Gladwin Glad Gardens

Mr. and Mrs. George Kinyon, Props.

Gladwin, Michigan

PRICE LIST 1932

Kinyon Originations

Baby Betty, Betty Lucile, Dr. Moody, Faith, Lorraine

Budge, Mary Lockwood, Mary Marie, Mary Van,

Resplendent, Stately Lavender

KINYON ORIGINATIONS

BABY BETTY

(1931, 80 days)

Cream blending to light pink at tips of petals. Graceful, slender spikes with from four to six, small rosebud type blooms open at one time. Just a darling Baby Glad which you will love.

STATELY LAVENDER

(1931, 85 to 90 days.)

Light lavender with ripple marks of a slightly deeper color. Faint violet markings on lower petal. Straight stately spike with 20 or more buds. Many spikes have ten or more blooms open at one time. Placement perfect, blooms large.

BETTY LUCILE

(1929, 85 to 90 days.)

La France pink blended to clear throat. Very large flowers with six or eight open at one time on a tall straight spike. Excellent substance of bloom and vigorous foliage. Beautiful.

DR. MOODY

(1927, 80 to 85 days.)

Beautiful lavender pink with faint markings on lower petals. Almost a self color. Perfect foliage, tall straight spike with twenty or more buds on main spike. Eight or ten blooms out at one time. When grown from a large bulb it produces from two to four side spikes. Should be in every garden and grown by all florists.

This variety has made wonderful growth with us this year, and we are passing this good fortune on to you by pricing the No. 1 and No. 2 at same price.

FAITH

(1929, 85 to 90 days.)

Soft blue, similar in shade to Heavenly Blue, and the color does not fade. Placement perfect. Wide open blooms of extra good substance. Size 4 to 4½ inches. Bulb-let production good. The foliage of this variety is not good, the leaves droop, but the spike and leaves around it always stand erect and are very straight. Does well on our soil which is a sandy loam.

LORRAINE BUDGE

(1930, 85 to 90 days.)

A very clear light pink, shading to a lighter throat. Tall straight spike, with many well placed blooms of good substance. Small twisted petals in center of bloom add to the beauty of this variety. You will be sure to like this one.

MARY LOCKWOOD

(1928, 80 to 85 days.)

Shell pink with scarlet lines on lower petals. Tall spike with many large blooms open at one time. Early.

MARY MARIE

(1930, 80 to 85 days.)

White with edges bordered as though embroidered with rose pink. Small dark red markings on lower petal. Tall straight spike with 5 to 7 perfectly placed blooms open. Size 3½ inches. Novelty.

MARY VAN

(1929, 75 to 80 days.)

As No. 457 this variety was a silver medal winner in commercial seedling class. Toledo, 1928. A tall even pink with tiny markings on lower petals, but is almost self color. One of those soft clear pinks which florists want. Spike straight with good placement of blooms, which are of extra good substance.

RESPLENDENT

(1928, 85 to 90 days.)

A creamy pink blending to rose at edges of petals, carmine blotches on yellow ground in lower petals. Intensely ruffled. Many good sized blooms open at one time perfectly placed on tall straight spike. Foliage very strong. Novelty, said to be one of the most beautiful ruffled varieties.

Have only a very few large bulbs which we will price per 1 as long as they last. If sold out shall we substitute a smaller size?

MRS. GEORGE KINYON IN TRIAL GARDEN

JENNY LIND (Decorah)

We are specializing in this beautiful variety, and as we grow it, and as it is grown from our strain, you can find none more beautiful both as an exhibition variety or for the florist. Pure, soft apricot pink, throat pale yellow, the two colors blending to perfection. We grow this in quantity and have sold to different large growers who advertise the tall strain.

Don't fail to add this to your list this year.

Nearly twenty years ago the love of flowers led us to plant a garden in the wilderness, where our home was located. We had perhaps a dozen different varieties of gladiolus which were best at that time. Many which are good commercial ones today. The third year some of these were crossed and each year since new crosses have been made. All of these first seedlings have been discarded, but some were kept a few years and used for crossing with new varieties which we had added to our list. In 1926 the first of these seedlings were shown outside our own garden and you can imagine our pleasure in knowing that they had received the approval of the judges. The first of these to be shown was the variety now Dr. Moody at the N. E. G. S. Show, Boston, Mass. A few days later two others, now Baby Betty and Betty Lucile were shown at the M. G. S. Show, East Lansing, Mich. All being awarded a blue ribbon.

The years have passed and other new ones of ours have gone out to make friends for themselves and for us. A few Glad lovers have found their way over the rough roads to see our gardens and have given us much pleasure in their coming.

Our garden is still in the wilderness surrounded on three sides by a State Reserve and last summer the State built a road which passes our place. Our garden and buildings are $\frac{1}{2}$ mile south of this road and we have a private road across.

If vacation time should find you in Northeastern Michigan during August or September it will be "Glad Time" and we want you to come and see us and our "Glads."

To reach our place turn west from Standish on M-61. Just west of the bridge after you have come 16 miles, find our road leading south. If you are at Gladwin come east $10\frac{1}{2}$ miles.

We have in our trial garden nearly 400 named varieties and hundreds of selected seedlings among which we hope to find a few which will have most of the good qualities to be found in Glads and really worth while.

HOW EACH VARIETY OF OURS RECEIVED ITS NAME

BABY BETTY with its rose shaped petals of cream and pink always reminded one of a baby, so was named for our little granddaughter. BETTY LUCILE received the name of a cousin of G. W. Thacker. Dr. Irving Moody was president of our American Gladiolus Society at the time when the variety now named for him, was first shown at the N. E. G. S. Show, Boston, 1926 and it was his expressions of approval which suggested the thought that we give this variety the name Dr. Moody.

FAITH—Summer of 1928 and our garden was a place of beauty from the tall sturdy blooms to the dainty seedling which seemed to take its color from the sky. One night came a storm of wind and rain, in the morning the wind was still blowing and many of our most beautiful blooms destroyed, but the seedling was unharmed and stood facing the wind as we think of Faith standing in time of need.

LORRAINE BUDGE—Named for Miss Michigan 1929 who was a Gladwin county girl.

MARY LOCKWOOD—was the mother of S. B. Jacobs who introduced Dr. Moody. Resplendent and this one which was named for his mother. MARY MARIE—was named for another little granddaughter of ours. MARY VAN—was a girl of long ago who is now Mrs. George Kinyon. RESPLENDENT—This name was suggested by Mr. Jacobs and really describes the variety with its gay colors and ruffled edges. STATELY LAVENDER—with its tall slender spike, perfectly arranged flowers and dainty color has received the only name which would describe this variety.

Gladwin Glad Gardens

Gladwin, Michigan

PRICE LIST 1932

At these prices all bulbs are prepaid anywhere in the United States or Canada, 5 bulbs at 10 rate. 25 at the 100 rates.

EXTRA ON ORDERS

On each order of \$5.00 to \$10.00 you may select 10% extra in bulbs. From \$10.00 to \$25 you may select 15% extra in bulbs, and beside this for every \$10.00 order you will receive one blooming sized bulb of Stately Lavender.

We grow many varieties of which the stock is too small to list. Some of you may have something in mind which you might want or something you have seen when visiting our gardens. If so write us about it and we might be able to spare a few even if we do not list.

A FEW WORDS FROM THOSE WHO HAVE GROWN OUR VARIETIES

"I have grown all the good lavender Glads ever introduced but until I saw Stately Lavender in bloom, I had not seen anything in that color. The tall graceful spike, perfect placement, beautiful color and ten or more large florets open at once is a sight not to be forgotten. It is so far ahead of any other glad in that color, there is no comparison. I have only one fault to find from a growers standpoint, it should have been priced at \$25.00 instead of \$2.00."

Newton Glad Gardens, Newton Highlands, Mass.
by S. B. Jacobs, Propr.

"Dr. Moody, for me, is in a class by itself. There is no other that we grow here that is as popular. When it is in bloom, glads that usually are best sellers go begging until Moody is all sold out. I cannot conceive of a better florists glad, both from the standpoint of cut bloom, and being a good propagator."

M. J. Sole, St. Petersburg, Fla.

"Your Stately Lavender certainly showed up well at Kalamazoo, and since I had already seen it growing in your garden, appreciated it the more. It is a lovely variety, and one of which you can well be proud. I've enjoyed Lorraine Budge the more each season it blooms. It is so tall, and has such lovely clear coloring."

Gale W. Thacker, Rockford, Mich.
