WILD FLOWERS

from Your Old Home State

Do you remember them— the blossoms of your childhood days? Remember the May Apple with its umbrella leaves, waxen, golden-hearted blossoms and tangy apple? Jack-in-the-Pulpit, in his green-and-brown canopied pulpit by the woods spring? Starry Hepaticas, dainty firstlings of the spring, often in bloom for Easter, although commonly known as Mayflower—or that other "Mayflower" of the pine barrens, lovely, fragrant Trailing Arbutus, often companioned by the shining leaves of the red-berried Wintergreen?

Or are your childhood memories of the Prairie Flowers—pale Pasque Flowers on short furry stalks braving the April winds of high pastures; wide-petaled, sky-blue Violets dancing among the meadow grasses of May; flaming red lilies, Indian Paint Brush and Butterfly Weed brilliant in the summer grasslands; Brown-eyed Susans and Purple Cone Flowers along the roadsides of early fall?

Did you seek the startling whiteness of the Spider Lily in southern marshes or the equal whiteness of the big-flowered Trillium in western fir woods?

Whatever your flower memories, make them live again for your later years and for your children in the place you now call Home. We have plants from every state in the Union acclimated here on our Iris Acres hillsides and have connections through which we can promptly secure many others. Write us your wants. Write for our catalogue. Write and tell us what flowers you remember best from childhood days and the locality in which found. Write and tell us what information you would like in a wild flower catalogue.

The following are suggestions only. These and many others will be found listed, described, priced and cultural directions given in our catalogue.
