Native Plants and Seeds

From

THE PACIFIC NORTHWEST

TO OUR CUSTOMERS AND FRIENDS:

We welcome this opportunity to thank you for the encouragement you have given us to continue our search for new and valuable native perennials here in the Pacific Northwest. This year we are able to offer you a number of plants and seeds which we believe have never before been listed for sale. All plants are grown and tested in our nursery before being listed for distribution.

We make a special effort to keep our nomenclature botanically correct and up to date. We guarantee all seed to be strictly fresh and all plants to be strong and healthy when they leave us. We cannot, however, guarantee your success in growing the plants or in germinating the seed since there are many causes of failure over which we have no control. We are glad to supply planting instructions with any plants or seeds which require special culture.

INSTRUCTIONS FOR ORDERING:

Kindly send remittance with your order. Postal money orders, checks or bank drafts accepted. Plant orders amounting to \$3.00 or more are sent postpaid. A delivery charge of 25 cents is made on orders amounting to less than \$3.00. All seeds are sent postpaid. All goods are carefully packed, the cost of which service is included in the prices quoted herein. We do not substitute unless you send a list of alternates. If we cannot supply your needs your money is refunded. Order early. Some items are available only in small quantities and may soon be exhausted.

FOREIGN ORDERS:

We welcome foreign orders for both plants and seeds. However, no foreign orders will be recognized unless accompanied by remittance in full. Only International money orders will be accepted as payment.
