Gardening the Easy Way

Here's Henry Hartwein of Overland, Kansas, showing you folks how to garden without breaking your back. Get out a garden cultivator and save yourself 9/10 of your work. These are tomatoes from my seed.

Field's Seeds in Colorado

Yes, they make good gardens out in Colorado, even though the elevation is 8,000 feet where these were grown. This is C. S. Planalp with two heads of iceberg lettuce grown from Field's seeds. How do they look to you? You can grow them like this, if you try.

From a Field Aster Packet

Here's a couple of what a packet of flower seeds will do. Mr. and Mrs. H. Linke, of Escol, Nebr., grew these from my seed and sent in this picture of themselves. That many flowers bought at a florist's would probably break you, but you can have all this for a nickel or a dime, if you take the trouble to plant this spring.

Part of 19,000 Melons!

When big gardeners like Grant Strain of White River, So. Dakota use only Field's seeds, you couldn't ask for better proof of the seeds merit. He raised 15,000 melons last year, he says, and that's some crop.

50c Each for Pictures

I always need pictures. Can't put out a Seed Sense or Catalog without them. Especially of your Mule-Hybrid corn or a hybrid of your seed and that for your chickens. And always want those snaps of your garden and flowers, and children and family groups or snaps of anything interesting. You can use them in the catalog or Seed Sense, I still pay 50c each when I do. The only rule is, they must be extra prints that you don't want back for I never know which I can use till each Seed Sense time. Best one sent in of all, gets $5. Fair deal? Well then get them in. You enjoy seeing what others are doing—well, they enjoy seeing what you are doing just as much.

Another Satisfied Customer

"Dear Henry: Here's a picture of my wife beside a Mock Orange bush we bought from you 7 years ago. It really is a beautiful sight, but little Elton Packard is running it tough hard to beat—plenty of children and family flowers."—Mrs. E. E. Fischer, picture sent in by Mrs.

Field's Nursery in Wyoming

That Spirea Van Houttei Mrs. Packard of Lander, Wyoming, got from me really is a beautiful sight, but little Elton Packard is running it tough competition. That's a combination hard to beat—plenty of children and flowers.

Most generally, the picture that I put of myself in this corner of mine, is one of me at the desk working at writing you letters or some such kind, but when the seed business comes up, so much fun of me, I didn't do it. They said, "You are most generally out in your garden and seed business makes you come on for more. But give most of the credit to you folks. Most everyone of you has told 2 or 3 of your friends about me and they've sent me orders. That's what has made our business desk double then triple. People are coming to headquarters for their seed.

I think I've got the finest bunch of customers in the world. Always hundreds of you come into the office and as they are the best stay in the seed and nursery business giving them the best stock it's possible to grow.

And how have you been? Many of you have written nice letters and told me about yourself, your garden and family but some of you haven't, I wish you would. This is the year of all years to garden and raise all you want. I want you to have it.

This corner of mine is not for selling but just for plain visiting and gossip, and I can't resist telling you that picture that was taken of my own Missouri Giant Blackberry—one of the heaviest yielders and best tasting berries I've seen in fifty years of raising them. You ought to try it.

This corner is for chinning and gossip where I don't have to worry about the advertising and the things like the rest of the pages. We've had an unusually good year. I take part credit for that because I know the perpetual watching we do to see you get the best seed and nursery stock in the world makes you come on for more. But give most of the credit to you folks. Most everyone of you has told 2 or 3 of your friends about me and they've sent me orders. That's what has made our business desk double then triple. A CHANCE TO WIN PREMIUMS OR CASH!

You boys and girls these days are looking for a chance to make money and win big prizes. I'm going to help you by putting you into the Seed business with me. I will furnish the seeds, you sell and give you a big share of the profits. I have had as high as 30,000 JUNIOR SEEDSMEN on my list and want 20,000 more now.

You know I started in business for myself selling seeds when I was probably younger than you are now. You have read about it in the catalog. But I didn't get very far at that time, for I had very few seeds to sell and really no money to sell with. If I had the chance now, I wish I could have had the chance you now have; I would have got a start in the seed business about ten years earlier than I did.

HERE'S MY PROPOSITION

1. Fill out the coupon at bottom of page and send it to me and I will send the rest to me. I trust you to do the dividing.
2. You need not send the money till they are all sold, but if you do not sell them within a month, you are to return them at my cost.
3. If you have sold ten collections you get one-fourth ($1.00) in money, or one of the premiums and will turn them over to you in good order. If you do not sell them all, will return them to you in good order.
4. If you should sell your share, keep out one-fourth, sell the rest to me. I trust you to do the dividing.
5. In case you cannot sell the 10, sell all you can, return the rest by mail, and I will give you the value of your share.
6. The collections must all be sold at the same price, 35c. We believe in one price to everyone. It's the only way.

DON'T WAIT

Don't put off until some other Junior Seedsmen has supplied your neighborhood. Get an early start and you'll sell more, easier.

EVERYONE WANTS A BARGAIN COLLECTION LIKE THIS

This year we're offering the best and most popular collection we have ever put out. It's just what everyone wants. A WHOLE GARDEN IN ONE COLLECTION. Get a start in the seed business about ten years earlier than I did. 

Now what I want you to do is sell these seed collections to your friends and neighbors. And remember, the more you sell, the more you earn. Heart. Enough seed for an entire garden. It's a collection that will grow many different crops, for only 35c. Think of it! Everyone will gladly buy a bargain like this.

INOCULATE YOUR PEAS AND BEANS FOR BIGGER YIELDS

All your garden peas, beans, and sweet peas
should be inoculated. You take a little
from the air and fer-
lizing your soil-
ing you bigger yields.

I.e., every 100 lbs. of garden soil that's not
inoculated is worth 100 lbs. of inoculated.

VITAMIN B1

Everybody is talking about this sensational
vitamin for plants—Vitamin B1. The
miracle things it does when added to plant soil
are almost unbelievable.

Bette Moore and Gardena who announced the
discovery and have written article after article
about it report it is miraculous—dubbing 10
inches across enormous apples—dubbing 10
inches across enormous apples—all because
Vitamin B1 was made available to soil which
was almost always deficient in this very necessary
vitamin. It can be used in solution to water plants,
shrubs, or trees, or the roots of plants can be
dipped in it to stimulate root growth and kill
the black rot, black spot, or the roots of plants can be
dipped in it to stimulate root growth and kill
the black rot, black spot, scab, and powdery
mold that is so ruinous. It is so powerful, but their
imitations don't come close. The comparatively new
and powerful insecticide REFONE is mixed with other
powerful ingredients, and makes it the nearest ALL-
PURPOSE DUST on the market. I predict in 2 years
nothing else will be sold.

CABBAGE

Cabbage is one of my favorite vegetables and I have always had a lot of it in the trial grounds, tried to raise a lot of it for market. I have spent a good deal of time in checking over the different varieties and kinds of seed. I've tried all of them throughout the season. There is nothing to be gained in trying so many. Start in hothouses and get them all ready before you expect to plant out of doors. Don't waste your rich deep soil. An ounce should make 2,500 plants.

HANSEN'S HARDY HYBRID PLUMS
Bear Heavily—Bear Early—Very Hardy
These are the famous hybrid plums of Fred. Hansen. He developed them for the sweet Daimont winter, so they will stand and bear the low temperatures of Chicago. Bearing heavily branched, often break with fruit. Come into bearing early—offers 1st yr. after planting.
The fruit is delicious. Try them all if you can.

WANETA
The most famous of all Hansen's Hardy Hybrid plums. Fruit big, bright red outside and crisp, juicy, sweet yellow inside. Heavy bearer, one of the first and best for canning, desserts, and jams.

OPITA—Bears 1st Year
Ripe early in season. Ripe color, skin yellow inside. Large, marriage-sized fruit, rich and good keeper. Can only be grown in Minnesota.

SAFA—Beautiful Color When Ripe

HANNSA—The Big Freestone
(Apricot Plum.) Big, reddish purple skin, firm, late in season performed yellow meat. Freestone, ripens late after planting. Ripens in August.

UNDERWOOD
The Giant Freestone
(American type.) My favorite as Cranberry. Bears weight, and is far more productive than Freeestone. Ripens in July with a heavy crop. FREE STONE is good to look at and delicious to eat.

BLUE DAMSON
Old Favorite Freestone
The old favorite blue plum excellent for preserves. A large freestone, and very heavy bear.

NEW DOUGLAS PEAR
Quick to Bear
At last we have been able to build up a stock of this wonderful pear to offer you. It is the new fall pear which bears almost at once after planting. Generally loaded year after planting. Fruit is large, yellow, and may be allowed to stay on the tree until fully ripe. You don't have to bother wrapping them. This is the most blighting proof of all the pears. Price same as other varieties although generally a premium is asked for this fine new pear.

GOLDEN EMBER
The New Canning Plum
Hangs on Tree Until Ripe

SUGAR PEAR
The Sweetest of All
These are SUGAR PEAR. As sweet a Sugar Plum as the old favorite Freestone. Sugar Pears give the same big, heavy yields, but in a smaller space. The size of fruit is large, yellow, and may be allowed to stay on the tree until fully ripe. You don't have to bother wrapping them. This is the most blighting proof of all the pears. Price same as other varieties although generally a premium is asked for this fine new pear.

GORMAH
The New Canning Pear
Just what we've all been looking for. A pear to fill in between Bartlett (Ripens 2 weeks later) and winter pears. Tender, crisp, juicy, while meatey. Better for dessert and canning.

KEIFFER
The Winter Pear—Good Keeper
A winter pear of high quality. Extra good keeper, heavy bearer. Lots of good pink and red color. Large fruit. Ripens at top but more uniform than Bartlett. Good pollinator.

Did you ever see a hedge so thick and solid you could sit or lie down on it? If you haven't, your time is here. Start sitting on a Chinese Elm hedge on thick and tight, and that rabbit couldn't get through it. Since the hedges, left to right, are Russian Olive, Mahonia, Chinese Elm and Privet. All are trimmed in different heights to show you different ways you can use these "living fences." Hedges are up to 10 ft. high and the bottoms cut at different heights to show a good range of hedges.

HOW TO MAKE AND PLANT A POOL

There are many types of pools used. Barrels sawed in half and sunk into the ground are used as tub gardens. Metal stock tanks of various sizes make ideal pools. The most common and least expensive of all materials used is the common building brick. Mix 4 parts of the sand to 1 part of cement. Can be shaped into any desired form with sand and smooth the sides and bottom when dry.

COUPLING—UNSCREW OVERFLOW PIPE TO DRAIN POOL

After the pool is formed, fill with water, place the cement on the sides without making a form to hold it. Let the first thickness harden a few hours then build up the sides until you have the desired thickness. Then pour some cement into the bottom. This enables you to plaster the cement on the sides without a form. Let the first thickness harden a few hours but not too long, and smooth and shape it to your desired form. Then pour some cement into the bottom and smooth it making sure to have one point low for the drain.

Don’t fail to make a drain to your pool. A pipe or tile at least 2 inches in diameter and at least 2 feet long. The drain saves work and time. The best depth for the pool is 25 inches when finished. This depth allows about 12 inches for bucket and 12 inches above ground level. This allows room for the design left. The drain should be funnel shaped and enter the sand at least 2 inches. To make a drain, fill with water, using 5 lbs. of rock salt to the 100 gallons of water, and let set for 10 days, then drain and refill with water, using 5 lbs. of rock salt to the 100 gallons of water. The drain will save work and time.

HOW TO PLANT THE AQUARIUM

(Balanced—Unnecessary to Change the Water)

1. Make sure the size of your aquarium then find a collection (on this page) that is similar. Make sure you have the amount the collection calls for, of plants, snails, clams and hi-balls.

WOOD

SHOULD . . . Place two inches of clean, common lumberyard sand, medium coarse, not too fine, in the aquarium and mound it up so the back will be some higher than the front, then fill with water. PLANTING . . . Put the plants in the sand in above picture, make any arrangement you wish, scatter them much as possible. Put in all the plants, snails, clams, hi-balls and one small fish. Let Greece grow a week and then put in the rest of the fish. FISH . . . A good rule is to use 2 inches of fish body to each gallon of water. LOCATION . . . Places the aquarium so it will have good bright daylight but very little sunshine. CLEANSING . . . Occasionally, use a small, extra clean cloth and wipe the glass on the inside, if a surplus of sediment accumulates on the bottom of the aquarium, dip it out with an aquarium dip tube or syphon out with small rubber hose.

Better Breeding—Careful Culling and Blood Testing Make Field Chicks More Profitable!

The superiority of Henry Field’s chicks doesn’t just happen. They come from careful planned expensive breeding. All of our chicks are regularly inspected by our own inspectors under the direction of Judge Leon Smith. All birds are carefully culled, wormed and marked and any birds that have failed to measure up to our higher standard are taken from our breeding flock. This careful breeding means healthier, more vigorous, and more profitable chicks for you.

This is the year for you poultry raisers to make money. Uncle Sam says, “MONEY EGGS AND MEAT,” and he’s willing to pay well for them. He has pegged the market to encourage heavy production and it’s up to you to supply the numbers at the same time cashing in on big profits this year.

Remember, you help the Defense Program most by raising good feed on scrubby chicks. Stick to known quality—stock that has high egg-producing and meat producing blood bred into it for years. And there’s where Henry Field can help you. For over 30 years we’ve bred poultry. Flock owners all over the country get better gains faster with Field’s chicks. Don’t be satisfied with less—this year of all years, Field’s cost no more.

Flock Owners Say Field’s Chicks Grow Faster... Lay Better!

Saved $4 and 100% Pleased

“Dear Henry: The 100 chicks you sent me April 14th are perfect. My best, 100% purebred, not one sickly or dead in whole bunch. They started right in eating and drinking right away. We do not get chicks a bit better right here and we pay 10¢ each here instead of less than 9¢ each from you. We are greatly pleased and will count on you for next year, too.”—D. F. Reeder, Seattle, Washington.

Pullets Laying In 4½ Mo.

“Dear Mr. Field: Just a line to thank you for the nice White Rocks you sent us. We sold 114 roosters when they were 4 and 5 months old and got 72¢ each for them. We now have a pure flock of Leghorns and your Leg Rocks are noted for being the best display in the American class. We also use them for meat and find our culling and grading easier than in any other breed. We also use them for meat and find our culling and grading easier than in any other breed.”—W. H. Stotfort, Wise.

Chicks Arrived O. K.

“Dear Seed Sense Folks: My baby chicks arrived on time and were in prime condition. The pullets and roosters were 6 weeks old and are fine as far as we can tell from the few that have laid so far.”—J. F. A. Knutson, Wolbach, Nebr.

Chicks More Than Pleased

“Dear Seed Sense Folks: We received our 406 chicks May 28, 1929, and are very well satisfied with them. They are a perfect bunch of chicks and not a dead or droopy one among them. I wonder what you did to make them so good.”—S. A. Cooper, Benton Harbor, Mich.

ABOUT “SEED SENSE”

Most all of you know all about Seed Sense and
most of you read it regular, too, from cover to
cover if the thousands of letters I get thanking
me for it are true.

Well, “Seed Sense” is free. It's free for the ask-
ing to any of my customers. The subscription
price is simply a garden seed, field seed, or
nursery order sometime during the year. And
every person who orders from me will be put
right away on the mailing list to receive “Seed
Sense” every time it's printed.

I have a lot of fun writing “Seed Sense.” I try
to put all of the pictures and information about
planting, pruning, seeding, etc., that I think will
interest you. It's crammed full of information
and fun, and is printed three or four times a year.
If you want it, say so.—H. F.

**HELP YOUR COUNTRY CONSERVE COTTON!**

We will pay you **15c TO 25c EA.**

For returned Field Seed Bags or Corn

**HERE'S THE DEAL**

Our country needs every cotton factory to produce army goods. That means you and I must use cotton goods over and over again. Whenever we can, we expect you to use this seed, making you a nice profit and saving cotton factories. We make nothing from this deal, except the knowledge we are doing our part.

That's why I've worked up this deal to pay you for returning both old and new Hybrid and/ or Regular cotton seed. For each seed bag or corn bag you return, we will pay you the difference in price. Simply tie them up in a bag, take them to your local mill or dealer, and mail them. Unsatisfactory bags will not be paid for or returned.

Let's do our part by using bags over. You'll make a nice profit doing it! Have some to give away or send them at one time—H. F.

Mule-Hybrid OPENING PRICE — LOWEST OF SEASON

Despite rising costs and increased demand for Mule-Hybrid, I'm still keeping my prices low FOR EARLY BUYERS, but it's for early buyers only as some numbers are already sold out and it's strictly first come first served this year. You will notice that though I have set my prices lower for early buyers, I have printed what it is going to be in season. That’s to give you an idea what prices we are going to have and give you a chance to get in early before the rise. But those prices for March and April aren’t guaranteed. I’m putting them there just to give you an idea and they’re going to be those prices OR HIGHER.

Don’t put off ordering corn. Get it now. Be fore the price rise and save.

The New Way to Plant Corn.

Weather-Proof Mule-Hybrid Blend

A high-yielding, fully adapted hybrid corn which is resistant to many of the most common pests and diseases. This blend produces a high yield of corn, even in adverse weather conditions.

ACTUAL TESTS PROVE IT WORKS

The highest yielding field of corn in the United States was planted with Mule-Hybrid corn and has switched to it. Our tests and the hundreds of other farmers who have planted Mule-Hybrid corn all report the same thing — it’s the only hybrid corn to give them a high yield.

White Corn $7.00

Edge, $5.50 Hill

PLANT HILL-DROP GRADE

AND SAVE YIELDS AS MUCH . . .

Costs You $1.50 bu. Less

(Perfectly Uniform)

Most farmers plant flat kernel corn and don’t know the advantages of hill drop corn. That’s the only reason it’s cheaper.

These tests prove that hill drop corn is the same as or better corn than the flat kernels—the only differences being they weren’t killed by the heat and that the corn was graded.

Every farmer should be using hill drop corn in his field. It’s the only way to get the best yields from your land.

FIELD'S NEW HYBRID ELM
Has All the Good Points of Both the American Elm and Chinese Elm—None of the Bad

The Perfect Cross for Shade Trees
No finer cross could be made for a shade tree than to combine the permanence and beauty of the American Elm with the rapid growth in all kinds of weather of the Chinese Elm. That is just what this new HYBRID ELM has done. It carries all the good qualities of both and none of the bad.

Resembles the American Elm—Perfectly Symmetrical
But the best part of the story is that it is almost impossible to tell the Hybrid Elm from the very desirable American Elm we all love so much. Its leaves are very large, dark green—almost exactly like the American. The bark is smooth and a medium grey color. The branches are identical to the American Elm—straight and strong—not gnarly and fine as with some trees. It does not break in a high wind. The trees are all perfect and symmetrical.

Grows 8 to 14 Feet Per Year!
The growth of this new Hybrid Elm is phenomenal. It has this habit from the Chinese Elm, but has far outstripped it. Records on some of the trees show they have grown as much as 14 feet in one year and 12 feet per year is not unusual. The growth is all straight and strong and perfectly shaped. It requires very little, if any pruning.

It Is 100% Hardy
Hot weather, cold weather—it's all the same to this new Hybrid. Not even the tips of the branches were hurt in the Armistice Day freeze in 1940 which took so many of our trees here in Shenandoah. Where ordinary varieties killed out, the Hybrid Elm was not hurt the slightest. And hot or dry, the growth doesn't stop. This elm is going to grow despite everything.

Limited Supply
There are no more trees available in the United States when our limited supply is exhausted, so I urge you to please reserve the trees you want as early as possible.
