Wholesale Bulletin

Fall 1931 — Spring 1932

C. E. WILSON & CO., Inc.
MANCHESTER, CONN.

OUR SPECIALTY — A General Line of
Connecticut Valley Grown Lining Out Stock

Pages 17 to 23

Note:—This list is for active dealers and Nurserymen only. We do not fill retail orders at Wholesale Prices.

Terms and Conditions of Sale

Terms. The usual terms are offered to those of established credit or whose responsibility is known to us. Cash, security or satisfactory references are required from unknown parties. All bills are due in sixty days unless other arrangements are made at the time of sale. All Prices are net and not subject to any discount unless specially agreed upon.

Shipping. Customers are requested to give definite instructions in regard to date of shipment and manner of shipping. In the absence of definite instructions, we will use our own best judgment but with the express understanding that it is without responsibility on our part.

Guaranty. We give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any nursery stock we sell and we will not be in any way responsible for the crop.

Claims must be made promptly on receipt of goods. If stock is not exactly as represented, it must be reported promptly and on authority should be returned to us immediately. We will cheerfully and without question credit back the unsatisfactory plants, or send others, but we will not entertain claims made after goods have been once accepted, or when report is not made within five days after arrival of stock.

Location. We are located ten miles east of Hartford, Conn., on the New York, New Haven and Hartford Railroad and enjoy the same freight service as Hartford. Overnight service to Boston, New York City and Philadelphia; two days to Albany, N. Y., Chicago, Ill., Pittsburgh, Pa.; three days to Detroit, Mich., and Cleveland, Ohio; and other points proportionately.

We cordially invite you to visit and inspect our Nursery.

Respectfully yours,

C. E. WILSON & COMPANY, INC.

ROSES

IMPORTANT ANNOUNCEMENT

After four years of extensive experimenting we have perfected a system and a quality of wax which we are using to coat all Rose Bushes sold by us, unless specifically requested not to do so.

This Coating Process is revolutionizing the handling of Roses and many other varieties of Nursery Stock. In many cases it really means the difference between selling a real good live plant to your customer as compared with plants that are dead or so lacking in vitality they do not produce the expected results.

There are many advantages derived from this coating. It not only protects you but your customer also. However, lack of space does not permit a detailed explanation of the merits of our Coating Process.

Practically all of our roses are budded on Multiflora Japonica which is the best understock for general purposes. This combined with our above mentioned waxing process makes our Rose Bushes practically fool proof.

CLIMBING AND PILLAR ROSES

MANCHESTER is famous for the quality of Berberry Seedlings it has produced for many years and justly so.

The ideal soil and climatic condition of the Connecticut River Valley develops the finest root system on all kinds of Nursery Stock. This is particularly important in the production of Lining Out Stock, where it is imperative to have the best root system possible.

We not only produce an abundance of nice roots, but in addition, all our Lining Out Stock has a certain Pep and Vigor that seems to be lacking in plants produced in other sections of the Country. This may not be generally known but we have proved it time and time again to our own satisfaction. It is the real reason why Manchester Berberry Seedlings have been so popular throughout the Country for so many years.

ROSE MULTIFLORA JAPONICA — SEEDLINGS

This is the best understock for budding and grafting. Some of its superior advantages are: perfectly hardy; does not sucker; buds as readily as other stocks; better stands — both stocks and buds; producing an ideal plant for potting or dormant planting; no long shank as is common where acutting stock is used:
