HARDY LILIES

The leading and best varieties for forcing and garden planting.

LILIUM AURATUM (The Gold Banded Lily of Japan)—The largest and one of the most gorgeous hardy Lilies. The white flowers are often eight to ten inches across, bell-shaped, with slightly flaring and waved petals, each thickly dotted with maroon spots and marked by a showy bright yellow band down the center. Intensely fragrant. Blooms in July and August. First size bulbs, \$1.75 per 12, \$12.00 per 100.

LILIUM RUBRUM—Considered the finest of the showy Lilies. The main color is white, clouded, banded, and spotted with beautiful crimson and pink, giving the effect of some rare orchid. First size bulbs, \$2.15 per 12, \$15.00 per 100.

LILIUM GIGANTEUM (The Easter Lily)—The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open, they can be kept for two weeks. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals. As a garden Lily, it is of great beauty, being entirely hardy except in Northern climate, where it requires a protection of leaves or litter to the depth of five or six inches. First size bulbs, \$1.50 per 12, \$10.00 per 100.

LILIUM CANDIDUM (The Madonna Lily)—The plants make healthy evergreen rosettes of leaves in the autumn, from which stout stems, clothed with short leaves, arise in spring, bearing spire-like clusters of pure white,

starry Lilies beautifully illumined by brilliant yellow anthers. They, too, are deliciously sweet, but are not so overpoweringly fragrant as some others, and may be cut and brought into the house with comfort. It blooms in June, immediately before the Royal Lily, at the same time as Delphinium Belladonna, with which it is frequently combined. As it is base-rooting only, it should be planted shallow. It likes good, well-limed garden soil and a sunny exposure. First size bulbs, \$2.15 per 12, \$15.00 per 100.

LILIUM REGALE (The Royal Lily)—A very hardy easily grown variety from the mountains of Western China, and one of the most glorious of all. The flowers are gigantic, of true Lily shape, with long waxed petals, recurved at the tips, and lightly frilled along the edges. In effect it is pure white, but the center of the flower is richly suffused with golden yellow and the brilliant orange-yellow anthers are large and showy. The outside of the buds and the three outer petals are stained with purple-brown, which often gives a faint pinkish value to the flowers seen in quantity. Unequaled for magnificent effect. Stem rooting; plant moderately deep. First size bulbs, \$1.20 per 12, \$8.50 per 100, \$80.00 per 1000.

LILY OF THE VALLEY—German Grown Pips the highest quality for outdoor planting. \$2.75 per hundred, \$24.00 per thousand.

Irvington Beauty and Fiat are the best pink Geraniums.

New Buddleia Alternifolia

This is the hardest "Butterfly Bush" yet introduced. Only once in a lifetime do we find a new shrub of so outstanding merit as this. While other Buddleias freeze down to the ground every winter, and during the summer grow to a height of five or six feet, being too large for a perennial border and not suitable for among shrubs, this wonderful new Buddleia DOES NOT FREEZE DOWN in the winter, but is just like other shrubs, filling a long-wanted place for Buddleias. It is a very distinct and charming sight while in bloom, with its long-arching or pendulous branches covered with clusters of lilac-purple flowers from mid-summer until late fall.

This climbing genus has been taken up by the florists' trade in a large way, since this plant adapts itself unusually well to the unnatural conditions of the average home better than most any other plant. A very large demand has ensued from the public. It is particularly suitable for sun parlor decoration, but does equally well in any part of the house, even in comparatively dark situations. Can be grown successfully in pots or hanging baskets, but seems particularly "happy" in wall pockets. Florists have found an unusually large demand for this valuable trailing vine and it can be merchandised with the assurance of giving utmost satisfaction with a minimum of care. It furnishes a beautiful "green atmosphere" and attracts no little attention. Try out this valuable plant in a merchandising way; we are sure you will follow with a repeat order in a short time.

AURANTIACUS—Large and double, with orange-colored flowers.

CARMINIATUS PERFECTUS—Full, round flowers of perfect shape and of a rich, soft, carmine-rose, with deep crimson eye; fully six inches in diameter.

DOUBLE CRIMSON—Flower of the richest crimson; combined with glossy foliage.

GRANDIFLORUS—Rich, glossy, cut-leaved foliage, literally covering the plant with scarlet-crimson flowers.

PEACHBLOW—A sport from the Double Red Hibiscus Rosea Sinensis. Flowers double and from four to five inches in diameter, of a charming rich, clear pink color, with small, deep crimson center. It is one of the freest flowering plant novelties recently offered. The color is an entirely new and beautiful shade and it blooms abundantly and continuously during the summer and fall months. Large plants two and three years old make a magnificent show. It will give general satisfaction to those who grow it, either in pots or planted out in the garden. It blooms well in winter in greenhouses or in any sunny window.

PSYCHE—Scarlet color, with edge of petals ruffled. The tree when in full bloom is completely covered with flowers.

SUB-VIOLEACEOUS—Flowers of enormous size, beautiful carmine, tinted violet. Probably the largest flower of the Hibiscus family, and an unusually free bloomer.

SINENSIS GIGANTEUS—Its flowers are of enormous size, often eight to ten inches across, opening flat, and are of such vivid crimson-scarlet color that they can be seen from a long distance like a flaming torch.

VERSICOLOR—A variety combining in its flowers all the colors of the whole family, being handsomely striped crimson, buff, rose and white. Flowers eight inches in diameter.

Nandina (Domestica)

The delicate foliage of the Nandina is a brilliant dash of gorgeous orange-red or crimson color in winter. It is dense and stocky, being one of the dwarfish plants of Japanese gardens. The leaves are rich red when young, dark green at maturity, and boldly colored in winter. Nandina thrives well in any well drained, loamy soil. In autumn is covered with showy clusters of small red berries.

FERNS

Altho we have been increasing our production of Nephrolepis Ferns for the past four years, the demand constantly exceeds the supply. Successful fern growing invariably hinges on the cleanliness of the plants. Ours are free from "White Scale." We carry at all times a good supply of 2½ inch ferns.

TEDDY JUNIOR (The Fern for Every Household)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzei, with longer, narrower gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other Nephrolepis.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

WHITMANII (The Ostrich Plume Fern)—The well-known fluffy leaved fern; a popular florists' variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are super-imposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZEI ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

DWARF BOSTON—The most popular of present day ferns. A dwarf type of the popular Boston variety.

GOODI ("The Baby's Breath Fern")—(Good & Reese.) This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite.

A dependable supply.

Geraniums

No plant lends itself to such general usefulness as the Geranium. For pot work and bedding it is unsurpassed. We carry at all times immense quantities of this indispensable florist's plant but have sold out early the past few seasons. Make your reservations early.

New Geranium

"Michell's Sensation"

(A cross between Ricard and Jean Vaud.) Well named, as it is really a "Sensation," and surpasses all red varieties now in existence. Below are a few of the outstanding features of this sterling novelty.

A—Very vigorous grower.
B—Free-flowering qualities, not in any other variety.
C—Handsome foliage of leathery substance. Light green with dark zone.

D—Brilliant red, Poinsettia colored. Double flower heads, expanding 5 to 6 inches across.

E—Covered continuously with flower heads, often 6 to 7 at one time.

F—Can be brought into bloom for Christmas, Easter, or Mother's Day.

2½-inch pots. Price per dozen, \$1.50; per 100, \$12.00; per 1000, \$100.00.

Irving Beauty (New): Since introducing Geranium in 1927, the demand has constantly exceeded the supply. It is the most prolific of all Geraniums, flowering earlier and later than all other varieties, every branch producing an immense truss of rosy salmon pink flowers. It is not unusual for a four-inch pot plant of Irvington Beauty to show five to seven flower heads at one time. Every progressive florist should grow Irvington Beauty for increased profits. 2½ inch pots, \$1.00 per 12, \$7.50 per 100, \$70.00 per 1000.

Fiat—(The True Variety): No Geranium has ever been so favorably received as Fiat. We have the true stock of Fiat, and will have the largest supply in the country this year. Florists who are not growing Fiat are missing the most brilliantly colored of all Geraniums. Of good growth, and an intense dark salmon pink in color. 2½ inch pots, \$1.00 per 12, \$7.50 per 100, \$70.00 per 1000.

Pink Beauty (New): A fine new geranium that we believe is certain to become very popular. It may best be described as an improved Jean Vaud. 2½ inch pots, \$1.00 per 12, \$7.50 per 100, \$70.00 per 1000.

Double Flowering Varieties, 2½ inch Pots
Price, except as noted, 85 cents per 12, \$6.00 per 100, \$55.00 per 1000.

Alphonse Ricard: Still the most widely used of the red varieties. For pot work and outside planting Ricard is unsurpassed. Large trusses of brilliant vermillion.

American Beauty: Of the same color as the famous American Beauty Rose. A very free bloomer, and excellent for forcing.

Beaute Poitevine: For many years Poitevine has ranked as the leading pink Geranium. In color, beautiful shrimp pink. One of the best for pot work.

Comtesse De Harcourt: One of the two best white Geraniums. The large trusses of pure white flowers hold the color in excellent shape.

Helen Michell: The universal favorite where planted. Helen Michell cannot be surpassed in either pot work or outside planting. Enormous trusses bear brilliant scarlet flowers that do not fade in the sun.

Jean Vaud: One of the older favorites that is still used by many growers. The color is rich deep pink, shading to light pink near the base of the petals; the base of the upper petals being creamy white. Jean Vaud is a remarkably good Geranium.

La Favorite: In this Geranium we have the finest double white in cultivation. The flowers are borne in large trusses of the purest snow white, retaining this pure whiteness even in the height of summer. For winter blooming La Favorite is excellent. Your profits will increase by using this favorite.

Madame Barney: A very profuse bloomer, the individual florets being of very large size. The color is pure deep pink. Considered the perfect bedding Geranium.

Madame Landry: The salmon pink Geraniums have been in constant demand for the past five years. We have never been able to grow enough of Madame Landry to supply the demand. The color is dazzling salmon pink with a slight scarlet shading. The flower heads are large and carried on long stems.

Marquis De Montmart: Commonly known as the Blue Geranium. In color a rich soft purple, a very striking color. Of good growth.

Mrs. Richard Gloede: A very good new Geranium that is being grown more widely each year. The color is similar to American Beauty but more brilliant. Of good branching growth.

Red Barney: A new variety of brilliant red that is very prolific. For pot forcing it is among the leaders. Of good branching habit.

Geranium—Irrington Beauty

Radio Red: The most intense scarlet in cultivation. The color is so brilliant that it instantly commands attention. Radio Red is fast becoming the most widely used red variety. It is the best red Geranium.

S. A. Nutt: The darkest and richest Geranium grown. It is a deep velvety maroon in color, an excellent bedder and a perfect pot plant. No other Geranium has ever equalled the richness of its coloring.

Sweet-Scented Geraniums

Lemon: The foliage is pronouncedly lemon scented.

Nutmeg: Foliage has the true nutmeg fragrance.

Rose: The famous sweet rose-scented Geranium; very fragrant. Per 12, \$0.85; Per 100, \$6.00; Per 1000, \$55.00.

Single Flowering Varieties

2½ inch pots. Per 12, \$0.85; per 100, \$6.00; per 1000, \$55.00.

Alice Lemon: For beauty of coloring, Alice Lemon is unbeatable. The large flowers are of beautiful blush white with distinct red eye. A wonderful pot variety and excellent for bedding.

Mrs. E. G. Hill: Undoubtedly one of the finest Geraniums ever introduced. A profuse bloomer of soft salmon pink; each petal bordered with rosy salmon.

Pelargoniums, or Lady Washington Geraniums

2½ inch pots. Prices, except as noted, \$1.25 per dozen; per 100, \$9.50; per 1000, \$90.00.

Easter Greeting: Florets fiery amaranth-red, with five large, regular shaped spots.

Gardener's Joy: The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster.

German Glory: Cattleya blue; crimson spots.

Goethe: Red, deep violet spots.

Lucy Becker: This grand novelty is a sport of Easter Greeting, and is like it in everything but color which is a rosy-pink.

Prince: Immensely large flowers, strongly crimped of fine shade with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

Springtime (New): Beautiful white and pink ruffled. 2½ inch pots. \$1.75 per dozen; \$12.50 per 100.

Mrs. Loyal (Pansy Geranium)

Rather dwarf in growth, and resembling the purple pansy. We offer select plants of this florist's variety.

Per 12, \$1.25; Per 100, \$9.50; Per 1000, \$90.00.

Irving Beauty and Fiat are the best pink Geraniums.

VOLCK—Effective, Safe and Easy to Use

Controlling plant pests successfully demands a spray that will not only effectively control pests such as Red Spider, Mealy Bug, Scale, White Fly, and Aphis, but at the same time be safe to use on tender plants. Safety is particularly necessary on tender greenhouse and garden plants. VOLCK answers these requirements and fewer applications will get results.

VOLCK is also a pleasant spray to handle and mixes easily with water.

We are growing a very complete collection of the new varieties, selecting each year only those which show decided commercial merit and improvement. Each one of the new varieties listed is an improvement over anything yet introduced. Compare our prices with those of reliable growers—and place your order today.

Good & Reese Giant Flowering Amaryllis

Special Notice

Good and Reese Amaryllis were awarded first prize at the 1931 National Flower Show in Cincinnati. We believe we have the finest Hybrid Amaryllis in America.

For the past eight years we have been selecting the best giant flowering Amaryllis from thousands of choice seedlings. These are now offered for the first time in blooming size bulbs of the most beautiful colorings. The Amaryllis is rapidly becoming more popular and it is our opinion that it will be grown by the millions before many years. It is easily grown both as a pot plant and for cutting.

Good's White Giant

Only once in a decade is a really worthwhile new plant produced. In Good's White Giant, we believe we have a sensational new introduction that will become as popular as *Lilium Giganteum* when its merits become known. The flowers are enormous in size, often ten inches in diameter. In color, pure white without markings of any kind on the flowers. Frequently as many as six flowers are carried on a single stem. It is the most striking flower that can be grown. The stock is limited this year. \$1.00 each, \$7.50 per 12, \$50.00 per 100.

Good & Reese Giant Hybrids

These reselected hybrids are gigantic in size and exquisite in colorings. The colors range from white with thin markings of carmine, various shades of pink, to deep scarlet. Some are pure in color, others have beautiful markings and mottled throats. \$4.00 per 12, \$30.00 per 100.

HARDY WATER LILIES

For Shipment April and Later.

Gardeners keeping apace with the increase in demand for Water lilies are making handsome profits. They require no attention after planting, other than to see that the pool or tub has ample depth of water, preferably not less than one foot of water over the crown of the plant. We offer only the most satisfactory varieties.

Sweet Wivelsfield An entirely distinct and novel hardy Dianthus known as "Sweet Wivelsfield." This new race resulted from a cross between Dianthus Allwoodii and Sweet William (D. Barbatus) made seven years ago. For two hundred years or so, crosses have been made between Carnations and Sweet Williams, and Pinks and Sweet Williams, but the resulting hybrids have been sterile, producing no seed and have been difficult to propagate. However, this new race seeds reasonably well. Individual blossoms are nearly three times as large as those of Sweet Williams and are borne in loose cymes. The colors come in hundreds of various shades including rich reds and purples with black lacings, whites and pinks with flakes and many other colors with innumerable markings. We recommend this as being one of the finest new plants we have ever grown 2½ inch pots.....				1.20	8.00	75.00

GYPSOPHILA---Bristol Fairy

A FLORIST'S MONEY-MAKER!

IN BRISTOL FAIRY we have a wonderful advance over all other types. The flowers are perfectly double, pure snow white and two to three times the size of *Gypsophila paniculata flore plena*. Bristol Fairy blooms early and continues to throw up flowers from the base, bearing fine sprays from June until killing frost. The dried flowers retain their pearly whiteness throughout the winter so that they can be depended upon to lighten the stiffness and formality of winter bouquets.
