SEDUM-STONECROP

A genus of plants which vary in habit from dwarf, creeping plants to those of larger growth, as Spectabile, which grows about two feet high. Some are evergreen and others of deciduous growth. The dwarf kinds do well as edgings to borders or in rock gardens. Others are suitable for grouping in the border. They are the easiest of all plants to grow.

Culture. Ordinary soil and dry, sunny borders or dry sunny places in the rock garden will suit all. Spectabile, indeed, will also thrive in shade. For edging purposes simply plant a few inches apart, and in due course they will develop into a continuous mass of foliage. They will grow where little else will thrive.

DWARF VARIETIES

1. *Acre* (Golden Moss). Much used for covering graves; foliage green; flowers bright yellow; prostrate and slowly spreading; 1 inch; each.....10c
2. *Album*. Dwarf and spreading; thick, waxy round foliage, white flowers; good rock plant; 2 inches; each.....10c
3. *Anglicum*. Dwarf, spreading; very good rock plant, evergreen, glaucous leaves, white flowers; leaves turn red in the fall; 1 inch.....15c
4. *Anacapseros*. Rare dwarf; foliage is glaucous gray; a very interesting plant; 3 inches.....25c
5. *Caeruleum*. Dwarf and spreading; thick waxy leaves; lavender flowers; 3 inches.....25c
6. *Dasyphelium*. Very good for shady places; very dwarf with round glaucous blue leaves; makes a very good house plant; 1 inch.....25c
7. *Diffusum*. Dwarf; light green almost white leaves; 2 inches.....15c
8. *Douglaii*. Dwarf, spreading; thick waxy round gray leaves; 3 inches.....15c
9. *Eversi*. A very nice variety of sub-trailing habit; foliage is glaucous gray; in October the plant is covered with rose colored flowers.....10c
10. *Glattium*. Native of Colorado; dwarf; green leaves, yellow flower; 1 inch high.....10c
11. *Hispanicum*. Very dwarf; pretty glaucous, bluish gray leaves of trailing habit; 1 inch.....10c
12. *Ibericum*. Orange flowers with prostrate green leaves turn red in fall.....10c
13. *Kamtschaticum*. Orange-yellow flowers, with prostrate, green foliage, turning golden in autumn.....10c
14. *Kamtschaticum Variegated*. One of the best, because of its handsome dull golden variegated foliage which blends marvelously with the orange-yellow flowers which are profusely produced in midsummer at a time when color in the rock garden is at a premium. Good strong grower but not rampant.....15c
15. *Lydiun*. Very fine rock plant; blue-green foliage and of prostrate habit; 1 inch high.....10c
16. *Middendorffianum*. Emerald green leaves; rapid grower; 3 inches high.....15c
17. *Maximowiczii*. Yellow flower with prostrate green leaves; 3 inches high.....10c
18. *Morarense*. Looks like *Acre* but grows erect; 3 inches high.....25c
19. *Murale*. Dwarf and spreading; thick waxy round leaves; pink flowers.....10c
20. *Nevi Rare*. Small gray evergreen-like leaves; must be planted in the shady side of rock; 2 inches high.....25c
21. *Oppositifolium*. White flower; same as No. 12.....10c
22. *Oregonicum*. Yellow flowers with green foliage, turns red in hot weather; 3 inches.....25c
23. *Obtusatum*. Golden yellow flowers, with emerald-green foliage, shaded bronze; 3 inches.....25c
24. *Pruniatum Forsterianum*. Pretty glaucous, bluish green leaves of trailing habit with golden yellow flowers; 3 inches high.....10c
25. *Pilsom*. Dwarf; glaucous gray leaves; rapid grower; 2 inches.....15c
26. *Reflaxum*. Dwarf; dark green foliage, yellow flowers; 1 inch high.....10c
27. *Sibericum*. Dwarf and spreading; thick waxy round leaves, yellow flower; 2 inches high.....10c
28. *Sarmentosum*. Excellent dwarf variety for rockeries or border edgings. The best Sedum for filling seams between rocks in wall garden; rapid grower.....10c
29. *Sexangulare*. Very dark green foliage; yellow flowers; habit much like *Acre*.....10c
30. *Sieholdi*. Round, succulent, glaucous foliage; bright pink flowers in September. The loveliest of all the Sedums.....25c
31. *Spurium Coccineum*. A beautiful rosy crimson-flowered form; July and August; 6 inches. Very fast spreading variety; good for covering sandy banks.....10c
32. *Stoloniferum*. Most desirable; evergreen leaves; flowers purplish pink; July and August. Excellent for rock garden. 6 inches.....10c
33. *Stahlii*. Dwarf; very fine rock plant; dark green foliage.....15c
34. *Ternatum*. The most satisfactory variety for planting in the shade; for ground carpeting under trees or anywhere it is difficult to make plants grow. Spreads rapidly and does well on all sorts of soil.....10c
35. *Tenuifolium*. Dwarf; thick waxy glaucous green leaves; yellow flowers.....10c
36. *Villosum*. Dwarf; blue gray leaves, turning red when planted in sunny places.....25c
37. Complete Collection, 1 of each or 36 Plants.....\$5.00
We have seven unnamed dwarf varieties.

Hardy Cactus Native of Minnesota, will stand the hardest winter.
Mammillaria (Pin Cushion Cactus) each.....25c
Opuntia (Pear Cactus) each.....15c
