Catalog 8

BANNER COLLECTION

For those who wish to get that new rock garden planted and are not sure what to plant, we offer the following ten plants, standard stock, well packed and labeled.

Alyssum argenteum
Campanula turbinata
Dianthus deltoides
Linum perenne (Flax)
Iris pumilla

Nepeta mussini
Phlox Sublata rosea
Phlox Sublata lavender
Veronica incana
Sedum album

Catalog Value \$2.50

**Collection Price for
10 Plants..... \$2⁰⁰—**

.....

Send in pictures of your rock gardens, pools, and landscapings, as we are interested in seeing how you have worked out your problems with our plants. We will give a \$5.00 list of hardy plants to the one that is judged the best in late September.

.....

READ CAREFULLY

All plants offered in this catalog are grown in our fields. All varieties, with few exceptions, which cannot withstand our climatic conditions, are discarded, as we are growers of HARDY Plants. All plants are grown in the open, not greenhouse or hot bed plants, insuring you better success and more vigorous growth in your gardens.

NON-WARANTY

Because there are so many causes for failure, over which we have no control, such as poor or improper soil, unfavorable situation or careless culture, etc., we can assume no responsibility after stock is delivered.

SPECIAL NOTICE

Prices quoted herewith cancel all previous quotations, either by letter or in printed lists and are subject to change without notice. All orders taken subject to priority sale, and are F.O.B. our nursery at Des Moines.

TERMS: Cash with order. Remittance may be made by money order, bank draft or check.

SHIPMENTS: We aim to ship all orders the same day received, whenever possible to dig from the field.

Russell's

Garden Guide

In presenting you with our 1932 list, we have selected many new and highly recommended varieties of fine alpine and perennials, to add to our long list of established, dependable plants, and it is our desire to give you the finest and newest varieties at the lowest prices possible.

All our plants are grown in our own fields, and by intensified cultivation, we develop a fine system of roots, that will transplant easily and get established in your gardens very rapidly. Our growing program permits us to send out large, strong plants that will bloom and thrive in your garden.

Our organization while not the oldest, is rich in experience—and having a very large stock of the items we offer—can well claim to set a standard for quality. Everything needed for the proper growth and cultivation is at our command—fertile soils of varied texture—modern scientific propagation methods—unlimited equipment and labor for caring for the growing stock—all go to make Russell's Gardens your safest, surest source of plant materials.

We are located in a belt where the summers are hot and dry, our winters are severely cold—the finest testing grounds in the country—"What will live and grow for us, will live and grow for you."

ROCK PLANTS

and PERENNIALS

The true garden lovers, those who are taking a real interest in growing fine plants, are demanding good sized plants, with well established root systems. Russell's plants meet the requirements of the most critical. All orders are fresh dug, with the soil on the delicate rootlets, for it is these tiny roots that make for quick growth in your garden. This assures you of strong healthy plants.

Our prices affords you an opportunity to make an extensive planting at a moderate cost.

The descriptions in our list are meager because of the wide variety of plant material offered. We have given you the blooming season, the color of the blooms as well as the height of the plants, these being the most important requirements.

<i>Achillea tomentosa</i> —yellow, 6 in.; Sept.....	\$.25

Recent Iris Introductions

We offer you a selected list of really fine, new introductions of New, Rare Irises, for those that want the best. Delivery after July 15th—good healthy rhizomes, that will bloom for you next year.

Prices are for Prepaid Parcels Post.

ALCHEMY—created much comment in the Taft garden the last three years, undoubtedly a fine yellow. The stems are tall, well branched and bear a good number of solid, deep yellow blooms. Mighty fine. Each \$42.50.

CLARA NOYES—a favorite of all visitors at our gardens last year. The coloring is a medley of peach and apricot tones, suggesting the blends of the rose "Talisman." Stock limited, as every one wants it at sight. Each \$9.50.

DAUNTLESS—appears much redder than any of the other so-called red ones. The blooms are of great size, on tall stems and flowers over a long season. Each \$10.00.

DEPUTE NOMBLOT—the worlds greatest iris. Bloomed for the first time in America in 1930, and it took every one by storm, that saw it. Standards light rosy-purple, overlaid bronzy-gold. Falls very wide, purplish garnet-red, deep orange beard. Over four feet tall, wonderfully branched. Each \$25.00.

DOLLY MADISON—a wonderful blending of colors, a huge Quaker Lady this variety has no superior in its class. It is reliable everywhere, and is admired by all that see it. Each \$2.75.

INDIAN CHIEF—Well named, being regarded as a red blend. The falls are deep blood-red, blended with bronze and the standards are lighter in tone. A large flower, well branched, tall stems. Each \$7.50.

MELCHOIR—The deep velvety-maroon flowers leave nothing to ask for in size, shape or all round Iris perfection. It is a self of velvety-garnet, with beard of bronze-yellow; distinctly different. Each \$7.50.

MIDWEST PRIDE—a wonderful variety by Hans Sass, with rich coloring. Standards are violet, and the falls are a rich deep violet-purple. Resembles Archiveque, but is very much larger, on tall stems. Certain to be much in demand. Each \$10.00.

RAMESES—another winner by Hans Sass, which went over big with us last year. Standards are light russett, with a yellow glow through the center. Falls pink, with prominent orange beard. Very hardy and vigorous, one of the fine new blends. 36 inch. Each \$8.00.

RED DOMINION—a pretty garnet-red Dominion, introduced last year. While the standards are a shade lighter than the falls, it is practically a self in effect—a piece of rich red velvet. The buds are very striking. Each \$27.50.

WAMBLISKA—This huge white self, by Jacob Sass was the sensation of 1930. Few Irises are larger, and it is sure to enjoy a wide popularity for many a season. Extra choice. Each \$15.00.

W. R. DYKES—here is a yellow iris that ranks with the largest in size, with heavy creepy texture and a color of richest golden-yellow. It has flowered in almost every section of the country. A great favorite. Each \$23.00.

ZUNI—a glorious glowing red-brown, overlaid with a coppery suffusion. Falls are a brilliant red and the standards seem to be sprinkled with gold dust. Large size, well branched and about 40 inches in height. Each \$12.50.

Newer Water Lilies

We know that you will enjoy these varieties as we propagate only those that have proven to be the most popular. They are selected because they are prolific bloomers and sturdy growers.

HARDY WATER LILIES

Attraction—Deep red, large blooms.....	\$5.00

Joanna Hill—yellow	Taisman—deep pink
Baby Rambler Roses, 3 for.....	\$1.00
Climbing Roses, American Beauty, Pauls Scarlet, 3 for.....	1.00

Fertilizer

•

BONE MEAL

Analysis: 2% Ammonia, 2% Nitrogen, Phosphoric Acid 20%. An excellent fertilizer, finely ground to act quickly. Free from acid. For lawns apply 50 pounds to 1,000 square feet. Should be used regularly on your plants to increase growth and to intensify the color of the blooms. 5 lbs., 55c; 10 lbs., 90c; 25 lbs., \$1.50; 50 lbs., 2.50; 100 lbs., 3.75. F.O.B. Des Moines.

SHEEP MANURE

Supplies all the necessary plant food elements. This is a pure natural manure, and its effect is lasting. Fine for mixing with soil to supply humus which is needed in your gardens. For liquid manure, dissolve one pound in five gallons of water. You can use it either liquid or dry form right up to the plants with safety, as it will not burn the plants. We highly recommend it to our customers. 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.25; 50 lbs., \$1.90; 100 lbs., \$2.85. F.O.B. Des Moines.

GRANULATED PEAT MOSS

This is a moisture-retaining humus, which is very important in keeping soils loose and friable, better than manure for the rock gardens. Keeps the soil from crusting and helps prevent fungus growth. 50c per package. F.O.B. Des Moines.

GARDEN FERTILIZER

Analysis: 3% nitrogen, 12% phosphoric acid, 4% potash. This mixture differs from other balanced plant rations in that it is composed of plant foods in mineral form. The advantage of mineral form is the absence of odor. This is an excellent mixture for the garden, but do not put on the green foliage. 5 lbs., 50c; 10 lbs., 90c; 25 lbs., \$1.95.

BOOKS

MODERN BOOKS FOR YOUR LIBRARY

We offer practical books, published by that reliable firm of A. T. De La Mare Company, written in understandable language. All prices are postpaid. Just send us your order and books will be sent promptly.

1001 GARDEN QUESTIONS ANSWERED. (By Alfred Hottes). 320 pages, answering our problems. Cloth bound. Postpaid \$1.65.

Campanula Garganica	Sedums
Carpatica, Muralis	Thymus
Piperi, Steveni	Tunica
Dianthus	Veronica Rupestris

For Shady Places

Ajuga Reptans	Erica Carnea
Anchusa Mysotidiflora	Erodium Amanum
Aquilegia (partial)	Heuchera
Arenerias	Phlox Sublata
Aster Alpinus	Primulas
Campanula Garganica	Platycodon
Muralis, Piperi and	Saxifraga
Steveni	Veronica
Dicentra Eximia	Viola

Vaughn Seeds

We are pleased to announce that we carry a full line of the choicer Vaughan seeds for the convenience of our customers. There are no better seeds and are sold at popular prices.

Gray foliage plants should be used more, to accent certain plants or spots in the Rock Garden. Bear in mind that all plants that have gray leaves do best in a high dry location, with full sun.

Most plants that have blue flowers like a shady location, the bluer the flower, the more shade they require.

In planting bulbs in the Rock Garden such as Crocus, Scilla, Fritillaria and other early Spring blooming varieties, we like to plant Sedums, Thymus, Veronica Rupestris or other low, matting varieties over them. Bulbs come up through them and after the bulb foliage dies down, an empty spot is avoided. This is a lovely combination.
