8-2802

Frankly our aim is to list only the very best varieties in the world. With this end in view we are continually trying out new varieties and eliminating others that fall below a certain standard.

We guarantee all stock true to name, and will replace any that prove otherwise. Notify us if anything is unsatisfactory when received, and we will be only too glad to adjust matters to your satisfaction. Correspondence is invited relative to flower growing.

DAHLIAS

The following varieties have produced wonderful flowers for us. It has been our experience that sometimes a variety will do poorly in some soils under certain climatic conditions. We will willingly replace or refund for any unsatisfactory variety purchased from us, which proved unsatisfactory also for us. As we cannot be held responsible for errors in growing, droughts, insects, etc., conditions beyond our control, goods must be accepted on these terms.

We have shipped out many plants and rooted cuttings which have produced wonderful results. Our rooted cuttings are really small plants which have been grown at least a week in soil. We believe that such a rooted cutting is able to stand a long journey and be transplanted with less set back than a large plant, unless the large plant has a correspondingly large ball of dirt.

ROOTED CUTTINGS should be planted in four inch pots, and placed in shaded cold frame until ready to be planted out. Ventilate and water freely. They may also be planted out directly into the field in the following manner: Plant the cutting in a hole six inches deep, using soil to which a small amount of sand has been added. Place a one quart jar (muddled on the inside) over the plant. The jar may be removed (preferably on a cloudy day), when the plant has grown to the top of the jar.

All plants and rooted cuttings should be planted in a hole at least six inches deep except in heavy soil. Care should be taken that too much soil does not collect around the plant and smother the roots. The hole may be filled up as the plants grow and the roots enlarge.

Price of ROOTED CUTTINGS is $\frac{2}{5}$ the price of tubers. Unless otherwise ordered, rooted cuttings will be shipped about May 1st, tubers, May 10th, and plants, May 25th. Dahlia orders for more than \$2.00 sent prepaid. Less than \$2.00, send 10c for postage. Plants shipped more than 500 miles, add 25c for special handling postage.

We have marked out dahlias with a certain rating as grown by us:

A—90 or above out of a possible 100.

B—85 to 90.

C—80 to 85.

D—Temperamental.

We recommend spraying at least once a week with Nicotine Dust or Red Arrow.
