LIVE STOCK AND ANIMAL PRODUCTS STATISTICS, 1920.

PREFACE

The present report on the live stock and allied industries in Canada, 1920, is the second of its series, the first covering the period from 1909 to 1919.

The object of the report is to assemble the more important statistical data relating to live stock and animal products in one volume. The present report has followed the plan of the first bulletin.

Materials for the report have been derived from various sources. In addition to the data compiled in the Bureau, tables are included based on the records of the Live Stock Branch and Health of Animals Branch of the Department of Agriculture, Canada. Both Branches have co-operated in the preparation of the present report.

Live Stock.—Data are included showing the number and farm values of live stock in Canada in comparison with other branches of agriculture, more particularly field crops. The marketing of live stock is then traced through receipts and shipments at live stock yards, tables being included showing the origin of such receipts. The interprovincial and market shipments of live stock and slaughterings at Canadian inspected establishments are also shown.

Meats and Dairy Products.—The production of meats and dairy products is next taken up from figures compiled through the Census of Manufactures. The operations of creameries and cheese factories are covered as well as those of packing houses and abattoirs. Summary statements are included showing stocks on hand in cold storage and process of cure during 1920, together with tables showing the visible supply of hides and skins during 1920. The interprovincial movement of meats is next traced. The latter figures are compiled from bills of lading filed in the office of the Veterinary Inspector General under the Meat Inspection Act.

International Trade.—The international trade in live Stock and animal products is also shown. Tables are included showing the exports and imports of Canada by both quantities and values. Data are included showing Canada's position in the live stock industry in comparison with other countries.

Prices.—Comprehensive tables showing wholesale and retail prices of live stock and animal products in Canada during 1920 are presented together with comparative data showing live stock prices at Chicago, U.S.A., during 1920.

The report as a whole has been prepared in the Internal Trade Branch of the Dominion Bureau of Statistics under the direction of F. J. Horning, Chief of the Branch.

STATISTIQUE DU BÉTAIL ET DES PRODUITS ANIMAUX, 1920.

PRÉFACE

Le présent rapport sur le bétail et les industries qui s'y rapportent, pour l'année 1920, est le second de sa série, le précédent rapport couvrant la période écoulée entre 1909 et 1919.

Le but de ce rapport est de réunir et de grouper les plus importantes des données statistiques, concernant le bétail et les produits animaux, en un volume devant servir de manuel et de guide au commerce.

Ce rapport est établi sur le plan du premier bulletin. Les matériaux qui ont servi à son élaboration ont été puisés à différentes sources. Outre les données compilées au Bureau Fédéral de la Statistique, on s'est servi pour la confection des tableaux, des informations recueillies par les sections du Bétail et de l'Hygiène Animale, du Ministère Fédéral de l'Agriculture. L'une et l'autre de ces sections ont coopéré à la préparation du présent rapport.

Bétail.—L'importance du cheptel canadien est comparée à celle des autres branches de l'agriculture, spécialement les récoltes. Les arrivages et les expéditions du bétail, dans les parcs à bestiaux et les abattoirs, sont relatés dans des tableaux qui indiquent également l'origine de ces arrivages. On y voit aussi l'importance du marché interprovincial et des opérations d'abattage dans les établissements canadiens soumis à l'inspection gouvernementale.

Viandes et produits laitiers.—Pour établir la production des viandes et des produits laitiers, on s'est servi des chiffres fournis par le recensement des manufactures, qui nous renseignent exactement sur les opérations des beurreries et fromageries, des abattoirs et des fabriques de conserves de viande. Plus loin on trouvera des états sommaires, donnant le volume des produits alimentaires se trouvant dans les entrepôts frigorifiques ou bien en cours de préparation pendant l'année 1920, ainsi que des tableaux relatifs aux stocks visibles de peaux, pendant la même année. Plus loin, nous abordons le mouvement interprovincial des viandes, en nous servant des lettres de voitures déposées au bureau de l'Inspecteur Général Vétérinaire, en vertu des dispositions de la Loi sur l'Inspection de la Viande.

Commerce international.—Nous n'avons pas négligé non plus le mouvement international du bétail et des produits animaux, indiquant, au moyen de tableaux, les exportations et les importations du Canada, tant au point de vue de leur volume que de leur valeur. Ces tableaux sont suivis de données montrant la position qu'occupe le Canada dans l'industrie du bétail, comparativement aux autres pays.

Prix.—La mercuriale, en gros et en détail, du bétail et des produits animaux au Canada en 1920, est l'objet de tableaux très détaillés, qui permettent la comparaison de ces prix avec les cours de Chicago, E.U.A., pendant l'année 1920.

Ce rapport a été préparé sous la direction de M. F. J. HORNING, chef de la Section du Commerce Intérieur du Bureau Fédéral de la Statistique, qui en a colligé les éléments.

*Revised figures—Chiffres révisés.

NOTE: Calgary and Edmonton are situated in districts 19 and 35 respectively. Cattle and other animals, brought into the stock yards, may be kept in pasture pending favourable market conditions. When these animals are marketed they are shown as originating in these districts although they have been shipped originally from outside points.

NOTA: Calgary et Edmonton appartiennent respectivement aux districts 19 et 35. Les animaux destinés aux parcs à bestiaux de ces villes sont parfois mis au pâturage, en attendant l'occasion propice à leur vente. Lorsqu'on les envoie au marché, ils sont portés comme provenant de l'un ou l'autre de ces districts quoique, en réalité, ils viennent d'ailleurs.

NOTE: District 37 was divided into eleven districts (37 to 47 inclusive) in 1920. There are therefore no comparative statements for 1919 for Districts 38 to 47.

NOTA: En 1920, le district 37 a été divisé en 11 districts (37 à 47 inclusivement). Par conséquent, il n'y a aucun relevé comparatif des districts 38 à 47 pour 1919.

(a) Figures incomplete.

*Canadian Exports and Imports of Live Animals—Average 1912-14.

Population figures used in estimating total present consumption are from World Almanac, 1920, except in case of Canada. Canadian figures are from Canada Year Book, 1919. Per Capita Consumption figures are from Bulletin 190 published by United States Dept. of Agriculture.

Numbers of Animals on Farms are taken from Annuaire and monthly bulletins of International Institute of Agriculture, except Canadian figures, which are from monthly Bulletin of Agricultural Statistics of Canada, October, 1920.

Pre-War Foreign Trade Figures are from original trade records of countries in question.

(a) Chiffres incomplets.

*Exportations et importations canadiennes d'animaux sur pied—moyenne 1912-1914.

Pour estimer la consommation actuelle on s'est servi des chiffres de la population indiqués par l'Almanach Universel de 1920, sauf pour le Canada. La population du Canada est celle qui figure dans l'Annuaire du Canada de 1919. Les chiffres de la consommation par tête sont puisés dans le Bulletin 109, du ministère de l'Agriculture des Etats-Unis.

Les chiffres concernant le cheptel sont tirés de l'Annuaire et du Bulletin mensuel de l'Institut International d'Agriculture. Pour le Canada, les chiffres ont été puisés dans le Bulletin mensuel, de la Statistique Agricole d'octobre 1920.

Les chiffres du commerce extérieur d'avant-guerre sont ceux des rapports officiels des pays énumérés.

†The classification of "Meats, Canned and Preserved" in British and Canadian records is not identical. British Imports include "Unenumerated Salted" and "Other Sorts" preserved otherwise than by salting, including tinned and canned. Canadian import figures include: 1. Canned Meats and Canned Poultry and Game. 2. Dried or Smoked Meats and Meats preserved in any other way than salted or pickled, n.o.p. 3. Other Meats, salted, n.o.p. Canadian Exports are given under the simple heading, "Canned Meats, n.o.p."

†Includes poultry and game, but does not include lard.

†La classification des viandes en boîte et viandes de conserve n'est pas la même dans le Royaume-Uni et au Canada. Dans les importations du Royaume-Uni on trouve: "non énumérées, salées" et "autres sortes (conservées autrement que par la salaison, y compris celles en boîte)". Les importations canadiennes comportent les divisions suivantes: 1. Viandes, volaille et gibier, en boîte. 2. Viandes séchées ou fumées et viandes conservées autres que celles saumurées ou marinées, n.a.e. 3. Autres viandes salées, n.a.e. Quant aux exportations, elles sont groupées sous un seul article: "Viandes de conserve, n.a.e."

†Comprend la volaille et le gibier, mais non le saindoux.
