Seeds of Success

"Everything for the Golf Course"
1932

J. OLIVER JOHNSON INC.
MORGAN HURON SUPERIOR STREETS
CHICAGO, ILLINOIS

1932

To the Trade

THIS edition of our General Catalog No. 12 cancels all previous issues. Owing to fluctuations in factory costs and changes of seed market, bulletins will be issued from time to time to promptly bring before the trade new goods of merit and also for the purpose of giving immediate advice of price changes.

EVERYTHING FOR THE GOLF COURSE

IN PREPARING this booklet of golf course accessories and supplies, we have endeavored to deal with the various subjects in an advisory as well as a merchandising capacity. Service and suggestion to golf club officials in connection with the upkeep of their courses are available here in the fullest measure. We pride ourselves on being able not only to supply you with the proper grass seeds, fertilizers and equipment, but to advise you correctly concerning those best suited for your particular needs. Our Golf Department will aid in solving your problems.

To this policy of thorough co-operation, we attribute our continued growth throughout a quarter of a century of such service. The arrival of the 1932 Spring Seeding Season finds us, as usual, ready to ship the necessary grass seeds, fertilizers and equipment for your course direct from stock. We cannot at this time list all the accessories we carry. If you require anything not listed ask us for prices.

Demonstrations for Golf Club Officials at Our Show Rooms

FOR some years we have maintained very complete show rooms and demonstrating rooms in our main Chicago plant, which is illustrated above. Local or visiting Chairmen of Greens and Greenskeepers are invited to call at these show rooms whenever they wish and examine the complete line of golf course construction and maintenance equipment.

Golf club officials have found this service exceedingly valuable. As a rule, considerable time is spent studying catalog specifications—often without a final decision being made. A personal inspection of the materials and equipment not only will make the decision and the choice much easier but will result in final satisfaction.

During your visit we shall be glad to conduct you through the warehouse,

where you will see thousands of pounds of both domestic and imported varieties of grass seeds and numerous Golf accessories.

How to Reach Our Main Plant

By surface cars: From loop take Milwaukee Ave. car to Morgan Street; or north and south-bound cars, transfer at Chicago Avenue, get off at Morgan, then one block south.

By autos: New Ogden Avenue Boulevard from north or south to Chicago Avenue, then east to Morgan.

Away from loop traffic—ample parking space.

From State and Madison Streets we are $1\frac{1}{4}$ miles west and 1 mile north.

Grass Culture

MANY conditions, differing in various localities, must be taken into consideration in the development of a satisfactory turf. Hence, it is almost impossible to give blanket advice covering each case as a whole. The general information we give, however, will be found to apply generally. Such factors as character of the

soil, fertilization required, regulation of moisture, weed growth and the use of quality seeds, obtain at all times. Proved and practical methods should always be followed, as satisfactory results never can be accomplished from slipshod work.

There is one rule which always applies in the purchase of seeds: It never

pays to select any but those of known quality. When you come to consider the labor, cost of planting and the additional expense of re-planting and extra attention if first results are not satisfactory, it will be found that the very best grade of seeds represents the most economical investment.

Our Service Department is at your command at all times to give personal assistance in solving your problems and to assist in the selection of proper seeds. If you wish, our representative will render written report of personal inspection. This service is gratis, and will be found a valuable source of accurate information for each individual case.

The producing of dense-growth putting-greens and fairways is not a matter of chance, but of close supervision of soil mixtures involving ideal capillary action, thus promoting resiliency of the turf, proper use of fertilizers, judicious use of tiling for sufficient drainage and immediate elimination of factors tending to later cause embarrassing delays.

In the selection of a site, such features as rolling land, hillsides and flat fields all contain different soil analysis. The loam conditions of each can be corrected by the use of sand, clay, humus and well-rotted horse manure mixed in proper proportions. This top-soil should be raked or fallowed until it is mellow.

Seeding of putting-greens will be found quite different from that of the fairway. The expense of preparing the green being greater, due to a limited area, than the fairway of given space, it is well to consider the seeding of the very best. Grasses for greens must be fine and dense, and

able to withstand constant wear and treading. The selection of various grasses, such as Bent Stolons, Chewings Fescue, Red Fescue, Creeping and Rhode Island Bents is a matter of personal likes. The method of sowing is similar to that followed on fairways. Broadcasting will prevent the seed from forming ridges of grass which would divert the ball in its course. Do not be sparing in the use of seed, as a dense, even turf is desired in as short a time as possible. The use of seeders of the broadcasting type for fairways is always advisable, due to the uniform work performed.

MILORGANITE will do wonders for new turf. This fertilizer assists in quickly establishing dense, heavy turf on new fairway seedings. Unfertilized seedings on poor soil invariably fail or result in a thin, disappointing stand of grass, difficult to improve by subsequent fertilization or seeding. Even on good soil, a reasonable expenditure for fertilizer will hasten establishment of turf and enable earlier play. The cost of fertilizer, compared with the cost of seed and soil preparation, is so small that new seedings should always receive fertilizer prior to seeding. At this time, fertilizers can be easily worked into the surface soil by discing and harrowing. This insures an abundance of plant food in the soil layer occupied by the root system.

GREENSKEEPERS' EQUIPMENT

We have in our files at all times the names of a number of capable greenskeepers whose services are available. We shall be glad to assist anyone in need of such help by putting them in touch with these men.

Johnson's Golf Mixtures

JOHNSON'S FAIR GREEN

A combination of the best heavy weight domestic and imported grasses. The cream of the crop. Desired and recommended by many of the best clubs. Experienced greenskeepers claim this is the best mixture they have used.

JOHNSON'S PUTTING GREEN

Absolute satisfaction has followed the use of this well known mixture. Producing a dense growth of deep-rooted varieties, forming an excellent putting green. Will "crown" well without loss of vitality.

CALUMET FAIR GREEN

This excellent combination will produce results on your fairway. A domestic mixture selected for purity, showing the highest possible germination.

FOREST PRESERVE FAIR GREEN

Well known and used by exacting clubs that demand the best. This mixture, consistent with cost, is an excellent producer.

SPECIAL FAIR GREEN

A moderate priced quick producing mixture, especially adapted for initial seedings, where a solid, compact turf is desired for early season play.

CHOICE FAIR GREEN

A very quick producer, where initial turf is desired in hilly spots subject to erosion.

Johnson's Recleaned Grasses

Grass seeds selected for quality and representative of a standard by which buyers should gauge their purchases. Seeds of Dependable Germination and Absolute Purity.

KENTUCKY BLUE GRASS (*Poa pratensis*)

Most noted grass in America. Native of the Old World, having been early introduced by the early colonists. Seed is harvested mainly in Kentucky, but more or less in Missouri and Iowa also. Seed of highest germination must be dried carefully and then cured during the winter. The grass has creeping underground stems each bearing a tuft of leaves at the tip.

WHITE CLOVER (*Trifolium repens*)

Used to a great extent in lawn mixtures. Grows well on poor soil, forming a close, dense mat, and will withstand close clipping. A real soil builder. Weight, 60 lbs. to bushel.

ITALIAN RYE (*Lolium multiflorum*)

Annual or short-lived perennial, distinguishable in the turf form from Perennial Rye Grass only by the blade being convolute in the bud. Grows well in any soil. Weight, 24 lbs. to bushel.

RED FESCUE (*Festuca Rubra*)

Leaves are bright green; does not grow tufts but creeps by underground stems. Only two varieties are used in golf courses—RED FESCUE from Europe and CHEWINGS FESCUE, native of New Zealand. Withstands more shade and account of fine quality of turf, particularly adapts itself to sandy soil.

SHEEP'S FESCUE (*Festuca Ovina*)

Thrives well in sandy, shallow soils. Weight, 20 lbs. to bushel.

MEADOW FESCUE (*Festuca elatior*)

Slightly coarser than most grasses. Very durable. Better known as English Blue Grass. Weight, 24 lbs. to bushel.

CREeping BENT (*Agrostis Stolonifera*)

South German—an invaluable grass for golf greens; long creeping stems and roots, producing a very durable turf that will withstand severe usage. Weight, 20 lbs. to bushel.

CRESTED DOG'S TAIL (*Cynosurus Cristatus*)

Very good in mixtures, forming a clear, dense growth and producing a tough turf of attractive color. Thrives best in Northwestern States. Weight 23 lbs. to bushel.

RED TOP (*Agrostis Alba*)

It is a perennial, with creeping habit. Makes a medium loose turf. Grows under a great variety

of conditions. Best wetland grass among "tame" species. Grows on soil very poor in lime. Strongly drought resistant; used for holding banks to prevent erosion. Chief uses: 1. Sour and grass. 2. Lawns under humid conditions—soil other than limestone. 3. Soil binder.

CANADA BLUE GRASS (*Poa Compressa*)

Useful in extreme Northern States. Very hardy, and will withstand droughts. Weight 24 lbs. to bushel.

PERENNIAL RYE GRASS (*Lolium perenne*)

Short lived perennial. Seed bed should be prepared as for other grasses. A fine mellow surface on compact subsoil gives best results. Does especially well when seeded in autumn. Its ability to grow rapidly allows plants to become well established before freezing occurs. Much coarser than other varieties.

CHEWING FESCUE, NEW ZEALAND (*Festuca Chewings*)

Considered one of the best grasses for shady places. Produces a mass of fine root leaves; branches being extra-vaginal, plant will spread, making a solid, compact turf. Adapts itself to poor soil. Weight, 24 lbs. to bushel.

HARD FESCUE (*Festuca Duriuscula*)

Will resist drought and stand hard usage. Should not be sown alone, due to its tendency to stool. Weight, 20 lbs. to bushel.

BERMUDA GRASS (*Cynodon Dactylon*)

A Southern grass that thrives well in hot climatic conditions, south of Virginia. Weight, 37 lbs. to bushel.

RHODE ISLAND BENT (*Agrostis Vu'garis*)

Domestic seed known as above. Also as Colonial bent; native of New Zealand and much purer. Thrives well in New England, and New York and is not uncommon south of Virginia and Missouri and west of the Rockies. Unlike other grasses it thrives well on acid soil.

SEASIDE BENT (*Agrostis Maritima*)

A high grade bent seed grown on the Pacific Coast and sold under various trade names. Does very well all over the northern half of the U. S. and forms a close uniform turf of fine texture and color.

Milorganite appeals to the greenkeeper because it imparts a deep green color to the turf, promotes long continued vegetative growth, and does not burn or injure the turf.

Furthermore, due to its dry granular mechanical condition Milorganite is easily applied to greens and fairways.

Milorganite sustains long continued growth on old turf, and quickly produces dense turf on new grass seedlings, is free from objectionable odors, harmful bacteria and weed seeds of all kinds.

Milorganite contains more than 6½ per cent organic nitrogen (equivalent to ammonia) and 2½ per cent phosphoric acid.

Application 30-40 lbs. per 1,000 sq. ft.

Car lots, per ton f.o.b. Milwaukee **\$20.00**
Ton lots, per ton, f.o.b. Chicago..... **29.00**

Urea

Urea is the purest and richest nitrogen plant food on the market. Contains 46% ammonia. Use only 1/3 as much as other fertilizers.

ANTROL SYRUP

The Antrol Syrup attracts the worker ants. They feed on it, and its mild poison is so timed that it allows them to carry it back to the nest for food. It is transmitted to the queen and the entire nest. The whole colony is quickly destroyed.

Antrol Syrup is but mildly poisonous. It is not left exposed like powders or pastes, and is safest to use around children and pets, where "deadly" poisons would not be advisable.

The Antrol System is packed in handy cartons of four patented glass containers, and one 4-ounce bottle of syrup.

“HERBICIDE” THE WEED EXTERMINATOR

*For Paths, Cobble
Gutters, Drives,
Tennis Courts etc.*

When diluted 1 part to 40 parts of water, HERBICIDE destroys both the tops and ROOTS of undesirable vegetation. It is used to great advantage by golf clubs for keeping weed growth out of sand traps. It is also used extensively by cemeteries and parks for keeping driveways and paths free from weeds. HERBICIDE gets rid of weed growth without disturbing the surface of the ground and is therefore a great help for use on tennis courts. 1 gallon mixture covers 2 to 3 square yards.

Semesan for "Brown Patch" Control

The principal ingredient of Semesan is a complex organic substance, made from carbolic acid, chlorine and mercury, which is known scientifically as hydroxymercuri-chlorophenol or, more popularly, as chlorophenol mercury.

With this extremely effective chemical are compounded certain other substances that intensify its disinfecting properties and make it possible to apply Semesan by the quick convenient and non-laborious method of water solution treatments.

Semesan possesses highly selective toxic qualities, by virtue of which it is deadly poisonous to the lower forms of life, such as the "Brown Patch" fungi, yet at the same time harmless to the higher types of life to which the grasses and plants belong. In fact, authorities now recognize that its effect upon seeds and plants is stimulatory and in no way injurious, as is corrosive sublimate.

Unlike other disinfectants and fungicides, such as Bordeaux mixture, Semesan may be used as frequently as conditions demand without accumulating in the soil as a poison detrimental to the purpose for which it is employed.

1 lb. tin	\$ 2.75	100 lb. drum	\$200.00
5 lb. tin	13.00	300 lb. drum	585.00
25 lb. pail	51.25		

Nu-Green Combination Disinfectant and Fertilizer

NU-GREEN is a combination of Brown Patch Disinfectant and a Fertilizer. No danger to grasses from improper mixture.

To prevent Brown Patch from putting in an appearance, once each ten days or two weeks, beginning prior to the Brown Patch season, apply a solution of one pound Nu-Green to 50 gallons of water. Use at the rate of 50 gallons of solution to 1,000 square feet of green area.

By using a power sprayer good results have been obtained by using 1 lb. Nu-Green in 50 gal. water to cover 2,500 square feet. A prevention application once a week.

As a cure if you have Brown Patch use one pound in 35 gallons of water and use at the rate of 50 gallons of the solution to 1,000 square feet.

5 lb. tin	\$ 9.00	100 lb. drum	\$130.00
25 lb. pail	33.75	300 lb. drum	375.00

F. o. b. Chicago.

Corrosive Sublimate

(Bichloride of Mercury)

Used by a large number of clubs as a worm eradicator and Brown Patch Remedy and is especially useful for the control of snow mould.

Do not use more than 3 oz. in 50 gal. of water to cover 1,000 square feet.

First mix 3 oz. with 3 oz. of either muriate of Ammonia or table salt and dissolve in one quart of warm water.

Thompson Spreader

The old reliable Thompson Spreader improved to handle all of the modern commercial fertilizers. Spreading range 1 to 10 lbs. per 100 square feet. Spreads 6 feet wide as fast as a man will walk, in any quantity desired. Will hold 100 to 150 lbs.

The wheels have a 3 inch face and will not injure the finest turf.

All materials are released to the scatter-board with a force feed broadcasting motion, and leaves the scatter-board 6 inches from the ground.

No. 208, f. o. b. Chicago....\$50.00

No. 110—Smaller than the No. 208 and intended for lighter work, especially for the application of chemicals such as Semesan, Arsenate of Lead, etc., with sand or other material as a carrier. Will hold 1½ bu. of fertilizer.

With scatter-board, 6 ft. spread, f. o. b. Chicago.....\$20.00

No. 615—Heavy galvanized metal hopper holds 6 cu. ft. Wheels 4 in. semi-convexed tires. New non-glogging forced feed mixes and breaks up material which cannot arch in hopper. Scatter Board 36 in. wide. Shipping weight 225 lbs.....\$75.00

Johnson's Master Distributor

No. 235—Fertilizer Distributor

A new, perfected machine for even distribution of fertilizer, top dressing and grass seed. Has simple regulating device for sowing desired amount. Positive instantaneous shut-off control on handle. Non-corrosive moving parts. Perforated distributing plate. Rotary agitator insures free flowing material. Strongly constructed throughout.

This machine recommended by leading agricultural colleges, fertilizer manufacturers and green keepers everywhere. Will last for years.

NOTE:—

Single disc wheels—GMD-160 and 240
Double disc wheels—GMD-241 and 361

Model	Width	Cap'y. lbs.	Price
GMD-160	16"	50	\$ 8.75
GMD-241	24"	75	12.25
GMD-240	24"	75	11.00
GMD-361	36"	110	18.50

The No. 235 distributor is one of the best on the market, and will handle grass seed, Milorganite and all commercial fertilizers. Used extensively for spreading Arsenate of Lead with Milorganite. Hopper holds about 100 lbs. Tire is 4 inches wide. Machine is very accurate and spreads material evenly.

Price, f. o. b. Chicago.....\$35.00

Hoffman Spreaders

Standard Line All Purpose Distributors
All Metal-Foolproof-Time Tested
Free Wheeling.

Can't be beat for distributing prepared plant food, lime, sand and all kinds of fertilizer on lawns and for dusting insecticides on garden plants and flowers. Unexcelled for salting grass infested walks with Atlacide, Calcium Chloride or salt and for sanding icy walks in winter.

Hoffman Senior—Spreads 53" swath.

Balanced construction. Easy to operate. Quick, accurate adjustment. $\frac{1}{4}$ lb. to 12 lbs. per 10 sq. yds.

Hoffman Standard—Spreads 38" swath.

Hoffman Junior—Spreads 27" swath.

Soilspreader Top Dresser

The new Soilspreader provides a better method for top dressing greens at a new low cost. It is simply constructed. Two large rolled edge wheels support the "V" Type Hopper of ample capacity. Clutches on each wheel prevent the discharge of material until wanted. Improved agitator at bottom of hopper provides for even distribution of material whether light or heavy feed is required. No ridges or rows—positive sifting into the grass.

Handles moist or dry material—light and easily moved—thoroughly tested and approved. A time and labor saver for the greenkeeper or gardener.

Model H. Soilspreader complete....\$90.00

F. o. b. Chicago.

Salem Distributor

Salem 24" and 30" sizes.

Salem "Twenty-four" and "Thirty" are ideal for large open spaces. For double duty where space permits, holds twice the amount of material.

GSD-24"	\$10.00
GSD-30"	15.00

Freight allowed on actual weight.

Converse Rotary Soil Screener

For screening compost to top dress Putting Greens and preparing soil for fine fairways and lawns; also for screening sand and gravel.

Consists of a revolving screen cylinder in three sections, which are easily changed. Screens are strongly made of heavy woven wire and mounted on strong steel frames which are so well balanced that very little power is required to operate.

Made in several different models for hand or motor power. Capacity five cubic yards per hour of dry material.

Screen diameter—30 inches. One section 36 inches and two 24 inches long. Can be had in any size mesh. Standard equipment $\frac{1}{4}$ ", $\frac{3}{8}$ " and $\frac{1}{2}$ ".

Kemp Power Soil Shredders

12 Cu. Yds. per hr.

Kemp No. 2

The "KEMP LINE" offers the most complete array of soil preparation equipment—A KEMP for every need (3 sizes.) Pay for your KEMP the first year by saving labor costs. Select the size that fits your need and produce compost of the finest quality. Note the saving in labor cost. Hand-turning a pile from 2 to 4 times is not only costly but never produces material equal to KEMP preparation. A KEMP with a double screener will mix, shred and not only remove sticks, stones and other refuse but produce top dressing, bedding and potting material for immediate use, properly aerated and moisture free. Operated by gasoline engine or electric motor.

Eureka Sprayer

The Eureka is intended for golf courses that want a good practical outfit at a reasonable price. It is built for hard service. Develops a working pressure of 200 pounds and is equipped with a large air pressure tank, to maintain a high pressure and steady discharge. It can be used on bent greens, in orchards, flower gardens, shrubbery, vineyards, gardens, stock barns, cattle pens, hen houses or for white-washing, cold-water painting, disinfectants, etc. It is made in the hand drawn style as shown.

Pump—Our regular No. 4 is used, mounted on side of barrel.

Tank—50 gallon welded steel barrel. This avoids the common trouble experienced with wood barrel of drying and warping when not in use so that it is impossible to make it tight again.

Pressure Tank—Boiler steel with welded seams; tested under a pressure of 275 pounds. Fitted with pressure gauge reading to 200 pounds.

Wheel—30 inches diameter, 2 inch tire. Fastened to tank with heavy bolts.

Frame—Steel tubing, handle of same material.

Discharge Equipment—4 ft. of ½ in. spray hose, a 4 ft. iron pipe extension, angle Ideal spray nozzle and leakless shut-off valve.

Shipping Weight—Securely crated, No. 22. 235 lbs.

GES-No. 22—Hand drawn as shown. Price \$50 00

High Pressure Tank Sprayer

This sprayer, unexcelled for spraying Brown Patch spots, may be carried over shoulder and spots sprayed with Nu-Green early in the morning. Drives the fungicide to the grass roots under high pressure.

4 gallon Brass or Galvanized tank with 27" Hose and 18" extension pipe with nozzle.

GTS1—Galv. Tank—Each.....\$5.00

F. O. B. Chicago.

The Meeker Discing Machine

Designed for use on golf courses, parks, and private estates where the grass either is not growing on account of the roots being choked and parched, or where it is desired to reseed without going to the expense and trouble of entirely tearing up the sod by plows or other heavy implements.

The machine, complete, has three sections, but the sections can be used as a single unit.

Each section frame measures 6' 8" long x 3' wide, and each section has four sets of rollers, with 30 steel cutting wheels, 8" in diameter, which can be set at a slight angle where it is desired to scarify the turf for reseeding, or can be set straight where the intention is merely to cut runners, or to break up the grass to aerate the roots. Where the soil is hard, the machine is capable of being burdened up to 1,000 lbs.

GMD-3—Price complete, f. o. b. Chicago. Three sections.....\$90.00

GMD-1—Price, Single section, f. o. b. Chicago..... 30.00

Imported Scotch Chain Harrow

Greenskeepers on golf courses state it is the most valuable implement on the market for surface pulverizing and leveling. It is far superior to the average disc or tooth harrow, as it not only pulverizes the soil thoroughly, but also fills in all inequalities in the ground, thus insuring a smooth, even surface for seeding grass.

As the final surface smoother on grading jobs, it is without an equal, for it obliterates all motive power marks completely. This implement has been in use for years on race tracks, driveways, golf courses, etc., for smoothing out footprints and ruts.

The heavy links are fashioned by skilled workmen in Scotland from solid wrought iron and are therefore very durable. When not in use it may be rolled up completely, so as to occupy a minimum amount of storage space.

2—Large Size, 7½'x7½', weight 220 pounds, f. o. b. Chicago..... 53.00

Pennsylvania Lawn Cleaner

This machine will remove from the lawn not only the cut grass, but all sorts of litter, leaves and trash, leaving the grass standing upright and free from foreign matter that prevents the sunlight and dew from getting to the roots.

The brushes are recommended for removing worm-casts from putting greens, tennis courts, bowling greens and other close-cut lawns, where a smooth surface is essential. It can also be used as a lawn or sidewalk cleaner for removing leaves and other litter.

Provision is made for adjustment to take up the wear of the brushes, thus insuring the same efficiency of the sweeper until the brushes are entirely worn out.

The change from rakes to brushes, or vice versa, is easily made without taking the machine apart. Width, 24 inches.

Price, each, f. o. b. Chicago.....\$30.00

Always designate "Rakes" or "Brushes" when ordering.

Thompson Swiftway Sweeper

A very useful new tool for golf greens, parks, tennis courts and estates, which will quickly pay for itself in time saved. It covers a large surface quickly. Sweeps in either direction, although designed for pushing.

The wheel stabilizes the pressure, which can be automatically controlled by the operator, and relieves him from lifting the weight of the brush throughout the operation. The handle can be adjusted to suit the operator and to allow for wear of the brush. The brush units are replaceable at small cost. They are made of a good grade of bassine.

Useful on greens for sweeping of sticks, stones, paper, leaves, ant hills and worm casts, for brushing in top dressing and brushing up grass before cutting. It is a very rapid sweeper for lawns, tennis courts, walks, pavements and all large floor areas.

No. 48—Thompson Swiftway Sweeper, with 48-inch brush.....\$17.50

No. 32—Thompson Swiftway Sweeper, with 32-inch brush.....15.00

Springfield Lawn Sweeper

FOR GOLF GROUNDS, ESTATES, RESIDENCES, ETC.

Collects fresh-cut and dead grass leaves, sticks, stones, worm casts and other litter. Reduces labor from hours to minutes. Beautifies the grass. A real necessity for the quick and economical upkeep of lawns and grounds. Labor-saving, money-making machine. Efficient, durable.

The Springfield Sweeper is equipped with powerful 12-inch Brush Reels, with six individual brushes. Sweeps a width of 28 inches.

Price, f. o. b. Chicago.....\$30.00

Improved Pennsylvania Green Mower

Light running smooth cutting high wheel green mower. Has been used for years by green-keepers all over the world where golf is played.

Its high gear drive insures ridgeless close cut. Reel five and one half inches in diameter has seven crucible toolsteel blades oil hardened and tempered. Runs on ball bearings. Wheels and intermediate gears have roller bearings.

Nineteen inch cut $\frac{1}{8}$ to $1\frac{1}{8}$ inches high.

Price \$40.00

Grass box 8.00

Pennsylvania Super Roller Green Mower

Is made as all Pennsylvania Mowers are, to do the finest work with minimum effort. Superior construction, will last for years with little attention.

Specifications

High speed eight blade reel of finest crucible steel oil hardened and water tempered.

Rollers seven inches cast aluminum.

Bearings ball and roller oil tight and dust-proof.

Alemite lubrication. Positive precision adjustment.

Eighteen inch cut. Height of cut $\frac{1}{8}$ to $1\frac{1}{8}$ inches.

Pennsylvania Undercut BB Trimmer

The unique construction of the Undercut Trimmer permits cutting, not only close up to a wall, fence, tree, etc., but it will get the grass under a fence or up to foundations and other places hitherto out of reach of anything but hand shears. The slanting side plate and conical cylinder make it possible to cut all grass left by regular style of lawn mowers. Has adjustable steel clamps on handle cross bar. $9\frac{1}{2}$ " drive wheel. Four blade cutting unit. Cut $5\frac{1}{2}$ " swath.

GUT-1—F. o. b. Chicago.....\$12.00

Pennsylvania Ball Bearing Trimmer and Edger

With the machine which consists of a Pennsylvania Ball Bearing Trimmer equipped with steel disc and small plow, you can trim overhanging grass along edges of walks and flower beds and do similar work that has heretofore required a half-moon hoe, grass-hook or hand shears. Combined Trimmer and Edger is a most useful labor-saving tool. Handle is adjustable to suit height of user and steel disc is securely braced. Width of cut 6 inches.

GST-1—F. o. b. Chicago.....\$12.00

Timken large tapered roller bearings on reel adjustable with screw cup. Hyatt roller bearings on wheels. Five special tool steel blades. Self sharpening device reversing sleeve on shaft.

10 inch wheels.

Ask for special freight paid price.

Johnson Motor Scythe

Whatever a Hand Scythe will do, in one-eight the time.

The Johnson Motor Scythe is adapted to all kinds of weed and grass mowing. Will equal in results work of at least eight men with hand scythes. Easy to operate in places where large mowing and cutting machines cannot go—around shrubbery, trees, wooded sections, and in rough places, which heretofore have required costly hand-cutting. Because the large wheel runs free of the motor, the scythe back up easily; can be tilted (similar to a wheel-barrow) to cut up or down slopes; and can be pivoted sharply in any desired direction.

Cuts only as fast as it is propelled. By slowing down speed of propulsion, sickle acts as a saw and will literally "saw" through heavy growth that would stall a horse-drawn mower.

Simplicity of construction and ease of operation are such that a fifteen-year old boy can handle it. Johnson Motor Scythe will rapidly pay for itself from savings it effects.

SPECIFICATIONS:

Weight: 160 lbs. Perfectly balance. Frame: Pressed sheet steel, welded and riveted. Wheel: 30 in. diameter field type with 3 in. concave tread. Cutter Bar: Standard Sickle type 36 in. in length, with adjustable wearing plates.

Motor: $\frac{1}{2}$ H. P. Johnson single cylinder, 2-cycle, no gears or valves and few moving parts; equipped with pull starter, button stop, muffler, fuel-lift carburetor with synchronized choke and gas feed. Motor drives only cutter bar by belt, independent of traction.

Gas Tank: Sheet steel, $\frac{1}{2}$ gal. cap'y, sufficient to operate scythe for five hours.

Guarantee: 90 days, against any defects in material or workmanship whatsoever.

Price.....\$140.00

Detroit Rough Mower

FOR OLD AND NEW FORDSONS

Also as shown above for cutting side of bunkers. Will save labor of four teams, wear and tear on revolving reel mowers, cut 50 acres of rough as low as 1 inch in height in one day. Extreme simplicity. No change in Fordson necessary, no changes on worm gear, no tractor oil to drain. Assembled in 30 minutes. Flexible in all capacities, cutting bunkers, or hills and can be set up as shown without impairing use of Fordson. Cutter bar always in plain view of operator, mowing bar 6 feet long. Coil spring in front drag bar absorbs shocks when running into stumps. Power taken directly from the pulley gear—mower runs at motor speed, not wheel speed. All gears and shafts automatically oiled from Fordson. It fulfills a most valuable service to golf courses, race tracks, baseball diamonds, polo grounds, sub-divisions, parks and cemeteries. Further circular information on request.

NATIONAL MOWERS

A MOWER OF RUGGED ENDURANCE AND UNSURPASSED QUALITY.

The **NATIONAL** Fairway Mower was built and developed with the definite intention of making it the sturdiest, the longest lived mower that was possible to put on a Golf Course.

The National 30" heavy duty mower uses hardened and tempered machine cut steel gears in oil tight transmission cases. There is a set of these gears on each side, so the mower is in perfect balance. It has the strongest and most rigid frame construction. Wheels are wide with deep grooves. Ratchets are of tempered steel. Timken Bearings on the reel with take-up adjustment.

Reel 8" diameter, 30" long, 5 oversize blades of finest cutting steel. Throwout pins for disengaging reel, individual lifting levers on all units.

Peerless Lawn Mower Grinder

No. 300

This machine grinds all makes and types of power-driven fairway, putting green and hand mowers without removing mower wheels or reel knives. It grinds the blades with amazing speed and accuracy, with the proper clearance behind the cutting edge, makes the mower run easily and lengthens the life of the mower.

The bed or frame is a one-piece box section heavy casting, mounted on three heavy cast iron legs and two steel supporting posts.

The carriage has a travel of 42-inches and, rolling on steel balls, requires only a slight pressure for feeding the work along the grinding wheel, eliminating all feed mechanism.

The grinding head carries a 6-inch grinding wheel driven by a 1/3 H. P. motor by a "V" Belt. This makes a smooth, quiet and compact drive.

A Reconditioner Attachment can be furnished, at an additional price, for "lapping in" mowers with emery paste. On putting greens this is of utmost importance.

This Attachment consists of a belt-driven, geared speed-reducer unit driven by the motor, and can be quickly clamped to the Sharpener by two clamps.

The Peerless Sharpener is fully guaranteed against defects for one year.

No. 300—Without Reconditioner Attachment (Shipping wght. 935 lbs.).....\$275.00

No. 350—With Reconditioner Attachment (Shipment wgt. 1,000 lbs.)..... 295.00

Prices, f. o. b. Factory.

Universal Lawn Mower Sharpener

A fine lapping in machine will accommodate every type of mower regardless of size or make—from large power mowers to small Putting Green Mowers—can be sharpened quickly. Mowers are manufactured with a bevel on the fly knives which should last at least three years and then put on the dry grinders to restore the required bevel. It has been found that users in their desire to maintain keen cutting edges put them on grinders too often. This grinds down the blades too soon and a new reel is required.

To obtain best results the fly knives must conform to the bed knife, but not touch it. Only emery and oil should be used on lapping in.

Power is applied directly to reel shaft and mower is sharpened on its own bed knife.

A Titan 1/4 H. P. motor, 60 cycle, with reduction gear running in oil supplies the power.

Length, 4 feet 7 1/2 inches.

Width, 1 foot 8 inches.

Price with 60 cycle 110 Volt motor, \$150.00

Additional for extra vise for power mowers, f. o. b. factory..... 25.00

The Hardinge Mower Sharpener

The Hardinge Mower Sharpener was designed to sharpen quickly and accurately any kind of lawn mower. Putting Green, Fairway, hand or mowers with herringbone blades.

It is constructed of most durable material and is so stable as to carry the heaviest mowers with no vibration when operated at high speed.

Sharpens the bed knife as well as the reel, and does not require an expert mechanic to operate it.

The grinding wheel is cup shaped and is the only form of wheel that will grind the front edge of the bed knife, the inside surface of the bed knife and the reel blades.

Price, f. o. b. Chicago.....\$325.00

Johnson Dump Cart

Improved Model—All Purpose

For hauling surplus dirt to dump. Note the specially constructed wide crown wheels, ten inches wide, 40 inch diameter. Spokes are now set in sunken groove. IN ORDERING—STATE SIZE OF HOSE USED.

Golf King No. 6

This BUCKNER Sprinkler will cover a greater area with more water than any other sprinkler we have tested. It is ideal for both fairway and putting green work, has slower motion. Will cover 90 to 160 feet diameter on pressure 40 to 100 lbs., distributing uniformly 10 to 48 gallons per minute over this area, without run-off or flooding. It has been thoroughly tested and approved by the best known architects and greenkeepers.

This sprinkler is by comparison with other sprinklers that have gone before, a most remarkable sprinkler. It is revolutionary, as it is perfect in action under all conditions.

No more delicate gears, triggers, flappers, vibrators, jumping jiggers or fast whirling freak parts to wear out or get broken off. Such contraptions work fine for a while, but experience is the best teacher and we have discarded the spectacular. Save money, labor and grief. Order GOLF KING No. 6 for either fairway or putting green work. **State size of hose and amount of pressure.**

GOLF KING No. 9

Positive Super Motion Control

Golf-King Pop-Up Rotary

This pop up sprinkler covers the same area as large portable sprinklers now used. Eliminates all labor and hose. One man can irrigate an entire 18 hole course. Concealed, does not interfere with mowers, strong enough to carry the entire weight of a tractor.

Price, f. o. b. Chicago.....\$20.50

No. 303 Sprinkler Buckner

Long arm covers 3600 to 4900 square feet on pressure of 40 to 60 pounds. Very efficient in spite of wind. One inch connection.

Price, with roller stand.....\$16.00

Golf King No. 9

GOLF KING N° 9

FULL CIRCLE SLOW MOTION ROTARY

This sprinkler is the last word in portable slow motion rotaries, designed for use, either on roller stands for hose systems or on Golf King quick coupling valves on semi-automatic hoseless systems. Will work on any pressure above twenty-five pounds and cover more area uniformly than any other sprinkler. It can be set to rotate one revolution in four minutes or four revolutions in one minute. Long running tests on high pressure has demonstrated that it is practically indestructible.

Price, head only.....\$10.50

Price, on roller stand..... 16.00

F. O. B. Chicago.

Golf King No. 9 1/2

Here is the sprinkler the whole world has been waiting for. Heretofore all attempts at part circle oscillating sprinkler construction has been more or less disappointing, due to lack of absolute control. This new Golf King control element has made it possible for us to offer a part circle sprinkler that is perfect in control in every way. It can be adjusted momentarily, to water any fractional part of a circle and will cut in and cut out absolutely to the fractional part of an inch, at the same spot, continuously without fear of sticking. A wonderful sprinkler for use on Snap Valves, around putting greens, along fences, or at the side of fairways, where scalloping is objectionable. It is a labor and water saver for every use. One of its best features is for use on overhead irrigation for orchards and gardens.

Price, head only.....\$13.00

GOLF KING N° 9 1/2

PUTTING GREEN SPRINKLER FOR HOSELESS SYSTEMS

Golf King Super Valve

GOLF KING SUPER VALVE

This valve designed for the increasing demand for high pressure systems, where great volume is required for super sprinklers of the Golf King No. 9 type. The Golf King Super Valve will deliver up to 100 gallons per minute with practically no loss across the valve. The flow is straight through the coupler, full unrestricted 1" volume. It has 1 1/2" intake and is self closing both top and bottom when quick coupler is removed. No loose covers to get lost. No trash can get in valve due to misplaced covers. No water hammer. Coupler positively locks when open so that it will not jar loose no matter what type sprinkler used.

Price, Valve only.....\$5.25

Price, Coupler 3.00

ALL ORDERS SHIPPED PROMPTLY

Buckner Hose Saving Swivel

The Buckner hose-saving swivelled connector consists of a male or female bottomed coupling to which is attached a full-swivelled 90° elbow, ending in a male hose thread coupling. This connector attached to any quick coupler or other vertical outlet such as ordinary valves and street washers.

Price, according to size.....\$2.25 to 2.50

Golf King Automatic Valve

Designed for Hoseless Systems. Self closing under any pressure. Rigid Quick Coupler. No leaks or wash when attaching or detaching. Connection is instantaneous.

Buckner originated the Hoseless System of golf course irrigation and the rigid quick coupling for connecting sprinklers and hose to systems instantly. And now we have the AUTOMATIC GOLF KING VALVE and QUICK COUPLER. This is a self closing valve allowing no leakage on hillsides or elsewhere. Effects great savings in expense by eliminating many control valves and service leads, as well as all hose and other upkeep cost.

The system is invisible and permits the use of one or any number of sprinklers at any point on the course without running around to open and close valves. Simply snap the sprinkler or the hose—where hose is used—to the valve in five seconds. This automatically opens the valve. Disconnect the sprinkler and valve automatically closes. No valve boxes required. No obstructions or hazards in the fairway. Mower or roller passes over without damage.

"Early Bird" Worm Cast Rake

Unique tool, simple and effective. Gets every worm cast, dry or damp—rapidly, easily; also all other litter. Can't injure greens. Is excellent for leveling top dressing and as a comb before cutting grass, getting up sprangly branches. Cleans 30-inch path perfectly at a fast walk. Average course equipment, 6 rakes.

GEB-1—Each \$8.50

Hudson All-Purpose Rake Self Cleaning

The All-Purpose Rake is unequalled for removing yellow dandelions. When it is pulled across the lawn, the stems, leaves and blossoms are wedged between its teeth and easily pulled out. It will pick up the acorns, pebbles, small twigs, etc., which an ordinary rake will not touch, and will clean the lawn of cut grass and dead leaves in better shape than is possible by any other means. It is self cleaning. A single backward stroke clears the rake. Curved so as to roll the rubbish before it.

Handle is polished hardwood, 5 feet long.

Weight 3 pounds each.

GPE16—16" All-Purpose Rake, ea...\$0.80

GPE20—20" All-Purpose Rake, ea... .90

Two or 3 story and attic—3 story has 28 compartments; easily taken apart and cleaned. Size, 22x27x21. Made of Oregon fir. Porch and columns all sides. Ready for painting.

A 4x4 post, 14 feet long, and so made that house is easily taken down, may be obtained also.

GF10R , each	\$30.00
GF20R , each	28.00
GF30R , each	26.00

The JOJ Sod Cutter

This machine is meeting with high endorsement among green keepers and others, and has proved to be a great success. Operates at a low minimum of cost. Cuts the sod of uniform width and thickness, in any length, so that it is particularly adapted to giving solidity to slopes in cuts and on embankments, working equally well on level or uneven surface, cutting both ways with the land, and leaving no sod uncut.

One machine will cut from 30,000 to 40,000 square feet per day, thus doing the work of forty men.

No. **GSC-1**—Price, f. o. b. Chicago.....\$34.00

Hand Sod Cutter

This is an easily handled sod cutter by which one man can cut 1,000 square yards of sod per day. Cuts any thickness desired. Operates by sharp shovels of the foot.

Number plate cast aluminum with 2" letters. Rod and weighted base galvanized. A marker easily readable that picks up your ball.

Weighted base keeps marker in upright position and will fit any cup. Finished natural aluminum background black letters, red background aluminum letters, or orange background with black letters.

GSS12. Price,
each, complete.....\$1.00

Special Signs

We are in an excellent position to furnish special signs when required. If the list of signs illustrated does not fulfill your needs, advise as to your requirements and we will gladly submit suggestions and quotations.

Made from "Standard" Flag Fabric Vat Dipped Dyes—Fast Colors

The fabric in "Standard" Flags is closely woven into a 48 square weave, from a hard twisted, high grade cotton thread, to give a firm, substantial and durable flag fabric. The cloth is vat dyed with fast colors.

All "Standard" Flags are carefully made. All hems and reinforcements are double lock stitched with genuine linen thread to withstand the severe whipping received in actual use. Headings are faced with full overlap for grommets, to prevent pulling out of fabric. Numerals are large and distinctive and made from the same quality of fabric as the flags to prevent drawing out of shape and are securely sewed to both sides of the flag with an over-edge stitch.

Bag Rack and Direction Sign

The Bag Rack and Direction Sign provides complete information regarding the hole and a convenient rack for bags. Sign plate cast aluminum 10x25 inches lettered on both sides. Rack is cast aluminum 20" diameter with space for eight bags. Top edges rounded to prevent damage to the bags. Will fit any 2" O. D. post or can be furnished complete with galvanized post with ornamental ball top.

"Do" and "Don't" Signs

Guests and other visiting players appreciate the convenience of sufficient signs to apprise them of distances, directions, local rules and regulations. They both eliminate playing delays and embarrassing situations.

While unobtrusive, they are easy to read quickly and their cast aluminum construction assures weather and wear resistance. Raised lettering on both sides of $5\frac{1}{2}$ "x14" plate makes them readable from all angles. Each sign furnished complete with easily removable and replaceable galvanized 18" stake avoiding interference with mowing.

A well kept course is a well marked course.

Any special wording you wish.

Price List "Do and Don't" Signs
GSS4. Complete, each with stake....\$2.50

Parking Regulation Signs

Parking on the drive is a problem of practically every private or public golf course. A few signs like this one will go a long way toward doing away with this nuisance.

The plate is 12" in diameter made from cast aluminum with raised lettering on both sides. The base is heavy cast iron, 11" in diameter, and not easily tipped over. You may specify any similar wording you require. Furnished complete with base and posts as illustrated.

Price—GSS5—Parking sign complete.....\$6.00

Fairway Yardage Marker

Carries raised figures on both sides so as to be easily readable from any position when sign is set at right angles to edge of fairway.

A real convenience on any course, and greatly appreciated by your players. Made from aluminum and will not rust or corrode. Mounted on galvanized iron stake and easily moved and replaced during mowing.

GSS6. Price, each.....\$1.25
Any yardage or distance.

4 "x $7\frac{1}{2}$ " cast aluminum plate, 3" lettering.

THE STANDARD LINE

Standard Steel Flag Poles

This distinctive pole is constructed from a special, strong, light weight seamless tube, $\frac{3}{4}$ " diameter, strongly reinforced at the bottom. (See below.) This tube is formed into a beautiful spiral design and thoroughly galvanized. Aluminum ferrule at bottom. Equipped at top with brass rings spaced for attaching standard flags 14"x20". Furnished for other sized flags without extra cost if specified when ordering. Attractively finished in two color combinations, Red and White or Orange and Black. Swivel illustrated at left is easily attached to these poles. Made from Duralumin and works perfectly. Keeps flag from wrapping about pole.

The color combinations make these poles visible against any background, their lightness in weight eliminates injury to the putting green and their rigid construction makes them strong enough to withstand continual usage.

Price List—"Standard" Steel Poles

GSP1. Flag Poles, each.....	\$2.00
GSPS. Swivel for above poles, each.....	.25

Flag poles furnished 8 ft. long, $1\frac{1}{8}$ " or 1" ferrule—two color combinations, Red and White or Orange and Black. Furnished $1\frac{1}{8}$ " ferrule and Red and White unless otherwise specified.

New Cast Aluminum Hole Rim

A hole rim scientifically designed and cast in one piece. Absolutely true and of correct standard size. Outside of rim is smooth and made with a slight taper for ease in inserting and extracting from the hole. Wall is thin with top inside edge rounded to eliminate rebound of the ball when putting. Smooth inside—cannot injure the hands. Ball receptacle strongly reinforced sloping to the center and with holes for adequate drainage. Pole socket is long and rigidly braced to always keep the pole in a straight upright position.

The "Standard" Hole Rim is rust proof, moisture proof and self draining—will not corrode and always maintains its perfect circumference. No other rim fits so perfectly or will last so long. Also is furnished in cast iron.

Price List "Standard Hole Rims

GSR1. Aluminum	\$2.00
SR2. Cast Iron	1.00

Furnished with $1\frac{1}{8}$ " or 1" Pole Socket. $1\frac{1}{8}$ " furnished unless otherwise specified.

Standard Hole Rim Extractor

Made of galvanized steel with easy fitting metal handle, price, each.....60c

Special Feature

The illustration at the lower right hand corner shows plainly the unique 18 in. reinforcement. This greatly strengthens the pole at the point of greatest strain and also eliminates the possibility of loosening of the ferrule.

Lewis Golf Ball Washer

Modernize and give prestige to your course by having the complete Lewis Tee Ensemble at every tee. Members appreciate the Lewis Tee Ensemble and Bag Rack. Lewis Tee equipment is practical, durable, convenient, inexpensive to buy and maintain.

Various items making up the Ensemble can be purchased separately. The Lewis Washer is the most practical device on the market, has proven best and is preferred by golfers as it does a quick, thorough job of cleaning balls. The Lewis Tee stake of heavy painted steel is the backbone of the Ensemble. The Waste Ensemble container provides a convenient receptacle for waste paper, etc.

New Bag Rack made of galvanized pipe with aluminum casting top to hold six bags.

Tee Data Plate provides hole number, yardage and par. Made of non-rusting materials. Send score card with order.
