HERBST BROTHERS, INC.

Agents for T. Sakata & Co., Japan

92 Warren St.

New York, N. Y.

Fresh Australian Palm Seed Just Arrived

Hedyscepe canterburyana, Canterbury Palm
at \$7.00 per 100 seed or \$50.00 per 1000

Howea belmoreana, Belmore Palm
Howea fosteriana, Foster Palm
at \$3.00 per 100 seed or \$25.00 per 1000

Abies balsamea

New Crop New England seed is now ready. Ask for samples of our specially re-cleaned stock. Immediate delivery.

Special price \$3.00 per lb. \$27.50 per 10 lbs.

Cedrus deodara

Our new crop will be available as early as November. Early sowing insures best results. Order now to secure delivery immediately after arrival.

Prices \$3.50 per lb. \$32.50 for 10 lbs.

Conifer Seed

Often in demand for Fall Planting

TREE & SHRUB SEED—Cont'd

Japanese Flowering Cherries

The late Dr. E. H. Wilson continually urged the use of Japanese understock for the Oriental Flowering Cherries, in spite of the difficulty of their production from seed. Too often failure in germination is attributed to the quality of the seed rather than to faulty handling. Check tests through botanical institutions convince that our method of packing the seed for the long trip from Japan brings it to our customers in prime condition. Our new crop seed will be arriving very soon. If we have your order it is immediately repacked and dispatched to you. The seed should AT ONCE be put in flats with moist sand. The sand must never be allowed to dry. The flats may be kept in the open where they are subject to natural stratification. In warmer climates artificial stratification is necessary as cherries require at least 12 weeks to afterripen. Sowing in the open is advisable as soon as the weather permits. One successful grower sowed his seed in a two inch deep furrow, filling it over with grain husks. This reduced the weed problem and helped supply the seed its continual demand for moisture.

	per lb.	per 10 lbs.
PRUNUS incisa, <i>Mume Cherry</i> (Mame-Zakura)	3.00	27.50
japonica, dwarf spreading, soft rose pink.	4.50	40.00

triloba, <i>Flowering Plum</i>	3.00	27.50
yedoensis, <i>Yeddo Cherry</i> (Yoshima C.) ..	3.50	32.50

QUERCUS

Public fad is as pronounced in the Nursery Business as it is in clothing, house furnishing, etc. Ornamental Growers and Foresters are, therefore, directing attention to the hardwoods. Among them none are more beautiful nor useful than the common oaks. Their culture from good seed is simple, as you know. Although our modern privately owned refrigeration chamber enables us to preserve its vitality perfectly till spring, we are frank in recommending that you plant it as soon as it becomes available. You should, therefore, order now.

Fresh seed of domestic varieties IS AVAILABLE IN THE FALL. Use no other. Also do not be misled into dealing with collectors offering low priced seed as it is frequently improperly cured or has fermented, thereby becoming worthless. These defects are not always obvious unless you are thoroughly familiar with the handling of seed berries. Our collectors are instructed what to do from the time they pick the seed until they ship it to us. We will not accept their deliveries unless they do. Do not let price influence your seed purchases.

Test The SEEDS You Plant

THE MASTER SEED TESTER is an attractive flat dish in which is placed a porous disc and over the disc fits a clear glass bell. *You just put one hundred seeds, (one in each little recess in the porous disc,) add water, put on the glass bell and Nature does the rest.* Nothing could be simpler, nothing could be more effective.

Books

Dr. L. H. Bailey's "HORTUS" is the finest reference book published in recent years. It consolidated numerous nomenclatures into an invaluable handy reference book. Plant characteristics, propagation and care are easily found and described so clearly that even a layman understands them. We recommend this work to you. POSTPAID \$10.00

AZALEAS and CAMELLIAS, by H. H. Hume is a brief and complete guide for planting and growing these increasingly popular broad-leaved evergreens. With illustrations in color. POSTPAID \$1.50

THE STANDARD CYCLOPEDIA OF HORTICULTURE, edited by L. H. Bailey. This is the one universal and invaluable authority on every horticultural question. Makes a compact but thorough presentation of the kinds, characteristics and methods of cultivation of the plants grown in the United States and Canada for ornament, for fancy, for fruit, and for vegetables. Formerly in 6 volumes, but now in three at about half the original price. 5,000 illustrations, 3,637 pages, 3 volumes, fabrikoid binding. POSTPAID \$25.00

IF I WERE TO MAKE A GARDEN is the crowning volume to Dr. Wilson's "Garden Classics," for here he reveals the practical application of the "aristocrats" of plantdom in every phase of garden-making.

In addition, he presents a wealth of new garden material, more true "aristicrats" of the plant world, more gems for the glory of American gardens.

In his former volumes Dr. Wilson told *what* to plant. In *If I Were to Make a Garden* he tells *where* to plant. POSTPAID \$10.00

BULBS FOR AMERICAN GARDENS by John C. Wister. Out of his vast experience, Mr. Wister has now written a book telling all that anyone would wish to know about *Bulbs for American Gardens*.

For the beginner he gives detailed descriptions of the more easily obtained bulbs and careful directions for planting, cultivation, lifting, dividing, resetting, etc., with drawings and over fifty splendid photographs.

Those interested in garden history will find detailed reviews of the discovery and cultivation of various bulbs, and accounts of the work of many botanists and plant breeders.

We believe this to be the largest, most complete and most practical book on bulbs ever published in this country. Over seventy illustrations in all POSTPAID \$6.50
