TEXAS PECAN NURSERY

TYLER, TEXAS

HOME ORCHARD BULLETIN

Our Famous
Golden Beauty Peach
(Copyrighted)

***We are the originators and sole propagators
of this wonderful new peach***

Why We Can Furnish You With Fruit Trees

WE have spent twenty years developing the Texas Pecan Nursery, Inc., which is by far the largest Pecan Nursery west of the Mississippi River and among the largest in the United States. A large number of our pecan tree customers write us each year wanting a dependable assortment of fruit trees. So, on account of these many inquiries we are getting, and the fact that we own and control several hundred acres of Peach Orchards, consisting of new varieties that we have developed, we have decided to add a Fruit Department to our pecan business and give our thousands of customers the benefit of our 20 years of experience along this line.

The trees that we are growing have been budded from good, strong, vigorous and heavy bearing trees.

We know how to grow good, strong, healthy, well rooted fruit trees as well as pecan trees, so we can assure you that you can get the best results if you will set and care for them according to our instructions that will be mailed with each order.

Why many fail in growing fruit trees is because they do not spray their trees for San Juan Scale. This is a small insect that will kill your peach, plum and pear trees if it is not controlled. One spraying between December 1st and February 15th with oil emulsion will control same completely if applied carefully.

We furnish this Oil Emulsion in 1-gallon buckets f. o. b. Tyler, Texas, at \$1.00 each; 5-gallon cans at \$4.50 f. o. b. Tyler, Texas. One gallon should make 33 gallons of spray when mixed with water which would properly spray twenty-five three- or four-year-old trees. It will keep as long as you do not let it freeze.

For six or eight small trees you can use a 35c or 50c spray gun; for larger home orchards get a 3 to 5-gallon spray, costing about \$5.00. For an acre orchard or more get a Barrel Sprayer from some hardware house.

No Order Sold for Less Than One Dollar

Spray Your Fruit Trees

The reason there are no more home orchards today is because people do not spray their trees. Buy Oil Emulsion from your druggist, but if he can not furnish same, order from us, as we are handling same for the convenience of our customers. \$1.00 per gallon; \$4.50 for 5 gallons, f. o. b. Tyler, Texas.

Protect Your Children's Health and Save a Big Grocery Bill by Having Your Own Fruits

It's not a real home without fruit. You can not afford to let your home grounds grow up with grass and weeds when you can grow the wonderful assortment of fruits as listed herein. We furnish free instructions how to successfully care for and grow these fruits. Order NOW before these assortments are broken. You can set until March 10th, but November and December are better.

APPLES

**We Offer You
Six of the
Best Standard
Varieties For
The Southwest**

RED JUNE. One of the best early apples for table and market. Medium; deep red; flesh white, crisp, excellent. Ripens in June.

YELLOW TRANSPARENT. Widely known and well liked; large size; transparent yellow; quality good, crisp, sub-acid, and very fragrant. An excellent cooker. Fruit tender and requires careful handling. Tree bears young and is of rather dwarfish growth; is extremely hardy. Ripens in June.

DELICIOUS. A beautiful red-striped winter apple. Good quality and fine flavor. One of the best known and best liked apples grown. Every home should have at least a few of these.

EARLY HARVEST. Medium; bright straw color; tender; sub-acid; fine dessert and cooking apple. Must be handled very carefully for market.

PRICES—On good, thrifty trees:

	Each	10	100
3 to 4 feet	\$.40	\$.35	\$.25
4 to 5 feet	.60	.50	.40

(F. O. B. Tyler, Texas)

WINESAP. One of the oldest of American apples and still increasing in favor. Its size, color and particularly its quality have given it the well deserved popularity it has enjoyed. It is of medium size, vivid red, with highly satisfying flavor. It is one of the best keepers of all the apples. It is an all-purpose apple and a good one.

GRIMES. A golden yellow apple that is an old favorite over the United States on account of its beauty and size. The tree is very productive and long lived; a splendid variety for commercial plantings as well as home orchards. Ripens in early fall.

GRAPES

Four exceptionally good varieties of grapes.

MOORE'S EARLY. Very large; early; black; of fine quality; good market grape; very healthy and prolific.

CARMAN. One of the most profitable and popular varieties; splendid as a table grape as well as for wine, grape juice, preserves and jelly. Cluster very large; sometimes weighing two pounds; shouldered; very compact. Berries medium size, black with thin bloom. Skin tough and thin, never cracks, pulp meaty,

firm but tender when fully ripe; of splendid quality. Ripe in July.

CONCORD. The best known of all varieties of grapes; large, black, suited for table or market. Ripe in July.

NIAGARA. Large, greenish white; semi-transparent; quality good; a seedling of Concord; successful over a wide range of territory. Mid-season.

PRICES—Two-year vines:

Our Famous New Golden Beauty Peach

(COPYRIGHTED)

THIS PEACH IS BEING OFFERED TO YOU FOR THE FIRST TIME. Provided you will agree not to use or allow others to use buds or grafts from your trees.

This is a large yellow freestone peach which has a beautiful red cheek, ripens from June 10th to 15th. 20 to 25 days earlier than the Elberta. We have spent seven or eight years in testing this peach, but now we are convinced that there is none that is being offered to the trade as good that ripens before the Elberta. It has missed only one crop completely and that was 1927. This year even with our below-zero winter this variety produced a nice sprinkle of fruit. We believe it is one of the best varieties for your home orchard.

As a commercial peach we find that it goes to Texas markets and brings TIP TOP prices. Read letter printed below from a commission merchant who handled them throughout the season this year.

Galveston, Texas.
July 2, 1930

Texas Pecan Nursery,
Tyler, Texas.

Gentlemen: I am glad to lend my endorsement to your Golden Beauty Peach. This is a new variety on the market and arrives here at a time when the demand is good. I have sold this peach at \$2.00 per one-third bushel lug throughout the season and could have been selling them at this price until now. I received the last one week ago.

It is my opinion that this variety, coming on so early and being so far superior in appearance, carrying qualities and taste than any other early peach, will always find a ready market.

Yours truly,

GEO. A. REYDER CO.

Prices of Trees (Can only furnish three sizes this season):

- 1 to 2 feet size, 40c each; 35c in 100 lots.
- 2 to 3 feet size, 50c each; 40c in 100 lots.
- 3 to 4 feet size, 75c each; 60c in 100 lots.

(F. O. B. Tyler, Texas)

Three Other Good Special Varieties

RED INDIAN. The old-fashioned kind that is so good to eat, pickle and preserve. Ripens in August.

YELLOW INDIAN. It is like the above except has yellow flesh.

SEPTEMBER ELBERTA. It is a wonderful yellow freestone peach that ripens in September. It has a delicious flavor and ships well.

Prices on these three specials:

1 to 2 feet size, 30c each; 25c in 100 lots.
2 to 3 feet size, 35c each; 30c in 100 lots.
3 to 4 feet size, 50c each; 40c in 100 lots.

(F. O. B. Tyler, Texas)

Eight Outstanding Standard Varieties of Peaches

MAYFLOWER. A "red all over" peach; handsome and of splendid quality. Fine for home orchards and finds ready sale on the market. Should be in every home orchard. Ripens in May.

ARP BEAUTY. Yellow with bright red blush; a firm, juicy and excellent peach of unusually good flavor; semi-cling; ripe the first of June.

HILEY. Ripens last of June; skin yellowish white with deep red cheek; flesh white and very juicy; medium size; freestone; prolific. Good shipper.

ELBERTA. The most widely known of all peaches. Very attractive in appearance; large size; deep yellow, splashed crimson; perfect freestone; ripens July 5th to 20th. Can be grown profitably in the North, South, East, and West. Tree very vigorous and highly productive.

AUGBERT. A superb freestone, similar to Elberta and in many respects superior. Tree vigorous and prolific; very valuable. Ripens the middle of August.

J. H. HALE. Large size; yellow overlaid with bright carmine; flesh deep yellow; firm and fine grained; delicious flavor; freestone. Ripens in July.

OLD MIXON CLING. Large, round, white with distinct red blush; flesh white, red next the seed, firm and of excellent quality. Adapted to nearly all sections where peaches are grown. Ripens in August. Exceptionally good for preserving and pickling.

STINSON. One of the best late peaches. Large, oblong; white with red cheek; good flavor; clingstone. Ripens in October.

Prices on Peaches

4 to 5 feet	.60	.50	.40

Prices quoted F. O. B. Tyler, Texas

FIGS

Every home should have figs.

BROWN TURKEY. Large; color, brownish purple; fruit very sweet; hardier than Magnolia; begins to ripen last of June.

MAGNOLIA. Fruit very large, sweet and rich; ripens in June until frost.

PRICES—F. O. B. Tyler, Texas:

2 to 3 feet.....	\$.35	\$.30	\$.25
3 to 4 feet.....	.50	.45	.40

Should bear first year.

SPECIAL IN PEARS

Our Blight-Proof Pineapple Sand Pear is Guaranteed not to Blight

This pear does not blight, is a very thrifty, vigorous grower and is an extra heavy bearer.

Georgia Experiment Station in Bulletin No. 142 says that a 33-year-old tree made 66 bushels of pears and an 8-year-old tree made 18 bushels. We do not say you can make such records, but it's given up to be an extra heavy bearer and a good eating, preserving, canning and shipping pear. You cannot afford not to have a few trees of this variety.

PRICES on this Special Blight-Proof Pear:

	Each	10 Lots	100 Lots
4 to 5 feet	\$1.00	\$.90	\$.75
6 to 7 feet	1.50	1.40	1.25

KEIFFER. The best variety for the Southwest; large; yellow with rusty cheek; fine for cooking and for market; ripens in October.

PRICES:

Size	Each	10 Lots	100 Lots
4 to 5 feet	\$.85	\$.75	\$.65
6 to 7 feet	1.25	1.15	1.00

F. O. B. Tyler, Texas

PLUMS

AMERICA. Successful anywhere. Bears very young and enormous crops. This wonderful plum should be in every orchard, or where there is no orchard there should be a few trees in the yard. It is as beautiful as a plum can possibly be, a golden yellow with red cheek. Ripens about June 15th.

BURBANK. Extremely popular in all sections. Richly colored, red mottled and dotted with yellow. A heavy bearer. Ripe in July.

SIX WEEKS. The earliest of all plums. Large; oblong; brilliant red; flesh pink; seed small; ripe May 20 to June 1. The tree is vigorous, upright in growth and very prolific.

GOLD. Nearly transparent; golden yellow; has wide range; sure bearer. Ripens the last of June.

PRICES:

Size	Each	10 Lots	100 Lots
2 to 3 feet	\$.35	\$.30	\$.25
3 to 4 feet	.50	.40	.30
4 to 5 feet	.75	.60	.50
