HOW TO GROW GOOD DAHLIAS

LIME YOUR GROUND IF IT IS ACIDY

Plant out in the open where they can get plenty of sunlight. Plant tubers horizontally eye up 4 or 5 inches deep, mound up a little hill over eye, knock top off if a crust forms until plants come through ground. Keep soil loose by frequent cultivating until buds begin to form. Keep all buds pinched out until the first of August. A little fertilizer with shallow cultivation in August is O. K. By all means do not force your Dahlias until August, and then only those that are not showing signs of buds by the 15th.

JOIN THE INDIANA GLADIOLUS SOCIETY

I will give two dollars worth of bulbs, my selection, to the first five persons that send me two dollars for their membership in the Indiana Gladiolus Society for 1932.

You will also be affiliated with the American Gladiolus Society and receive their Gladiolus Review each month which is worth many times more than the two dollars. Just send me two dollars and say, "Send my name to the Indiana Gladiolus Society," and I will do the rest. And at the end of the year if you feel that you have not received your two dollars worth please notify me and I will refund your two dollars.
