PLANT MORE LEGUMES AND GRASSES FOR FARM RELIEF

INTERNATIONAL CROP IMPROVEMENT ASSOCIATION BACKS CAMPAIGN

At the twelfth annual meeting of the International Crop Improvement Association, held recently in Chicago, the following resolution was passed.

INASMUCH as we have just experienced what Secretary of Agriculture, Arthur M. Hyde, characterizes in his annual report as the worst drought ever recorded in this country; and

WHEREAS this drought has not only caused a tremendous shortage of hay and feed tonnage in some sections for this winter, but has so seriously impaired 1930 seeding (see U.S.D.A. Report August 20, 1930) and the stands in older meadows, as to constitute a serious menace to hay crops in ensuing years; and

WHEREAS there will probably be a tendency to turn this bare ground into an increased grain acreage, and inasmuch as we apparently have such a surplus of grains as to make further extension of that kind of production very undesirable; and

WHEREAS this organization has for years advised as the basis of sound fundamental agriculture that our legume acreage should be increased in order to maintain soil fertility, and thus to reduce the cost of production per acre;

THEREFORE BE IT RESOLVED that the members of the International Crop Improvement Association will individually and collectively actively lead and support an aggressive program of increased sowings this year of legume and grasses and particularly legumes as the most immediate means and at the same time permanent form of giving "Farm Relief".

FURTHERMORE, we solicit the cooperation of the press, the wholesale and retail seed trade, country banks and financial institutions and all those interested in a successful American Agriculture to cooperate in this emergency to make it possible for every American farmer to regain an adequate acreage of legumes and grasses.

K. E. BEESON, PRESIDENT
International Crop Improvement Assoc.

CONDITIONS OF NEW SEEDINGS OF ALFALFA, CLOVER AND GRASS, AUGUST 20, 1930 . . .

Reports received by the Department of Agriculture on August 20 indicate that the new seedings of Alfalfa, Clover and other Grasses in 1930 were in very serious condition in the states where the drought has been serious and prolonged. The reports related to the seeding of Alfalfa, Clover and other grasses sown in the Spring of 1930 for the hay crops of 1931 and subsequent years. The reported percentages of a full crop by states are as follows:

	%		%
New York	62	Maryland	17
Pennsylvania	38	Virginia	22
Ohio	29	West Virginia	19
Indiana	35	Kentucky	16
Illinois	31	Tennessee	29
*Michigan	36	Alabama	36
*Wisconsin	58	Mississippi	26
*Minnesota	61	Arkansas	10
*Iowa	55	Louisiana	27
Missouri	25	Oklahoma	30
*North Dakota	43	Texas	39
*South Dakota	40	Montana	53
*Nebraska	65	Wyoming	78
Kansas	53	Colorado	78

In many States where the condition is shown to be very low, many of the reports indicate an absolute failure of the seeding.

HAY CROPS PROMISE PROFITS THIS YEAR

DEMAND FOR CLOVERS AND GRASS SEEDS SHOULD BE GREATER THAN USUAL

AVAILABLE STOCKS, GENERALLY SPEAKING, ARE BELOW NORMAL

"PINE TREE" BRAND FARM SEEDS ARE DEPENDABLE

Pine Tree Towel Bags

PATENTED

*Eliminate all your losses and troubles with second-hand bags:
 put a salesman to work for you in every farmer's home.*

Made of a high grade of face toweling, specially woven to prevent leakage, each bag makes two fine towels. Brand and markings are imprinted in special ink easily washed out. Makes real towels you will be proud to own!

Towel Bag packing, bushel size, is now available for Timothy, all Clovers and Alfalfas. Each bag sealed. Easier to handle, easier to sell, more profitable. Welcomed in every household. See special prices on first inside page.

Order "Pine Tree" and specify "in Towel Bags"
