ROSE LIST • Season of 1931-1932

Strictly First Quality 2 and 3-year-old Budded Dormant Roses

The Lester Rose Gardens "Roses of Monterey" Monterey, California

This List supplements our 32-page booklet, "Roses of Monterey," a copy of which will be gladly mailed you if the one previously sent you has been misplaced. All prices below replace previous quotations. *They are the lowest prices at which we have ever offered such fine stock.*

Quality and Price

You cannot know if the PRICE of a Rose is high or low unless you know its QUALITY. Millions of Roses are produced by cheap labor, on contract, with mass production methods which may work with some sorts of merchandise but won't work with Roses. It is for this reason we urge all of our rose friends who can do so to come and SEE our dormant Roses,—thousands of them, stored under ideal conditions in our new rose house. You will then see instantly what strictly first quality Roses are; large in size, matured wood, strong roots, good bud unions, correct debudding that prevents suckers, and, what is extremely important, varieties budded on the BEST UNDERSTOCK for each sort. All these things go into the making of a good rose.

IT NEVER PAYS TO PLANT A POOR ROSE. We confidently believe that, price considered, our stock is the best possible value for the money.

EVERY ROSE IS CORRECTLY MARKED WITH PERMANENT WEATHERPROOF LABEL.

Varieties

The list below gives only a partial list of sorts we carry in stock. We think it one of the most complete and useful stock-lists in America. Because we ship to every state in the Union, we have for many years made a close study of the BEST VARIETIES OF ROSES for YOUR conditions and gladly advise when requested. Especially have we studied the MILDEW-PROOF Roses, best suited to Pacific Coast conditions. Only EXPERIENCE can determine what are the best Roses to plant under any given condition. More than 30 years' rose-experience is back of our recommendations and our offerings.

Uncommon Roses

Note, please, that our offerings include many Roses hard to procure, the rare Old Roses, now more sought after than ever; the Wild or Species Roses, used so successfully for landscape and native plantings; the Unusual Sorts, some of them positively without an equal, such as the glorious climber Mermaid and the Weeping Standards that are masterpieces of rose creation.

Terms and Conditions: An order blank is provided below for your convenience. Terms are cash with order, or we will send C. O. D. for the balance if one-half cash accompanies order. WE PREPAY DELIVERY CHARGES if 6 or more Roses are ordered; if less, add 10% to partly cover postage. Remember, that due to the unusual size of our dormant Roses shipping costs are higher than for the ordinary stock. Standard, Pillar Standard and Weeping Roses are sent by express only, charges collect. Unless otherwise ordered we expertly prune all roses when packing for shipment so that they are ready to plant on arrival. We urge ORDERING EARLY, otherwise disappointment may result.

Guarantee: We exercise the greatest care to have all roses genuine and reliable but in case any prove defective or untrue to name are liable only to the extent of amount paid for such stock.
