STALLIONS IN USE.

No. 1.

TENNESSEE WILKES, No. 2735. Trial 2.25. Bay, 15 $\frac{3}{4}$ hands high; weight, 1,200; foaled 1880. By GEORGE WILKES, No. 519, record 2.22, sire of sixty-one horses in the 2.30 list, ten of them with records below 2.20.

First dam LIZZIE HAYDEN (full sister to LUCY FLEMING, 2.24), by PEAVINE, No. 513, sire of two horses in 2.30 list.

Second dam THE PARISH MARE (dam of Lucy Fleming, 2.24; Odd Fellow, 2.31; the Karr filly, two-year-old record 2.46; Lizzie Hayden, trial 2.37, and Bud Crookes, pacing trial 2.22 $\frac{1}{2}$), by Brinker's Drennon.

Third dam Lucy, a fast pacer, by Million's Copperbottom.

At the close of 1886 George Wilkes had forty-eight trotters and four pacers in the 2.30 list, of which ten had records below 2.20. He is credited with nine new ones in 1887, placing him well at the head of all stallions. At the close of 1886 his sons had sired nineteen 2.30 trotters. Twenty-nine others are placed to their credit in 1887, including Sable Wilkes 2.18—best three-year-old record—and Hourí, 2.19 $\frac{1}{2}$ at three years.

The dam of Tennessee Wilkes, LIZZIE HAYDEN, has a trial over a half-mile track in 2.37 with less than two months handling. She was sired by PEAVINE (sire of two horses in 2.30 list), by RATTLER, son of Stockbridge Chief and sire of two horses in 2.30 list, and of the dam of Keene Jim, 2.19 $\frac{1}{4}$. The dam of Peavine was by Gough's Wagner,

thoroughbred son of Wagner and sire of the dam of Fanny Wither-
 spoon, record 2.16 $\frac{1}{4}$, and best two-mile record, 4.43 $\frac{1}{2}$.
 Stockbridge Chief (sire of the dam of Gloster, 2.17) by Vermont Black
 Hawk (sire of Ethan Allen), dam by Sir Charles (thoroughbred), son
 of Duroc.
 Brinker's Drennon is a noted Kentucky sire of handsome harness and
 saddle horses.

Tennessee Wilkes was jogged regularly through the season of
 1887, and at its close was put in training. About the middle of
 August Mr. Bostick drove him a mile in 2.25, over my three-
 quarter-mile track, going to the half at his ease in 1.15 and coming
 home in 1.10. Three or four days later pinkeye attacked every
 horse in my stable except Brown Hal and McEwen, and training
 was virtually suspended. He will be kept out of the stud this
 season and driven for a record.

Before pinkeye appeared in the stable his youngsters had
 shown some good work. Optimist, three years old, had gone a
 mile in 2.39, quarters in 39 seconds; Watauga, two years, quarters
 in 40 seconds; and Reata, two years (pacing), a quarter in 39 sec-
 onds. All will be handled next season.

PACING HORSES.

In this catalogue all animals by trotting-bred sires are classed as trotters, and those by pacing-bred sires as pacers, the blood of the dams and the natural gait being, for the time, ignored. Some arbitrary line of division was necessary and this seemed the most simple, although the result is not always satisfactory. For instance, the filly, Reata, by Tennessee Wilkes, out of Lizzie Moore, is found among the trotters; but she is a pacer, her dam a pacer and pacing-bred, and the second and third dams of Tennessee Wilkes are pacing-bred, so that Reata has more pacing than trotting blood. Laurel, by Brown Hal, is among the pacers, though her first, second, and third dams are by standard trotters.

But pacing blood has done so much for the trotter, and so many trotting-bred horses are natural pacers, that no sharp line of division can fairly be drawn. It may not be uninteresting to examine these two points very briefly and imperfectly.

Blue Bull, a pacing stallion, is second only to George Wilkes as a sire of trotters, having to his credit fifty-six 2.30 trotters and pacers, five of them with records below 2.20. Smuggler, a pacing stallion, held, for eight years, the best trotting stallion record, viz: 2.15 $\frac{1}{4}$. Bonesetter, a pacing-bred stallion, still heads all trotting stallions in number of heats (88) trotted below 2.30. Again, there are but four stallions up to this date with records below 2.20 that have sons or daughters also with records below 2.20. Bonesetter, 2.19, is one of these, his daughter, Flash, having a record of 2.19 $\frac{1}{2}$.

No trotter has yet been able to equal the three consecutive heats of Little Brown Jug in 2.11 $\frac{3}{4}$, 2.11 $\frac{3}{4}$, 2.12 $\frac{1}{2}$ —nor to go three heats so near the top of his speed, and in so nearly the same time.

A hasty examination of the 2.30 list, as it stood at the end of 1885, shows that twenty pacing-bred sires have contributed to it one hundred and six 2.30 trotters, ten of them with records of 2.20 or better.

In Wallace's short list of "great brood mares," no less than twenty-three are pacing-bred, and five others are out of pacing-bred dams. Of these twenty-eight mares five have produced three or more 2.30 trotters.

During the past year the pacers have advanced so rapidly in popular favor that it seems useless to make any extended argument on their behalf. Their merits as road-horses are pretty generally recognized, and the demand for them for this purpose is in excess of the supply.

But it may not be out of place to speak of the opportunities and performances of the pacing-bred horses of Tennessee. Ten years ago there was hardly a training-stable for trotters and pacers in Tennessee, and to-day there are very few. Yet in that time the State has sent out Little Brown Jug, 2.11 $\frac{3}{4}$; Mattie Hunter, 2.12 $\frac{3}{4}$; Brown Hal, 2.13; Argyle, 2.14; Joe Braden, 2.15 $\frac{3}{4}$; Duplex, 2.17 $\frac{1}{4}$; Joe Bowers, 2.18; Sam Jones, 2.18 $\frac{3}{4}$; Warrior, 2.22 $\frac{1}{4}$; Cora Mack, 2.22 $\frac{3}{4}$; Thunder, 2.23 $\frac{1}{4}$; Nettle Kernan, 2.26 $\frac{1}{2}$; Bay Tom, 2.23; Rattler Brooks, 2.23 $\frac{1}{4}$; Henry Drane, 2.23 $\frac{1}{4}$; Rebellion, 2.25; Black Frank, 2.27; Mattie Bond, 2.27 $\frac{1}{4}$; George Gordon, 2.27 $\frac{1}{2}$; Sleepy Lize, 2.29; Mattie Harris, 2.29 $\frac{1}{2}$. Moreover, the following Tennessee-bred trotters are of pacing blood: Bonesetter, 2.19; Flash, 2.19 $\frac{1}{2}$; Molsey, 2.21 $\frac{3}{4}$; Joe Rea, 2.23; Frank Reeves, 2.23 $\frac{1}{2}$; Rival, 2.29; Blue Jay, 2.29; Fred Neil, 2.29 $\frac{1}{2}$.

Third dam Old March, by Young Conqueror, son of Lafayette.

Fourth dam the Conrad Hicks Mare, of untraced blood.

Tom Hal was probably (for there is some doubt as to his paternity) by Kittrell's Tom Hal, a large bay pacer, bred in Bourbon County, Ky., by Simeon Kirtley and brought to Tennessee by Maj. M. B. Kittrell. As to his dam there is no question whatever. She was a roan mare named Julia Johnson, by Adams' Stump (pacer), son of the thoroughbred horse, Stump-the-Dealer, and he by Timoleon. Tom Hal sired Little Brown Jug, $2.11\frac{3}{4}$, Brown Hal, 2.13, and the dam of Blue Jay (trotter), 2.29. His son, Locomotive, sired Rebellion, $2.24\frac{1}{2}$.

John Netherland, by Taylor's Henry Hal, son of Kittrell's Tom Hal.

John Hal has no Tom Hal blood in him, being by a horse claimed to be thoroughbred, out of a pacing-bred mare.

Brown Hal is the joint property of M. C. Campbell and Campbell Brown. He was bred by R. H. Moore, the breeder of Little Brown Jug, and sold as a weanling to Ozro N. Fry, of Marshall County, Tenn., of whom we bought him in December, 1881. Brown Hal trotted a mile trial over my track (a little over three-quarters of a mile, and with one bad turn in it) in the latter part of May, 1885, in 2.21. In August, 1885, he was put to pacing, and in October paced a mile over the same track in $2.18\frac{1}{2}$, and repeated in $2.16\frac{1}{2}$. A week later I timed him a quarter in $31\frac{1}{4}$ seconds. In the summer of 1886 Brown Hal started in four races—at Pittsburgh, Detroit, Cleveland, and Rochester—winning all, pacing seventeen heats without a single break, and making a record of $2.17\frac{1}{2}$. Of the seventeen heats he won twelve, was second three times and third twice. The slowest heat won by him was paced in 2.19, the slowest that he lost was in $2.18\frac{3}{4}$. In 1887, after a full season in

the stud, he was started at Lexington, Ky., on August 31, to beat Maxie Cobb's record, for a cup. He succeeded at the first trial, making his present record of 2.13. Of this performance Wallace's Monthly for December speaks as follows:

BROWN HAL.—We have until now inadvertently omitted to refer to the great performance this season of Brown Hal, the brother of Little Brown Jug. As every one knows, this greatest of pacing stallions has beaten Maxie Cobb's trotting record of 2.13 $\frac{1}{4}$ by just one-quarter of a second. We think the three consecutive heats of his brother, Little Brown Jug, in 2.11 $\frac{3}{4}$, 2.11 $\frac{3}{4}$, 2.12 $\frac{1}{2}$, a better record than the single dash of Johnson in 2.06 $\frac{1}{4}$, and the two pacing sons of Gibson's Tom Hal are the pacing kings indeed.

BONNIE ANNIE. Half-sister to Mattie Hunter, 2.12 $\frac{3}{4}$. Chestnut mare, 15 $\frac{1}{2}$ hands high; foaled 1869. By Omega, son of Traveler (pacer).

First dam, the dam of Mattie Hunter, 2.12 $\frac{3}{4}$, by Driver, son of Vermont Morgan (sire of Golddust).

Second dam, a fast-pacing mustang mare.

Omega, the sire of Bonnie Annie, was a fine saddle horse, 15 $\frac{1}{2}$ hands high, by Traveler, grandsire of Joe Bowers Jr., pacing record 2.18, Geo. Gordon, pacing, 2.27 $\frac{1}{2}$, and Dick Hunter, trial 2.21. The dam of Omega was by Hark, a thoroughbred son of Imp. Consol.

The grandam of Bonnie Annie was a fast-pacing black mustang mare, brought from Texas by the late George P. Webster, Esq., of Maury County, Tenn., and sold by him to the late Rev. Isaac Milner. In 1862 Mr. Milner was stationed in North Alabama, and while there bred this black mare to Driver, a son of Vermont Morgan (sire of Golddust), owned by Mr. W. Malone, of Cherokee, Alabama. The produce was a chestnut mare, the dam of Mattie Hunter, 2.12 $\frac{3}{4}$, of Dick Hunter, trial 2.21, of Ned Hunter, trial 2.22, and of Bonnie Annie, trial 2.53. All these were bred by Mr. Milner.

Bonnie Annie was sold by George Milner, Esq. (son of Rev. I. Milner), to Hon. Henry Cooper, of whom I bought her when eleven years old. She had been used as a rockaway mare and driven in a trot. With thirty-six days' handling she paced a mile over a half-mile track in 2.53. This satisfied me of her speed, and she was put to breeding.

This mare was bred by Sky Boyd, of Marbert P. O., Giles County, Tennessee, who also bred her son, Joe Braden, and sold both animals to Joe Braden, of Pulaski, Tenn. Boyd is a small farmer, careless as to the pedigrees of his horses, and keeping no records. He knows positively that Lula Braden was by one of two stallions, half-brothers, the Frank Carter Traveler or the Brownlow Traveler (both sons of the old McMeens' Traveler, grand sire of Joe Bowers, 2.18), but cannot say by which one. Her dam was a mare of unknown breeding, a natural pacer. Lula is a natural pacer, with high withers, sloping shoulders, drooped rump, neat, bony head, and good mane and tail.

The extraordinary richness of this pedigree speaks for itself. The Clay blood has never been in such demand as at this time, and no Clay stallion can claim more fashionable or more desirable breeding than Brighton. He is by the sire of that greatest of brood mares, Green Mountain Maid, dam of Electioneer, and of six 2.30 horses; and his dam is by Volunteer, son of Hambletonian, and sire of St. Julien, 2.11 $\frac{1}{4}$, and of twenty-six 2.30 horses. His grandam is the speed-producing mare Martha, by Old Abdallah, sire of Hambletonian.

Brighton is the property of his breeder, Mr. E. G. Doolittle, of New York. We consider ourselves fortunate in being able to offer his services for 1888, at a very reasonable figure, to the breeders of Tennessee. He is handsome, stylish, strong-limbed, thoroughly sound, nice-tempered, and can show a good deal of speed, with a good way of going.

PONIES.

A part of the farm being hilly and well adapted to rearing ponies, I have established a herd of about sixty, headed by the imported Welsh stallion, Rajah, and the Shetland stallion, Dandy—the former $13\frac{1}{2}$ and the latter $9\frac{1}{4}$ hands high. The mares are Welsh, Shetland, and Creole, or Acadian. These are a native breed, formed in the Attakapas region in West Louisiana, and well known for docility, endurance, and activity. They are totally distinct from the ponies of Texas or Mexico, and are admirably suited for boys or girls from ten to fifteen years of age.

They have clean limbs, bony heads, neat crests, good sloping shoulders and strong backs, but are apt to be a little flat-ribbed and ragged-hipped. To remedy this, which seems their only defect, they are being crossed with the rounder Welsh and Shetland, with promise of excellent results. None of the crossbreeds are ready for the market, the oldest being two years old.

JERSEY CATTLE.

The Ewell Farm herd numbers about one hundred and fifty head, including many noted animals.

It is headed by Imp. Tormentor, 3533, only living son of Khedive, and sire of fifteen cows with tests ranging from 14 lbs. to 23 lbs. $2\frac{1}{2}$ oz. per week. The other bull in use is Ida's Stoke Pogis, whose full brother, Ida's Rioter, stands at \$1,000 in the herd of Messrs. Miller & Sibley. The herd contains over thirty tested cows, the dams of about thirty others, and the daughters of fifteen others.

Young stock always for sale.

SHEEP AND PIGS.

The flock of Southdowns numbers about one hundred. Berkshire pigs are bred for sale from animals imported by the owner from the noted herd of Heber Humfrey, Esq., Abingdon, England.

TERMS FOR KEEPING STOCK.
