JAPANESE FLOWERING CHERRIES

ERECT and WEETING

Nowadays nothing in the ornamental line is of greater interest to the horticultural public than these rare and beautiful trees.

We have specialized on them for years and have the largest commercial collection in the U. S. A. Every tree is propagated direct from our own specimen trees. They are correctly and authentically named.

The stock is splendid, still perfectly dormant and can be shipped to any point in the East with entire safety at very moderate cost. Freight shipment O.K. except for very small lots.

Prices are as follows and available sizes for each variety are shown after each description below:

		each	10 rate	100 rate
Prices of	6 to 8 ft.	2.50	2.00	1.75
all	4 to 6 ft.	2.00	1.65	1.50
Erect Varieties	3 to 4 ft.	1.75	1.35	1.25

DAYBREAK An unidentified variety. Extremely early. Flowers single pink borne entirely before the leaves and in such profusion as to make the tree look like a cloud of pink. The most effective variety in our collection. Growth strong. 6/8 and 4/6 ft.

JUGATSUZAKURA (*P. subhirtella autumnalis*) This occasionally blooms in the fall but usually in the very early spring. Flowers are single, long narrow petals, light pink with cerise at the tips and on the back. Flowers nearly one inch in diameter. Very beautiful. 6/8, 4/6 and 3/4 ft.

KURAMAYAMA A beautiful double flowered variety opening out rather flat. The center is flesh pink but marked with carmine at the edges. The petals are ruffled or frilled. Late. 6/8 and 4/6 ft.

KANZAN (Sekiyama) A very beautiful double pink variety with extremely large flowers. Much like Naden but has fewer and larger petals. 4/5 and 3/4 ft.

MIYAKO Flowers double and large, nearly two inches in diameter, almost white, faintly flushed. The center of the flower usually has several carpels which are green, or white veined green, giving it a unique appearance. 4/6 ft.

MOMIJIGARI A subhirtella variety, so has small flowers which are red in the bud but open deep pink. Semi-double, about 15 petals. Very pleasing. 4/6 and 3/4 ft.

NADEN One of the loveliest and most double of the pink flowered varieties. The petals are so numerous as to make the flower a perfect tuft showing no center. This is not the Naden of Wilson. 6/8 ft. only.

OJOCHIN Flowers pale flesh, nearly white. It is really single but the large petals are so crinkled and ruffled that it appears semi-double. 6/8 and 4/6 ft.

List #3005. Sheet #2 JAP. FLOWERING CHERRIES W. B. CLARKE & SON

SHIROTAI The best double white. Flowers are large and double.

Foliage light green. A good grower. Also known as Mt. Fuji and Komatsunagi-zakura. 6/8 and 4/6 ft.

TAIZANFUKUN Flowers of medium size, double and tufted. Light pink becoming flesh or nearly white. Leaves small. The tree grows unusually erect and slender. Late. 4/6 and 3/4 ft.

TAKASAGO This is the cherry that Wilson calls Prunus sieboldi. Flowers are double, light pink on rather short stems and massed into large compact clusters. Blooms early before the leaves appear. Very showy. 4/6 and 3/4 ft.

TAKINIOI Flowers of medium size, single and semi-double. Buds flesh, open flowers white. Valued for its delightful fragrance. 4/6 ft. only.

UKON Unique in having yellow flowers, somewhat greenish. When the flowers get old the center and the veins of the petals change to cerise. A good grower; late. 6/8, 4/6 and 3/4 ft.

VICTORY Also known as Shirofugen. Flowers extremely large, up to 2 1/2 inches diameter, borne in racemes of about three on a long stem. Very double, 35 to 40 petals. Coloring very unique. Flowers open a pale pink become white and then turn cerise. For this reason trees will always show white and pink flowers at the same time.

Weeping Varieties

These have a charm of their own. All are top worked on erect stems.

EUREKA WEEPING and PARK WEEPING

on 4 ft. stems \$2.00 ea; 10 rate 1.60; 100 rate 1.50

The following varieties are now reduced to somewhat lighter stock than sent out earlier in the season so prices are reduced accordingly.

DOUBLE PINK WEEPING

4 ft. stem \$2.00 each; 10 rate 1.75
3 ft. stem 1.75 each; 10 rate 1.50

DOUBLE PINK WEEPING One of the scarcest varieties in our collection. Branches droop but not as strongly as the single weepers. Flowers are of medium size and double, 50 to 60 petals. Color deep pink. Has to be top grafted to make a good tree.

EUREKA WEEPING (P. subhirtella pendula; Japanese Weeping Rose Flowering Cherry) This is the common, single flowered, light pink Weeping Japanese Cherry that has been grown in this country at least 50 years which is a tribute to its beauty and popularity.

PARK WEEPING An unidentified variety. It is as strongly drooping as Eureka Weeping but differs in its more vigorous growth, type of foliage and most important the color of the flowers which are deep pink instead of light pink.

One great selling advantage is that practically all trees offered, both erect and weeping, will have flowers this spring.

Everything offered is ready for immediate shipment. Orders can be filled within 24 hours. Please act quickly while stock is available and dormant. Orders should reach us by March 15th at the very latest.

- 10 rate will apply to an order of five or more -
- 100 " " " " " " " fifty " "
- but any variety of which less than five are ordered
- will be charged at each rate. -
