STATISTICS OF COOPERATIVE EXTENSION WORK, 1921-22.

A permanent nation-wide system of agricultural extension work to be carried on by the State agricultural colleges in cooperation with the Department of Agriculture was provided for by Congress in the cooperative agricultural extension act of May 8, 1914. This extension work includes practical instruction and demonstrations in agriculture and home economics given to persons not attending or resident in colleges in the several communities and the imparting of information through field demonstrations, publications, and otherwise, the work to be carried on in such manner as may be mutually agreed upon by the Secretary of Agriculture and the State agricultural colleges.

In order to provide a comprehensive basis for the cooperative agricultural extension work in the several States a general memorandum of understanding between the department and the colleges was drawn up. This memorandum provides that each college shall organize and maintain a definite and distinct administrative division for the management and conduct of extension work in agriculture and home economics, in charge of a responsible director selected by the college and acceptable to the United States Department of Agriculture; shall administer through the extension division thus organized any and all funds received for such work from appropriations made by Congress or the State legislature, by allotment from the board of trustees of the college, or from any other source; and shall cooperate with the department in all extension work in agriculture and home economics which the department is authorized by Congress to conduct in the States.

The States Relations Service, through its Office of Extension Work, represents the Department of Agriculture in the administration and general supervision of all its cooperative extension work in agriculture and home economics. This involves relations with the State agricultural colleges and the different bureaus of the department. Before any work requiring the expenditure of the cooperative agricultural extension funds is undertaken in a State the act requires that the plans for work shall have the approval of the Secretary of Agriculture. The director of extension of the college is required to submit detailed projects covering each line of extension work, with proposed allotment of funds for each, for approval by the department. After

approval of the projects the State is certified by the department to the United States Treasurer as entitled to receive its funds.

The main lines of cooperative extension work are those conducted by county agricultural agents dealing with farm problems, by county home demonstration agents dealing with problems of the farm home, by county club agents working with boys and girls, and by extension specialists in various phases of agriculture and home economics located at the State agricultural colleges. There were engaged in these lines of work on July 1, 1921, 2,421 county agents, 959 home demonstration agents, and 327 club agents, together with specialists and others, totaling 3,707 extension workers in all. This work is administered by the State extension directors assisted by State leaders of county agricultural agent work, home demonstration work, and boys' and girls' club work.

The total amount allotted for cooperative extension work in the United States in 1921-22 was \$18,500,000, of which the Federal Government contributed \$5,580,000 under the provisions of the Smith-Lever Act. In addition Congress, by direct appropriation to the Department of Agriculture, made available \$1,050,000 for farmers' cooperative demonstration work and \$100,000 for extension work by the several bureaus of the department, cooperating with the States Relations Service, making a total from Federal sources of \$6,730,000. The remaining \$11,770,000 was derived from sources within the States, including \$4,880,000 appropriated by the State legislatures and funds under control of the State agricultural colleges, \$5,850,000 provided by the different counties, and \$1,040,000 from other sources, mostly local.

This circular summarizes statistics relating to sources, amounts, and project allotment of funds used and number and distribution of persons employed in the cooperative extension work in agriculture and home economics, compiled from the approved budget statements in which the State agricultural colleges have outlined their plan of work for 1921-22.

TABLE 1.—Maximum amounts of Federal funds which each State is eligible to receive under the cooperative extension act.
