HEREFORD'S GARDENS

Spring Planting List

1932

Hardy Perennials Only

We are offering a list of particularly good quality at very reasonable prices. You were never offered better values. All plants are field grown. Our field grown stock is matured without watering, insuring hardiness, ability to ship well and strong root structure that transplant without loss. Weaklings do not withstand this treatment and only the strong survive. We dig plants fresh for each order.

We pack our shipments with utmost care and will replace any order that is lost through faulty packing.

Shipments should be unpacked as soon as received. Either heel plants in a shady place or plant in permanent place. Inspect all plants as soon as received and report at once to shipping company if received in bad condition.

If possible water and shade plants until established.

We reduce all foliage possible to reduce shipping cost and evaporation when planted.

In planting in the nursery we firm the soil around each plant by tramping.

We only grow the best and hardiest of plants and are constantly on the lookout for new plants and better varieties.

Not less than three of each variety sold. We pay postage on shipments weighting three pounds or less. Not less than five plants sold on the ten lot price, nor twenty-five on the one hundred lot price.
