a horizontal position and is barely covered.

PEONIES

CULTURAL DIRECTIONS

Peonies should be planted in fertile, well-drained soil, and where they will get the full sun at least half the day. They will not do well in poorly drained ground, nor where water stands about their roots during any part of the year.

Any garden soil will grow good Peonies, but the more care that is given to preparing the ground where Peonies are to be planted, the better the blooms will be. Under no circumstances should fresh manure be used around Peonies.

Set the planting divisions in the prepared soil at a depth so that the new eyes, or buds, will not be over 2 inches below the surface of the ground after the loose soil and the roots have settled.

For Spring Planting, Orders Must Reach Us before April 15th

For fall planting by October 15th. By planting this spring you can gain a year on those planted the following fall.

ROSES

There are many delightful varieties of roses, each with a habit of growth and bloom characteristic peculiar to itself. If you have never before grown roses, you have the assurance that the varieties shown on this page are standard garden roses that are sure to succeed with only the care necessary for proper rose cultivation.

We are offering only strictly first class, well branched 2 year field grown roses. All the roses we send you will be pruned, ready for planting with the roots packed in damp moss. Do not allow them to dry out before planting.

Talisman—The rose which has created a sensation for the last two years. A combination of shadings of gold, apricot, yellow, pink and old rose.

Best grade 2 year old plants—\$1.25 each

HYBRID TEA ROSES (Everblooming)

Give these roses winter protection. We list the most hardy of this class.

Etoile De France—Large flowers clear velvety red-crimson. Fragrant.

Gruss An Teplitz—Profuse bloomer, clear crimson-scarlet. Fragrant.

Kaiserin Aug. Victoria—Large double white on long stems. Fragrant.

Killarney—Large pointed buds, strong stems, flesh pink.

Mme. Butterfly—Large flowers, brilliant pink, suffused apricot and gold.

Mme. Caroline Testout—Large rounded flowers, bright satiny rose, with darker center.

Red Radiance—Brilliant crimson. One of the best all-around roses.

Souv. De Claudius Pernet—Long pointed buds, beautiful clear yellow.

Sunburst—Bright, glowing orange blooms. Bronzy foliage.

White Killarney—Same type as Killarney but pure white.

HYBRID PERPETUAL ROSES (June Flowering)

These are more vigorous and sturdy than the Hybrid Teas.

Frau Karl Druschki—The ideal hardy white rose.

General Jacqueminot—Known as the "Jack" rose. Brilliant scarlet crimson.

George Ahrends—Very fragrant large pink flowers.

Marshall P. Wilder—Bright cherry-carmine. Very fragrant.

Paul Neyron—Bright ruddy pink. Very large flowers.

CLIMBING ROSES

Climbing American Beauty—Abundant, lovely, deep pink large flowers.

Dorothy Perkins—Clear cherry pink. Flowers produced in great clusters.

Dr. Van Fleet—Long pointed deep pink buds opening to a lighter pink.

Paul's Scarlet—The purest red of all cluster blooming climbers.

White Dorothy—The best white climber. Flowers in clusters.

All roses except Talisman 60c each; 3 for \$1.60; 10 for \$5.00

Roses will be shipped by express. *If wanted by mail add 10c each*

FLOWER SEEDS

Many of our flower-loving friends who have been purchasing "BILL'S BEST BULBS" suggest that we supply them with flower and vegetable seeds also. Our specialty is Gladiolus, so we could not attempt to grow seeds for you, but by special arrangement with one of the best seed growers in America we are able to offer a short list of Seeds. We make this list short because we want to make it easy for you to select and insure that you will get only the very best in each type of flower or vegetable. The packet will contain generous quantities as compared with those you buy from seed racks on display at stores. Order seeds by number, for instance: 1 Pkt. No. 2021, will bring you a packet of Candytuft seeds.

GLADIOLUS CULTURAL DIRECTIONS

Unpack the Gladiolus bulbs as soon as received and keep in a cool cellar until ready to plant. Any good garden soil will answer, but do not use any fresh manure in the spring. If fertilizer is required apply barnyard manure the previous fall or use bone meal in spring.

WHEN TO PLANT

In Central New York the best time to plant is from May 1st to 15th, when the weather has become settled. If you are farther south, plant earlier. A good plan is to plant when maple trees begin to open their leaves. For

later flowers you may plant at various periods up to the 4th of July.

HOW TO PLANT

The general method is to plant in rows anywhere from 1½ feet to 4 feet apart, depending on the method of cultivation to be em-

ployed. Dig a trench 5 inches deep and 2 inches wide at the bottom. Place the bulbs on the bottom of the trench, 3 inches to 5 inches apart, and then fill the trench level full with soil. Deep planting and close planting both help the plants to stand erect at blooming time.

WHERE TO PLANT

They will bloom if planted most anywhere. They will not be at their best if roots from large trees penetrate the ground where they are located. Remember that the roots of trees reach out further than the branches. Out in the garden or in special beds is the place where they will flaunt their beauty to perfection. Plenty of air and sunshine makes them strong and sturdy.

WATER

If you wish you may water them in dry seasons, but water thoroughly. Dig into the soil after you think they are soaked and if the soil is not wet 5 inches give them still more water. Don't sprinkle a little every evening, but give them a thorough soaking and let them alone for a week.

CULTIVATION

Do it after every rain or watering. Keep the surface loose and don't let the weeds live on the moisture which belongs to the Glads.

DIGGING AND STORING

As the maple begin to lose their leaves, lift the bulbs, cut the tops off close to the bulb and expose to sunshine for two or three days. Then store in a cool, dry cellar, 40° is best. In about three weeks you can remove the old bulb and roots with ease.

BLOOMING TIME

Go out in the garden early each morning and see the new ones with the dew on them. If you want them for house decoration cut

them in the forenoon when two or more flowers have opened. Put in vases or baskets with fresh cool water. Give fresh water every morning, remove wilted flowers and cut about $\frac{1}{2}$ inch off the stem. Given this care, every bud on the stalk will open in the house. Give them a personality and you will enjoy them twice as much.
