CATALOGUE OF FAMILY-GROUP AND GENUS-GROUP NAMES (LEPIDOPTERA : RHOPALOCERA)

by

Charles A. Bridges

ABSTRACT

Notes on the Family-group and Genus-group names of the Butterflies (Lepidoptera : Rhopalocera) are arranged in a **ten-part catalogue**. **Part I** is an alphabetic list of the type-genera of the Family-group names. **Part II** is a synonymic list of the Family-group names. **Part III** is an index to the authors of the Family-group names. **Part IV** is an alphabetic list of the Genus-group names. **Part V** is a synonymic list of the Genus-group names. **Part VI** is an index to the authors of the Genus-group names. **Part VII** is an index to the type-species of the Genus-group names. **Part VIII** is the bibliography. **Part IX** is an index to the bibliography by journal title. **Part X** is an index to the bibliography by year of publication.

The arrangement of the names is based entirely on bibliographic references. No specimens have been examined, and no new names are introduced.

INTRODUCTION

Zoological nomenclature is the system of scientific names applied to taxonomic units of animals, while the *International Code of Zoological Nomenclature* [b1207, b1214] is the system of rules and recommendations governing the use of these names at the family-group, genus-group and species-group levels. It is consistent with the code to say that names may be objectively classified as either **available** or **unavailable**, the determination depending on the details of publication, etc. The **available** names may be further divided into **objectively valid** and **objectively invalid** names, and, in accordance with the Code, only the **objectively valid** names may be used for naming taxa.

In addition to the above **objective** classification of names, the **objectively valid** genus-group names may be further subjectively classified according to their use as names of genera, subgenera or unused synonyms. When a name is used for a genus- or subgenus-level taxon it is said to be validated at the generic- or subgeneric-level, while if it is considered to apply to a taxon which has an older valid name, it is said to be invalidated as a junior subjective synonym.

In this catalogue the genus-group names are assigned one of the five letter codes [a-e] according to their status as **available/unavailable**, **objectively valid/invalid**, and depending on their use as the name for a genus, subgenus, or as an unused synonym, as defined by the following table.

Table I - Definition of Status Letter Codes [a-e]					
Letter code	Nomenclatural status (objective)	Subjective use	Print	Indent (in Part V)	Number of names
a	Available, Valid	Genus	Bold	1 em	1877

BASIC LITERATURE

Journal titles have been checked in the *World List of Scientific Periodicals* [b2177] and these data are included in Part V. Bibliographic information on the authors has been found in Gilbert, 1958 (*A Compendium of the Biographical Literature on Deceased Entomologists* [b0861]), Carpenter, 1945 & 1953 (*Bibliography of Biographies of Entomologists* [b0362 & b0363]), Horn and Schenkling, 1928 (*Index Litteraturae Entomologicae, Serie I*) [b1140], Derksen and Scheiding-Göllner, 1965 (*Index Litteraturae Entomologicae, Serie II* [b0530]), and, finally, in the *Commemorative Volume of the Lepidopterists' Society* [b1371].

The task of building up the bibliography has been greatly aided by using, in addition to the above, Moulds, 1977 (*Bibliography of the Australian Butterflies* [b1542]), Field, dos Passos & Masters, 1974 (*A Bibliography of the Catalogs, Lists, Faunal and Other Papers of the Butterflies of North America, etc.*) [b0783], Kudrna, 1986 (*Butterflies of Europe, Volume I. Concise Bibliography*) [b1322], and the catalogues of the firm of Wheldon & Wesley [b2162].

PUBLICATION DATES OF NAMES

The 10th edition of Linnaeus' *Systema Naturae* [b1379] marks the beginning of the consistent general application of binomial nomenclature in zoology. The date 1 January 1758 is arbitrarily assigned to that work, and taken as the starting point of zoological nomenclature. The following table gives the number of Genus-group names published in each 5-year interval from 1758 to the present. The data are broken down according to the nomenclatural status of the names, represented by the status codes [a-e], as previously defined.

PART I
TYPE-GENERA OF FAMILY-GROUP NAMES

INTRODUCTION

In this section the Type-genera of the Family-group names are arranged in alphabetic order. For each name a reference is given to the first valid use of a Family-group named based on the genus. Also included is a cross reference to the position(s) of the Family-group names in the Synonymic List (Part II).

PART II
SYNONYMIC LIST OF FAMILY-GROUP NAMES

INTRODUCTION

In this section the Family-group names are arranged in a synonymic list. The family-group names are printed '**bold**' if they are objectively valid, printed 'light' if they are objectively invalid, and in '*italics*' if they are unavailable. Names preceded by a '+' are considered synonyms (subjectively invalid) and are not used in the classification. The standard endings for Family-Group names are taken to be -oidea (superfamily), -idae (family), -inae (subfamily), -ini (tribe) and -iti (subtribe).

ABBREVIATIONS

The following abbreviations are used in this section.

PART IV
GENUS-GROUP NAMES

INTRODUCTION

In this section the Genus-group names are arranged in alphabetic order. If two names are spelled the same, they are ordered by date of publication, and if they have the same publication date they are arranged by the authors name.

ABBREVIATIONS

The following abbreviations are used in this section.

H.....	Homonym
HC.....	Higher Classification (Key)
ICZN.....	International Commission of Zoological Nomenclature
ISS.....	Incorrect Subsequent Spelling
JOS.....	Junior Objective Synonym
NN.....	Nomen Nudum
OD.....	Original Description
OS.....	Objective Synonym
PD.....	Pending Decision (by the ICZN)
PS.....	Published in Synonymy
PWI.....	Published Without Indication
RC.....	Rejected by the Commission (ICZN)
Refs.....	References
SS.....	Subjective Synonym
TM.....	Type method
TS.....	Type-species

PART V
SYNONYMIC LIST OF GENUS-GROUP NAMES

INTRODUCTION

In this section the Genus-group names are arranged in a synonymic list. The genus-group names are printed '**bold**' if they are objectively valid, printed 'light' if they are objectively invalid, and in '*italics*' if they are unavailable. Each group is preceeded with a key to the higher classification which can easily be read with the help of Part II. For example, **Hamearis** is in the group headed **Lyc:Rio:Nem:Nem:Nemeobiliti**, which can be read as Superfamily LYCAENOIDEA, Family RIODINIDAE, Subfamily NEMEOBIINAE, Tribe NEMEOBIINI and Subtribe NEMEOBITI. If the last word in the heading is a genus name without the standard family group ending (-oidea, -idae, -inae, -ini and -iti), the group is an informal one. For example, **Alaena** is placed in the group **Lyc:Lyc:Lip:Pen:Alaena**, and this reflects the fact that the Tribe PENTILINI has informally been divided into three groups centered on the genera **Alaena**, **Pentila** and **Telipna**. Finally, the correct position of some genera is not known, and these have been placed in groups with incomplete headings. For example, **Takashia** is thought to be in the RIODINIDAE, but the exact position is unknown (to me), so it is placed in **Lyc:Rio:**, at the end of the RIODINIDAE.

ABBREVIATIONS

The following abbreviations are used in this section.

Dir.....	Direction (of the ICZN)
H.....	Homonym
ICZN.....	International Commission on Zoological Nomenclature
IOS.....	Incorrect Original Spelling
ISS.....	Incorrect Subsequent Spelling
JOS.....	Junior Objective Synonym
NN.....	Nomen Nudum
OP.....	Opinion (of the ICZN)
PD.....	Pending Decision (by the ICZN)
PS.....	Published in Synonymy
RC.....	Rejected by the Commission (ICZN)

PART VI
INDEX TO BIBLIOGRAPHIC CITATIONS
(GENUS-GROUP NAMES)

INTRODUCTION

This section is straightforward and needs little introduction. It consists of an index to all those publications which contain original descriptions of Genus-group names, original descriptions of Type-species of Genus-group names or valid Type-species designations of Genus-group names. The particular type of citation is indicated in the first column, where the status letter codes [a-e] are given if the citation is to the original description of a name, TS is given if the citation is to the original description of the Type-species, or TM is given if the citation is to the Type-species designation.

PART VIII
BIBLIOGRAPHY

INTRODUCTION

This section is straightforward and needs little introduction. Abbreviations used in journal titles have been taken from the *World List of Scientific Periodicals* [b2177]. Of the 2254 items in the bibliography, approximately 2000 deal directly with the Family-group or Genus-group names. I have tried to provide the full names of the authors, and to give some information about where and when they were born and died, and what happened to their collections. This information has been taken from various sources, but the works of Gilbert, 1978 (*A Compendium of the Biographical Literature on Deceased Entomologists*) [b0861], Carpenter, 1945 & 1953 (*Bibliography of Biographies of Entomologists*) [b0362, b0363], Horn & Schenkling, 1928 (*Index Litteraturae Entomologicae, Serie I*) [b1140] and Derksen and Scheiding-Göllner, 1965 (*Index Litteraturae Entomologicae, Serie II*) [b0530] have been most helpful. In general papers with multiple authors are only listed under the senior author, but in cases where junior authors have published material which has nomenclatural implications (i.e. type-species selections), the paper is given a second entry.

Aaron, Samuel Frank;

The Supplement came in 1869 and 1878 - not all at the end. The title above is the final one, slightly changed from the first one, "- Lepidoptera. Part I, Lycaenidae", issued when Hewitson had not finalised his plans. Hewitson died 28 May 1878. The last part was published by H. Grose-Smith, as explained in the Preface, 6 months later. The text was finished by W. F. Kirby, who is shown as responsible for the last new name, *Hypolycaena amba* Kirby (p. Suppl. 32, pl Va). After publishing the Specimen Cat. lyc. in B.M., the Br. Mus. "declined" to publish further parts, so Hewitson turned to van Voorst for this fresh venture. The two works are separate, but the Index to the latter covers both. [CFC, pc]. [1863-1878]

b1186 1947 Opinion 181. On the type of the genus *Carcharodus* Hübner, [1819], and its synonym *Spilothyrus* Duponchel, 1835 (Class Insecta, Order Lepidoptera), genera based upon erroneously determined species. Opin. Declr. Int. Comm. Zool. Nomen. 2(51):589-612. [28 Feb 1947]

b1187 1954 Opinion 214. Designation, under the Plenary Powers, of a type species of the genus *Actinote* Hübner, [1819] (Class Insecta, Order Lepidoptera) in harmony with accustomed usage. Opin. Declr. Int. Comm. Zool. Nomen. 4(4):41-50. [8 Mar 1954]

b1188 1954 Opinion 232. Suppression, under Plenary Powers, of twelve generic names in the Order Lepidoptera (Class Insecta) published by Illiger in 1807 in senses different from those in which those names were published by Fabricius later in the same year. Opin. Declr. Int. Comm. Zool. Nomen. 4(22):249-274. [21 Apr 1954]

b1189 1954 Direction 2. Addition to the Official Lists and Official Indexes of certain scientific names dealt with in Opinions 161 to 181. Opin. Declr. Int. Comm. Zool. Nomen. 2(52):613-628. [21 May 1954]

b1190 1954 Opinion 269. Validation, under the Plenary Powers, of the specific name *idas* Linnaeus, 1761, as published in the combinations *Papilio idas*, and determination of the species represented by the nominal species *Papilio idas* Linnaeus, 1761, *Papilio argyrognomon* Bergsträsser, [1779], and *Papilio argus* Linnaeus, 1758 (Class Insecta, Order Lepidoptera). Opin. Declr. Int. Comm. Zool. Nomen. 6(1):1-24, 1 pl. [10 Sep 1954]

b1191 1954 Direction 4. Addition to the Official Lists and Official Indexes of certain scientific names and the titles of certain books dealt with in Opinions 134-160, exclusive of Opinion 149. Opin. Declr. Int. Comm. Zool. Nomen. 2(53):629-652. [1 Oct 1954]

b1192 1954 Opinion 278. Addition to the Official List of Generic Names in Zoology of the names of ten genera of the Sub-Order Rhopalocera of the Order Lepidoptera (Class Insecta), species of which were cited in the undated leaflet commonly known as the Tentamen, prepared by Jacob Hübner, which is believed to have been distributed to correspondents in 1806, a leaflet rejected in Opinion 97. Opin. Declr. Int. Comm. Zool. Nomen. 6(10):135-178. [1 Oct 1954]

b1193 1956 Opinion 382. Validation under the Plenary Powers of the generic name *Sicyonia* Milne Edwards (H.), 1830 (Class Crustacea, Order Decapoda) and action consequential thereon. Opin. Declr. Int. Comm. Zool. Nomen. 12(3):43-58. [24 Jan 1956]

b1194 1956 Opinion 400. Validation under the Plenary Powers of the generic name *Melanargia* Meigen, [1828] (Class Insecta, Order Lepidoptera). Opin. Declr. Int. Comm. Zool. Nomen. 12(23):419-432. [16 Jul 1956]

London, Author Folio 1:iiij+86 pp, tfs, 45 cpl & pl & maps; 2:104 pp, frontispiece, 83 cts & tfs, 59 cpl & maps. The two volumes were issued in parts from 1889 to 1907. It appears that individual copies of parts were distributed as the author's painting of the plates proceeded. Thus no precise date of issue for parts can be determined. Several of the earlier pages and plates were also reissued at later dates in a revised or corrected capacity. Plates VII and 10 in vol. I were both published uncoloured. However, one, or possibly two copies, of plate VII were specially coloured for their owners by the author after they had received them. As far as can be ascertained, only 33 copies of this work were ever completed. (Moulds, 1977). [1889-1914]

All species dealt with were in the family Nymphalidae. Koçak considers Petrus Ericus Becklin as author of this, but this is incorrect. Becklin was a respondent (pupil) under Thunberg. He had to defend a thesis written by Thunberg. The situation parallels that of Johannsen and Linnaeus. For additional notes, see Karsholt and Nielsen. [Ref: b0479; b1247; b1300] [1784-1795]

PART IX
INDEX TO JOURNALS AND SERIAL

INTRODUCTION

This section is straightforward and needs little introduction. Abbreviations used in journal titles have been taken from the *World List of Scientific Periodicals* [b2177]. Papers with multiple authors are listed under the senior author only, and it has been found necessary to occasionally truncate the authors name to keep the listings orderly. When this has been done it is indicated by using a '+' at the end of the name. For convenience a few publications which were issued in parts with various authors have been treated as if they were journals (i.e. *Annot. Lep.*, *In Romanoff*, *Mém. Léop.* and *In Seitz, Grossschmett. Erde.*).

[A publication in which experts in different subjects reviewed current published works. Zoologists occasionally introduced new names where they thought they were needed. Thus no titles as such were used; the full title, price and publisher, etc. would appear at the head of the article. Reviews were often anonymous; (e.g. "R.L.", or "**"). A daily publication.]
