EVERGREENS

At our evergreen nursery, north of Oneida Lake, at Cleveland, N. Y., we grow all the hardy varieties of evergreens. It is absolutely essential that an evergreen tree be root trimmed and transplanted very often in the nursery to make certain of a healthy tree when the customer gets it. One of the primary reasons for evergreens dying, is traced to ignorance of this principle by growers.

BE SURE that the evergreens you buy have been transplanted three to four times in the nursery and have multifold little fibrous roots.
