Three new outstanding Iris that are well worth giving a place in your garden—

Frieda Mohr—Brilliant of color and vigorous of growth. It is a pink bicolor, with light pinkish lilac standards and deep lilac rose falls. The flowers measure 6½ inches from the top of the standards to the tip of the falls and 6 inches horizontally. The plants average 50 inches in height with the clean straight foliage in proportion, making it equally satisfactory as a specimen plant or for massing. It is very elegant in doors, day or night, with any color hangings and has a most exquisite locust-like perfume. Blooming time from midseason till very late\$5.00

Labor—(Cayoux 1926) M. 36" F. An absolutely new color. Dark violet heliotrope, practically a self, although the falls are a shade deeper than the standards. The standards are suffused with a soft coppery glow. The color effect is burnished red copper and is wonderfully beautiful. The flowers are very large on stout stems. At this astonishingly low price for a new introduction this should be in everyone's collection. We cannot recommend this too strongly to our customers ..\$5.00

William Mohr (Mohr) 1925. A wonderful hybrid from Parisiana X Gatesii. The ground color is pale lilac standards flushed darker, the whole flower beautifully veined manganese violet. Substance and shape of the very best, a very large flower; actual measurements showing standards 3¼ by 2¾ inches and falls 3 by 2 inches. Stems strong and rigid, 20 to 24 inches, usually four flowers on each\$5.00
