Beetle-proof Evergreens

Named Hybrid Rhododendrons, Hollies and Conifers

Which the Japanese Beetle Spares

LIBRARY
RECEIVED
★ MAR 21 1932 ★

Give a thought to the little enemy which feasts in your garden, and which is planning this year to bring out a much larger family than last. The Japanese Beetle eats many different shrubs and trees. Other varieties it does not like, and seldom or never injures.

Are you planting for your own enjoyment or for the beetle's? If for your own, select Guyencourt Beetle-proof varieties.

BEETLE-PROOF AMERICAN HOLLY

You can and should spray your non-beetle-proof flower plants and small shrubs with a suitable poison to save them. Shrubs and trees which grow larger can be sprayed only at great expense and trouble.

When setting out new shrubs or trees for the future, ask yourself, "Shall I plant beetle-food or ornaments?"

At GUYENCOURT for years we have specialized in varieties which the Japanese Beetle avoids. They include fortunately some of the most magnificent plants known to gardeners.

There are of course other sorts which although the beetle may at times attack them, are so beautiful that no garden would be complete without their presence. But you can plant your grounds virtually beetle-proof, yet keep the utmost quality and elegance.

***Cutting - Grown Named Hybrid Rhodendrons**

These superb varieties propagated by our improved method are hardier, stronger plants, with no understock to sap their vitality.

Plant in soil lightened and acidified with peat or acid leaf-mold. Give some shade, and shelter from the worst wind. Keep permanently mulched with oak leaves. Never dig around the roots. Never lime.

	1 foot	1¼ feet	1½ feet
*Album Grandiflorum (Blush, fading white)			
Rapid, graceful grower forming a large bush. Bright, smooth leaves. Very hardy			
.....	\$2.50	\$3.25	\$4.00
*Catawbiense Grandiflorum (Deep lavender)			
Dense bush or small tree. Good foliage	2.50	3.25	4.00
*Giganteum (Bright crimson). Very large truss of flowers unusually fine in form and color. Large leaves	3.50	4.25	5.00
*Roseum Elegans (Pink). Dense, rather dwarf shrub, flowering well even when young. Popular and very hardy	2.50	3.25	4.00

Named Hybrid Rhodendrons Grafted

	1½ feet	2 feet	2½ feet	3 feet
*Album Elegans (Lilac blush)				
Tall shrub with large flowers and very large leaves. Very hardy				
.....	\$5.00	\$6.50	\$8.50	
*Delicatissimum (White). Good bush form. Very hardy	6.00	8.00		
*Ignatius Sargent (Deep rose). Sturdy growth with fine large flowers and foliage	8.00	10.00	15.00	
*White, yellow blotch (Name unknown). A good named variety, but the name has been lost	\$5.00	6.00		

Unusally Fine Specimen Evergreens

(For prices, get our Special List: Rarities & Specimens)

Plant a Beetle-proof Evergreen Hedge

The most carefully landscaped grounds are usually enclosed with evergreen hedges, beautiful winter and summer alike. The following suitable varieties include some at very low cost. Now is the time to plant.

Best hedge evergreens where parts are shaded:

*Japanese Yew	*American Holly
*Dwarf Japanese Yew	*Japanese Holly
*Hemlock	*Mahonia

Hedge evergreens for sunny places:

*Hinoki Cypress	*American Arborvitae
*Pyramidal Arborvitae	*Sawara Cypress
*Rosenthal Arborvitae	*Norway Spruce

Ask for special prices according to size of hedge.

Firethorn

Did you see the remarkable specimens of Firethorn (Evergreen Hawthorn) in our rows during the fall and winter? They were half hidden under a mass of scarlet berries.

5 feet high, 6 feet broad, densely grown — \$12.50

Thrifty plants in 4 inch pots, propagated from the
best specimens — 50¢

These Popular Evergreens Only \$1 Each

*3 Globe Arborvitae.....1½	feet	*2 Irish Juniper.....2	feet
*1 Norway Spruce.....2½	feet	*1 Norway Spruce.....1½	feet
All for \$12		All for \$6	

All dug with ball & burlap but not delivered or planted

*Japanese Beetle-proof

***American Holly in Pots**

Sure to Grow — Sure to Bear Berries

Our special Arden Holly is very hardy, grows rapidly, and is sure to bear quantities of berries even when small. By growing this variety from cuttings and carrying them in pots, we have eliminated all difficulty in transplanting, and now offer a thoroughly satisfactory Holly.

American Holly makes a fine hedge plant, can be grown in an orchard to furnish Christmas greens, or planted as a specimen. Thrives in sun or shade.

4-inch pots — \$2.00

6-inch pots — \$3.00

Where there is no staminate American Holly in the neighborhood, it will be necessary to plant one for pollen. Same price.

****Ilex crenata microphylla***

A small-leaved Japanese species unsurpassed for foundation planting in cities.

1 foot — \$2.50 1¼ feet — \$3.50
1½ feet — \$5.00

****Ilex Pernyi***

A rare Chinese species offered by only one other nursery in the United States, so far as we know.

4-inch pots — \$3.50
6-inch pots — \$5.00
