PREFACE.

THE first edition of this List was issued in 1862, and contained the names of all the animals that had been living in the Society's Gardens at any time during the previous year, with their habitats, and the dates and modes of their acquisition.

In the second edition, issued in 1863, the animals living in the Society's Gardens from the 1st of January to the end of May of that year were given in a similar form. In the third edition, which was completed for press on the 1st of January, 1865, the names of all specimens received by the Society during 1864 were added to the list.

In the fourth edition, issued in 1867, the names of all the vertebrated animals added to the Society's collection during the years 1865 and 1866 were inserted in their proper places ; so that the list contained a complete record of all specimens of Vertebrates that had been exhibited alive in the Society's Gardens in the years 1864, 1865, and 1866.

In the present revised edition of this Catalogue I have pursued exactly the same system, and have added the names of all the vertebrated animals that we have received during the years 1867, 1868, 1869, 1870, and 1871, with the date and mode of acquisition of each specimen.

The result is a nearly complete Catalogue of all the living Vertebrates received by the Society during the past ten years.

It is not, however, *quite* complete, as in the two first editions some of the specimens which had been lost by death or departure were struck out ; but commencing from January 1st, 1864, I believe that every specimen received will be found

to have been inserted in its proper place, although there may of course have been errors in the determination of the species.

For several years it has been my practice to bring before the scientific meetings of the Society short notices of the more important accessions to the Menagerie, with the object of calling attention to such as are of special interest. These notices are subsequently printed and published in the 'Proceedings' of the Scientific Meetings. Both our 'Proceedings' and 'Transactions' also contain frequent communications referring to specimens living, or that have previously lived, in the Society's Gardens. I have thought that it would add to the value of the present Catalogue to add references to the 'Proceedings' and 'Transactions' in all these cases, so as to make the Catalogue a sort of index to numerous passages in our scientific publications that refer to specimens in the Society's collection.

When animals have been figured in our publications from specimens in the Gardens a reference to the figure is likewise added.

The thirty woodcuts in the present Catalogue have mostly already appeared in the Society's 'Proceedings.' Some of them, however, have been kindly lent to me for the purpose of this Catalogue by the proprietors of 'Nature.'

REVISED LIST OF THE VERTEBRATED ANIMALS NOW OR LATELY LIVING IN THE GARDENS OF THE ZOOLOGICAL SOCIETY OF LONDON, 1872.

This List contains the scientific and vernacular names of all the species of Vertebrates in the Society’s collection, arranged in systematic order, and forms a complete record of all the specimens that have been exhibited alive in the Society’s Gardens during the past ten years. The number of the species is as follows :—Mammals 498, Birds 1044, Reptiles 181, Batrachians 35, Fishes 68; total 1826.

These publications may be obtained at the Society’s Office (11 Hanover Square, W.), at Messrs. Longmans’, the Society’s publishers (Paternoster Row, E.C.), or through any bookseller.

Fellows, Honorary, Foreign, and Corresponding Members of the Society, who pay a Subscription of £1 1s. before the day of the Anniversary Meeting (April 29th) in each year, are entitled to receive all the Society’s Publications for the year. They are likewise entitled to purchase the Publications of the Society at 25 per cent. less than the price charged for them to the Public. A further reduction of 25 per cent. is made upon purchases of Publications issued prior to 1861, if they exceed the value of five pounds.

*Now ready, price £25, in two volumes, bound in half-morocco,
containing 100 coloured plates,*

ZOOLOGICAL SKETCHES

BY JOSEPH WOLF.

MADE FOR

THE ZOOLOGICAL SOCIETY OF LONDON,

FROM ANIMALS IN THEIR VIVARIUM.

EDITED, WITH NOTES,

BY PHILIP LUTLEY SCLATER, M.A., Ph.D., F.R.S.,

SECRETARY TO THE SOCIETY.

THIS series of Drawings was undertaken with the object of preserving a faithful record of the living characters of the most rare and interesting Animals in the Vivarium of the Zoological Society of London.

In selecting the subjects, particular regard has been paid to those species which exhibit aptitude for acclimatization, either as objects of economic value, or simply as additions to the Exotic Animals which are now so frequently seen in the parks and on the ornamental waters of Europe.

The Drawings have been executed in Water Colours, after most careful study, by Mr. WOLF, who may be fairly said to stand alone in minute knowledge of the habits and forms of Mammalia as well as of Birds; and the Lithographic copies, partly printed in colour and then finished by hand, are in such exact fac-simile as to be scarcely distinguishable from the originals.

The Letterpress, prepared by the Editor, embraces all particulars of interest relating to the general history, habits, distribution, and use of the Animals illustrated in the Plates.
