New Fancy Yellow Aster

This is the Aster we are trying to develop into a yellow color and sent free samples of seed last year all over the country for testing.

We have received thousands of reports and find the color produced varies a great deal in different sections. Some report a very pretty yellow, others yellow center and lighter petals, others of various tints and shades.

We saved seed from our best yellows the past year and hope it will come true this season, and we are sending our customers sample packets of this strain to try again. We hope to get fine reports from these samples.

SPECIAL OFFER. This improved strain of Aster seed is not for sale, but we will include a sample packet (30 seeds) for trial free with all orders from this Seed Book if asked for when ordering.

46 Hardy Plants, Shrubs, Roses, Perennials

In this Department we offer a choice selection of hardy Plants, Climbing Vines, Shrubs, Roses and Perennials. All of this stock is dormant, properly labeled and each label gives instructions for planting.

Our stock is clean and healthy, has been properly inspected, and we can fill spring orders up to about May 20th in dormant condition. Fall plantings should be made in October. At prices given we deliver everywhere.

ABOUT GUARANTEEING PLANTS. To guarantee the life of plants in the hands of another person is to make the grower responsible for the errors and inexperience of others, not to mention freaks of weather and unfavorable seasons, bad soil, unfavorable locations and many other conditions over which the grower has no control.

When you receive plants from us they are in a dormant condition as provided by Nature, to rest and sleep over the winter, just as the Maple and Elm trees do when they lose their foliage. When you receive plants showing no foliage don't consider them dead; they are resting and are well prepared to start growth when spring comes.

We are willing to replace any plants that are dead upon arrival, but it would be very unreasonable to ask that we become responsible for the future life and conduct of a live plant received in good condition, and no complaints will be considered after 60 days from delivery.
