LATE APPEARANCE OF THE SWALLOW.

To the Editors of the Annals of Natural History.

Croydon, 24th Nov. 1852.

GENTLEMEN,—I beg to bring to your notice an unusual visitation of Swallows, which occurred on the 22nd instant in this neighbourhood. About a dozen or more of these birds were observed flying in circuits of about 100 yards, keeping close to one building. It was about half-past eight o'clock in the morning when they were first perceived, and the weather was very dark and cloudy.

I have been induced to forward the above communication, as I find in White's 'Natural History of Selborne' that the latest notice of these birds being seen is about the middle of November, except in one instance, when two were perceived on the 23rd of that month.

I am, Gentlemen, your obedient servant,

G. BRYANT.

METEOROLOGICAL OBSERVATIONS FOR OCT. 1852.
