CLASS LIST
OF
CURRENT SERIAL DIGESTS AND INDEXES
OF THE
LITERATURE OF SCIENCE, TECHNOLOGY, AND
COMMERCE

N.B.—The List represents the minimum bibliographical equipment of a library professing to specialize in any of the following departments of knowledge. It is a selection from the "Class Catalogue of Current Serial Digests, etc.," issued by the Library Association in 1912, revised and extended. The classification is that of the Library of Congress, except that Z Bibliography has been transferred to A. As a rule German periodicals have been included only where no suitable substitute in another language could be found.

AA.—Universal Bibliography.

Union Lists of Periodicals.

As there is no printed Union List of Periodicals of the United Kingdom, information must be sought in (i) the lists prefixed to the Subject Indexes, 1800-1900, published by the Royal Society (B.J. Q); (ii) the local Union Lists published by Manchester (1898); Cambridge (1906-1914), and Oxford (1913); (iii) the catalogues of periodicals published by various institutions, e.g. the British Museum; Royal Society; London University; Patent Office, etc. Where these sources fail, application should be made to the Keeper of the Printed Books, British Museum, for the desired information.

AB.—Universal Bibliography.

Library Catalogues. British Museum. Subject Index of the Modern Works added to the Library. Ed. G. K. Fortescue. Vol. 1-3, 1881-1900. Continued quinquennially, 1901-5 (1906); 1906-10 (1911). Imp. 8vo. *In progress.*

The work is supplementary to "The Catalogue of Printed Books" for the period covered by the two publications.

Patent Office Library. Subject Lists. (List free on Application.) 6d. each.

These are valuable for the earlier literature and for their analytical references to foreign periodicals. Supplementary information to date in specified headings in these lists can be obtained on application to the Librarian of the Patent Office.

AC.—National Bibliographies.

Foreign. Hinrichs (weekly, half yearly, and quinquennially) for books in the German language, Lorenz and "La Bibliographie de la France" for French books and the "American Catalogue" and the "Cumulative Book Index" for American books are the three most important foreign bibliographies. Sets of the above publications are expensive and difficult to procure. For more detailed information consult R. A. Peddie's "National Bibliographies" (Grafton, 1912).

AC 50.—Press Directories.

United Kingdom. Willing, 1s. Mitchell, 2s.

France. Le Soudier (H.). Catalogue-Tarif des Journaux Publics à Paris. *Paris* ()

AD.—Public Documents. See also KZ Legislation.
