All Orange buds taken from heavy-bearing trees. This, together with a strong, healthy root system insures you long-life trees and heavy bearers. Don't overlook the Pineapple Pear—it is the money maker of South Texas.

December and January are the two
best months to plant fruit trees.

Exhibition and Sales Ground:
Hardy Street, Opposite Alvin Hotel

1931-1932 Price List

IMPROVED SATSUMA ORANGES

(All buds from heavy-bearing trees)

Budded on 2-year-old roots, well branched and bushy Owara-Satsuma	{	6 to 12 in.	.15
		12 to 18 in.	.25
		20 to 24 in.	.35
		24 to 30 in.	.50

Two-year-old Satsuma Orange Trees, each \$1.00

Japanese Hardy Satsuma-----	{	6 to 12 in.	.20
		12 to 18 in.	.30
		24 to 30 in.	.40
		30 to 36 in.	.50

ROUND ORANGES

Improved Texas Sweet-----	{	6 to 12 in.	.20
		12 to 16 in.	.35
		18 to 24 in.	.40
		30 to 36 in.	.50

GRAPEFRUIT

Marsh Seedless-----	{	6 to 12 in.	.25
		12 to 18 in.	.35
		24 to 30 in.	.50

KUMQUATS

Oblong-----	{	.25 and .35	
Round, Sweet-----			

LEMONS

Meyers-----	{	6 to 12 in.	.25
		12 to 18 in.	.30
		24 to 30 in.	.35
		30 to 36 in.	.50

PEARS

Pineapple—on Japanese roots, blight-resisting, bear 3rd year	{	2 to 3 feet	.25
		3 to 4 feet	.30
		4 to 5 feet	.35
Le Conte, very early-----	{	4 to 5 feet	.40
Garber, medium-----			
Keiffer, late but good preserver		5 to 6 feet	.50

PLUMS

Wickson, ripens about May 20	{	.25 to .35	
Bruce, ripens about May 20--			
Methley, ripens about May 15			
Gonzales, ripens about July 1-			
Texas Beauty, ripens about May 10			
Excelsior, ripens about July 10-			
Happness, ripens about June 15			
San Rosa, ripens in June----			
Dorris, ripens in June-----	{		
Gold, ripens in June-----			

Two to three-year-old Plums, bear first year.	{	each, .75
--	---	-----------

PEACHES

Best June, ripens June 10	----	}	.25 to .35
Mamie Ross, ripens July 5	----		
Indian Kling, ripens August 1	----		
Elberta, ripens July 10	----		
Honey, ripens June 15	----		
Carmen, ripens July 5	----		

APPLES

Helms	-----	}	2 to 3 feet .40
Becker	-----		3 to 4 feet .50

QUINCES

Orange	-----	.40
--------	-------	-----

LARGE JAPANESE PERSIMMONS

Tani Nashi	-----	}	2 to 3 feet .35
Hyakume	-----		3 to 4 feet .45
			4 to 5 feet .55

Trifolita plants, per thousand	-----	\$2.50
--------------------------------	-------	--------

CHERRIES

Early Richmond; Large Montmorency, each	---	.60
---	-----	-----

FIGS

Magnolia	-----	.25
Celestial	-----	.30
Green Ischea	-----	.30
Brown Turkey	-----	.30

GRAPES

Moore's Early	-----	}	1-year-old, .15
Niagara	-----		
Delaware	-----	}	2-year-old, .25
Concord	-----		
Carman	-----		

PECANS

Stuarts	}	3 to 4 feet .65
		4 to 5 feet .75
		5 to 6 feet .80
		7 to 8 ft. \$1.00
Success	}	3 to 4 feet .65
		4 to 5 feet .75
		5 to 6 feet .80
		7 to 8 ft. \$1.00
Schley	}	3 to 4 feet .65
		4 to 5 feet .75
Money Maker	}	3 to 4 feet .65
		4 to 5 feet .75
Delmas	}	3 to 4 feet .65
		4 to 5 feet .75
Pabst	}	3 to 4 feet .65
		4 to 5 feet .75
		5 to 6 feet .80
		7 to 8 ft. \$1.00

PECANS

Frotscher-----	}	3 to 4 feet .65
		4 to 5 feet .75
Moore's-----	}	3 to 4 feet .65
		4 to 5 feet .75
		7 to 8 ft. \$1.00

All budded on four-year-old roots and will bear the third year.

Mehan Pecan, largest in the world, 33 nuts make a pound. Bear when 2 to 2½ years old. Thin shell, plump and rich meat. Nuts 2½ in. long, 3 in. in circumference.	One Tree	\$5.00
	10 or more, each	\$4.50

APRICOTS

Moor Park; Royal, on Mariana roots ,3 to 6 ft.	.45
--	-----

DEWBERRIES

Thornless -----	.08
Mayes -----	.05

BLACKBERRIES

Dallas-----	}	each, .05, per 100 \$3.00
McDonald-----		

China Ju Juba-----	.25 to .35
--------------------	------------

ORNAMENTAL SHRUBBERY

Crepe Myrtle in red or white, each	.35
Red Radiance Rose	} each, .25 to .35
Pink Radiance Rose	
Estoile de France Rose	
J. I. Mock Rose	
Yellow Persian Rose	
Chinese Elm, each	.40
Nandina, each	.50
Large Italian Cypress, 7 to 8 feet, per foot	.40
Medium Italian Cypress, 4 to 5 feet, per ft.	.40
Small Italian Cypress, 2 to 3 feet, per foot	.40
Small Arizona Cypress, each	.50
Juniper, wide-spreading, Pfitzerina, small, ea.	.50
Wax Leaf Ligustrum	.35 to \$1.50
Irish Juniper, small each	.40

Magnolia Trees, 4 to 5 feet, each	\$3.00
Althea—White, Pink, Red, Purple, each	.25
Butterfly Bush, each	.25
Wild Peach	.25 up

Citrus trees should be pruned before planting. It is a safe plan with practically all plants that the tops and broken roots (if any) should be cut back before planting.

Bank your orange trees about 12 inches high the last of November and let them stand until the last of March. I have carried orange and grapefruit trees through the winter when the thermometer registered 8 degrees above zero.

Set the trees the same depth they stood in the nursery rows. The exact point can be determined by the earth-mark or the "collar". Citrus trees, particularly, are very much injured by too deep planting, and it is a safe rule with all trees and shrubs to set them a little higher than they grew rather than lower. Spread out the roots carefully by hand, and pack the earth well around them. When the hole is three-quarters filled up, pack thoroughly with the feet. This is important. More trees are lost from loose packing than from any other cause. After packing thoroughly, and before the hole is quite filled up, pour in water, especially if the soil is dry.

December and January planting brings best results. They get a better and earlier start in Spring.
