DECIDUOUS TREES

GOOD trees for street planting have been extremely scarce. This Autumn we offer a good supply of them in the best varieties. Such sizes as we offer here are at real bargain prices. Other sizes available and will be gladly quoted on request. Most of the varieties on these pages can be shipped either from the East or from the Middle West, representing a considerable saving in freight. We will gladly estimate delivery costs in advance. Not in years has such an offering of deciduous shade trees been made. Every tree twice or more transplanted and properly headed according to grade. We have been furnishing shade trees for more than fifty years.

NATIVE RHODODENDRON IN CARLOTS

Rhododendron is splendid for thick mass planting.

For years we have specialized in these fine evergreen shrubs. We offer some extremely low prices for collected Rhododendron Maximum and Kalmia latifolia (Mountain Laurel). The plants are dug with a good ball and packed in the car carefully for delivery in good condition. Strong clumps with several branches. Fine for mass planting. Carloads only. Freight extra from nearby Pennsylvania.

WE SUGGEST REFORESTATION OF WASTE

LANDS WITH NUT TREES

Not for the sake of nut crops at all—as a matter of fact these ARE of considerable value—But consider nut trees from the point of view of lumber alone:

Hickory—very valuable special purpose wood.

Walnut—a slow crop, but very profitable.

Beech—A valuable special purpose wood.

Oak—Always in demand.

Chestnut—Durable, popular lumber.

Consider also the fact that while these trees are not very fast growing as compared with Elms and Maples, they are considerably faster growing than the fastest of the evergreen varieties now so commonly used for reforestation—Spruce, Pine, Fir, etc. Nut trees may be planted during October and November. Many hardy varieties are priced on these two pages. Special prices in large quantities.

GRAFTED VARIETIES FOR LINING-OUT

FRESH grafted trees are troublesome, at times, even for the initiate. For this reason we are offering nothing but stock that has been cut-of-doors all summer and is now thoroughly hardened off. Some winter protection is desirable, but no other special treatment. Many of the sizes are offered Balled and Burlapped for still easier handling. Where so noted, please remember that Dutch burlap is used and can be planted without removing from the plant.

RED PINE
(*P. resinosa*)

This excellent native species is among the fastest growing evergreens and seems remarkably disease-resisting. Ideal for hedges and screens where strong winds sweep the site and few other varieties would be hardy enough to stand the exposure. NIGRA—

THE AUSTRIAN PINE

This variety of the Black pine is perhaps the best of the hardy, fast growing kinds and succeeds in a wide variety of soil—even along beaches subject to the salt spray of the sea. It is much used as a wind break in estates near the ocean, but is equally adapted for forestry planting.

RESINOSA—THE RED

(NORWAY) PINE

This is probably the one most popular evergreen for all purposes. It is a native to the Eastern parts of the country and absolutely hardy. This variety is notable because of its freedom from most insect pests.
