Hardy Garden Lilies

Lilium Candidum

THE MADONNA LILY

One of the oldest plants cultivated in gardens. The plants make healthy evergreen rosettes of leaves in the autumn, from which stout stems, clothed with short leaves, arise in spring bearing spire-like clusters of pure white, starry Lilies beautifully illumined by brilliant yellow anthers. They, too, are deliciously sweet, but are not so overpoweringly fragrant as some others, and may be cut and brought into the house with comfort. It blooms in June, immediately before the Regale Lily, at the same time as Delphinium Belladonna, with which it is frequently combined. Can be planted only in the fall. Large size, 35c each; \$3.50 per doz. Mammoth size, 50c each; \$5.00 per doz.

Lilium Harrisii

The chaste snow-white flowers supply a long-felt want for purpose of decoration. The exquisitely perfumed flowers are produced in clusters on a stem varying from 2 to 4 feet in height. Invaluable for early flowering from Christmas onward.

Regal Lilies

A very hardy, easily grown variety from the mountains of western China, and one of the most glorious of all. The flowers are gigantic, of true Lily shape, with long, waxen petals recurved at the tips, and lightly frilled along the edges. In effect it is pure white, but the center of the flower is richly suffused with golden yellow and the brilliant orange-yellow anthers are large and showy. The outside of the buds and the three outer petals are stained with purple-brown, which often gives a faint pinkish value to the flowers seen in quantity. Unequaled for magnificent effect.

MEDIUM SIZE. 40c each; \$4.00 per doz.

MAMMOTH SIZE. 50c each; \$5.00 per doz.

Lilium Candidum, Madonna Lily.

SUPERBUM (Turk's Cap Lily). One of our native species. Grown in good, rich soil, it will produce upwards of 20 beautiful orange, tipped red spotted flowers in a pyramidal cluster. 3 to 5 feet high. Blooms in July. 35c each; \$3.50 per doz.

ELEGANS. Very handsome, producing in July, large blood-red colored flowers with small, black spots; a strong, robust grower; very decorative in pots or borders. 15 to 18 inches. 35c each; \$3.50 per doz.

TENUIFOLIUM. A lovely orange-red Lily. Its brilliant color, easy culture and absolute hardiness have made it a great garden favorite. All it asks is a sunny place in the border where the soil is well drained. 2 feet. 40c each; \$4.00 per doz.

Lily-of-the-Valley.

Paper-White Narcissus.

Indoor Bulbs

GIANT-FLOWERED AMARYLLIS. Bulbs, 85c each; \$8.50 per doz.

YELLOW CALLA LILY. Bulbs, 50c each; \$5.00 per doz.

LILY-OF-THE-VALLEY. Pips, \$1.00 per doz.; \$7.00 per 100; \$65.00 per 1000.

Freessias

This is one of the most beautiful of all Cape bulbs, possessing a peculiar grace of form, and its fragrance is most delightful, one pot of five to six bulbs being sufficient to perfume a whole house. As cut flowers, they are extremely valuable.

PURITY. White. 85c per doz.; \$6.00 per 100.

GEN. PERSHING. Pink. 85c per doz.; \$6.00 per 100.

CALIFORNIA. Yellow. \$1.00 per doz.; \$8.00 per 100.

MARC PETERS. Lavender. 85c per doz.; \$6.00 per 100.

Paper-White Narcissi

For the past few years we have made tests with bulbs from different locations and are now able to offer you a quality that blooms as well as the bulbs formerly imported from France.

Start them after December 1st. Planted in pebbles and water and grown fairly cool in full light, they will flower three weeks after planting.

We offer the largest size bulbs, which is the only grade from which you can expect splendid flowers.

A border planting of Darwin, Breeder and Cottage Tulips.

Breeder Tulips

The Old Dutch Breeder Tulips appeal to all tulip lovers on account of their sturdiness, large size, and beautiful "art colors." In size they even out rival the popular Darwins. Under favorable conditions many sorts will grow over 2½ feet high and bear enormous flowers of ideal form and great substance.

The colors of these tulips are most fascinating; including solid art colors (such as bronze, brown, buff, terra cotta) as well as many combinations of colors that are unsurpassably beautiful.

Cottage Tulips

Cottage Tulips are so-called because found growing in the old cottage gardens of England, Scotland, Ireland and France where they had been established for 50 years or more. All are very beautiful, presenting a great variety in form and coloring, and having none of the stiffness of other tulips. For cutting they are greatly prized on account of their long stems and graceful habit.

Tulip Clusiana

The Little Lady Tulip. A beautiful dwarf variety suitable for perennial borders and rockeries. Outer petals bright cherry-red, inner petals creamy white with violet base. Plant 8 inches deep, 8 inches high. 85c per doz.; \$6.50 per 100.

Parrot Tulips

The petals of these have feathered edges, and in addition to other colors, combined shades of green—a peculiarity confined to this class. These Tulips are very showy and worthy of general planting in beds and borders. Very late in flowering. 15 in.

ASSORTED COLORS. 70c per doz.; \$5.00 per 100.

FANTASY. (Novelty). This recent product of the Tulip breeder's art originated as a sport from Clara Butt, the well known Darwin Tulip. Clara Butt is esteemed for its beautiful salmon pink color; and this sport Fantasy has inherited the same glorious color, except that the inside of the flower is more intense in color; and borne on stiffer stems. The height is 20 inches. 30c each; \$3.50 per doz.

SUNDEW. This Tulip is called the Bartigon Parrot. Color a brilliant fiery crimson. The edge of the petals are finely fringed, like tiny icicles. Very attractive and out of the ordinary. \$1.15 per doz.; \$8.75 per 100.

In general habit of growth these resemble the popular Darwin Tulips. All are striped or splashed with a rich shade on lighter ground. 25 in. Stock carried in four colors. 95c per doz.; \$7.00 per 100.

Hyacinths

Every year our growers prepare to select the finest grade of Hyacinths. These bulbs are called Exhibition and Bedding size, fully aged for these purposes. The Exhibition size are most adapted for indoor culture and should be planted singly in 5-inch pots or four bulbs to an 8-inch bulb pan. Keep cool and in a dark place, six to eight weeks, then bring to the light, forcing them by heat.

Bedding size bulbs are not as large but prove satisfactory for garden planting. Plant six inches apart and six inches deep, and fertilize with Bone Meal.

The distance apart should be 3 to 6 inches, according to the size of the variety.

Shady Lawn Grass Seed

On nearly all lawns there are unsightly spots caused by the fact that ordinary varieties of grasses used for lawns do not do well in the shade; consequently we have prepared a mixture of grasses which naturally grow in shady spots.
