Before and After Planting Effects

Photographic effects speak plainer than words. The few illustrations immediately following, need but little explanation.

Notice please, the bare, bleak and unhomelike appearance of the house before planting. Likewise notice that the few dollars expended for HIGH GRADE NURSERY STOCK used in the exterior decorating of the same house has converted it into a "HOME."

This small expenditure compared to the actual cost of the structure, has done more to make it beautiful, livable, valuable and homelike than any other single item.

"It's not a HOME until it's planted." Make your house a HOME.

GLADIOLI

Most beautiful flowering bulb. Produces all colors of the rainbow. The flowers cluster along tall spikes that grow two or more feet in height. Used extensively in perennial borders. Make beautiful cut flowers. Bloom over a long season.

CAMPANULA

The old favorite Canterbury Bell. Has drooping bell shaped flowers along upright stems. White and various colors. Blossoms in June and July.

DELPHINIUM

Commonly called Larkspur. One of the best known and most popular of all perennials. Grows to about eighteen inches. Foliage deep cut dark green. The flower spikes grow from three to six feet tall, the blooms being in various shades of blue. Is adapted to border plantings, among shrubbery and along walks.

GOLDEN GLOW

Grows five to seven feet high. Flowers of fine golden yellow. A rapid grower. Blooms profusely from July until September. Makes an excellent background for other perennials.

DIGITALIS

Commonly called Foxglove. It is a good wholesome old fashioned plant that will always be popular. Is dignified, stately, clean of growth and hardy. The blossoms of many colors are borne on long stiff flower stems that grow from three to five feet tall. Blossoms in June or July. No border planting or perennial garden is complete without it.

COREOPSIS

GAILLARDIA

COREOPSIS

Flowers are a bright cheerful golden color. Excellent for cut flowers, lasting well after cutting.

The plant grows from 18 inches to two feet high, the foliage being a rich green. A very graceful and attractive perennial that withstands sandy or barren soils. Very hardy and will grow almost anywhere even in rock gardens or on the sea shore.

A persistent bloomer, starting to bloom in June and continuing throughout the season until Fall, if the flowers are cut every day or two. No garden is complete without one or more of these bright blooming plants.

GAILLARDIA

One of the most conspicuous and decorative of all perennials. Grows from 1½ to 2 ft. in height. Starts blossoming in June and continues in wonderful profusion until late Fall. Stems of flowers are long and sturdy, bearing blooms of beautiful red centered, yellow bordered flowers, that shade into red-browns and orange-crimsons. Some blooms have brown centers and complete yellow petals. All of these shades are borne on the same plant at the same time, producing a very striking and brilliant effect.

The plant is exceptionally hardy, and makes an unusually fine border or bedding plant.

When used for cut flowers, stands up well for several days in a vase or container. Harmonizes well with other cut flowers.

ANEMONE

X85 PROCESS COLOR PTG. CO ROCHESTER, N. Y., U.S.A

SWEET WILLIAM

ANEMONE

Often called Windflower. Grows three to four feet high. The flower stems are tall and stately. Flowers are wax-like, very dainty and sometimes are two inches across. Will thrive in rock gardens or thin rocky soil. Blooms from late August to the middle of November when other flowers are scarce. We have two varieties. The Whirlwind which is pure white and the Queen Charlotte which is a delicate rosy pink.

SWEET WILLIAM

An old garden favorite. Grows from 12 to 18 inches in height. Blossoms from May until July or August. Flowers are in large flat clusters in all the shades of pink, white, lavender and red. Is very fragrant, showy and cheerful. Makes an excellent border plant when mixed with other perennials. Very beautiful for cut flower purposes.

LOGO PROCESS COLOR PTG. CO. ROCHESTER, N. Y.,

BLUE BIRD FLOWER
(VERONICA or SPEEDWELL)

MONARDA (OSWEGO TEA)

BLUE BIRD FLOWER

(Veronica or Speedwell)

Blooms from mid-July until September. The blossoms are deep blue in color and on long spikes at the end of upright stems, shooting up three or four feet. A very handsome plant. Desirous for its conspicuous beauty and long blooming season. Excels in dry, barren and hot soils. Hardy and cheerful under all conditions.

MONARDA (Oswego Tea)

Is a narrow, upright growing plant. Leaves are coarse and heavy veined, aromatic and attractive. Bears a profusion of large red flowers from June until September. Succeeds in almost any garden soil. Especially effective when planted against dark green foliage, or between shrubs where it produces a brilliant effect. Lights up the sombre shades like a lantern in the night.

ΔΟΨ PROCESS COLOR PTG. CO, ROCHESTER, N. Y. U.S.A.

PHLOX

YUCCA

YUCCA

Sometimes called Adams Needle. Leaves thick and sword-like. Blooms in June and July on long, sturdy stalks that shoot up above the foliage to a height of from 3 to 6 feet and bear large heads of exquisite creamy-white bell shaped flowers. Very attractive and distinctive.

PHLOX

The hardy Phlox is so well known that little mention of its many merits is required. It is one of the most beautiful, useful and interesting of the perennial family. Where there is a vacant spot that needs plants, put in Phlox. Produces a profusion of bloom from July until late fall. Plants grow to a height of from 18 inches to two feet. The blooming period is prolonged by cutting the flowers for home decorations. May be had in nearly every conceivable color and tint.

GERMAN IRIS

SHASTA DAISY

GERMAN IRIS

The Iris most commonly grown. Is indispensable as it will grow in almost any location. The leaves are dull green and are from one to two feet long. Flowers are delightfully fragrant lasting into June. Excellent for cut flowers. The basic colors are white, yellow, light purple and dark purple, with many variations of shadings and colors.

SHASTA DAISY

Grows from 12 to 15 inches tall. Blossoms from June to September. Small yellow center and long white petals. Will grow anywhere. Is a fine plant for beds and borders and to naturalize along the banks of streams. An unusually fine cut flower plant. Hardy, bright and showy.

LARKSPUR

X87 PROCESS COLOR PTG CO. ROCHESTER, N. Y., U. S. A

FOXGLOVE

LARKSPUR (*Delphinium*)

One of the most popular and best known perennials. Plant grows to about 18 inches. The flowers are on long, straight stems that will reach a height of from four to six feet. Along and about this stem the beautiful many shaded blue flowers cluster. There is no other blue perennial that adds as much distinction or color to the planting as the Larkspur. Used extensively for border plantings and for massed effects. A most beautiful perennial that should be in every garden.

FOXGLOVE (*Digitalis*)

The blooms resemble the finger of a glove, and extend up and down almost the entire length of the sturdy stem. Dignified, stately, clean of growth and savors of the "old fashioned garden." Blossoms in June and July and sometimes continues to bloom through August and into September, making a blaze of glory throughout the entire summer. Comes in nearly every shade and color of the rainbow. Every border planting or corner of the garden should have its supply of Foxglove.

PEONIES

X 82 PROCESS COLOR PTG. CO. ROCHESTER, N. Y. U. S. A

PEONIES

The rival of the rose. By some is considered the queen of all flowers. Has a fragrance as pronounced and exquisite as the rose. It has the most striking, showy form and the foliage is beautiful all summer. May be had in various colors and in named varieties. Used effectively along borders, for massed plantings or as individual specimens. For cut flowers the Peony is unsurpassed. No floral planting complete without a reasonable quantity of Peonies in various colors.

340 PROLESS COLOR PTG CO. ROCHESTER, N. Y. U. S. A.

PEONY-RED

PEONY RED

Nothing is more beautiful than a cluster of Red Peonies.

The Peony is truly the rival of the rose and by some is considered the queen of all flowers. The propagators of today have given the Peony its delicious odor and have lengthened its blooming period. For cut flowers the Peony is unsurpassed. Red Peonies should be in every border planting and perennial bed. Use Red Peonies liberally.

CHRISTY INC. ROCH. N. Y.

PEONIES. They are the "Queen of Spring Flowers," and are well adapted for massing in beds, and particularly valuable for planting in groups throughout the perennial or shrubbery border, where their brilliant hues add attraction to all around. They are perfectly hardy, requiring no protection whatever, even in the most severe climate.

PEONY WHITE

Some white Peonies are as pure white as the driven snow. Others are slightly marked or diffused. The Festiva Maxima is highly recommended by Peony growers. You need white in every planting. White Peonies will fill the bill.

CACTUS
DAHLIA

SHOW
DAHLIA

CACTUS DAHLIA

Have large, loosely formed chrysanthemum-like flowers. The long, narrow petals are rolled or twisted into quills, some tightly rolled, others more loosely. May be had in a variety of colors. A favorite Dahlia.

SHOW DAHLIA

Has a round, formal head of quilled floretts or petals. Perhaps one of the best known and most widely grown Dahlias. Used extensively for cut flowers. May be had in a variety of colors.

Our Dahlias are super-fine being grown by one who knows how.

821 PROCESS COLOR PTG. CO. ROCHESTER. N. Y., U. S. A.

GLADIOLI

GLADIOLI

For spring and early Summer planting. Has erect sword like leaves. Flowers are grown along the spike like branches in color of white, pink, red, salmon, yellow and blue, also different shades of these colors. With its diversified coloring, the Gladiolus is one of the outstanding features of the garden. Very effective when planted in front of shrubbery, among Roses, or in Perennial borders. May be planted any time between May 1st and July 1st and will bloom that season. Will thrive in any good garden soil. Excellent for cut flowers. No garden is complete without a reasonable supply of these bulbs. Should be taken up in the Fall and re-planted in the Spring.

826 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A.

HYACINTH

HYACINTH

For fall planting. Recommended for both house culture and out of door bedding. A circular or star shaped bed with various colors alternated produces a beautiful effect. Is much used for forcing in the house, and when so used blooms freely during the winter.

The plants have stiff, upright green leaves growing up from the bulb. The bell shaped flowers are in large thick clusters from eight to twelve inches long. Colors are white, pink, red, yellow, lilac and purple. When planted out of doors blooms in April and May according to locality.

May be set in clumps in the shrubbery or perennial border. When set among lilies, produces bloom before the lilies reach the blooming stage.

845 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A.

one-half actual size

TULIP

TULIPS

For Fall planting only. This particular bulb is so well known all over the continent that but little need be said about it. We sell only Holland grown varieties of the very best quality and that are sure to give universal satisfaction. Need practically no attention after planting. Will come up year after year and make your garden cheery and beautiful early in the season.

EVERGREEN BITTERSWEET (above)

AMPELOPSIS VEITCHII (below)

EUONYMUS RADICANS VEGETUS

(Evergreen Bittersweet)

An Evergreen vine with large, round, glossy leaves which are attractive the year around, and with its orange-red fruit this vine makes a pleasant variety for various locations. Attains a height of from 10 to 15 feet. Excellent for covering fences, stone walls or rock piles or trellises. If not allowed to climb, may be trimmed to form a small tree or large bush. As a general utility plant, no other is so versatile.

AMPELOPSIS VEITCHII

(Boston Ivy)

The best of all vines for covering stone, concrete or brick, as it clings closely and tenaciously. Adds grace and beauty to buildings, making picturesque the most unsightly. Grows to a height of from 30 to 40 feet and under favorable conditions higher. The leaves are a beautiful green, three lobed and grow very thickly, overlapping each other forming a tapestry of rare charm. Becomes very gorgeous in Autumn. Has black fruit that will remain into the winter furnishing food for birds. It is the vine usually seen on churches, town halls and other buildings of this nature. Not an evergreen.

CLEMATIS PANICULATA

CLEMATIS JACKMANNI

X97 PROCESS COLOR PTG. CO., ROCHESTER, N. Y.

CLEMATIS PANICULATA

Sometimes called Star Clematis as the flowers are small star shaped, pure white and dainty. Blossoms from late August until October, when other flowering vines are very scarce. Has a most alluring and penetrating fragrance. One of the hardiest, most satisfactory vines for porches, pergolas and trellises.

CLEMATIS JACKMANI

A rapid climber, growing to a height of 10 feet. Blossoms from July to September. Flowers large, of an intense violet-purple. The most widely known and the most popular of the large flowered Clematis family.

98 PROCESS COLOR PTG. CO., ROCHESTER, N. Y. U. S. A.

HALL'S JAPAN HONEYSUCKLE

**BIRTHWORT
(DUTCHMAN'S PIPE)**

HALL'S JAPAN HONEYSUCKLE

Has very attractive blossoms which are white when first opened, then turning to yellow. Blossoms from June until September. Has deep green foliage in profusion which remains green until mid-winter. The blossoms are dainty and very fragrant attracting humming birds. Is thoroughly at home whether grown over trellises, fences or porches. The Hall's Japan Honeysuckle and Clematis Paniculata grown on the same trellis or porch, so that the intermingle produces a beautiful effect. Grows to a height of from 10 to 15 feet.

DUTCHMAN'S PIPE (Birthwort)

A magnificent hardy vine of rapid growth, often reaching a height of 30 feet. Has very large, heart shaped leaves. During the summer has small purplish-brown blossoms that resemble little curved stemmed pipes an inch or more long. The leaves retain their dense green color from Spring until late Fall. So dense that it completely shuts out the wind and sun. Excellent to grow across the sunny or windy end of the veranda or a cover for arbors and garden archways. Absolutely free from disease and pests.

WISTERIA PURPLE

X99PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A.

TRUMPET VINE

BIGNONIA (Trumpet Flower)

A strong, robust, hardy vine, growing 15 to 20 feet. Light green foliage. Has showy, orange-red, trumpet-shaped blossoms 5 or 6 inches long, in clusters at the tips of the branches. Begins to bloom in July and continues for several weeks. Will climb wherever it can attach its tendrils and get a foot-hold, twine around posts, pillars and gutter pipes. One of the most decorative vines. By staking, the main branch can be trained and trimmed to form a large, spreading bush or shrub. This is possible due to the woody, robust nature of the main stem or branch.

WISTERIA

A woody vine of strong vigorous habits, growing to a height of from 20 to 30 feet. It is a tightly twining vine, curling tightly around conductor pipes, telephone wires, trees or anything to which it can attach itself. The flowers are borne in dense pendulous clusters a foot in length and very fragrant. While the purple color is most desired, this vine may also be had in white. The white Wisteria does not bloom as profusely as the purple. May be grown as an individual item and trimmed to tree form, producing as gorgeous effect as you can imagine. Should be used somewhere on every property, for its fragrance and beauty.

Red Snowberry

Syringa, common

Barberry. Thunbergii

Honeysuckle Morrowi

Syringa Virginale

High Bush Cranberry

Forsythia

Snowberry, white

Spirea, Anthony Waterer

CORALBERRY, or RED SNOWBERRY

Grows to a height not to exceed 4 feet. Slender graceful branches with beautiful foliage. Dainty pink blossoms in June followed by small red berries. Will survive and flourish in shady, dusty and dry places.

COMMON SYRINGA

Height 5 to 6 feet. Bears an abundance of single white blossoms of the most fragrant nature. Blossoms in May and June.

BARBERRY THUNBERGII

A beautiful general purpose shrub of dwarf habits. Grows to 3 or 4 feet in height. Small yellow flowers in June followed by oblong red berries that remain all winter. Adds color to the winter aspect. Also used extensively for hedging purposes.

HONEYSUCKLE MORROWI

Grows to 8 feet. Smooth light grey branches and broad rough leaves. Flat heads of white flowers in May and June followed by clusters of scarlet fruit.

DOUBLE SYRINGA

Has characteristics of the Syringa Common, except that the blossom is of the double variety.

HIGH BUSH CRANBERRY

Grows 4 to 6 feet or more. Has pure white flowers that change to yellow tones in May and June, followed by dense clusters of beautiful red berries, which remain until winter. A good filler in the border or shrubbery bed.

FORSYTHIA

One of the earliest blooming shrubs. Bright yellow bell shaped flowers appear all along the stems or branches several days ahead of the leaves. Attains a height of from 5 to 8 feet. Should be in every border or planting so as to obtain that April bloom.

SNOWBERRY

Related to the Coralberry. Grows to a height of four feet. Dainty pink blossoms in June or July followed by large white berries in heavy clusters. Well adapted to shady, sandy, dry and dusty or smoky locations.

SPIREA ANTHONY WATERER

This is a fine dwarf Spirea, with dark, crimson flowers. It is a low—growing shrub, one of the finest of recent introduction.

505 PROCESS COLOR PTG CO. ROCHESTER, N. Y., U. S. A

ALTHEA

ALTHEA

Commonly called Rose of Sharon. Grown in both bush and tree form. May be had in the following colors:- White, Red, Pink, Blue or Purple. The bush form grows to a height of about six feet while the tree form attains a height of eight or ten feet. The tree form is used mostly for individual plantings while the bush form is used extensively for massed plantings and hedges, or is mixed in extensively in border plantings. Blooms very late in the season when practically all other shrubs have discontinued blooming. Should be a part of every landscape job.

Blooms freely during August and September, when scarcely any other shrubs are in blossom.

517 PROCESS CO. & PIG. CO. ROCHESTER, N. Y., U. S. A.

BUTTERFLY BUSH

BUTTERFLY BUSH

Called "BUTTERFLY BUSH" because of its tendency to attract butterflies in large numbers. Is semi-herbaceous, dying down to the ground in autumn and entirely new growth from the root in spring.

Produces beautiful violet purple blossoms in profusion the first year and each succeeding year. Very desirable as an individual lawn specimen or in massed and border plantings. Also makes a beautiful herbaceous hedge.

DEUTZIA GRACILIS

DEUTZIA GRACILIS

One of the most exquisite small shrubs. Grows 2 to 3 feet tall. If not crowded and given plenty of sunlight will bear a mass of dainty, snow-white blossoms in May and June. Branches are slender and graceful, growing so thickly that the shrub is a compact mass, remaining beautiful after the blossoms are gone. Especially adapted for borders.

527 PROCESS COLOR PTG. CO., ROCHESTER, N. Y., U. S. A

DEUTZIA—Pride of Rochester

DEUTZIA PRIDE OF ROCHESTER

One of the best known and popular shrubs. Usually grows from 5 to 8 feet tall. Has showy clusters of white flowers tinged with pink. Blooms in June and early July. Especially adapted to landscape effects where tall growing shrubs and one that will fill a good sized space is desired. Should not be trimmed or pruned. Should be part of every landscape effect.

DEUTZIA
CRENATA

FORSYTHIA
FORTUNEI

DEUTZIA CRENATA

A beautiful white single flowering variety, growing 5 to 8 feet high. Blooms in early June nearly the entire shrub being covered with a mass of sweet scented white blossoms, which last a long time. Used quite extensively for cut flowers. A charming, beautifully formed, fragrant and effective part of the landscape.

FORSYTHIA FORTUNEI

Often called Golden Bell on account of the bright golden yellow flowers that appear in profusion during late April or early May before the satiny green leaves. Truly a "spot of sunlight" in the border planting. Also makes a beautiful shrub for individual plantings. Branches are a deep green that adds to its beauty in the Fall of the year when the leaves turn a purplish hue. Grows 5 to 8 feet high.

531 PROCESS COLOR PTG. CO. ROCHESTER, N. Y. U.S.A.

BUSH HONEYSUCKLE

BUSH HONEYSUCKLE

Is often called Tartarian Honeysuckle. An upright shrub which often attains a height of from 6 to 10 feet.

May be had in the following colors, red, white or pink.

Bears a profusion of small fragrant blossoms in May and June, followed by its chief charm - a wealth of orange or red berries which remain during the summer and autumn. Furnishes food for birds during autumn and early winter. The great beauty of this berry-bearing shrub should not be overlooked. Fits well in any border or landscape planting where a high growing shrub is desired.

HYDRANGEA PANICULATA GRANDIFLORA

HYDRANGEA ARBORESCENS

HYDRANGEA PANICULATA GRANDIFLORA

The large flowered Hardy Hydrangea, which grows in both bush and tree form. The bush form is most usually seen and the most desirable for the average planting. Should be cut back severely in early March. The new growth will be from 3 to 6 feet during the season and in August will bear a profusion of large white blooms that will later turn to various shades of pink and purple. The blossoms will remain on the shrub until frost. Very valuable as a late blooming addition to the shrubbery border. Is also used as a flowering hedge and is very effective for this purpose.

HYDRANGEA ARBORESCENS

Often called the Hills of Snow Hydrangea. Very effective for porch plantings as well as for individual use in the lawn or in sharp corners. Starts to bloom in June and continues until August. When planted alternately with the Hydrangea P. G. produces a long succession of bloom. Grows from 3 to 6 feet. Should be severely pruned in March before the new growth starts.

X53 PROGRESS COLOR PTG. CO., ROCHESTER N. Y., U.S.A.

LILACS

1 President Grevy		3 Michael Buchner
2 Marie Le Graye	5 Charles Tenth	4 Ludwig Spaeth

LILACS

PRESIDENT GREVY. Double, beautiful pale blue.

Very large individual blossoms in exceedingly large panicles. Distinct and desirable.

MARIE LeGRAYE. Single, pure white, large clusters.

Very fine.

MICHAEL BUCHNER. Double, handsome flowers of pale lilac. borne in splendid tresses. Low, compact growing.

LUDWIG SPAETH. Single, dark purplish red. Large individual flowers in long compact panicles.

CHARLES TENTH. Single, reddish blossoms in large loose tresses. Of exceptionally strong, rapid growth.

X54 PROCESS COLOR PTG. CO. ROCHESTER, N. Y.

JAPAN QUINCE

COMMON
SNOWBALL

JAPAN QUINCE

Blooms in May just ahead of apple blossom time. Startlingly brilliant with its dazzling scarlet flowers. Bloom followed by fleshy fruits which are fragrant and quince shaped. The stout branches are armed with many thorns. Grows from three to six feet. Makes a beautiful decorative or defensive shrub or border.

COMMON SNOWBALL

This old favorite attains a height of six to eight feet. Bears large rounded balls of snow white flowers in May and June, on drooping branches making it a very attractive shrub. Looks well as a single specimen and is fine as a background for smaller shrubs.

SPIREA
ANTHONY WATERER

SPIREA
BILLARDI

SPIREA ANTHONY WATERER

Of dwarf habit, growing to about 18 inches high. Has beautiful clusters of Crimson flowers in July, continuing to bloom until frost. Is used extensively for planting ahead of higher growing shrubs, for edging along drive ways and side walks and for a low growing massed planting.

SPIREA BILLARDI

Grows to a height of from 5 to 6 feet. Blooms in July and August with a second blooming period later. The flowers are borne in dense spikes of exquisite pink. Highly decorative wherever planted. Fine for cut flowers. Does well in dry places. Especially adapted to planting in masses on a hill side or in borders. Excellent for single specimen planting where individuality is desired.

562 PROCE. & COLO. PIG. CO., ROCHESTER, N. Y., U. S. A.

SPIREA THUNBERGII

SPIREA THUNBERGI

Grows to a height of three to four feet. Blooms in late April and May with abundant white flowers that almost cover the branches. It is a small, rounded shrub. The leaves are narrow and long, on slender twigs, forming a dense, feathery bush which is ornamental all summer. In autumn foliage takes on bright red and orange tones; hangs late. Hardy; does well in smoke and dust; succeeds best in moist soil; but will grow anywhere.

565 PROCESS COLOR PTG. CO. ROCHESTER, N. Y.

SPIREA VAN HOUTTEI

SPIREA VAN HOUTTEI

Rightly called "The Most Beautiful Shrub in America."

It is also the most universally planted. Used for porch bankings, massed and single plantings and also for a flowering hedge.

Flowers are pure white, borne in dense clusters along gracefully drooping branches. A veritable bank of snow when in full bloom during May or early June. Attains a height of from eight to ten feet. May be trimmed immediately after flowering, to conform to individual idea. Perfectly hardy, Will thrive anywhere.

(Left)
SYRINGA
GOLDEN

X58 PROCESS COLOR PTG. CO,

SYRINGA
MOCK
ORANGE

SYRINGA GOLDEN

The golden leaved dwarf form of Syringa, growing to 5 or 6 feet. Blossoms in May and June. Foliage yellow and remains bright throughout the season. Very necessary for contrast in groupings, borders and massed plantings. Is very fragrant. Will thrive in smoky and dusty locations.

SYRINGA MOCK ORANGE

This is the familiar "Mock Orange" dear to the hearts of every one. Grows from 6 to 8 feet high. Is of fine form with upright branches, the twigs slightly arching. Very fragrant creamy white flowers borne in May and June. Foliage large and oval. Makes a fine flowering screen, throwing off a long lingering fragrance.

(Left)
**WEIGELA
ROSEA**

(Lower) **WEIGELA EVA RATHKE**

WEIGELA ROSEA

Not only one of the best of the species, but one of the choicest of the shrubs. Grows from 4 to 6 feet high. Has a beautiful pink, trumpet shaped flower. Blossoms profusely in June and July and to a certain extent at intervals. Has numerous small spreading branches and dark green leaves. A very conspicuous feature of the landscape. Should not be pruned.

WEIGELA EVA RATHKE

A dwarf growing red flowering Weigela. Does not grow more than from 3 to 5 feet high. A very choice variety. Rich dark red fragrant blossoms in June and July, often continuing to blossom until Fall. Makes a real high light in any planting. Do not prune. Cut out the dead wood only.

©

LODENSE PRIVET

LODENSE PRIVET HEDGE

Low and dense, just what the name implies. Has a foliage like the California Privet, but grows only to a height of about three feet. Especially adapted for a border along walks, flower gardens and as a dividing line between the vegetable garden and the back lawn. It is hardy, thrifty and may be trimmed or sheared to any form desired. Should be set about ten or twelve inches apart and a real dense effect will be produced. Best when sheared both top and sides and kept down to 12 or 15 inches in height.

400 PROCESS COLOR PTG. CO., ROCHESTER, N.Y., U.S.A.

(Upper) AMOOR RIVER (Lower) CALIFORNIA PRIVET

AMOOR RIVER PRIVET

A very hardy variety that does well in the colder climates. Will grow from eight to ten feet in height but may be kept sheared to the height desired. Branches are upright; foliage oval or oblong; Holds its green leaves almost all winter. Closely resembles California Privet in growth. Makes one of the most pleasing Privet hedges, and is well adapted to decorative plantings in corners of the lawn.

CALIFORNIA PRIVET

The most popular privet for hedges. Not as hardy as the Amoor River, in the extreme northern states. Should be planted in the spring. Will attain a height of from six to eight feet. Appears best when trimmed to conform to individual taste. Should be trimmed in the spring before the buds swell. Upright and stiff in habit. Foliage oval and dark green. Does well in dust, smoke or shade.

403 PROCESS COLOR PTC. CO. ROCHESTER, N. Y. U. S. A.

BARBERRY THUNBERGI

BARBERRY THUNBERGI
THE HEDGE
OF
BEAUTY--- DENSITY--- PROTECTION

THE BEST OF ALL HEDGES

For low, informal effects, growing to three or four feet.

It stands shearing well however, and can be made a very beautiful formal hedge. Also makes a tight, but **LOW DEFENSIVE HEDGE.**

THE FOLIAGE is very fine, in the Autumn taking on gorgeous coloring, and the Berries are red and attractive.

FOR INFORMAL HEDGE, plant two feet apart.

FOR FORMAL HEDGE, one foot apart.

AMERICAN
ARBOR
VITAE

AMERICAN ARBOR VITAE

One of the leading evergreens. Grows as high as 30 feet. Has beautiful green foliage of a feathery nature. Compact in form. Makes a fine individual tree for lawns or parks. Is also used as a tall growing hedge or wind-break.

470 PROCESS COLOR PTG. CO. ROCHESTER N. Y.

NORWAY SPRUCE

NORWAY SPRUCE

One of the best known and most popular evergreens.

Well adapted to specimen planting or when used for group effects. Lofty tree, extremely hardy and of rapid growth.

PFITZERIANA JUNIPER

460 PROCESS COLOR PTG. CO. ROCHESTER, N. Y. U. S. A.

PFITZERIANA JUNIPER

PFITZERIANA JUNIPER

One of the low growing evergreens. Has a flat or prostrate appearance. Looks best when planted in massed formation. Also used for planting ahead of taller growing evergreens. The foliage being fine and dark green gives a wonderful contrast to the evergreen planting.

GRUSS AN TEPLITZ

X71 PROCESS COLOR PTG CO. ROCHESTER, N. Y. U. S. A.

AMERICAN
BEAUTY

GRUSS AN TEPLITZ

A beautiful dazzling red rose that stands out prominently in any rose planting. Flowers are borne in such profusion and so constantly as to make them very conspicuous. Invariably blooms from June until November.

AMERICAN BEAUTY

A profuse bloomer with very large dark red flowers that are delightfully fragrant. Usually borne on rather stiff stems, heavily clothed with foliage. A universal favorite.

ULRICH BRUNNER

GOLDEN
EMBLEM

ULRICH BRUNNER

An excellent rose of great beauty. The buds are finely formed and the blooms when open are full and of a bright cherry red and usually large. One of the best Hybrids Perpetuals and essential in any collection.

GOLDEN EMBLEM

One of the most desirable and dependable of the Yellow Roses. Shows large, superb, perfect shaped, golden yellow bloom, of vigorous growth, fine foliage. No Rose planting should be considered complete without one or more of this splendid variety.

GEORGE
AHREND'S

OPHELIA

GEORGE AHRENDS

Sometimes called "Pink Druschki." In color, a fine, delicate rose pink. Blooms full and double, of strong growth and free blooming habits. A very desirable variety.

OPHELIA

Salmon-flesh coloring, shading to yellow. Especially fine when in bud or partly open. One of the favorite hot house roses, yet highly successful as a garden rose, making a good growth and blooming constantly.

MADAME PLANTIER

Hardy as an oak. The flowers are small, very double and pure white. Grows under almost any conditions. Blooms in great profusion in the Spring.

FRAU KARL DRUSCHKI

Known also as "Snow Queen" and "WHITE AMERICAN BEAUTY." The finest white rose, in fact, one of the finest of all roses. Of exquisite shape with pointed buds, framed in closely set abundant foliage. A large closely formed rose when open. Blooms in June and if pruned after the first and succeeding periods of bloom should continue to bloom all summer. This magnificent rose should be in every collection.

LADY
HILLINGDON

KILLARNEY
PINK

LADY HILLINGDON

A Tea Rose with exquisite formed buds of rich apricot yellow shading to orange. Blooms freely. A very choice yellow variety.

KILLARNEY PINK

A good strong growing pink Hybrid Tea Rose that is well known. One of the leaders of the pink Rose family. Buds are long and finely formed. Hardy and well adapted to Northern gardens.

MADAME
CAROLINE
TESTOUT

MRS. AARON WARD

MME. CAROLINE TESTOUT

Beautiful pink bloom of the satiny type. The flowers are large and almost round, with perfect center and edges of petals bordered with soft carmine pink. Strong, vigorous plants. A very beautiful rose.

MRS. AARON WARD

Has beautifully formed yellow buds. Blooms in great abundance and almost constantly until frost. Is very fragrant. While the bush is small when coming from the Nursery row and always remains small, it produces more blooms than any other yellow rose. The foliage is a bronze green, very distinctive.

ROSE, F. J. GROOTENDORST. A new Hybrid Rugosa (*Rosa rugosa rubra* X *Crimson Baby Rambler*). True Rugosa foliage blooms bright crimson, in clusters, produced from early Spring to frost: strong but compact. Particularly suitable for hedging and mass planting.

F. J. GROOTENDORST

A NEW ROSE OF GREAT MERIT

A cross between Rugosa and Baby Rambler, the results being that this NEW VARIETY retains all the Rugosa qualities of vigor, hardiness, foliage with growth shortened by the influence of the Dwarf Baby Rambler.

GROOTENDORST makes an ideal hedge through the summer. The only massing or hedging Rose that is hardy and everblooming.

The leaves are fine, with-standing heat and dust, and the fine red blooms brighten the garden wonderfully.

THIS FINE ROSE IS NEW, DISTINCT, DIFFERENT.

WE RECOMMEND IT HIGHLY.

AMERICAN PILLAR (above)

TREE ROSES (below)

AMERICAN PILLAR

A glorious rose and among the best of the pillar roses. Immense clusters of single bright crimson flowers with clear white eye on long, strong stems. A very vigorous climber, making strong canes with large leathery foliage. An American favorite.

TREE ROSES

“Tree Roses add distinction to small or large landscape plantings.

Red, pink, yellow and white are the predominating colors.

Tree Roses are very scarce but can usually be supplied in small quantities.”

777 PROCESS COLOR PTG. CO., ROCHESTER, N. Y. U.S.A.

BABY RAMBLER

BABY RAMBLER

Small, compact and bushy, growing to a height of about two feet. Blooms in large clusters of small double flowers. Everblooming, and make wonderfully attractive small hedges or edging borders for the rose garden.

Especially fine for planting along walks or drives.

Three colors; Crimson, White or Pink.

X78 PROCESS COLOR PTG. CO., ROCHESTER N. Y., U

TAUSENDSCHON

DOROTHY PERKINS

DOROTHY PERKINS

Clear shell pink, slightly fragrant flowers, borne in great profusion and lasting a long time. They are double, and the petals crinkle which gives them a delightfully fluffy appearance. Foliage is glossy, bright green and persists until cold weather. One of America's notable climbing roses.

TAUSENDSCHON **(Thousand Beauties)**

Entirely different from all other roses, since it is impossible to say that it is any particular or single color. It is of many colors. In a single cluster of bloom there will be all shades from light pink to red. Some individual blooms will be practically white, and some have a suggestion of creamy yellow. Each cluster a complete bouquet in itself. A highly desirable variety for covering porches, walls, fences, trellises and pergolas.

X77 PROCESS COLOR T.G. CO., ROCHESTER, N. Y. U.S.A.

CRIMSON RAMBLER

CLIMBING
AMERICAN
BEAUTY

CRIMSON RAMBLER

The most widely known and most popular of the Ramblers. A vigorous grower bearing great clusters of semi-double crimson flowers in the Spring. Especially adapted to trellis, arbor and porch plantings.

CLIMBING AMERICAN BEAUTY

A fine climber with blooms of large size, fine shape and color. Fragrant. Flowers bright red, resembling any Tea or Hybrid Tea Rose. Few hardy climbers have blooms as large. Will do well in almost any location, and makes a vigorous growth. Every planting of Roses should include two or more of these beauties.

617 PROCESS COLOR PTG CO. ROCHESTER N. Y., U. S. A

BECHTEL'S CRAB

BECHTEL'S FLOWERING CRAB

Attains a height of from ten to fifteen feet. Good in the lawn or with tall growing shrubbery. Has a fragrant double pink flower in May, resembling small roses in large clusters. The tree is compact and symmetrical. Blooms when quite young.

687 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A.

PRUNUS PISSARDI
(Purple Leaf Plum)

PRUNUS PISSARDI

Purple Leaf Plum.

Ultimate height eight feet to ten feet. A small tree in form. Of beautiful purple foliage. Retaining its color well through the season. May be set alone as a showy specimen tree, or placed in a border with high growing shrubs, producing an excellent contrast. This particular tree quite often takes the place of the Red Leaf Maple or Purple Leaf Beech.

688 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A

PRUNUS TRILOBA

PRUNUS TRILOBA

Double Flowering Plum

Ultimate height five feet to six feet. A dainty, sturdy, symmetrically formed little tree. Attractive in form and blossom. Upright in growth, with slender branches. It is completely covered with double pink flowers, an inch across and each flower resembling a little rose. Blooms in May. The blossoms come before the leaves and are so thickly crowded along the slender branches that the tree, from a distance, looks like one big solid mass of pink. A mighty attractive little tree for individual planting or for cluster effect.

610 PROCESS COLOR PHOTO CO. ROCHESTER, N. Y., U. S. A.

CATALPA BUNGEI

CATALPA BUNGEI

COMMONLY CALLED UMBRELLA TREE. Develops a

broad, dense head on a sturdy trunk. Leaves are heart

shaped and are laid with shingle like precision. Used ex-

tensively as lawn trees, planted on each side of the walk

and along drive ways producing a semi-tropical effect.

A universal lawn favorite.

613 PROCESS COLOR PTG. CO. ROCHESTER, N. Y.

CATALPA SPECIOSA

CATALPA SPECIOSA

Grows to a height of 40 feet. Very hardy and a rapid grower. Rather open and irregular in growth. Has large fragrant white flowers in July. Leaves are large, heart-shaped, rather deep green turning to yellow in the fall. Desirable for lawns or with which to border parkways. Not so desirable for public street. Is of commercial value for timber, fence posts, telephone poles and railroad ties.

• 685 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A

CAROLINA POPLAR

CAROLINA POPLAR

Grows to a height of from 40 to 50 feet. Is a very beautiful tree when properly placed in the landscape. Should not be planted near the house, side walk or curb as its roots traveling close to the surface of the ground are likely to disrupt the walls, walk or curbing. It has attractive bark and is a beautifully formed tree for winter landscape. Leaves are borne on slender stems. and flutter in the slightest breeze, showing its relation to the aspen family. A rapid grower, and will stand intensely smoky and dusty locations where other trees fail. Makes a quick dense screen or windbrake when planted close together.

686 PROCESS COLOR PTG. CO. ROCHESTER, N. Y.

LOMBARDY POPLAR

LOMBARDY POPLAR

Grows from 40 to 80 feet in height. Introduced from Italy soon after the Revolutionary War. Is extensively planted in fine estates, along drive ways and for back-grounds. Gives a most artistic effect as it catches the eye from a far distance, on account of standing out prominently against the sky line. Tall, slender and columnar. Its branches are crowded, all growing upward. Fills a place that no other tree can fill.

680 PROCESS COLOR PTG. CO., ROCHESTER, N. Y. U. S. A.

ORIENTAL PLANE

ORIENTAL PLANE

Grows to a height of from 50 to 60 feet. One of the most picturesque trees, resembling the Buttonwood, but a much better tree all around. The bark is creamy white mottled with dark blotches of older bark, which peels off at intervals. This mottled effect of the bark gives the tree a distinctive winter beauty. It has a large head of beautiful foliage, the leaves being large, deep green and heart shaped, somewhat cut or notched. Stands well up to the head of the list as a street shade tree. Grows rapidly, is majestic in aspect, broad, free and restful. Withstands the smoke and dust of cities. Unsurpassed for specimen planting for shade purposes in parks and lawns.

621 PROCESS COLOR PTE. CO., ROCHESTER, N. Y., U. S. A

AMERICAN ELM

AMERICAN ELM

One of the grandest of all American trees. Grows to a height of from 60 to 90 feet. Is a majestic tree in a class by itself. Tall, graceful, wide spreading with outward curving and pendulous branches. A marvelous tree for street and lawn planting. A street of Elms, is always shady as the tops of the trees broaden out in a way that causes them to eventually come together across the street, giving the appearance of the aisles of a Gothic Cathedral. Its tough wood fibre makes it a very safe street tree. We recommend this tree for all general purposes,

661 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A.

SILVER MAPLE

SILVER LEAF MAPLE

TRULY

A BEAUTIFUL STREET AND LAWN SHADE TREE

For majestic and graceful, wide spreading branches, it is the Leader of All Maples, having the decided advantage of being the most rapid grower. FOR BEAUTY it is equal to any, and should be freely planted for it's charm the year around. It's Silver-gray bark is attractive summer and winter, it's leaves are deeply cut, a soft light green above, and with a bright silvery sheen beneath, taking on Golden Tones in Autumn.

IT IS ADAPTED TO ANY SOIL, but prefers the moist loam and is one of the best trees to plant in wet places. It is a wonderful LAWN TREE, is much planted in PARKS, is unsurpassed for LINING AVENUES and BROAD PRIVATE DRIVE WAYS. Is very good as a STREET TREE.

LINDEN

LINDEN

A graceful, straight trunked tree attaining a height of from 50 to 80 feet. Good for parks, lawns or streets. Foliage thick, oval and dark glossy green, with a silver sheen underneath. Has large creamy white flowers in July.

641 PROCESS COLOR PTG. CO. ROCHESTER, N. Y. U.S.A.

ASH LEAF MAPLE or BOX ELDER

ASH LEAF MAPLE

Commonly called Box Elder. Grows 40 to 50 feet high.

Makes a rapid growth and is drouth resistant. Especially adapted to poor and dry soil. Will withstand the impure, gaseous, dusty atmosphere of crowded city districts where considerable paving creates intense heat. Is also called Manitoba Maple and Negundo Maple.

663 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A.

SUGAR or ROCK MAPLE

SUGAR or ROCK MAPLE

Grows 50 to 80 feet making a tall, erect tree. Bark is light gray, foliage dark green, turning to gorgeous orange, gold and scarlet tones in Autumn. Yellowish green flowers in April or May, followed by winged seed pods in September. It is from the sap of this tree that we obtain our pure maple syrup. Is a very fine lawn tree, in fact one of the best for park and broad street plantings. When used for street plantings should be spaced 50 feet apart as it has a broad spread. Should not be planted in narrow paved streets as it suffers from intense heat and drouth. Ideal for open spaces.

565 PROCESS COLOR PTG. CO. ROCHESTER N. Y., U. S. A.

WIER'S CUT LEAF MAPLE

WIER'S CUT LEAF MAPLE

Grows to a height of 50 feet. Belongs to the Silver Leaf family. Trunk is erect, but branches are pendulous, almost to the weeping form. Foliage a restful green above, with silvery sheen underneath. Turns to golden tones in Autumn. Most effectively used for lawns and parks.

ROME BEAUTY

KING

ROME BEAUTY (Winter)

Large, bright red with yellow cheek. Flesh yellowish, tender, juicy and sub-acid. Fruit stands handling remarkably well. A good keeper and holds till late in storage. Size, color and appearance make this a favorite variety.

KING (Winter)

Large to very large. Color red, marked with deeper red stripes. Flesh rather coarse, crisp, tender and juicy. The large, handsome and uniform appearance makes this a good seller.

BALDWIN

STAYMAN'S
WINESAP

SPITZENBERG

A2 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A

BALDWIN (Winter)

Is well known to almost every fruit grower and housewife. A good cooking apple and keeps well in storage. Well adapted to drying purposes. Color, yellowish red, heavily shaded with deep red. Fruit large. Skin somewhat tough making it a splendid shipper. Sub-acid flavor. An all around apple for commercial and home purposes. It's the apple that makes good apple sauce and pies.

STAYMAN'S WINESAP (Winter)

Fruit of good size, round and sometimes slightly conical. Has a pleasing sub-acid flavor. A long keeper that "tastes good" in late season. Considered a strictly high-class apple. Color, yellowish almost completely covered with red, slightly splashed with deep crimson. Used extensively for orcharding purposes, as it is a good shipper and commands a good price.

SPITZENBERG (Winter)

Deep red, striped with red. Of medium size, slightly conical in shape. Flesh yellow, firm crisp and juicy and unsurpassed to eat out of the hand. Keeps well through the winter.

**RHODE ISLAND
GREENING**

WINTER BANANA

RHODE ISLAND GREENING (Winter)

A sour apple with green skin of moderately thick texture. A deep grass green in autumn and later as it fully ripens takes on a yellowish color. Sometimes develops a red cheek. Fruit of large size, flesh yellowish white, tender, rich and juicy with an acid flavor of real quality. Ask the housewife her preference in cooking apples and she will say "the Greening". Fruit keeps well in storage and has a good demand on the market. A universal favorite.

WINTER BANANA (Winter)

Yellow with pronounced red cheek. Of large size and very attractive. Flesh firm and juicy of good quality and texture. Distinctly aromatic. Tree vigorous and comes into bearing young.

RED ASTRACHAN

DUCHESS
of OLDENBURG

RED ASTRACHAN (Summer)

A summer favorite. It is surely a very beautiful early summer variety. Red, large and roundish. Very attractive early in the apple season. Flesh white, crisp and juicy with a distinct acid flavor, and delicacy of quality. Ripens early in the season when we are really "apple hungry". Excellent for eating out of the hand or for all culinary purposes. Ready for use late July to middle of August.

DUCHESS OF OLDENBERG (Autumn)

An extra hardy variety of mid-season bearing. The fruit is large and symmetrical. Skin red splashed with stripes and blotches of deeper red. Very attractive. Flesh yellowish white, firm juicy and sub-acid. Highly esteemed for household use. Stands shipping well. One of the hardiest of mid-season apples. Especially recommended where hardiness is important. Tree makes a large growth and bears abundantly.

**YELLOW
TRANSPARENT**

WEALTHY

YELLOW TRANSPARENT (Summer)

A summer apple in a class by itself. Yellow, not striped. Fruit of good size, uniform, round. Flesh white and fine grained, tender and exceptionally juicy with sub-acid flavor. Is an excellent eating apple and also highly prized for baking and cooking. Its early season makes it a profitable market variety. Tree is unusually straight and upright, hardy and a very young bearer. Ripens in July and August.

WEALTHY (Autumn)

A real red apple, somewhat striped or diffused. Often a solid red. A favorite in appearance and a big seller. Makes an excellent shipping variety for early autumn market. Flesh white, sometimes stained with red. Fine grained, tender, juicy and agreeably sub-acid. Tree extremely hardy, a good grower and an abundant bearer. Considered one of the most profitable market apples.

DELICIOUS

Mc INTOSH RED

DELICIOUS (Winter)

In speaking of the Delicious, several have said, "frankly the only comparison is with another one just like it." Color, red striped with darker red. On the cheek next to the sun is almost a solid red. Fruit is large, round and long, tapering to a marked ribbed nose. Skin is thick, but tough and therefore stands handling without injury. Flesh is fine grained, tender and firm and flowering over with rich, highly flavored juice. Has a delightfully fragrant aroma. A decidedly beautiful and attractive apple. Tree is a vigorous grower that will carry an enormous amount of fruit, and is adapted to almost any kind of soil that will grow apples.

Mc INTOSH RED (Winter)

A sour red apple of much merit. Skin yellow underneath completely covered with a bright red, giving it an attractive appearance. Fruit is of medium size, round and of even form. Flesh snow white, fine, crisp, very tender and juicy, Cooks well and is well thought of as a desert apple. Tree a good bearer, coming into bearing rather young. Extra hardy.

**FAMEUSE
or SNOW**

**NORTHWESTERN
GREENING**

BEN DAVIS

FAMEUSE OR SNOW (Autumn)

Red striped, medium size, roundish. Gets its name from the snow white appearance of the flesh of the fruit, here and there flecked with red. Mild sub-acid flavor, tender juicy with a slight perfume. Usually sells well in the market.

NORTHWESTERN GREENING (Winter)

Fruit medium to large. Skin greenish yellow slightly diffused with red. Flesh medium in texture, firm juicy and sub-acid with slight aroma. Cooks evenly and ranks well as a dessert apple. Tree is hardy under extreme cold conditions. Makes a strong growth and bears well.

BEN DAVIS (Winter)

Large, roundish red skinned apple. Skin is tough and waxy, of a yellowish tinge underneath but is heavily covered with streaks and spots of deep red. Flesh white with a mild but not rich sub-acid flavor. Can be kept in storage until late in the season. A popular market apple in many sections. The size, color and appearance of the fruit assures a ready market for it. Tree is a heavy grower and cropper. Bears young. Holds its own as a dependable and profitable apple.

**CLAPP'S
FAVORITE**

X8 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A

SHELDON

CLAPPS FAVORITE

Early season. Extra hardy. Fruit of large size tapering to the crown. Neck rather small. Yellowish green with a delicate blush where exposed to the sun.

Flesh greenish or yellowish white, juicy and of splendid flavor. Ready for market about ten days ahead of the Bartlett. Very desirable and highly recommended for its hardiness.

SHELDON

Mid-season. Ranks as one of the best pears. Large and roundish. Color greenish, fully covered with brownish russet.

A fine grained flesh with very luscious flavor. Splendid both for dessert and culinary purposes. Ships well, keeps well, and sells well.

SECKEL

BARTLETT

ANJOU

SECKEL

Mid-season. Fruit small. Skin rich yellowish to reddish brown, with a deep brownish red cheek. Flesh very fine grained, sweet, juicy and melting. One of the richest and highly flavored pears. Used extensively for pickling. A commercial variety that almost always commands a high price. Trees are small when coming from the nursery row, and seldom grow as large as other standard varieties. Grows a low, compact, pyramidal top.

BARTLETT

Early season. Fruit large and pyramidal in shape. Color clear yellow with a faint blush on the exposed cheek. Somewhat dotted with russet. Thinly russeted around the base of the stem.

Flesh fine grained, buttery, rich and juicy. Is excellent for canning. Its splendid qualities render it a general favorite both for home planting and for commercial orchards. One of the most widely planted pears. Trees bear full crops year after year. Bears young, lives long and makes money for the planter.

ANJOU

Late season. A large handsome pear of dull greenish yellow color, russeted and furrowed with a reddish cheek on the sunny side.

Flesh yellowish white, firm, tender and juicy. A very valuable pear. Few varieties equal it in appearance or quality. Trees are large, spreading and vigorous, with regularity of productiveness. Recommended for home planting or commercial orcharding. Properly ripened the fruit will keep until the Holiday season.

BLACK
TARTARIAN

LARGE
MONTMORENCY

EARLY
RICHMOND

BLACK TARTARIAN

Early to middle of June. Fruit very large with small pit, heart shaped, almost black. Pleasing to the eye and a delight to the palate. Handsome purplish-red flesh, meaty juicy and rich. Excellent for table use and canning. Tree grows to very large size and is a regular bearer. Lives to an old age. Adapts itself to many soils and climates.

LARGE MONTMORENCY

Late June. The leading sour cherry. Canning companies and fruit stands provide a ready market. A big commercial cherry that spells abundant profits. Fruit is of good size and flavor. Bright red. Unexcelled for every sour cherry purpose. You will "go right" when you plant Large Montmorency.

EARLY RICHMOND

Late June. Sour. Red. The earliest of sour cherries, therefore a profitable market variety. Fruit round and light red, changing to dark red. Skin thin, rather tough and easily separated from the pulp. Flesh pale yellow, juicy and tender. Stone small and free. Tree a heavy bearer and thrives on a large variety of soils.

GOVERNOR
WOOD

NAPOLEON BIGARREAU

WINDSOR

GOVERNOR WOOD

Middle of June. Fruit large, nearly clear red, with under color of yellow. Flesh light, tender and deliciously sweet. "Has a taste all its own." Tree bears so prolifically it is often advisable to thin the fruit to prevent the branches breaking. Bears almost immediately after Black Tartarian.

NAPOLEON BIGARREAU

Middle of June. An ideal light colored sweet cherry. Especially good for shipping purposes. Very attractive coloring of pale yellow with amber cheek. Fruit large, heart shaped; flesh firm and of delightful flavor. Commonly called Ox-heart. Tree large, vigorous, upright and very productive.

WINDSOR

Late July. Fruit extra dark, bordering on black. Large, attractive; flesh hard, meaty and pleasing to the taste. Especially welcome as it is available after other cherries are gone. Tree a big producer, the fruit clustering on the branches.

BRADSHAW

YELLOW EGG

BURBANK

BRADSHAW

Skin purplish-red, covered with thick bloom. Flesh dull yellow with trace of red when fully matured. Juicy, sweet and tender. Mid-season, stone semi-free, fruit large. Tree large, vigorous and very productive. One of the very best varieties.

YELLOW EGG

Skin golden-yellow with thick bloom. Flesh also golden-yellow, firm, juicy with average sweetness. Season late. Stone semi-free to free, fruit large. The largest and handsomest of yellow plums. Excellent for cooking.

BURBANK

Skin dark red, mottled. Thick bloom. Flesh deep yellow, tender and juicy, firm, sweet and very good. Mid-season. Keeps well and is a good shipper. Tree large, vigorous and very productive. A Japanese variety.

ABUNDANCE

WICKSON

LOMBARD

ABUNDANCE

Skin pinkish-red to red, changing to a darker mottled red when fully ripe. Thin bloom. Flesh juicy, very tender and melting, sweet, pleasant and aromatic. Fruit medium size, roundish. One of the best known plums in America. Adapted to a wide variety of soils and climates. Tree so productive that it is liable to over-bear unless the fruit is thinned. A Japanese sort.

WICKSON

Skin dark red over a yellowish background. Thin bloom. Flesh amber-yellow, juicy, firm, sweet, pleasant flavor. Good early mid-season, period of ripening unusually long. Fruit large. Tree is large, vigorous with upright head, blooming season early. A Japanese variety.

LOMBARD

Skin light to dark purplish-red with thick bloom. Flesh yellowish, juicy, firm and sweet. Stone semi-free to free. Mid-season ripening. Fruit roundish oval of medium to large size. A plum that is widely grown over the entire continent. Tree medium size, round topped, very hardy and productive.

**ORANGE
QUINCE**

**REA'S
MAMMOTH
QUINCE**

X14 PROCESS COLOR PTG. CO. ROCHESTER, N. Y.

ORANGE QUINCE

Fine golden color, roundish with ends generally flat like an apple. Ripens in September in most localities. Surface only moderately fuzzy. Flesh firm and tender when cooked. Highly flavored. Under ordinary conditions the fruit can be kept a long time.

REA'S MAMMOTH QUINCE

The tree is vigorous, productive and hardy.

Fruit large to very large. Rich golden color. Cooks as tender as an apple, without hard spots or cores. Flavor very delicate imparting a quince odor to any fruit with which it is cooked. Ripens rather late.

Tree is extremely hardy and very productive.

X10 PROCESS COLOR PTG CO. ROCHESTER, N. Y. U. S. A.

CHAMPION

HALE

CHAMPION

Early Mid-season. A white fleshed variety. Flesh tender, juicy and of a very pleasing flavor. This peach possesses the character that makes quality. Skin is white with red cheek.

The tree itself is large, vigorous, spreading open-topped and very productive. Stone semi-free to free.

HALE

Mid-season. This peach has many merits to commend it. The flesh is yellow with red pit. Very juicy, fine grained and of an excellent flavor. The skin is creamy yellow, over-spread with red making it very attractive to the eye.

The tree is vigorous and productive. A free stone.

CARMAN

HEATH
CLING

CARMAN

Early. One of Carman's greatest assets is its rugged constitution which enables it to withstand trying climates both North and South. Fruit matures very early making it one of the first peaches on the market or table.

Skin is brilliant red splashed with a darker red on a creamy background. Flesh is white, red at the pit, juicy, tender, mild and pleasing.

The tree is large, vigorous and productive. One of the most useful peaches of its class. Stone nearly free.

HEATH CLING

Very late. One of the latest peaches under cultivation. The best of all peaches to preserve or pickle whole. Flesh white juicy and firm. Meaty but tender and of good quality. Skin is creamy white blushed with red. The trees are large, healthy and hardy. Stone clings.

CRAWFORD LATE

ROCHESTER

CRAWFORD LATE

Late season. The quality of this yellow fleshed variety can hardly be equaled. The fruit is large with a golden yellowish skin and rich red cheek. The flesh is yellow, red at the pit, juicy, firm and tender.

The tree is large, spreading, open topped and vigorous, also adapted to a large range of soils and climates. Stone free.

ROCHESTER

Early. Here is the variety that fills the long felt want of fruit growers for an early, yellow free stone. Ripens soon after the middle of August and its season is long.

The fruit is very large, yellow with handsome over color of deep red, making it a strikingly beautiful peach. The flesh meets all the requirements of a good peach. Thick and firm, marble yellow, stained with red at the pit, juicy, rich and sweet. An all around A-1 quality peach.

Trees are large, upright, productive and vigorous. Stone semi-free to free.

CRAWFORD EARLY

X13 PROCESS COLOR PTG. CO. ROCHESTER, N. Y. U.S.A.

ELBERTA

CRAWFORD EARLY

Early mid-season. Has all of the characteristics which gratify the taste. Richness of flavor, pleasant aroma, tender flesh and abundant juice. One of the handsomest of peaches. Its golden yellow skin well covered with a red cheek makes it attractive to the eye.

Flesh a deep yellow, rayed with red at the pit. The tree is all that can be desired in health, vigor, size and shape. Stone perfectly free.

ELBERTA

Late season. One of Elberta's greatest merits is its adaptability to a variety of soils and climates. Trees load themselves with fruit year in and year out. Elberta is grown with profit in every peach growing state of the Union, and in greater quantities than any other peach. A long keeper, good shipper and a real commercial variety.

The skin is orange yellow overspread with red. Flesh yellow, stained with red at the pit. Juicy, sweet, sub-acid and tender. The tree is large, vigorous very productive and starts bearing when young. Stone free.

BRIGHTON

BRIGHTON GRAPE

Red in color. Ranks as one of the ten or twelve leading commercial varieties. One of the early ripening grapes, which is usually marketed by the time the Concord is ready for the market. A vigorous grower, very productive and adapted to various soils. Clusters are large to medium. Berries vary in color from light to dark red and are covered with bloom. Should be in every home and commercial planting.

153 PROCESS CO. OR PTG. CO. ROCHESTER, N. Y. U. S. A.

CATAWBA

CATAWBA GRAPE

A red grape turning to a deep coppery red when fully ripe. Is a leading commercial variety due to the fine flavor and abundance of juice. An unusually long keeper. Clusters medium to large, berries oval to roundish. Used extensively for grape juice and wine purposes. A very late variety.

111 PROCESS COLOR PTG. CO. ROCHESTER N.Y. U.S.A.

CONCORD

CONCORD GRAPE

Dark blue to almost black in color. Probably the best known and most widely planted of the grapes of this continent. Succeeds in a greater number of soils than any other variety. Leaves out and blossoms late in the Spring and therefore seldom suffers from late frost. Fruit ripens about mid-season, keeps well and is therefore a desirable shipper. Yields a good run of red juice. Berries medium to large, roundish, juicy, sweet, and of high quality. As Horace Greeley said "It is the grape for the millions".

MOORE'S DIAMOND

MOORE'S DIAMOND

Light green to white. Clusters medium to short, rather broad and compact. Berries above medium in size, of light green to white in color, tinged with yellow to which is added a gray bloom. Flesh pale green, juicy, fine grained, tender, of sprightly aromatic, melting flavor. Early, productive, vigorous and hardy.

112 PROCESS COLOR PTG. CO. ROCHESTER, N. Y., U. S. A.

NIAGARA

NIAGARA GRAPE

Light green or nearly white in color. Is the leading light colored American grape. Valuable for its splendid and delicious juices. It is a grape that you eat out of the hand and enjoy. Fruit ripens about the same time as Concord. Ships and keeps well. Berries above medium to large.

ASPARAGUS

PEDIGREED WASHINGTON ASPARAGUS

This new variety of Asparagus is the first result of a blister proof campaign for the eradication of asparagus rust. As far as possible a resistant, vigorous and high yielding strain of asparagus has been produced in this Pedigreed Washington variety.

The tips are uniform in size with good top buds of rapid growth, Exceptionally tender and delicious. This is the top-notch variety that is worthy of due consideration. When planted on a large scale the cash returns are much greater than from ordinary varieties of asparagus.

BLOWERS
BLACKBERRY

ERIE
BLACKBERRY

BLOWERS BLACKBERRY

The berries are large, jet black and of delicious quality.

A good shipper making it a profitable market variety.

Bush is vigorous, hardy and a prolific bearer.

ERIE BLACKBERRY

A strong healthy grower, unusually productive and of extra fine quality. Extremely hardy making it a safe and dependable variety to plant.

ST REGIS

CUTHBERT

**BLACK
DIAMOND**

ST. REGIS RASPBERRY

One of the Everbearing varieties. Large, sweet berries of attractive red. Continues to fruit until the first snows of winter, which makes it profitable for a late market fruit. Also produces a good crop in July. A favorite berry for home garden and commercial plantings.

CUTHBERT

An old and tested variety, remarkably strong and hardy. Fruit a bright red, large, conical and of excellent quality. A good shipper. Cuthberts should be included in every planting.

BLACK DIAMOND RASPBERRY

One of the finest of black raspberries. Often spoken of as the "black cap." Fruit is large, of delicious quality, small seeds and very sweet. Its quality, productiveness and healthy growth make this one of the best.

LATHAM

LATHAM RASPBERRY

Considered by many the finest Red Raspberry grown. Perfectly hardy, without protection, even in extremely cold climates. Unusually heavy cropper, outyielding almost any other variety. Is supposed to be, and as far as is known is MOSAIC-FREE.

The berries are large, round, juicy and of brilliant red color that makes it a quick seller and very desirable for canning. An excellent shipper.

COLUMBIAN

COLUMBIAN RASPBERRY

Berries of very large size. Bush of extra strong and vigorous growth and great bearing qualities. In color the berries are purple. Large, juicy, sweet, and a flavor all their own. Unsurpassed for canning. The best all around commercial berry.

SENATOR
DUNLAP

EVERBEARING

POCOMOKE

SENATOR DUNLAP STRAWBERRY

Medium to large in size; rich dark red, the quality being excellent. An excellent shipper. The plants are strong and healthy.

EVERBEARING STRAWBERRY

Usually bears fruit from May until November the same year set out. Fruit firm and of good size. Succeeds over a wide range of climates and soils.

POCOMOKE STRAWBERRY

Fruit is large, holding its size well up to the very last picking. The berry is a large, dark glossy red which extends clear to the center of the fruit making it equal to any for canning.
