INQUIRIES -

We do our best to answer all questions, but for fuller instructions of fish and plants, you will find the following books full of Aquatic information. They are: Goldfish Varieties and Tropical Aquarium Fishes, published by Wm. T. Innes & Sons, Philadelphia, Penna. Also, Tropical Fish for the Home by F. H. Stoye, an American Aquarium book that surpasses the German books on the market. Also, Life and Love in the Aquarium by C. H. Peters. Both of these are the Newest out and the best in the hobby. You may also buy both from Wm. T. Innes & Sons or The Home Aquarium Bulletin, East Orange, N. J. For the identification of New Tropical fish, we suggest the Bilderatlas, which is a picture book with Latin name below each fish and may be bought from August M. Roth, World Building, Baltimore, Maryland.
